GaAs/AlGaAs heterojunction material for bipolar ICs, MBE growth 85−44723
GaAs/AlGaAs heterostruct., defect and impurity incorporation during MBE growth 88−63303
GaAs/AlGaAs heterostructs., MBE growth and transport props. 87−53266
GaAs/AlGaAs heterostructs. on Si substrate, MOCVD and MBE growth 87−320
GaAs/AlGaAs interfaces, MBE grown, O accumulation, SIMS profiling 87−52107
GaAs/AlGaAs, interfaces and layers, MBE growth, migration enhanced 88−38167
GaAs/AlGaAs interfaces, selective ion implantation MBE, C-V and photolum. characts. study 86−53436
GaAs/AlGaAs λ MQW lasers, λ index-guided MBE fabricated with dry-etched mirrors 85−56638
GaAs/AlGaAs laser diodes on monolithic GaAs/Si substrates, prep. and characterisation 87−46913
GaAs/AlGaAs lasers and modulation doped heterostructures, MBE growth 85−33466
GaAs/AlGaAs low-threshold patterned quantum well lasers grown by MBE 88−65678
GaAs/AlGaAs modulation doped heterostructs., growth and transport props. *(Chinese)* 86−63069
GaAs/AlGaAs multiple quantum well channeled-substrate lasers, MBE growth 85−2297
GaAs/AlGaAs pair-groove-substrate MQW laser with self-aligned stripe geometry 87−12462
GaAs/AlGaAs pair-grooved-substrate multiquantum well lasers, MBE growth 86−9825
GaAs/AlGaAs quantum wells, MBE growth and energy levels, photoluminescence meas. 87−280
GaAs/AlGaAs quantum wells, MBE growth, interface disorder studies 87−279
GaAs/AlGaAs quantum wells and double heterostruct. lasers, chemical beam epitaxy, photolum. 87−10393
GaAs/AlGaAs self-aligned structure lasers, selective area MBE regrowth, GaAs/AlAs superlattice buffer layer effects 86−15691
GaAs/AlGaAs single quantum wells, interrupted MBE growth and temperature-dependent optical spectra 87−24819
GaAs/AlGaAs structures, MBE growth, interface formation, RHEED intensity oscillations 88−31725
GaAs/AlGaAs superlattice heterostructures, MBE on nonplanar substrates 87−31498
GaAs/AlGaAs/GaAs MBE heterostructures, photosensitive C-V characteristics 86−35389
GaAs/Au interface form. by MBE, spectroscopic studies *(French)* 86−14947
GaAs/$Ca_{0.45}Sr_{0.55}F_2$/Ge (100) heterostructures, lattice matched, MBE grown, RBS and SIMS 88−39174
GaAs/$Ca_xSr_{1-x}F_2$ SOI structures, MBE growth, lattice mismatch and elec. props. 86−34310
GaAs/$Ca_xSr_{1-x}F_2$/GaAs SOI struct., MBE grown for MESFET fabrication, IC appl. 87−25592
GaAs/CaF_2 system, MBE growth processes, growth chamber transfers 87−31513
GaAs/CaF_2/GaAs, MBE growth, struct., photoluminescent and elec. props. 85−45483
GaAs/CaF_2/Si structures, MBE heteroepitaxial growth 86−34333
GaAs/$Ga_{0.47}In_{0.53}As$ lattice-mismatched Schottky barrier gates, misfit dislocations and reverse leakage currents 85−55513
GaAs/$Ga_{1-x}Al_xAs$ superlattice bipolar transistor, MBE, parameters, X-ray characts. 87−45891
GaAs/GaAlAs heterointerfaces, MBE grown, characterisation 86−47356
GaAs/GaAlAs heterojunction bipolar transistors, MBE grown, DC current gain, electron traps effects 86−53607
GaAs/GaAlAs n-p-n heterojunction bipolar transistor on Si, MBE growth 88−71518
GaAs/GaAlAs superlattice structs., metalorganic MBE growth 87−276
GaAs/$GaAs_{1-y}Sb_y$ strained-layer superlattices, MBE grown 86−8826
GaAs/Ge (100) interfaces, MBE grown, microscopic effects 85−34587
GaAs/Ge single-crystal structures on Si substrates, selective patterning by MBE 85−54465
GaAs/Ge/Ge Pnp phototransistor, MBE grown 86−36330
GaAs/InAs (100) multiple quantum well structs., MBE grown, TEM study 85−50231
GaAs/NiAl/GaAs heterostructures, epitaxial growth by MBE and solid phase resolutions 88−38139
GaAs/Si and GaAs/SOS photodetectors, ps response, MBE fabrication and characts. 86−48286
GaAs/Si wafers, warpage reduction by selective MBE growth through Si shadow mask 88−63291

molecular beam epitaxial growth continued
GaAs/SrF_2/GaAs, MBE growth, struct., photoluminescent and elec. props. 85−45483
GaAs/W/GaAs structures as metal gate transistors, MBE growth 86−47530
GaAs/n-$Al_{0.3}Ga_{0.7}As$ selectively doped heterostructs. MBE growth and carrier props. 88−56242
GaAs/n-AlGaAs inverted heterostructure, MBE grown, 2-D electron gas mobility 85−1359
GaAs/n-AlGaAs selectively doped heterostruct. grown by MBE, for HEMT IC appls. 85−40895
GaAs/n-AlGaAs selectively doped heterostruct., AlGaAs barrier at heterointerface 85−45440
n-GaAs/p-Ge heterojunction characts., As and Ge diffusion effects during MBE growth 86−53391
$(GaAs)_n/(InAs)_n$ superlattice semiconductor, MBE growth 86−20055
GaAs-(Al,Ga)As, p-type modulation-doped, MBE growth, appl. to p-channel FET 85−40726
GaAs-(Al,Ga)As superlattices, MBE growth and physical props. 86−26830
GaAs-Al Schottky barrier contacts, MBE grown, interface reactions, vacuum annealing effects 87−24915
n^+GaAs-Al Schottky-barrier diode, MBE grown, hot-carrier transport effect determ. 88−50792
GaAs-$Al_{0.3}Ga_{0.7}As$, modulation doped quantum well structs., MBE, anisotropic low field electron transport 87−37942
GaAs-$Al_{0.3}Ga_{0.7}As$ modulation doped quantum well structures, anisotropic electron transport 87−60145
GaAs-$Al_{0.4}Ga_{0.6}As$ MQW on Si grown by MBE 88−44584
GaAs-Al_2O_3, interface struct., dielectric film mol. beam epitaxial growth 87−17848
GaAs-$Al_xGa_{1-x}As$ device structures, MBE grown, δ-doping 88−56260
GaAs-$Al_xGa_{1-x}As$ modulation-doped heterostruct., MBE grown, D-X centre and electron traps study 86−53389
GaAs-$Al_xGa_{1-x}As$ multilayer structures 87−53250
GaAs-$Al_xGa_{1-x}As$ quantum wells, MBE growth with growth interruptions 86−34334
GaAs-$Al_xGa_{1-x}As$ quantum wells grown by interrupted, uninterrupted MBE, interface struct. atomistic models 87−36717
GaAs-$Al_xGa_{1-x}As$ single quantum wells, MBE growth and photoluminesc. 86−425
GaAs-$Al_xGa_{1-x}As$ superlattice APD, ionization coeff., performance characts. 86−63726
GaAs-$Al_xGa_{1-x}As(In_xGa_{1-x}As)$ lattice-mismatched heterojunctions, misfit strain relaxation, X-ray study 87−10367
GaAs-AlAs MBE superlattice growth using RHEED intensity oscillation *(Korean)* 88−44613
GaAs-AlAs, atomic layer molecular beam epitaxy 88−56261
GaAs-AlAs device structs., MBE prep. using In-free mounting techniques 87−264
GaAs-AlAs heterointerface fluctuation suppression by insertion of smoothing period by MBE *(Japanese)* 86−53407
GaAs-AlAs mono- and bi-layer superlattices, MBE growth 85−1361
GaAs-AlAs quantum wells, MBE growth, heterointerface fluctuations 85−60969
GaAs-AlAs quasiperiodic heterostructures, MBE growth, struct., electronic and vibr. props. 87−36715
GaAs-AlAs superlattice alloys, growth, elec. characts. 88−1373
GaAs-AlAs superlattices grown by MBE, struct. props., TEM and X-ray diffr. obs. 87−36716
GaAs-AlAs-based heterojunctions and superlattices, Be diffusion in MBE growth 88−390
GaAs-AlGaAs 2D-EG structs. with high carrier mobility, MBE growth 87−74070
GaAs-AlGaAs DFB struct. with multiquantum well for surface emitting laser 87−7368
GaAs-AlGaAs DH coupled-waveguide optical modulators and their HF modulation characts. *(Japanese)* 88−66275
GaAs-AlGaAs DH interferometric lasers, MBE growth on stepped-channelled substrates 86−15701
GaAs-AlGaAs GRIN-SCH lasers, low threshold, MBE growth, OEIC appls. 86−9706
GaAs-AlGaAs GRIN-SCH lasers, selective MBE growth on SiO_2-pattern substrate, optical and elec. characts. 88−45444
GaAs-AlGaAs GRIN-SCH lasers with superlattice buffer layer, MBE growth, optoelectronic IC appls. 85−35794
GaAs-AlGaAs GRIN-SCH lasers with superlattice buffer layer, MBE growth 85−44720
GaAs-AlGaAs HBT IC technology for high-performance sample and hold implementation 88−39675
GaAs-AlGaAs HEMTs, MBE grown, backgating effect reduction 87−53525
GaAs-AlGaAs, MBE materials for high-speed digital heterostructure devices 87−24870
GaAs-AlGaAs MODFET, MBE growth using GaAs-AlAs superlattice buffers 86−52471
GaAs-AlGaAs MODFET, p-channel, double heterojunction, MBE grown, struct., fabrication and characts. 87−25340
GaAs-AlGaAs MQW and GRINSCH lasers grown by MBE 85−41408
GaAs-AlGaAs MQW structures, MBE grown, material parameters meas. 87−24909
GaAs-AlGaAs MQW, third order nonlinearity as function of quantum well width 88−65868
GaAs-AlGaAs Pnp HBTs, MBE growth on Si (100) 88−50809
GaAs-AlGaAs, Rohm laser diodes, low noise, astigmatism, MBE production methods 88−2263
GaAs-AlGaAs SQW GRIN-SCH lasers, MBE grown on Si_3N_4 masked substrates, low threshold current 88−72313
GaAs-AlGaAs SQW structure grown by MBE, optical quality and surface morphology 85−39744
GaAs-AlGaAs, bistable multiquantum well lasers with 45° dry-etched mirror 88−20682
GaAs-AlGaAs channelled-substrate MQW laser grown by MBE 85−2342
GaAs-AlGaAs directional complex switch, design and fabrication using MBE and RIE 87−12246
GaAs-AlGaAs, distributed feedback transverse junction stripe laser, 867 nm, MBE grown 87−61139
GaAs-AlGaAs heterostructure, MBE growth *(Korean)* 88−6468
GaAs-AlGaAs heterostructure, selectively doped, MBE growth *(Chinese)* 85−33416

molecular beam epitaxial growth continued

ARABSAT ground stations, communications monitoring facilities *(Japanese)* 86−43784
arc fusion welding, US monitoring and control 85−60606
ARIANE launching facility, electrical test and control system 86−50692
assembly sequence monitoring using pulsed coherent sonar 88−61700
asynchronous electric motors, monitoring methods *(Dutch)* 86−19276
ATLAS tandem/linac, CAMAC-based intelligent subsystem, cryogenic monitoring and control 86−24870
atmospheric, pure gases certification for metrological support 86−44461
atmospheric corrosion monitor using resistance meas. technique 85−58824
atmospheric pollution monitoring, using Raman spectroscopy lidar, metrological support 86−44813
atmospheric refractive index meas., using dispersion meter and laser range finder 86−25415
attenuation monitoring using switched heterodyne radiometer, in circular waveguide network 86−44377
audio-controlled loudspeaker monitor 86−24206
AUSSAT, communications system monitor performance 86−30736
Australian Broadcasting Corp. Satellite Network Control System for remote and unmanned locations 87−56098
automated signal/load parameter meas. in mismatched transmission lines *(Russian)* 87−20859
automatic hierarchical system of metering, monitoring and controlling energy consumers *(Russian)* 86−61201
automatic metering and monitoring of energy flows in power systems *(Russian)* 86−12520
automatic monitoring systems using multimeters, interference suppression techniques *(Norwegian)* 87−33451
automatic time monitor for rate measurement 87−14562
automation, monitoring, control and telemetering systems *(Portuguese)* 86−65134
balance of plant performance monitoring using desk-top computer, BWR appl. 85−9615
balance-of-plant heat rate monitoring and diagnostics productivity improvement 87−9234
Barco CVS programmable colour picture monitor, review 87−70230
battery condition monitoring, conf., London, England (Dec. 1985) 86−26514
battery monitoring, recommendations revision *(Swedish)* 88−11348
battery voltage monitor, latching cct. 85−11474
bearing fault detection in hostile environment 87−22202
bearing lubricant debris monitor and sampler 87−22203
bearings diagnosis by acoustic emission analysis, steam turbines monitoring appl. 87−9050
Beloyarsk nuclear power station, monitoring reactor and steam generator thermal power 85−15740
biosensors for industrial monitoring and control 88−42498
bipolar battery supply monitor circuit 87−65805
bipolar power transistor current overload protection by base-emitter voltage monitoring 85−34945

monitoring continued
bit rate/bit error rate monitor for digital data communication equipment performance assessment 87−27781
BMW automobiles, self-diagnosis and control system 85−60508
boiler performance monitoring for operational optimisation 86−45188
boiler tube failure investigation and correction manual 85−49322
broken steel cables monitoring in moving elastomer belts, using passive coils 86−17933
building services industry, condition monitoring organisation 87−16334
caboose elimination using end of train monitor system 86−4549
calibrating electrical sorption hygrometers 88−16904
CAMAC power-supply controller-monitor for SLC DC magnets 85−43292
CANDU multi-unit stations, on-power containment integrity monitoring 86−32947
car lights, op-amps monitor lamp currents in automobiles 85−44283
card testing, voltage sequencing control cct. with test/bias voltage monitoring 85−54646
CCITT Recommendations G 821, digital transmission network centralised monitoring and supervising 86−30234
CCTV installations, electronic monitoring system *(Spanish)* 87−56392
cellular radio system monitoring 88−9455
central heating monitor with LED indication 85−11452
central network supervisory system, rack interface for control and alarm signal indication *(German)* 88−14944
centralised digital transmission network maintenance operations system 85−13761
chemical anal. sensors, development *(German)* 88−74329
chemical reacting materials, microwave processing and dielec. diagnosis in single-mode cavity applicator 88−29609
circuit breaker back-up system type PDE 2005 *(Russian)* 86−45599
clean room air monitoring challenges Users 85−22221
CMOS custom microprocessor, loss-of-clock monitor and on-chip RAM power multiplex switch 85−11282
coal mine monitoring and control systems, test criteria and eval. methodology 86−11401
coal power plants, monitoring diagnostics using fibre optic endoscope *(German)* 85−27263
coal-fired power station boilers, utilisation of flame monitoring device *(German)* 87−9358
coaxial cables, leakage monitoring and regulations 88−9377
coaxial line activity monitor for new display system 87−3423
coherent optical spectrum analyser, periodic spacing monitoring *(Russian)* 87−70502
colloquium on power system monitoring and fault recording, London, England (1983) 85−27961
color animation monitor for display of loudspeaker acoustic radiation *(Japanese)* 88−60806
colour characts. of cloth, industrial monitoring 86−55865
colour graphic display monitor with 20-inch CRT *(Japanese)* 85−14653
combinational circuits, self-checking, design using customised monitor cct. 87−66138
combustible gases monitoring, thermochemical gas analyser checking using safe mixtures 85−48138
combustion analysers, principles 85−26499
combustion/firing monitoring by photoradiometry and photothermography, application to power station monitoring *(German)* 85−38810
Commission of European Communities PV demonstration programme, performance and costs 88−17447
communication satellite power system using solar arrays and batteries, power conditioning 85−48419
COMPEX-compatible manual-control and display units 86−24442
complex system monitoring/fault diagnosis using communicating expert systems, US space station appl. 87−29871
composite fibre-optic ground wire communication systems for power transmission facilities appl. 85−58120
comprehensive monitoring of particulates in deionized water [wafer fabrication] 87−60252
compressor unavailability analyses for Pickering NGS A annulus gas systems, leak detection and monitoring 88−10997
concrete pylons, damage inspection and statistical eval. *(German)* 86−32800
condenser biofouling monitor and detector evaluation 85−53565
condition monitoring, conference, Brighton, England (May 1986) 87−16287
condition monitoring of electrical machines 87−42801
contact sensing points supervision device for alarm/sense lines fault detection 85−40203
contact welding, measurement channel normalising amplifiers in monitoring and controlling systems 87−9964
contactless sensors for vibration monitoring of steam turbines 86−56627
continuous vapour deposited conformed metal films, optical thickness monitor wafer 87−5449
control and alarm systems signal contacts and lines digital monitoring 85−110
control chart for processes with very high yields 87−44028
control module for high resolution colour CRT display monitors *(Japanese)* 85−14654
control quality, performance monitoring, overview 86−7542
cooling water systems with continuous corrosion rate monitoring 85−32343
coupled AC and DC transmission networks, performance of semiconductor rectifier monitoring and protection *(Russian)* 85−21246
CPL 40 process monitoring system, position meas. and control using potentiometers *(German)* 88−47673
CRT multiscan-type 14-inch display monitor, review *(Japanese)* 87−70430
CRT raster monitors, limits to resolution 85−58551
crystal growth from melt, IR crystal growth monitoring technique 85−10659
current monitor circuit 86−736
data communications, network management systems 87−76051
data communications watch dog cct., fail-safe 555 timer cct 85−45200
DBS TV systems, measuring equipment 85−3411
DC networks, device for determination earth faults location *(Russian)* 88−61992
deep freeze cabinet temperature monitoring circuit *(German)* 85−31615
diameter continuous monitoring, wires, filament and cables production testing appl. 85−48090
dielectric film monitoring by means of nematic liquid crystals 88−6566
diesel injector needle lift sensor, integrated Hall-effect type, closed-loop control appl. 86−47694
diesel-electric power generation, power system operation and performance monitoring 86−45217

monitoring continued
digital communication channel eval. 86−30447
digital control system requirements and configurations for power electronics 86−70987
digital facility networks, planning for centralised maintenance control 85−13759
digital instrumentation for power industry measurements and monitoring, control and data acquisition 85−26178
digital telecommunication networks, monitoring and analysis 88−52714
direct stepped wafer lithography, charactn. tools in inspection and process control 88−19871
distribution network electrical energy quality anal. and monitoring *(Russian)* 86−39117
distribution networks, 6-10 kV, reliability of relay protection, effect of built-in direct monitoring methods *(Russian)* 87−64198
distribution substation load effects on end-use air conditioner load control 85−59669
distribution substation monitoring for feeder design appls. 88−75870
drill bit temperature monitoring using IR thermal sensing during laminate drilling 87−53048
Dupline system, monitoring and control over two wires *(Dutch)* 86−56401
dye film, radiachromic, energetic H^+, B^+, N^+, P^+, As^+ ion fluence monitoring using ionisation 85−55665
E10B exchanges, installation and commissioning of operation and maintenance centre 86−69525
earth-leakage monitor, Siemens 7VC 1626-4AA, for medically used room 87−15387
effectiveness of monitoring system with arbitrary loss function of object 87−56463
electric discharge machining, remote monitoring of machining conditions *(Chinese)* 86−57061
electric drives, condition monitoring by axial flux sensing 86−45742
electric drives, fault diagnosis and identification *(German)* 87−36196
electric equipment insulation monitoring by partial discharges measurement 85−43056
electric generators, acoustic noise monitoring *(French)* 86−25970
electric generators, RF monitoring of neutral ground lead current 88−48898
electric load metering/monitoring/control instrumentation, microprocessor-based, new technology 85−21271
electric machines, air gap monitoring system 86−51577
electric machines, electromechanical monitoring systems, software based approach 86−33309
electric machines, monitoring rotating systems, revolution measurement *(German)* 85−38950
electric machines, stator core imperfection monitoring and detection system 86−45345
electric reduction furnace for ferrosilicon, heat resistant lining temp. monitoring, model 88−42312
electric tramway suspension wire, maintenance *(Japanese)* 86−66417
electric utility pollutant sampling and analysis, seminar and workshop, Los Angeles, CA, USA (Feb. 1983) 85−53198
electrical installations insulation, systematic gauging *(German)* 85−48028
electrical machine drives, faults and defects determ. by vibr. and stray field monitoring 85−65484
electrical machines, stray field and vibr. monitoring, instruments survey 85−65213
electrical services for modern office building communication, monitoring, security etc. 87−50760
electricity supply in Soviet Union, quality maintenance *(Russian)* 85−15501
electro-optical transducer for monitoring tool head position, modulation characts. *(Russian)* 85−47943
electrochemical/solid-state sensors for monitoring H_2S gas, props. 85−58673
electromechanical apparatus switching processes as source of mains supply transient overloading, evaluation monitoring *(German)* 86−33480
electronic charts for maritime navigation, present and future *(Japanese)* 88−16288
electronic liquid level regulation system with alarm/metering facilities *(Spanish)* 85−15084
electronic product manufacture and EMC test sites, statistical process control 88−58889
Electronic Visuals EV4050 waveform monitor for analogue component TV 87−70229
electronics in UK agriculture and horticulture 87−63213
electrostatic charge monitor using electro-optical effect *(Japanese)* 86−65171
electrostatics, safe handling areas, setting up and monitoring 88−18429
ELIN Weiz works, laboratory meas. and test technology *(German)* 86−34015
EMI measuring system with spectrum analyzermonitoring 87−3737
energy accounting and monitoring systems, data accumulation errors 86−6446
energy management and plant efficiency monitoring systems 86−45833
energy management systems for monitoring and control of energy usage 85−22176
energy monitoring and costs reduction in industry 87−42542
engineering monitoring concepts 85−60745
entry phones for security in multi-family and office buildings 85−57686
environment monitoring system for multiphase and porous media, modelling 87−35508
environmental monitoring using simultaneous prediction intervals to reduce overall false detection risk 88−16939
equatorial Pacific sea level monitoring with GEOSAT 88−10509
equipment, for large diesel engines, market potential 85−14757
error monitor for fibre optic links, bipolar IC 86−37917
error seconds meas. in digital transmission systems 85−48081
ESM 1 electronic monitor of power maximum *(Czech)* 86−51156
etch rate monitor using dual beam interferometer config. 87−17941
etching process monitoring by mass spectrometry 86−21410
European Communities' photovoltaic pilot plant acceptance testing and monitoring 86−45274
EUTELSAT satellite multiservice system, business communications ground station 88−3945
fault recording and monitoring equipment applied to generating plant 85−32360
fault/event decoder 85−11198
FBR heat recovery, steam generator monitoring using hydrogen measurements *(French)* 85−21359
monitoring continued
FBRs, monitoring system for failed fuel element detection and location *(French)* 85−21360
Fermi dipole magnet, acoustic emission monitoring 86−42178
FGD systems, multisystem corrosion monitoring 88−75441
fiber optic composite impact monitor 87−56681
fibre optic cables for power cable monitoring and heat system control appls. *(Danish)* 88−28313
fibre optic sensing using chromatic modulation, industrial appl. 88−29423
fibre optic sensors, design and use in meas. instruments *(Japanese)* 85−7259
fibre optic sensors, intensity-modulated type, design and charact., remote monitoring appls. *(Japanese)* 85−7259
fibre optic splice losses, continuous monitoring 88−26816
fibre optic systems, performance monitoring 86−55324
fighter aircraft electrical system built-in test monitor design 86−38870
film thickness monitor, voltage control oscillator principle 86−11716
five-pin insulation-monitoring transformer influence on insulated-neutral network phase resistances *(Russian)* 86−18782
flexible checking automation for automatic meas. facilities, transducer checking 86−11428
flue gas cleaning plant at GKM power station, PROCONTROL P control and monitoring system 85−32336
fossil fuel power plant monitoring and instrumentation, research and development requirements 85−4902
fossil fuel power plants, corrosion monitoring system for FGD equipment 88−75440
fossil fuel power plants, water heater leak detection *(Italian)* 86−56580
fossil-fuel fired boiler exposed tube temp. monitoring system 87−64423
fossil-fuel fired boiler monitoring and inspection developments 87−64422
fossil-fuel power plant condition evaluation and life extensibility assessment 86−61391
fossil-fuel power plant water chemistry instrumentation and control guidelines 87−64375
frequency meters, industrial, modular construction, features and performance capabilities *(Spanish)* 85−4032
FS-400M optical fibre submarine transmission system, supervisory system 86−30822
furnace atmospheres, monitoring for Cu thick film firing 87−60027
gas and oil production equipment availability reporting database and anal. package, develop. 86−52097
gas metal arc welding process monitoring using statistical process control 88−6264
gas turbine multisensor condition monitoring systems 87−22153
gas-insulated, on-site voltage testing using acoustic methods *(French)* 85−27461
gas-purification and purification-monitoring systems 88−33308
gearwheel tooth slack and initial contour displacement checking and sorting devices 85−20467
generator core condition monitor 87−57994
generator diagnostics and monitoring, vibration level meas. *(German)* 88−17509
generator fault detection, monitor using radiofrequency signals 85−60118
generator monitoring and surveillance, EPRI-sponsored workshop, overview 85−5059
generator protection by air-gap monitoring system 87−42763
generator rotor, in-service failure testing and monitoring 88−23839
generator-monitoring system *(Japanese)* 87−15649
generators, large, monitoring and diagnosis methods 86−70875
generators and large motors, monitoring 86−45343
GPS satellites, independent ground monitor coverage for civil aviation 87−41105
Grafcet based monitor, parallel transient management of finite element solvers 86−42709
groundwater contaminants monitoring using laser fluorescence and fibre optics techniques 87−63980
groundwater-based public drinking supply contamination probability prediction by logistic regression analysis 88−54769
Grundig MT700 monitor-tester for any line standard *(German)* 87−49514
hazardous gas safety and the role of monitoring in semiconductor industry 88−37915
heat trace control using PLCs 88−23559
heating system operation monitoring by performance line method 86−40305
helicopter fatigue monitoring using a single channelrecorder 86−18412
HF broadcasting service, international monitoring of jamming 88−67518
high error rate data channels, synchronisation monitoring algorithm 87−27130
high-risk security area monitoring, microwave detectors design *(German)* 85−42973
hodoscopic Cherenkov counters stabilisation and calibration 88−61153
home security, detector, control units, monitoring and alarm systems review 86−38320
hotel security, closed circuit TV systems 85−47706
HV polluted insulator surface discharge monitoring electromagnetic detector 85−32214
HV power system equipment, in service monitoring methods 85−32048
HV switchgear, diagnostic monitoring equipment and techniques 88−30956
hybrid IC manufacturing, QC inspection monitoring system 88−1251
hybrid magnet, water-cooled coil monitoring by field and resistance meas. 88−65072
hybrid package thick film hermeticity monitors 85−37607
hydraulic turbine vibration severity criterion using few meas. points 87−22163
hydraulic turbogenerators, vibration monitoring and control *(Russian)* 86−66019
hydroelectric generators, stator monitoring using rotor mounted scanner 87−72107
hydrogenerator, no load operation, governor parameter presetting *(Chinese)* 85−38889
IC contact openings, plasma etched, elec. end point detection technique 85−50679
IC defect anal. using laboratory plasma reactor *(French)* 87−1610
IC fabrication, electronic digital vernier for process evaluation 85−50675
IC multilevel interconnection process, test vehicle for monitoring 87−1700
image fibre, 250000 pixel capacity, development and fabrication, hazardous environments monitoring appl. 87−46547
immunosensors based on surface plasmon reson. 85−9149
implantable chronic pressure sensor 86−56129
Inconel 625 corrosion monitoring in power station heat extractor tubes 88−75447

monitoring continued
induction micromotors, automatic monitoring of mechanical losses 86−39772
induction motor fault detection method, unbalanced supply and interturn winding fault monitoring *(Hungarian)* 88−17587
induction motor protection during unbalanced system faults 86−39794
induction motors, stray field condition and vibr. monitoring, laboratory assessment 85−65261
induction motors, three phase, vibration and current monitoring for air-gap eccentricity detection 86−33405
induction motors, three-phase, vibration and current monitoring for airgap eccentricity detection 86−45415
industrial electronic equipment interference monitoring devices *(German)* 87−15390
industrial gas turbines, condition monitoring for protection and cost effective maintenance 85−27318
industrial plant life monitoring and extension 85−22206
industrial plant vibration monitoring and analysis 87−77409
industrial plants, explosion protected, sensors appl. in safety technology *(German)* 86−7484
inflammable gas monitoring, develops. in standards and equipment 87−14609
Infranet data transmission system using public telephone network *(German)* 88−15221
ingestible pill for thermal monitoring system 88−74815
ink weight monitoring system for ribbon coating process 85−8972
insertion test signal with audio monitoring facilities 87−76996
instrumental cigarette smoke monitor for direct meas. of smoke particulate matter 85−15070
insulator leakage current monitor for pollution eval. 88−42888
insulator surface discharge, monitoring using electromagnetic detector 86−45003
integrated power system, planning, design and construction by TMPA 85−48511
integrated surveillance system design for high capacity fibre systems 86−55325
Intelsat satellite power subsystem using solar arrays and Ni-H_2 batteries, control 85−48420
iNTELSAT system monitoring station equipment 86−37820
interactive graphical information system for medium voltage network control of Lech Electricity Works *(German)* 86−12259
interprocessor communication monitoring in shared-memory multiprocessors 87−825
ion implantation, real-time monitoring using optical dosimetry 88−57451
ion implanter 85−6820
ion implanters, high-current, particle control using particle flux monitor 88−57452
IR eight-channel telemetry system for condition monitoring, low-power semicustom IC implementation 88−22479
isolation amplifier for signal monitoring used in student laboratories 88−25021
joint operation by group of moving objects, performance monitoring 88−63076
journal bearing condition monitoring by vibration and temp. analysis 87−22201
Kettering Group, amateur satellite observers 88−22019
KWU Series 86 monitoring and detection systems for nuclear plants 88−36939
LAN amplifier requirements and specifications 88−9104
LAN management functions *(French)* 88−35119
LAN monitoring concepts for management support 88−73659
laser interferometric process monitor for polymer thin film props. during device fabrication 87−17861
laser machining, process monitoring of high power CO_2 lasers 85−51339
laser second harmonic generation technique for process monitoring and inspection appls. 86−15819
laser workstation processes, in-process monitoring using acoustic signals 87−7475
LDD transistors, oxide sidewall spacer width monitoring using cross-bridge struct. 85−45702
level monitoring, survey reveals new trends and products 85−8876
level monitoring and control, developments and products 86−18180
level monitoring and control, market survey and selection advice 87−77295
light-pulse waveform monitoring by optical cct. with 500 ps temporal resolution *(Japanese)* 86−29221
line monitoring in a changing network environment 87−62493
line signal quality detector 85−7867
liquid crystal thermography for wall heat transfer and flow visualisation 87−21272
liquid-level monitor, electronic type using LM 1830 IC, corrosive fluid control appl. *(German)* 85−31629
loss reduction in power systems using single-pole autoreclosing and reactive compensation 86−39023
LWR power plant components, fatigue monitoring *(German)* 85−53446
M61 amplification monitoring system *(German)* 87−70747
m/e ratio monitoring in magnetically scanned mass spectrometer, using two Hall probes 87−63380
machine condition monitoring for planned maintenance 87−58632
machine fault diagnosis by vibration meas. 86−5275
machine insulation, reliability improvement, use of condition monitors and luminesc. spectroscopy anal. 85−1790
machine monitoring and reporting system for mobile coal mining machines 85−42919
machine tool flank wear measurement with resistance film cct on throw away tip 88−47670
machine vibration monitoring guidelines and applications *(German)* 88−11161
machine windings, quality and ageing monitoring, by partial discharge measurements through RF monitoring 85−53670
machinery condition monitoring using transducers *(Chinese)* 87−3556
mains borne interference, coping 88−2598
mains frequency monitor for circuits *(German)* 85−22647
mains monitoring equipment to prevent computer failures 88−10924
mains supply failure detector for microcomputers, cct. 86−52671
measuring station, for large boiler plant continuous emission monitoring *(German)* 85−32034
mechanical gear wheel pairs, QC, acoustic noise monitoring *(German)* 85−44532
metrological characteristics, errors in determ. 86−11395

monitoring continued
microbiological objects dielectric props. monitoring, use of microwave bridge *(Slovak)* 87−35171
microelectronic device US wire bonding, QC methods, in-process monitoring 86−26660
microelectronics wire bonding using laser beam technique, fibre optic config., MLC packaging appl. 88−57234
microprocessor reset cct. using voltage-supervisor IC 87−10646
microprocessor reset logic, voltage monitoring and watchdog using timer IC *(German)* 85−49960
microwave communication network for remote monitoring and control 87−76573
microwave digital radio as long-haul technology, DS1 facility performance 88−3832
microwave oven leakage monitoring instrument 85−4095
Middle Eastern power transformer condition monitoring 88−17695
mine monitoring systems, operational evaluation, using Mine Monitoring Test Facility 85−22202
mine roof instability detection by movement rate monitoring 88−68035
mining, control and monitoring via medium-frequency techniquesand existing mine conductors 86−4503
mining machines monitoring and maintenance changes in equipment and procedures 85−22197
mining pit and quarry distribution network insulation monitoring by selective current transducer *(Russian)* 86−57069
Mitsubishi Auto Clean water quality monitoring system 85−16530
mixed input queueing model, input control with discrete monitoring, anal. *(Japanese)* 85−28105
mobile satellite communication systems, error rate monitoring and correction study *(Japanese)* 87−3139
modular monitoring devices, specialised sets, for electric machine components meas. 85−43105
MOGRER, vehicle carrying CCD camera for pipe internal monitoring *(Japanese)* 87−14518
Mooka City Water Treatment Center, Shinko Electric supplied electrical, monitoring and control facilities *(Japanese)* 86−19688
MOS IC ion implant monitoring with thermal wave technology 86−28503
MOSFET, Pd gate, appl. to H_2 monitoring *(Chinese)* 85−1583
motor drives, stray field variation and vibr., survey of causes 85−65483
motor load detector, cct. 86−56699
multi-Faraday-cup-type beam profile monitoring systemfor a dual-beam irradiation facility 86−65324
multi-spindle pneumatic bolt tightener, torque monitoring circuit *(Russian)* 85−6461
multichannel acoustic emission equipment development for welded structure inspection 85−54543
multichannel measuring instruments, in situ metrological checks 88−29204
multifunctional recorder/analyser units, wide range of transducer appls. *(Italian)* 87−77168
multilayer PCBs, immersion wave soldering at IBM, water soluble flux, process monitoring 86−58148
multilevel monitoring system for a central research and development agency 85−33060
multiple thermistor thermometer for monitoring controlled-environment installation 86−18164
multisensor system for hazardous atmospheres monitoring 86−55661
multistage relay protection with automatic control, functional reliability, cct. *(Russian)* 85−4688
n^+ contact resistance monitor, design and struct. 87−1465
natural gas transmission pipeline inspection tool location technique 87−35526
NEC 20-inch ultra high resolution colour display monitor, review *(Japanese)* 86−65128
NEC model CT-MS2601 auto scan monitor, review *(Japanese)* 86−65127
NEC model PJ-1000XV and PJ-R1100XVS auto scan video projector models, review *(Japanese)* 87−34757
negative-sequence power-direction relay for HV overhead transmission lines 87−9206
network, disturbance analyser, Liebert model 3600A *(Italian)* 85−8761
non-contact height monitor using selective heating and IR radiation detection 86−31640
nondestructive ion-implant monitoring using laser Raman spectroscopy 88−32989
nuclear industry man-machine system performance, decision aids eval. 86−45090
nuclear material containment and surveillance systems development at JAERI 88−47353
nuclear plants, on-line diagnostic system for pump failure warnings 87−71822
nuclear power plant, acoustic monitoring of steam turbines 85−9602
nuclear power plant, primary coolant system monitoring, leak detection and fatigue 85−53447
nuclear power plant, software verification and validation programme 85−27260
nuclear power plant, utility machinery vibration monitoring guide 86−32960
nuclear power plant condition monitoring of cables, motors, solenoids, circuit breakers and transmitters 87−9252
nuclear power plants, acoustic monitoring of generators 85−9603
nuclear power plants, low-pressure casing turbines, vibrs. and noises 85−9606
nuclear power plants, on-line vibration monitoring of turbines, pumps and fans, recent research 85−9601
nuclear power plants instrumentation and surveillance systems, optical data transmission method 86−49700
nuclear power station bypass/inoperability status monitoring system, automatic, design 85−38719
nuclear power station Class-1E electrical equipment, in mild environment, surveillance and testing method for maintaining qualification 85−48688
nuclear power station component fatigue monitoring, inspection and maintenance *(German)* 88−75275
nuclear power station security systems, criteria for selection and appl. of equipment, IEEE standards 87−22052
nuclear power-stations, data acquisition for preventive maintenance program 85−59892
nuclear reactor surveillance using noise anal. technique *(French)* 86−25743
oil circuit-breaker maintenance using contact erosion monitor 85−65391
oil platforms, structural, geotechnical and wave measurements, and stability monitoring 85−48082
Omega navigation system, Marine Security Agency *(Japanese)* 87−76886

monitoring continued
on-line discharge monitoring of generators 88−69294
online nuclear plant machinery diagnostics, expert system for monitoring 85−15787
operational life testing, monitoring and prediction of early life reliability failure mechanisms 88−49506
optical cable splice closure addressable moisture sensor converted from pressure transducer 87−49118
optical etch-rate monitoring using IC active device areas, lateral interf. effects 86−9214
optical fibre diameter meas., optimal longit. periodicity 85−58879
optical fibre long haul technology, DS1 facility performance 88−4030
optical gas analysis in medicine *(German)* 86−11932
optical multiparameter monitoring facilities, engineering appls. 88−68025
oscillating quartz crystal thickness monitor, calibration method 86−31655
overhead distribution systems, monitoring and protection systems 85−64983
overhead line conductors, temperature monitoring at remote positions 85−59834
parallel DC blower motor operation, monitoring cct. using Hall effect devices 86−58005
passive surveillance techniques for nuclear plant control and power circuits, TMI-2 appl. 86−51207
PCB laminate drilling, thermal monitoring of drill bits, IR radiometry techniques 87−24570
PCB multilayer lamination process, in-situ method to monitor resin flow 87−17515
PCB production, microsectioning as process control tool 88−64090
PCM 480S line system, operation and maintenance, monitoring technique *(German)* 87−76509
PECVD process options and a thermally based monitoringtechnique 86−57488
permanent magnets combined with magnetic systems of electrical engineering products 86−36054
personal computer picture display, TV receiver vs. monitor *(German)* 87−49258
phased-array antennas, monitoring techniques 86−68923
phased-array antennas, techniques 86−22834
photoflash type lamps for alarm and monitoring systems *(German)* 87−9933
photoresist dissolution kinetics, photoproduct effects, quartz cryst. microbalance rate monitoring 86−1883
Picker 1200SX CT scanner, value of systematic performance monitoring 86−5900
pipeline instrumentation development reviews 87−34911
piston compressors, continuous supervision via capacitive measurement *(German)* 85−26453
planar transistor structures, relative thickness of collector monitoring, by ionisation method 85−48095
plasmochemical etching processes with finite selectivity, optical monitoring 88−64419
POISK telegraphic switching stations, operational and statistical monitoring equipment 86−23364
pollution monitoring equipment, components, materials and operating principles 87−15079
polyimide cure monitor, fluorescence detect. using photocell arrangement 85−3925
polyimide lightguides, humidity monitoring 88−42026
porous material drying control by supplementary microwave power *(French)* 88−62786
poultry processing plant refrigeration heat recovery system 87−5121
power consumption, monitoring and control measuring instrumentation *(Russian)* 86−39250
power distribution, protection and monitoring of HV equipment, circuit breakers using microprocessors *(Swedish)* 87−64741
power disturbance conditioning and monitoring 86−32821
power frequency deviation monitoring for power system control 85−21092
power line voltage disturbances 85−9465
power meters, class 0.5, verification set-up 85−9556
power MOSFETs with internal current monitoring, design and characts. *(German)* 87−11776
power overhead lines and associated equipment, monitoring of critical foreign deposits *(German)* 85−32195
power overhead lines construction, tools, methods and protective measures in use in Switzerland *(German)* 85−43634
power plant discharges, water-borne pollutant monitoring and treatment 86−32898
power plant explosion protection by airborne coal dust monitoring and suppression 86−61387
power plant feedwater heater reliability improvement using periodic testing and monitoring 85−15833
power plant heat rate improvement workshop, San Francisco, CA, USA (Oct. 1985) 87−22143
power plant incipient failure detection conference, Lake Buena Vista, FL, USA (Oct. 1984) 87−22144
power plant performance monitoring, engineering, accuracy and simulation 85−15832
power plant performance monitoring, workshop, Washington, DC, USA (Oct. 1984) 86−56521
power plant performance monitoring and system dispatch workshop, Washington, DC, USA (Nov. 1986) 87−78229
power plant safety using AS 220 EHF automisation system *(German)* 86−18907
power plants, continuous emission monitoring guidelines, United States 85−27142
power plants, planned maintenance, rational monitoring and modern technology for reliable operation *(German)* 85−27140
power plants, smart instrumentation 86−61305
power quality site surveys, disturbance monitoring, equipment 87−72267
power station actuator performance monitoring 88−75239
power station emission-monitoring instrumentation progress 86−38973
power station equipment availability improvement through plant monitoring *(German)* 86−33068
power station water chemistry, automatic operational monitoring 87−42677
power supplies to ATE, conditioning and monitoring for surges and noise 85−9471
power supply network control and monitoring, new approach *(German)* 85−38412
power supply supervisory cct., config. with shutdown warning signal 87−10667
power supply voltage supervisors in microcomputer applications 85−22640
power system control and monitoring, capability chart utilisation 87−4303
monitoring continued
power system disturbance monitoring, informational scheme 85−4580
power system earth resistance meas. and alarm reporting *(Japanese)* 86−32838
power system load or security monitoring, automatic tuning of performance indices 87−4267
power system loading, monitoring and security using performance indices, algorithm for tuning 86−50910
power system monitoring using high rate telemetry, voltage phase angle and stability 87−4266
power system protection using frequency synchronisation monitors with memories 85−4679
power system real-time monitoring, convergence behaviour of fast second-order method 87−42343
power system telemetry of voltage phase angle and other stability related quantities 86−50802
power systems, centralised online voltage control *(Chinese)* 85−15474
power systems, remote monitoring and control, appl. of electronics 85−15508
power systems load flow feasibility and voltage collapse problem 85−53282
power transformer oil-circulation pump premature failure prevention 88−37256
power transformers with special applications, axial coil insert monitoring *(German)* 85−39055
power transmission line insulators, pollution monitor using current transformer arrangement 86−39193
power transmission networks, insulating monitoring without using voltage transformers *(Russian)* 85−59653
power transmission systems, static distance relay equipment, RYL1S, built-in testing and monitoring 85−38578
power utility global control monitoring using Digital Scope Multimeter M 2050 *(German)* 85−43658
power-line monitoring system, low-voltage conditions for computer power supplies 88−42901
power-on reset monitors master clock 86−20668
predicted-value errors inherent in least-squares method *(Russian)* 85−14566
pressure monitoring chair, for adaptive seating design 87−14843
pressurized telecommunication cable network, remote monitoring 86−23641
product-specimen parameters monitoring, meas. errors-reliability relationship 87−65166
projection printing, lens aberrations, identification and monitoring 88−1593
PROM memory contents scanner *(Slovak)* 86−27306
protective metal films electron beam deposition, microwave device for active monitoring of thickness and rate of application of coatings 85−44345
protocol monitor system for data monitoring *(Japanese)* 88−9132
PTFE/glass PCBs for microwave circuitry, drilling, punching and routing 85−40343
public transport systems, rail motorcar driver dispatching *(German)* 88−9802
pulse amplitude monitoring device 86−14083
pulse counting cct. for biomedical 87−50206
pulse voltammetry in-situ technique for simultaneous monitoring of critical components in plating baths 87−29347
pulverised fuel flame monitoring 85−15850
pulverised-coal-fired boilers, coal flame monitors 86−19054
pump cavitation monitoring by single fluid-borne noise meas. 87−21812
PV pilot plant monitoring data for installation performance, usefulness and reliability 88−17444
QC constant monitoring processes and procedures 88−49572
qualitative definiteness in object establishment 88−29189
quality of an individual monitoring result evaluations 86−24252
quartz crystal thickness monitor using digital freq. counter *(Korean)* 88−42296
radiated emission test facilities, monitoring measuring repeatability 88−14430
radio frequency diagnostic monitoring of electricalmachines 86−45318
radio transmission modulation type, automatic recognition 88−3804
radio transmitters for plantwide monitoring and control 86−30314
radioactive release from nucl. power station, measurement system *(German)* 85−38353
radioelectronic-apparatus fabrication technology processes, monitoring arrangements 88−49495
radiotelemetry system development for long-term monitoring of lab. animals 86−50470
railway line displacement measurement, fibre optic sensor 87−14546
RAM bitline monitor, FET implementation 85−11252
random sequences, evaluating correlation function, thin cross method *(Russian)* 86−24255
rapid-scanning autocorrelator with extended scanning span for monitoring short optical pulses 88−10148
read/write head error monitor circuit 85−50835
real-time monitoring of power systems using fast second-order method 87−64066
rectifier monitoring, faults, causes and testing *(German)* 85−49721
Red CARE security alarm system, British Telecom 24-hour surveillance service 86−23342
relative frequency monitor for mains voltage *(German)* 86−27055
relay protection and power system automatic control diagnosis, instrument and program cost effectiveness eval. *(Russian)* 85−59807
relay protection devices, logic control and monitoring *(Russian)* 86−25650
relay protection system monitoring elements, remote controlled, gradient self-adjusting system *(Russian)* 87−64205
reliability, use of advanced monitoring instruments and improved materials for rotors and stators 85−38964
remote control of position using optical beam *(Russian)* 87−49587
remotely-controlled monitor operating characteristic deviation rel. to intermediate transformer dynamic props. *(Russian)* 86−56456
resistance meas., US legal unit monitoring via quantum Hall effect 88−16415
resonant wire differential pressure sensor, plant condition monitoring by noise spectrum analysis 88−60980
respirable dust monitoring, methods 85−38355
RF monitoring in turbine generator stators 86−61486
Rohde & Schwarz EZM spectrum monitor for radiomonitoring, field-strength and interference meas. 87−56582
Rohde & Schwarz SCUD and ESVP monitor tone-signalling transmissions for DTI in Great Britain 88−35357
rotating equipment monitoring, continuous vibration signal anal. 88−11187

monitoring continued
rotating machine vibration monitoring, basic concepts and practices 87−9455
rotors, noncontact technique for rotary direction meas. 85−8787
RS-232C communications monitoring circuit 85−61343
safety and diagnostic system design for microcomputer-based power station automation *(German)* 87−50993
safety monitoring system, mathematical anal. of human-machine interface 88−43665
satellite communications system monitor, performance 87−69999
satellite control and monitoring for mission experiments *(Japanese)* 86−37849
SATNET monitoring system 86−30732
security system with slow rate scan CCTV visual feedback 85−47729
self-contained digital period meter for string transducers for hydraulic structure monitoring 85−47866
semiconductor components, early-life failure rate analysis 86−46067
semiconductor industry, ion chromatography to monitor ionic concs. in pure water 86−53517
semiconductor laser diodes, mode hopping and optical feedback monitoring using elec. noise meas. 86−29138
semiconductor technology, dielec. process monitoring, appl. of contour maps and statistical control charts 88−13081
semiconductor wafer contamination hazards and monitoring principles 88−32978
semiconductor wafer etching end-point detector employing laserinterferometer and video display 86−28188
service monitor techniques 86−55577
Seto Inland Sea (Japan) benthic boundary layer water quality and O_2 consumption monitoring system 88−48355
sewage treatment plant, Shinko Electric supplied electrical, monitoring and control equipment *(Japanese)* 86−19689
sewage treatment plant at Makurazaki City, Shinko Electric supplied equipment *(Japanese)* 86−19690
sheet resistance low dose monitoring using the double implant technique 87−11621
shortwave broadcasting band spectrum occupancy and signal levels in the continental United States and Western Europe 88−67519
signal monitoring on current loops *(German)* 86−62431
signature analyzer for built-in monitoring ofVLSI circuits 86−57787
SIMAS EL signalling, monitoring and switching system using HV distrib. network, operation and features *(German)* 85−14083
Sinclair Spectrum-monitor interface, design 85−3696
slag monitoring techniques for utility boilers 88−75466
slide bearing lubricating rings, direct monitoring of operation *(Polish)* 87−20992
smoke detection, remote fault detection for motor control centres 88−15968
soil moisture content monitoring using microwave signals, feasibility study 85−20714
soil water, satellite system for monitoring temporal and spatial behaviour 87−57394
solar cell parameters monitoring cct. 85−31557
solar generator intelligent output controller for cathodic protection 86−45266
solder-joint inspection system 87−51842
soldering, IR thermography for real-time anal. *(French)* 87−34973
solid electrolyte analyzer for SO_2 stack emission monitoring 86−44466
space-based radar for the united nations' international satellite monitoring agency 85−42644
SPC switching stations, effect of monitoring on reliability 86−30504
sputter cleaning process monitoring subsystem 85−55707
squirrel cage induction machines, rotor condition monitor using direct temp. meas. 87−42966
squirrel cage induction motors, rotor cage fault detection techniques using vibration monitoring 88−17620
squirrel cage motor condition monitoring techniques 87−15776
squirrel cage motor rotor condition monitor using direct temp. meas. 87−51205
squirrel cage motors, fault meas. using terminal voltage and currents *(German)* 88−31065
stationary battery charging systems, load voltage limits and condition monitoring 86−33528
stator winding end-turn vibration monitoring using fibre optics 88−11180
STAZ SR-LAMBDA professional monitor headphones for radio *(German)* 86−17692
steam turbine automatic control systems review *(Chinese)* 86−65934
steam turbine start-up optimisation using TURBOTROL and TURBOMAX control systems 86−61355
steam turbine starting based on predictive monitoring and control of thermal stresses 85−48872
steam turbine-generators, transmission system induced torsional fatigue, monitoring 86−51580
steam-flood enhanced oil recovery process remote monitoring from seismic and EM data 88−30138
steel melts, continuous temp. meas. using thermovoltage *(German)* 87−70836
stepper-type, main mechanism electric drive control system dynamic monitoring *(Russian)* 85−10181
stepping feed drive, monitoring system for positioning *(Russian)* 87−30634
Stress Monitor cct., skin resistance meas. 85−15318
subassemblies for monitoring of output voltage of switching-mode power supplies *(German)* 88−30821
submicron VLSI ccts. manufacture, etching steps monitoring *(French)* 88−13160
SUMIOFCAS TYPE 34 direct core monitoring system, compact fusion splicer development 88−58152
superconducting magnet monitoring using acoustic resonance for local temp. rise detect. 88−65059
supervision methods for generators and transformers *(German)* 88−17499
supervision of transformers, instrument transformers, and coupling condensers *(German)* 88−17684
supervisory control, data acquisition and automatic control systems for power facilities, IEEE standard 87−64757
surveillance video recording, time lapse control system 88−60458
switchgear, metalclad, monitoring and insulation testing for failure prevention 86−19423
switchgear and plant component monitoring using thermographic inspection *(German)* 85−39125
switchgear in mining, remote monitoring and control unit 85−39128
monitoring continued
synchronous generator and compensator excitation circuits insulation monitoring *(Russian)* 86−45370
systems approach to vibration monitoring 87−50009
T1 circuits, in-service monitoring and out-of-service testing 86−69298
Teflon FEP foamed coaxial cable, continuous extrusion process monitoring 85−61497
Tektronix spectrum and waveform monitors for rapid broadcast link access 87−70227
Tele View, monitoring of remote switching stations *(Swedish)* 87−69821
telemetry errors, adaptive rejection *(Russian)* 87−40312
telephone data channel phase characteristics, fast measurement 87−69569
telephone line current monitoring cct. for call logging 86−59699
telephone line monitoring circuit 87−2957
telephone ringing tone monitor, cct. design with audible or visual indication 85−13988
telephone subscriber line transient monitoring system for lightning surges 88−8525
Temex remote meter reading system *(German)* 85−48632
temperature, using analogue pulse counter, sintering process control appls. *(Czech)* 86−24808
temperature monitoring and control equipment, market survey 85−15060
temperature profile recording of steel tube, electronic package with Chromel/Alumel thermocouples 86−5571
test instrument power monitor improvements 88−36817
tester output signal monitoring 85−47894
textile threads/fibres movement monitoring, design of electrokinetic sensors *(German)* 87−56611
thermal monitoring of quality of analog and digital circuits 85−49793
thermal power station turbines, monitoring of operating life *(Croatian)* 85−32339
thermal power stations, operation and plant monitoring criteria *(German)* 85−21425
thermosetting resin systems, dielectric props. meas. for cure process monitoring and control 86−65255
thin film rate monitor calibration technique 86−26882
three-electrode system for locating charged-particle beams 85−20808
Tokyo metropolitan railway substation control integration *(Japanese)* 86−56986
tool condition monitoring by acoustic emission method *(Russian)* 85−59522
torque meas. by shaft angle monitoring, remote measuring system with transducer *(Polish)* 85−31471
toxic gas flow during semicond. manufacturing processes, pressure monitoring system with alarm 86−57163
tracking array calibration underwater, remote monitoring 87−70146
tracking electrical drive, module for matching with source of test signals *(Russian)* 86−40204
traction motors overloading prevention by meas. armature temp. *(Czech)* 86−19568
traffic alarm sound monitor for aurally handicapped drivers 87−35431
traffic-alarm-sounds monitor for hearing-impaired drivers *(Japanese)* 86−32343
train detection and track monitoring systems in BRD, West Germany 87−51548
transformers, HV impulse testing using digital recording technique 86−19347
transformers, temperature-current devices for protection against faults and systematic overloads 87−9624
transformers with automatic load monitoring, load handling capability standards 85−5154
transmission facility maintenance by decision support system 85−13763
transmission lines, remote protection equipment 87−9187
trickle-charging of sealed lead-acid batteries, monitoring cct. 85−22637
trouble communication equipment for railway crossing *(Japanese)* 86−52001
turbine-generator system, retro-fitted with supervisory instrumentation 85−15895
turbine-generators, torsional vibration monitoring and data collection, EPRI project 86−33306
turbogenerator monitoring and surveillance, diagnostic techniques 86−70872
turbogenerator overheating, expt. anal. using ionisation chamber *(Russian)* 86−19200
turbogenerator radio-frequency diagnostic monitoring 88−48887
turbogenerator rotor earth fault monitoring and protection 86−33310
turbogenerator slipring and brushgear temp. monitoring using thermistors *(Russian)* 86−33259
TV and radio centre, remote control systems for monitor exchange *(Polish)* 85−3690
TV broadcasting stations monitoring, automated systems effectiveness 86−37986
TV centre, picture and sound signals switching network for monitor exchange *(Polish)* 85−3689
TV centre, signal distribution monitoring system, remote control 86−55441
TV images, test line monitoring to ensure technical quality *(German)* 85−37239
TV interface, between human operator and automatic process *(German)* 85−26094
TV monitor, meas. systems display indicator appl. *(Polish)* 85−42905
TWACS two-way power line communication technology for distribution network control 86−39125
unbalanced power systems, modelling for supervisory monitoring and control 85−15527
underground mines measuring, monitoring and control instruments, use of electronics 85−43092
underground power cable sheath corrosion protection and resistance monitoring *(German)* 88−54997
underground vehicles monitoring using TV system 87−20716
undervoltage relay for monitoring power station and substation DC operating supplies *(Russian)* 86−45025
underwater acoustic telemetry for aquaculture research and development 87−57115
underwater depth estimation, accuracy in multipath environment 87−8365
UPS system, single phase, fast acting detector for monitoring abnormal output voltages 87−64695
US alarm system using Doppler principle, RSG1 unauthorised entry monitoring device *(German)* 88−10636
variable depth sonar tow cable service life extension 88−47235
versatile monitoring and control instruments for viscosity meas. *(Spanish)* 86−31727

monitoring continued
vertical axis wind turbine and power train design 87−72066
VHF-UHF radio monitoring receiver family ESM500 extension 86−30902
VHF/UHF monitoring receiver, RG62A, wideband config., design and appls. *(Japanese)* 85−57931
video monitoring system with frame memory 86−8712
video signal detector for fault isolation 86−34681
video signal transmission along the Chur-Thusis autobahn *(German)* 85−8531
video surveillance system using optical fibres in Paris museum *(French)* 87−62971
VLSI chip fabrication, monitoring of ultrafine aerosol particles in semiconductor cleanrooms 86−21653
VLSI Clean room design, aerosol particle monitoring 87−36465
VLSI contact plasma etching, elec. endpoint detection 85−18412
VLSI devices, contact misalignment monitor/gauge 86−28383
VLSI wafer processing, surface particle detector for workstation air quality monitoring 88−57746
Voitsberg 3 thermal power station, 6 kV auxiliaries protection, warning systems *(German)* 85−9544
Voitsberg 3 thermal power station, auxiliary electrical machines and buses *(German)* 85−9721
Volkingen power plant, automatic control system, equipment and design *(German)* 85−4871
voltage monitoring using optocouplers *(German)* 87−70734
wafer processing, 200 mm, prod. monitoring, sheet resist. mapping 88−7443
warehouse automation, pulse bridge appl. in monitoring equipment *(Russian)* 85−39371
wastewater treatment at Simi Valley, CA, Cl anal. 88−60943
watchdog circuits for 5 V power rail 88−6643
watchdog timer plus operating voltage monitoring *(German)* 88−32359
water pollution, dissolved sulphides meas. in groundwater via portable monitor based on glass/sulphide-selective electrode couple 85−32036
water pollution monitoring by turbidity meas. 87−15080
water supply, pump efficiency monitoring based on water temp. change 88−47722
wave soldering attributes data monitoring by variables control charts 87−10209
wear debris monitoring, Filtergram and analytical ferrogram techniques compared 87−16768
West German Post Office radio monitoring service, role in freq. planning and assignment *(German)* 87−13813
XL-1 automatic international telephone service observation equipment *(Japanese)* 85−36794
XLPE and polyethylene insulation, constant visualisation of water trees using scanning *(German)* 87−50837
Yumoto Waste Water Treatment Center in Nasu Town, Shinko Electric supplied equipment *(Japanese)* 86−19691
Z80 PIO control/monitor signals by interrupts 85−17575
ZENPA central network supervisory system for Swiss PTT digital data network *(German)* 88−14945
Zurich-Letten traffic control centre, using decentralised process computer system 85−25234
Al line-cutting end monitor using scanning ion microscope voltage-contrast images 85−34873
CO_2 laser spectrum monitoring and displaying instrument 87−2226
Cl_2 gas warning instrument for continuous monitoring of air *(German)* 86−12191
Cr thin film deposition temp. monitor, annealability 85−15062
Cu/Ni coating for EMI shield, qualification using resistance-testing method 86−26938
GaAS MMICs, CAD, modelling and process monitoring 87−73695
GaAs error detection IC, high-speed type for fibre optic transmission systems 88−73920
GaAs laser array, Si photodiode array for monitoring individual lasers 85−41269
He, liquid, level monitor, low power, for continuous operation 87−63350
Ni electroless deposition, real-time rate monitor evaluation 88−10130
Ni-H_2 cells, lightweight, direct radiating, for space appls. 87−22707
Pb/Sn thickness monitor 85−58876
Pb-Sn alloys in IC soldering process, visual method for monitoring surface comp. 86−40561
Pb-acid batteries, advanced, for electric vehicles, performance testing 86−66277
Pb-acid batteries, charging and state of charge indication 88−5825
Pb-acid battery design, electrolyte specific gravity, and monitoring 86−33638
Pb-acid sealed batteries, monitoring techniques 86−19467
SF_6 arc, EHV circuit breaker, radiation monitoring using optical fibre transmission 88−49085
SO_2 monitoring programme for Plomin thermal power station area *(Croatian)* 85−65140
SnO_2-based gas sensors, fabrication, CO and methane sensitivity 85−52747
WSi_2 deposited layers, clean method for contamination monitoring during production 87−6612
ZnO gapless surge arresters monitoring systems 86−6439

monitoring, computerised *see computerised monitoring*

bipolar-MOS ring oscillators, voltage-controlled 87−73357
bipolar/I^2L/CMOS on-chip technology using three-level epitaxial layers for analogue/digital VLSI 87−67336
BIST, test control signal distribution in self-testing VLSI circuits 87−38447
bit-serial floating-point complex multiplier-accumulator for fault-tolerant digital signal processing arrays 87−59562
block code encoder-decoder IC *(French)* 85−54937
book on techniques and capabilities 86−33974
broadband MMICs, review 87−37571
broadcast receiver with one sideband selection 85−8559
brushless DC motor driver IC 87−43088
brushless DC motors, drive system, for video tape recorders *(Japanese)* 88−24198
brushless DC motors, drivers and speed controllers using monolithic ICs 88−30740
burn-in reliability testing 86−28397
Burr Brown OPA 541 monolithic operational amplifier *(German)* 88−12228
C70250−a new copper alloy for electronic packaging 87−52211
C-2C ladder-based D/A converters for PCM codecs, design and monolithic implementation 88−19225
CA1523 control IC for SMPS with PFM/PWM variable-pulse modulator improves power-supply regulation 87−65802
CA5470 BIMOS general-purpose quad op amp targets low-voltage CMOS designs 88−12224
CAD *(German)* 85−6115
CAD, CAE workstations review 85−18403
CAD, global geometrical checking of IC layout 86−2242
CAD, hierarchical system for layout design and checking 86−2245
CAD, IC layout, elec. connections checking, implementation 86−2243
CAD, local checking of design rules for IClayouts described hierarchically 86−2244
CAD, manufacturing appls. *(German)* 85−29269
CAD module generation speeds IC design, extends ASIC library 88−7641
CAD software, high level of integration, open interface 87−46155
CAD system for microelectronics products 88−24883
CAD/CAM microwave modeling with six-port automatic network analyzers for microwave ICs 85−6529
CAE, PC-based ASIC design: a user's perspective 88−13541
CAE tools for top-down design of complex ICs 88−39544
car radio single-chip audio preamplifier *(German)* 87−37020
CB transceiver using TBA 570 A IC *(Spanish)* 88−46929
CCD cameras, signal processing ICs development *(Japanese)* 85−42746
CCT (Computer Controlled Teletext) for receiving telesoftware 85−13852
CD player ICs, M51008P sample and hold cct., M51759P motor-control LSI *(Japanese)* 86−38138
CD players, 3 chip set including advanced preamplifier with built in photodetector 87−14018
cell libraries, systems designers aid 88−1697
cell libraries for MMIC 87−998
cellular radio, RF ICs for portable communications equipment 86−4498
CERACLAD, Cu metallisation of ceramic leadless chip carriers 87−51870
channel routing based layout method 88−49971
characterisation techniques 85−45833
CHARCO IC transient anal. program 86−67135
chemical sensor developments *(Hungarian)* 88−35920
chip carrier enhancements for improving electricalperformance 86−13495
chip die bond materials and interfaces, AES/ESCA/SEM/EDX studies 85−7042
chip optical power system, photovoltaic surface 86−9198
chip power in information society in Australia 85−10305
chip transfer head with programmable probe centerlines 86−58521
chip-redundant wiring technique, auto-wiring programs 85−61971
chips, state of art survey *(German)* 85−50619
chips for tomorrow's communications *(German)* 88−33287
chips mounting directly on organic PCB 85−16792
Chipsmith packages for process-independent ASIC design 87−46156
Chipsmith software package, cAD tools eliminate design compromises 85−50616
circuit simulation helps you design radiation-hard circuits 88−71636
circulators for microwave and MM-wave ICs, requirements 88−32447
Citizen Electronics chip LEDs lower manufacturing costs of equipment 87−18860
CK 4000 Multi Mors, Morse course from single IC, test report *(German)* 87−48483
CLASS: a chip layout assistant 86−28429
clock/calendar chips add system features, hybrid versions vie for memory sockets 86−57901
CM 302 IC in measuring and regulation systems *(Bulgarian)* 85−6993

monolithic integrated circuits continued
CMI encoder and decoder, monolithic integrated devices for gigabit optical links, design and performance 86−23854
CMOS compatible, self-biased bipolar transistor aimed at detecting maximum temperature in a silicon integrated circuit 88−64514
CMOS-compatible bandgap references, family 86−7997
CMOS/bipolar circuits for 60-MHz digital processing 87−5742
code-controlled current divider IC accuracy improvement 88−18894
coded data transceiver for multidrop networks, Am7960 chip 85−42240
CODUS database of data on electronic components 87−73975
color graphics RAM 'palette', AMD Am8151 85−22849
colour graphics CRT display, monolithic DAC device for image signal conversion, Am 8151 *(French)* 85−54958
colour graphics system building-block ICs, AMD Am8150/7/8 85−22959
colour palette chip for graphic displays 85−58549
colour TV receiver, two-chip, design 85−37255
colour TV receiver picture signal improvement 86−11235
combined handcrafted and cell compiler approach tocustom IC design 87−703
combined MMIC/MIC 8-channel receive only phased array demonstrator operating in I/J band 87−7630
commercial monolithic operational amplifiers: a review *(Spanish)* 85−11052
comms ICs, monolithic techniques 86−16657
communication control LSIs LC8910 series *(Japanese)* 86−35803
communications ICs, developments overview 88−8948
compact grating structure for application to filters and resonators in monolithic microwave integrated circuits 88−25460
comparison of electronic equipment manufacture technologies *(German)* 87−1117
compiled ASIC−a silicon compiler based technology 88−63479
complementary FET bipolar circuit, logic cct. appl. 87−31798
component and system design for radar development, interaction 88−47207
component technology, GaAs complements Si 85−50116
components and modules, new circuits *(German)* 86−20242
COMPOSITE, Si IC technology modelling program 86−21646
computation complexity aspects 88−57710
computer data links with monolithic laser arrays, transmitter availability improvement 88−35177
computer-aided design verification 85−45836
computer-aided modelling of technological processes in microelectronics *(German)* 85−34829
computer-controlled graphic audio equaliser IC, development 85−17756
Concert ASIC development system with user friendly interface *(German)* 88−57720
conference, New York, USA (Feb. 1987) 87−58543
conference on electron devices, Washington, DC, USA (Dec. 1987) 88−37837
conference on frequency control, Philadelphia, PA, USA (May 1985) 86−33920
consistency of package geometry and permitt. in manufacture, monitoring technique 88−63051
CONSTELLATION, system which uses examples to learn VLSI structure manipulations 87−38437
constraint based incremental compactor for IC layout 88−26430
constraint propagation and design interaction in an object orientated IC design environment 88−64703
consumer electronic products, use of semicond. devices and ICs, trends and forecast *(Japanese)* 86−35798
continuous time filter, monolithic, transconductance amplifier, design 86−67348
continuous time filters, design consideration 87−66331
continuous-time low-pass filter, composed of matched transconductance amplifiers 86−63465
control ICs for brushless DC motors 86−39813
controlled monolithic bandpass piezoelectric filter 87−52703
cooling of semiconductor components *(German)* 86−46085
coplanar couplers for hybrid and monolithic MIC appls., unified CAD-oriented anal. 88−56987
coplanar waveguide for MMICs, effects of dielec. capacitor layer and metallisation on propag. characts. 88−63911
coplanar waveguide for MMICs, propag. parameters, effects of dielec. cap layer and metallisation 88−56990
coplanar waveguides for MMIC, loss minimisation 88−56953
coplanar waveguides for MMICs 87−66538
coplanar waveguides for MMICs, parasitic effects 87−37552
correlation function implementation; algorithms, ccts. and meas. appls. 86−29843
cosmic ray effects in microelectronics 85−44959
covering algorithms with min. number of rectangles 86−21738
CPU and accessory functions in one single component *(Italian)* 86−46874
critical IC-fabrication steps, simulation 86−21645
cross-sectional profile simulation using CAD tool SIMPL-2 88−33294
CRT controller generator 87−60585
current mode analogue circuit for implementing artificial neural networks 88−50284
custom analogue IC capacitive pressure sensor for biomedical research 86−5891
custom chip combination of analogue and digital circuits *(Norwegian)* 86−21634
custom design of integrated circuits 85−1669
custom devices, technology and product review 87−32589
custom IC, conf., Rochester, NY, USA (May 1986) 86−66546
custom IC design, building block layout 88−50971
custom IC design, object oriented CAE 88−1735
custom IC global routing method 88−71682
custom IC layout CAD tools 86−41896
custom ICs, appl. to communications technology *(German)* 86−27182
custom ICs, comparison of gate arrays, standard cells and full-custom devices *(Spanish)* 87−11854
custom ICs, conf., Portland, OR, USA (May 1985) 86−53
custom ICs, conf., Portland, OR, USA (May 1987) 87−58532
custom ICs, design aspects and training designers *(Hungarian)* 85−27985
custom ICs, layout and test *(German)* 85−500
custom ICs, partition into appropriate technology blocks 87−38336
Custom ICs design at Landis & Gyr 87−25423
custom ICs for the first time buyer 88−50915
custom integrated circuit structures for processing man-machine interaction 87−67491
custom integrated circuits, conf., Rochester, NY, USA (May 1988) 88−62884
custom VLSI circuits, testability *(German)* 86−15196
custom-built circuits, difficulty of choice *(French)* 86−20399
customised BiCMOS logic integrated circuits *(French)* 87−52512
CW switched capacitor bandpass filter, design 86−34495
cyclic A/D convertor not requiring ratio-matched components, design and performance 88−847
D70 digital switching system, subscriber line interface circuit LSIs *(Japanese)* 85−3282
D/A and A/D converters offer 14-bit and higher resolution 85−28585
D/A convertor, 14-bit, fabrication using doped polysilicon trimming technology 85−22952
D/A convertor family, 12-bit operation with low power consumption, configs. and appls. *(French)* 88−50217
D/A convertors, single-chip type series from Monolithic Inc. *(Italian)* 86−41173
DAC, 16-bit single-chip precision, design 85−17555
DACs for RF signal processing 88−25291
damage by SEM low-energy electron irradiation, effect on semicond. device parameters 88−13328
data convertors, Analog Devices monolithic chips 85−11361
data convertors with improved speed and resolution 85−17547
DC brushless motor control, configs. using ICs and microprocessors *(Italian)* 88−23951
DC brushless motor controller chip 87−43054
DC motor integrated servo controller, Motorola MC33030 86−6953
DC relays control *(Polish)* 88−71152
DC servomechanism controller using ASIC and digital filter 88−75641
DC servomotor closed loop position control using dedicated monolithic IC controller 87−51283
DC-DC solid-state, universal input, fixed output convertor 87−65846
decimation filtering for delta-sigma ADCs 88−73016
decoder for D2-MAC/Paket television standard *(Czech)* 88−35688
DECTROSWISS, Swiss Electronic companies undertaking 85−55887
dedicated and semi-dedicated integrated circuits *(Spanish)* 87−38418
dedicated IC, manufacturers cooperation *(Italian)* 87−25457
defects, human contaminant anal. 88−1746
delay line ICs, US market survey 87−59263
design, role of cct. element modelling 86−9184
Design Advisor, AI system for ASICs 88−63445
design and testing procedure *(Slovenian)* 87−46065
design capability conversion from mainframe to workstation environment 86−41922
design capability conversion from mainframe to workstation environment 86−67919
design centres for semi-custom-IC design, gaining CAE experience 85−23863
design in restructured semiconductor industry 87−60611
detectors, integrated technology 87−74943
die attach in high-reliability DIPs, polyimides, low-chloride epoxies 85−23888
die yield with clustered flaws, statistical model 88−39567
die-attach conductive adhesives, effect of porosity on characts. 85−6632
dielectric resonators, cylindrical, for MM-wave monolithic IC, theoretical props. 88−25421
diesel injector needle lift sensor, integrated Hall-effect type, closed-loop control appl. 86−47694
differential amplifier, broadband, 5-500 MHz, 5A-501 device with TO-8 package 85−61126
differential amplifier, INA105, appl. examples 86−40915
differential amplifier, monolithic type, INA 105, design, characts, and appls. *(German)* 87−65862
diffusion induced degradation of microelectronic materials *(French)* 87−6512
digilin arrays, interface cct. designs *(German)* 86−27503
digital, CAD, systems approach by semiconductor manufacturers 85−22756
digital, design, analysis of I/O syntax 86−8086
digital, electron beam tester for inspection, debug and failure anal. 85−17241
digital design using trace theory 88−26470
digital integrated circuits, supplemental multilevel interconnects by laser direct writing 87−46046
digital matrices for communication, PABX operation *(Italian)* 87−62766
digital processing of analogue signals, matching devices, anal. 87−35010
digital RF memory, design and fabrication using mixed custom GaAsIC/Si ECL technology 86−34805
digital signal processing devices, conf., London, England (Oct. 1987) 88−6128
digital signal processor, high speed monolithic 87−66238
digital teletext equaliser, circuit integration 85−42220
digital tuning system with EPROM block, NEC μPD17P00 family *(Japanese)* 87−31938
digitally controlled programmable transversal filter using SAW delay line and LSI GaAs ICs 88−70889
digitally programmable 1-chip filters yield lower-cost data-acquisition systems 88−41999
DIP dual-property lead frame materials 87−51871
direct conversion receivers for the MW band using ICs 88−15336
direct cooling using Cu plated bubble heat sink 85−28055
display LSI family for computer equipment, Hitachi devices 88−36145
distance education course on custom-design circuits 88−62936
distributed monolithic travelling-wave amplifiers 85−55144
distributed RC filters, SPICE modelling and design considerations *(German)* 87−66361
drafty treaty on the protection of intellectual property inrespect of [semiconductor] integrated circuits 86−67906
DRAM, 35 ns 1 Mb biCMOS expt. device 87−59507
DRAM cell with three-dimensional storage capacitor and fabrication process 85−54871
DRAMs, high speed, using BiCMOS circuit technology 88−764
driver ICs for low-loss control actuators *(German)* 88−14362
driver ICs from Valvo for unipolar stepping motors *(German)* 86−51655
DSP LSIs, NEC devices *(Japanese)* 87−37337
DSP VLSI arrays, model identification for digital filter realisation 86−20600
dual function mixer cct. for MM-wave transceiver appls. 86−8478
dual function mixer circuit for millimeter wavetransceiver applications 86−27631

monolithic integrated circuits continued
DYLMOS IC, hybrid technology cct. without isolation *(Chinese)* 86−67897
dynamic RAM cell with merged drain and storage 86−8229
dynamic time warping custom integrated circuit for speech recognition 87−47614
dynamically reconfigurable interconnection chip, LINC 87−59685
E310D blinker unit IC for automobile industry, review *(German)* 88−62727
E355D/E351D IC interconnection, noise immunity *(German)* 86−10123
E^2POT, monolithic electrically erasable and programmable potentiometer *(Italian)* 86−67516
E^2POT digital IC, monolithic replacement for potentiometer, design and appls. *(German)* 87−24291
E-plane integrated 60 GHz RF subsystem for low cost communications 88−53168
Eastern European VLSI technology *(Dutch)* 85−149
ECL compatible RAM 64 kbit, 7 ns, design using Hi-BiCMOS technology 88−6835
ECL RAM using Hi-BiCMOS technology, 64K, design and charact. 87−10863
ECL/analog laser driver IC, wide-band general-purpose, development 88−65731
economic quality assurance of application specific integrated circuits *(German)* 88−39549
education, microelectronic engineering program at RochesterInstitute of Technology 86−19778
EHF mixers using surface-oriented low-parasitic Mott diode 85−55133
EHF monolithic receive module technology for antenna arrays 87−47399
EL2020 current feedback op amps raise gain-bandwidth product 88−63533
electrical assessment of semiconductor material forelectronic device applications 86−41500
electrical engineering education, influence of semiconductor IC develop. 88−55872
electrically programmable interconnections for passive substrate using 100 mm Si wafer 86−15244
Electro/86 and Mini/Micro Northeast 86, conf., Boston, MA, USA (May 1986) 87−28
electrochemical failure, polymer encapsulants for microelectronics: mechanisms for protection and failure 88−37983
electroluminescent display driver cct. based on BIDFET process, Texas Instruments development 85−8907
electron beam influence on cct. operation expt. study *(Slovenian)* 87−46064
electron beam lithographic system for monolithic cct. fabrication 86−21691
electron devices, conf., San Francisco, CA, USA (9-12 Dec. 1984) 85−49265
electron devices, conference, Washington, DC, USA (Dec. 1985) 86−45928
electronic component materials reliability after product screening 87−72857
electronic components, review *(Dutch)* 86−28396
electronic correction of linear distortion in loudspeakers using Pfield Transducer Preset System *(German)* 86−49876
electronic design with off-the-shelf ICs, book 85−60649
electronic speech for TVs and VCRs, synthesizer ICs 85−31279
electronics insulation materials 87−32771
ELLA−a CAE system for truly hierarchical IC design 86−46505
EMI in microelectronics, review 86−15946
EMILIE2−a microprocessor based interactive graphic editor for integrated circuit design 85−40867
emitter-down, Schottky collector HJBT for very fast, high-density logic applications 88−63604
epitaxial semiconductor optical interference devices 88−7966
erasable/programmable solid-state memories 86−20515
ESD, effect on PCB-mounted ICs, equiv. cct. and expt. study *(Italian)* 88−1710
ESD and microelectronic devices in communication engineering, impairment of reliability *(German)* 88−34215
ESD effects on IC reliability 86−46143

experience of capture systems for IC design 88−7699
fabrication, accurate positioning servomechanism *(Slovak)* 85−50632
fabrication process optimisation 85−45816
failure-rate model, accuracy improvement using date-code factor 87−25448
fast convolution operation for contact verification inintegrated circuits 87−1583
fast hopping direct frequency synthesiser 88−44076
fault distrib., yield model based on negative binomial statistics 85−29279
fault identification of device and chip faults in analogcircuits 86−62398
fault-isolation test (FIT) chip for process enhancement and fault detection 87−38474
FEDSS, two-dimensional semiconductor fabrication process simulator 85−55888
Ferranti compiled ASICs 87−53597
ferrite device requirements in microwave and millimeter wave monolithic integrated circuits 87−67791
ferrite films for microwave and MM-wave devices 88−33531
FET input monolithic instrumentation amplifier, fast settling 86−34592
fiber-optic electronic coupling and packaging technique suitable for VHSIC appls. 86−30802
fibre optic ICs based on III-V semiconductors 87−54208
fibre optic video signal transmission module 87−13710
fibre-optic LED-p-i-n transmitter and receiver modules for high-speed LANs 85−62458
Fick's second law, atom diffusion in solid state *(Spanish)* 88−57286
field bus network of intelligent sensors *(Japanese)* 88−41316
field-defined bipolar structure in CMOS technology, fabrication technique 87−6779
field-implant spacer for isolation devices 85−29293
fin lines on semiconductor substrate, anal. 85−11504
finite-element analysis of voltage state of plastic type asymmetric semiconductors in ICs *(Italian)* 85−40808
finlines on MIS substrate, mode analysis 85−6539
FIR and IIR digital filters for real-time signal processing, monolithic types and CAD *(German)* 87−52742
monolithic integrated circuits continued
FIR digital filter using RNS arithmetic, VLSI implementation in multiple-valued logic 86−35005
flash 11-bit A/D convertor *(Italian)* 87−37400
flash A/D converter, 8 bit, 250 MHz operation, design using binary decoding method 87−17184
flash A/D convertor, monolithic 8-bit, power saving technique 86−1164
flash EEPROMs, principles for use 87−44826
flash X-ray parts testing, dosimetry error minimisation using standard radiation environment 85−18394
flat-panel monolithic display driver innovations 88−36139
flexible ASIC concept *(German)* 87−38341
flexible sensor arrays fabricated by monolithic Si technology, biomedical appls. 85−58665
Flexx array, IC design, features 85−11185
flow sensor with on-chip fluid temp. sensing element 86−44262
FM audio IC series for Hi-Fi: VTRs *(Japanese)* 86−55490
FM demodulator ICs for satellite TV receivers 87−56346
FM-PLL detector IC for sensitivity improvement in car radios *(Japanese)* 85−31178
FMX stereo broadcasting, decoder IC 88−15738
fractional horsepower motor drivers using smart power ICs 88−71759
frequency dividers up to 2.5 GHz for cable and satellite TV appls. 85−1035
front end and IF for car audio system, one chip integration 85−37349
FSK modem chip set 85−54977
FSK modem implementation using digital signal processing 85−30774
full duplex analog front-end chip set for split-band and echo-cancelling modems 87−20318
full-chip RC routing extraction and delay analysis 87−60584
full-custom ICs, design and production process *(Spanish)* 88−39633
fully integrated ECAD environment 87−1671
Functional Electronics, book 85−22157
functional laser trimming of hybrid and monolithic ICs 87−17570
GaAs linear ICs, product characteristics, ADA25001, CGY40, NEPA1001, PM-C1003 86−41857
GaAs MMIC image-rejection mixer using lumped elements, design and performance 88−19368
GaAs MMIC technology radiation effects 86−35767
GaAs monolithic frequency doublers with series connected varactor diodes 85−1061
GaAs monolithic MIC mixer-IF amplifiers for direct broadcast satellite receivers 85−1048
GaAs monolithic microwave IC, W laser-direct-write deposition for postfabrication trimming 87−45226
GaAs semicustom ICs 86−58504
GAP, graphics co-processor and its display processor ICs 88−19181
GARDS automatic prediffusion placing/routing software for ICs *(French)* 86−52757
gate array design experiences, conf., London, England (Jan. 1988) 88−31315
gate array technology, recent advances 87−32674
gate arrays, flexible design of custom and semi-custom integrated circuits, market survey *(German)* 85−22748
gate arrays, NEC devices *(Japanese)* 87−31816
gate arrays and standard cells, distinctions 85−61951
gate arrays in BiCMOS technology, NEC devices, construction and charact. *(Italian)* 88−656
gate arrays with on-chip custom RAMs 85−22889
geometry optimisation, parasitic thermal feedback elimination *(Polish)* 85−1633
global router based on a multicommodity flow model 87−44465
graphic equaliser ICs, Mitsubishi device series for audio appls. *(Japanese)* 87−77040
graphics D/A convertor, TDC1018 85−11340
graphics memory management, Flip systems *(French)* 87−31894
GTO with monolithic antiparallel diode, config., charact. and computer modelling motor control appls. 86−15148
HA-5147 monolithic op amp chip 86−8003
Hall effect devices, IC type, switching appls. *(Spanish)* 85−45789
Hall effect IC sensors and switches, design and charact. 88−44731
Hall effect ICs used for nocontact switches and DC motors *(Dutch)* 85−50478
Harris HC-5512, 5512A and 5512C PCM filters for lowpass, bandpass options 85−54628
Harris HM-6508 1 K RAMs, single event upset, spacecraft on-orbit obs. 87−31886
Harris HV1000 Induction Motor Energy Saver *(Dutch)* 86−19267
Harris Microwave Semiconductor low-current MMIC amplifier for military EW modules 88−63935
HD63485 graphic memory interface controller and HD63486 graphic video attribute controller, support chips 86−67910
HEMT photoconductor, microwave response 88−71036
HEMTs for MM-wave and high-speed digital ICs 88−38744
hermetic ceramic MMIC chip carrier for 10 Gbit digital and 50 GHz wide-band signal processing 86−46101
hermetic chip carriers, CIM 86−63423
HF applications of monolithic and hybrid video amplifiers 86−24139
HF filters using switched capacitor techniques, dynamic level shifting method 85−17661
HF monolithic switched capacitor cct. building blocks with improved op-amp *(Slovenian)* 87−46066
Hi-BiCMOS 32-bit execution unit 88−38547
Hi-BiCMOS 32-bit execution unit *(Japanese)* 87−59327
Hi-BiCMOS gate array with configurable 3-port 4.6 K SRAM 87−59378
Hi-BiCMOS SRAM, 16 Kbit, 7 ns/350 mW design using ECL 87−24202
Hi-BiCMOS technology, appl. to VLSI devices 88−33289
Hi-BiCMOS technology, merged struct. for high-speed Mbit DRAM appl. 87−44856
Hi-BiCMOS technology for high speed and low power dissipation 87−38351
hierarchical IC artwork verification system, resistance extraction 86−28428
high level VLSI simulation for mixed analogue and digital ccts. 87−46138
high performance BiMOS gate arrays with embedded configurable static memory 87−59376
high speed A/D converters, monolithic devices *(Spanish)* 87−66271
high speed LSI 85−45828
high speed optical submarine repeater ICs 86−21724
high temperature electronic systems 86−35620
high voltage drivers for ink jet printers 86−63447
high-frequency design with analog master chips 88−50964
high-performance current conveyor implementation 85−11402

monolithic integrated circuits continued
high-performance VLSI, prototype ASIC verification system 88−32084
high-reliability semiconductor ICs, rescreening for military and aerospace systems 85−18391
high-sensitivity magnetosensitive microdevice, integrated p^+-n^--n^+ sensor 86−55608
high-speed A/D and D/A convertors, Siemens SAD 8005 and 8010 *(French)* 86−57895
high-speed amplifiers, hybrid and monolithic devices, specifications 87−73349
high-speed computer packing, meas. considerations 88−39623
high-speed digital LSI technologies, developments at Fujitsu 86−67917
high-speed interconnect systems, elec. performance anal. 88−26384
high-speed logic ccts., total-dose hardness assurance for low Earth orbit radiation environment 88−26390
high-speed monolithic A/D convertors using GaAs technology 85−54959
highly automated design system for rapid development from architecture to ASICs 88−64702
historical development *(Slovenian)* 87−45836
historical development, review *(Italian)* 85−45623
historical development and trends *(Dutch)* 86−47654
Hough transform processor, monolithic, based on restructurable VLSI 88−33298
HP 293X dot-matrix impact printers, custom ICs 85−18390
HPX-32 ultra-thin brushless motor for headphone stereo cassette recorders *(Japanese)* 88−23986
HSCF24040 antialiasing programmed filter strips aliases before sampling input signals 87−66321
humidity resistance improvement by special formulation of epoxy moulding compounds for ICs 87−72837
HV custom IC operation, reliability considerations 86−2327
HV gate array IC, design using single-metal BiMOS process 87−695
HV IC technology for power control and conditioning 87−1658
HV ICs, survey of available products 86−57610
HV junction-isolated bipolar/MOS IC for 500 V/25 A half-bridge hybrid module 86−14006
HV monolithic AC/DC solid-state relay, design and appls. 87−37634
HV monolithic drivers for printhead piezoelec. transducers 87−11006
HV solid-state relays using dielectric isolation 86−47135
HV user specific ICs, design process and manufacturing technologies *(German)* 87−11835
hybrid 2560 dot linear LED print head development 86−67922
hybrid actuator using monolithic intelligent MOS based structures 88−69660
hybrid gate arrays using CMOS and Bi-CMOS technology 85−22796
hybrid simulation of the large integrated circuit in the KOMPAC-EC system *(Russian)* 85−45751
I^2C bus, inter-chip serial link 87−38410
IBM PC IC design packages *(Polish)* 88−24887
IC chip temperature distrib. simulation 86−58542
IC fixed tolerance design centering based on nonlinear simplex method 87−67492
IC input protection cct. 85−45201
IC layout and interconnections *(French)* 86−41889
IC layout compilation 88−7695
IC lets serial data link control motor 86−27494
IC library symbols and models standardization 88−13545
IC nanostructures, fabrication by electron beam lithography, appls. 86−21661
IC process and device design, MASTIF workstation 88−71647
IC technology, automotive applications 85−61955
IC/LSI thermal design *(Japanese)* 86−9223
ICL 7126 A/D convertors, low power, development features 86−52903
ICs, components thermal interaction and electrothermal models 87−67338
ICs, Eindhoven Polytechnic Transportable Design Utility development *(Dutch)* 85−39847
ICs, electron and optical beam testing, conf., Grenoble, France (Dec. 1987) 88−37808
ICs, low-power video-processing devices for pocket colour TVs with LCD panels *(Japanese)* 88−22271
ICs and EMI, future trends 88−8500
ICs for digital audio, ADC and DAC limits 85−45126
ICs for LANs *(Dutch)* 85−47192
ICs for optical transmitters and receivers *(Japanese)* 88−22101
IECE Japan 1986 National Convention, conf., Niigata, Japan (March 1986) 86−66531
IEICE National Convention, Keio, Japan (March 1987) 87−58518
IEICE Spring Convention, Tokyo, Japan (March 1988) 88−49350
IF video signal processing, low dissipation ICs appl. *(German)* 88−53427
III-V compound devices, high speed, rapid thermal processing 88−44849
III-V semiconductor IC technology overview 87−25485
III-V semiconductor lasers for integrated optoelectronics 85−41298
image processing with VLSI 85−54939
impact of packaging materials on semiconductor thermal management 87−72863
IMPATT diodes, MM wave quasi-optical power combiner 88−19338
implantable multielectrode array with on-chip signal processing, microprobe for biopotentials recording 87−21575
IMS T424 transputer for dig. signal processing appls. 85−45795
in-house ASIC production using direct-writing laser 88−39617
INA102 monolithic instrumentation amplifier, low power consumption 86−27082
INA110, instrumentation amplifier for wide range of circuit designs 87−44604
independent design house role 87−60620
independent designer as an objective advisor and producer *(Dutch)* 85−35035
induction motor energy saver, monolithic IC applications 85−23899
industrial solid-state electronics, devices and systems, book 87−65114
industry, market prospects *(Dutch)* 85−45738
industry trends in 1985 86−28389
instrumentation amplifier, monolithic, FET input device, INA 110, characts. and protection features *(German)* 86−67044
instrumentation amplifier, Precision Monolithics AMP-01 *(German)* 85−39934
instrumentation amplifiers, development and products 86−40914
integrated circuit feed antennas, efficiencies anal. 85−13316
integrated circuit packaging−a materials microcosm 87−72855
integrated circuit subsurface features, detect. by photoacoustic microscopy 87−23373

monolithic integrated circuits continued
integrated low-voltage headphone amplifier for mono operation 85−37348
integrated silicon compilation tool system for IC design 87−1667
integrated solenoid drivers with current regulation for automatic gear control 88−69885
integrated transducer technology 86−55651
integrated video output stages for direct driving of cathodes of colour TV tube 86−8704
integrated VLSI CAD system built from vendor-supplied tools, implementation and management 85−45820
integrated VLSI CAD systems at Digital EquipmentCorporation 86−21782
integrated voltage controllers, review *(German)* 86−20291
integration density limitation due to heat dissipation 86−67915
INTEL 8293 IC bidirectional amplifier for IEEE-488 bus *(Polish)* 88−63550
intelligent 212A-type modem component 85−17223
intelligent capacitive transducers, switched-capacitor interface 86−65160
intelligent sensors, general purpose types using microelectronic fabrication techniques 87−14292
intelligent sensors for specific applications *(German)* 88−60676
intelligent silicon compiler for full custom layout 86−67954
interconnection costs of various substrates−the myth ofcheap wire 86−13504
interdiffusion in thin films, book contrib. 86−28103
interfacing solid state sensors with digitalsystems 85−52733
internal microwave propagation and distortion characteristics of travelling-wave amplifiers studied by electro-optic sampling 87−6114
international trends, survey *(German)* 87−53626
intra-cell router for automatic synthesis IC design 85−35117
ion implantation doping of semiconductors 88−57441
ion sensors based on monolithic IC and hybrid technologies 86−5212
IR solid state imagers, progress review 86−55559
IR starting monolithic focal plane array, with high-speed readout 88−53699
irradiation effects *(Japanese)* 87−1571
irradiation testing, scatt. photon spectra., Monte Carlo calc. 85−18395
ISDN, echo cancellation, burst mode technique, integrated single chip modem use 88−41405
ISDN, IC developments *(Italian)* 88−59751
ISDN, ICs for subscriber interfacing *(German)* 87−40129
ISDN, ICs/VLSI devices from Siemens, Intel and AMD *(French)* 87−59673
ISDN, LSI technology appls. 85−19986
ISDN, technology forecast of telecommunication integrated circuits 85−25679
ISDN burst transceiver, 384 Kb/s IC 87−62727
ISDN burst transceiver, 384 kbit/s, design and monolithic cct. implementation 88−21757
ISDN chips for digital PABXs design 85−47365
ISDN system design, Intel 29CX series of components 85−19993
ISDNs, principles and technologies *(French)* 88−3382
ISDNs, subscriber-line card ICs from Advanced Micro Devices 85−19908
isolation trench filling in Si substrate 86−35749
Jack St Clair Kilby IC inventor 88−11813
Jack the Mapper, knowledge-based CAD system for synthesis of multiprocessor digital signal processing chips 88−31942
JFET-bipolar integrable composite cct. with improved FET-like characts. 85−45762
Josephson and Si chip technology/manufacture *(German)* 85−35100
Josephson interferometer array, two-dimensional config. for improving device accessibility during testing 85−41053
junction degradation and dielectric shorting: two mechanisms for ESD recovery 87−47095
junction isolated power IC's 87−1659
justification of CAD tools for IC design 86−47649
Ka-band front end with monolithic mixer, hybrid IF amplifier and lumped-element Gunn LO 86−47062
Ka-band front-end integrated with monolithic mixer 86−8480
Ka-band MMIC receivers, development of monolithic ccts. 87−59887
KD2, intelligent circuit module generator 87−46114
KP1100CK2 integrated sample-and-hold circuit, development *(German)* 86−67440
L6202/3 in BCD IC technology *(German)* 88−18902
LA2800/4070 telephone answering system ICs *(Japanese)* 88−28554
Lada 2105 electronic assemblies, review *(German)* 88−62728
LAN controller chip, 82588, low end systems 85−57786
large area ICs, yield statistics study 87−18264
large scale ASIC library for microprocessor peripherals 86−58509
laser trimming of precision, hybrid devices 88−1241
latch up, influence of photocurrent representation 87−53639
latch-up simulations, single event upset induced, PISCES-II 87−32604
latching relay/custom signal processing IC device, C3 series, characts. and appls. *(Japanese)* 85−55227
lateral magnetotransistors with integrated signal amplification, optimisation 87−35064
layer assignment by simulated annealing 86−20177
layered dielec., media electromagnetics, Sommerfeld-integral representation of elec. dyadic Green's fn. 88−64799
layout, efficient netlist comparison using hierarchy andrandomization 86−21789
layout, legal protection, European legislation 88−57711
layout CAD, silicon compilers 86−2236
layout design and verification, book 87−51710
LC^2MOS linear compatible CMOS switch for power supply appls. 88−69505
LCD driver/controller ICs for versatility in configuration and function 85−64193
LD optical matrix switch 88−45462
leadless chip carrier packages, die attach failure anal. by AES characterization 85−7043
lecture course in solid-state devices and integrated circuits 86−61872
legal protection of IC designs, US Semiconductor Chip Protection Act 87−60534
legal protection of semiconductor chips 86−26553
legal protection of semiconductor chips, Danish act 88−50182
legislation for semiconductor chip protection, EEC directive 87−67518
LES, layout expert system 87−32630
light sensing devices, design, operation and cct. appls. 85−41295
light sensors, developments *(Spanish)* 86−24541
light sources in monolithic circuits for integrated optics *(Polish)* 85−51070

monolithic integrated circuits continued
limit switches for mfg. systems, high resolution and speed using resolver-to-digital converter ICs 88−64033
limitations and possibilities of semiconductor ICs 85−35112
LINA-1 semicustom IC, construction, charact., and appls. *(Hungarian)* 85−29275
linear, modular circuit solutions 87−25372
linear array developments 88−50907
linear arrays and standard-cell ICs for analogue-circuit design 85−50613
linear ASIC macro creation using Spice-like simulators 88−20021
linear ASICs, high power arrays, cell structure, advantages 88−44825
linear custom and semicustom ICs, design considerations *(German)* 85−55881
linear ICs, analytical noise estimation *(Croatian)* 85−29265
linear ICs, failure rates prediction 86−35835
linear semicustom ICs, evaluation tradeoffs 88−33272
linear temperature-to-frequency convertor, using integrable Colpitts oscillator 86−24455
linear voltage regulator, monolithic CMOS/p-n-p struct., 5 V 10 A specifications 86−7998
linear voltage regulator ICs 86−52643
linewidth meas. systems calibration 86−55848
linking design and test for fast-prototype testing 88−20096
LINMIC, CAD package for layout-oriented design of MICs/MMICs to MM-wave freqs. 86−58056
LM12 150 W operational amplifier in TO-3 encapsulation, integral DSOA protective circuits *(Swedish)* 87−10691
LM1578 versatile IC switching regulator for localizedpower applications 86−34542
LM3914 series LED display IC 85−31532
LM604 Mux-Amp, multiplexer-op amp IC 87−46050
local distributed data interface for LANs VLSI implementation 85−25543
LOG/iC, universal logic compiler for ASIC. *(German)* 87−25390
logic circuits, designing in silicon 86−8199
logic IC, CMOS/bipolar transistor combination *(German)* 86−67153
loudspeaker telephone, speaking freely without feedback, IC MC34018 chip appl. *(German)* 88−21827
low dimensional device physics fundamentals 87−25058
low insertion loss filters synthesized with thin film resonators 88−50236
low power, low voltage receiver integrated circuits 88−28743
low power substrate voltage generator, design and operation 87−508
low supply-voltage driving telemetering IC for biological signals, config. and operation *(Japanese)* 88−36486
LS/TTL improvement by fast CMOS *(French)* 87−10779
LSI, design and manufacture *(French)* 86−21733
LSI, photolithography, 1-μm feature size 85−35104
LSI ccts., radiation hardness assurance based on system reliability models 88−24607
LSI chip cooling using Peltier couple solid-state heat pump 85−45775
LSI devices, chip level modelling 85−1616
LSI devices for read/write functions in floppy disc drives, M51017P and M51018P *(Japanese)* 85−17573
LSI interconnect lines, propag. delay problems and solns. 86−41898
LSI near-optimal quadratic-based placement for a class of IClayout problems 86−9206
LSI process integration of p-channel JFET with bipolar technology 87−60590
LSI production trends *(Japanese)* 86−15221
LSI semiconductor circuits, development 86−15187
LSI signal routing technology 86−41910
LT1070 5-pole cct. control *(German)* 87−59798
LT 1070, complete 5A switched regulator IC *(German)* 86−62432
lumped elements for MIC and MMIC appl., CAD aspects 86−13942
LVDT signal conditioner, signetics SE/NE5521 87−70523
MACPRO, time simulator for picosecond circuits *(French)* 88−18861
macro cell placement with parallel simulated annealing 87−38444
magnetic field sensors, features, appl. 87−3589
magnetic vector sensor IC *(Japanese)* 87−3728
manufacture, clean room conditions *(German)* 85−1653
manufacture and CAD considerations for special purpose ICs *(German)* 85−6997
manufacture parameters determ., computer aided simulation 87−1624
manufacture using CAE system, from circuit design to chip *(German)* 86−15197
manufacturing environmental control and chip production process *(German)* 85−40800
market and design trends *(Dutch)* 87−38343
market report 1984, Austrian and worldwide sales *(German)* 85−44564
markets, interest, and economic aspects for fast prototyping 88−20087
markets, trade agreements and advancements 88−64635
mask critical image of placement in chip chamfer area 85−29294
mask programmable filters *(German)* 86−14343
Mason: a global floor-planning tool 86−28424
MAT-04, monolithic quad-transistor IC for diverse matching appls. 86−40913
MAX 232, RS-232 interface chip 87−59669
MAXIM, macrosimulator for fast circuits *(French)* 88−18860
Maxim MAX691 analogue supervisory circuit for microcomputers *(German)* 88−12190
MC33034 integrated logic for brushless DC motors, solid-state devices ease design task 87−78705
MC33034 monolithic brushless motor controller 87−72097
MC 1930 telephone IC and testing *(Polish)* 88−39632
measurement and control techniques using ICs *(German)* 88−57732
measuring amplifiers *(German)* 88−32017
medical monolithic flexible thermometer arrays for use in cancer hyperthermia 85−38015
MEGA project for microelectronics production, memory devices and manufacturing technology *(German)* 86−2247
megabit chips development and reality *(German)* 85−50618
megabit memories, technological trends and developments *(Japanese)* 87−37289
memory chip reliability, effect of increasing density, failure rate anal. 86−20555
memory device technology comparisons 87−66188
memory ICs, automated tester *(Russian)* 87−14100
merged bipolar-CMOS technology, 2 μm process for VLSI implementation 85−50667
merged CMOS/bipolar technologies using zone-melting-recrystallised SOI films 85−50668

monolithic integrated circuits continued
MESFETs, integration with Si MOSFETs on monolithic GaAs/Si substrates 87−46733
metal-programmable logic arrays for DSP, LSA2000 family, configs. and communications appl. 87−10784
metallic electromigration phenomena 88−38801
MF10 active filter chip 87−37456
MIC, spiral inductors, small size and high cut-off freq. charact. 85−1097
MIC filters, 2D synthesis and design 88−25308

mixed analogue/digital standard cells, hierarchical approach 87−74375
mixed chip testing techniques review and developments 87−18268
mixed technologies with analogue and digital sections on same chip 88−44011
mixed technology gate array with ECL and BiMOS logic on a single chip 88−6810
mixed-mode analog-digital simulation methodology for full custom designs 88−64708
MM wave devices, miniaturisation *(Dutch)* 88−19362
mm wave monolithic ICs progress, oscillator, W-band mixer, distributed amplifier and receive module design 87−45295
MM wave monolithic switching circuit manufacture *(German)* 88−38705
MM wave phased array radar antennas using monolithic modules, new architectures 88−2885
MM-wave circuit technology, recent trends *(Japanese)* 88−12589
MM-wave dual function monolithic mixer cct. design for transceiver appls. 86−20834
MM-wave low-loss digital phase shifters, topologies and monolithic implementation 85−23144
MM-wave MMICs, advance 88−19380
MM-wave MMICs, fabrication techniques and technologies, receiver and transmitter appls. 86−47081
MM-wave monolithic ICs 88−71061
MM-wave monolithic ICs, development and communications appls. *(Dutch)* 88−25518
MM-wave monolithic ICs, Fabrication and props., review *(German)* 88−56938
MM-wave monolithic ICs, Si technology using ion implantation and laser annealing 85−40246
MM-wave monolithic ICs, techniques and appls. *(German)* 88−19356
MM-wave monolithic ICs, technological developments and appls. *(German)* 88−32423
MM-wave monolithic ICS, technology, appl., and 35 GHz receiver development *(Italian)* 88−56912
MM-wave monolithic ICs , MIM capacitor model for CAD and anal. 88−71068
mm-wave monolithic ICs for smart weapons 88−44359
MM-wave monolithic ICs for transceiver appls. 86−47089
MM-wave monolithic IMPATT oscillator and active antenna, design, fabrication and performance 88−71116
MM-wave monolithic IMPATT transmitter, oscillator/antenna array design, fabrication and characts. 88−38771
MM-wave monolithic integration technology for communications and radar appls. *(German)* 88−56939
MM-wave monolithic MM-wave IC for radio and radar systems *(German)* 88−25523
MM-wave monolithic Schottky diode grid freq., multipliers, structs. for watt level operation 88−71077
MM-wave oscillator using transmission line periodically loaded by QWITT diodes 88−50354
MM-wave passive components for monolithic circuits 85−1006
MM-wave phased array antennas, monolithic type architectures 88−34496
MM-wave planar ccts., Bi bolometer probe design for meas. appls. 86−47067
MM-wave semiconductor oscillator 86−8503
MM-wave solid-state devices and monolithic ICs, technology, developments and appls. *(German)* 88−19357
MM-wave two-and three-terminal active devices, structs. and characts. for MMIC development 87−11063
MMIC, CAD *(French)* 88−63882
MMIC, coplanar probe to microstrip transition 88−63855
MMIC, ferrite plating on GaAs 88−50364
MMIC, modular source-type 3 D anal. of scattering parameters 88−32458
MMIC, monolithic subsystems for satellite appls. 88−19389
MMIC, Q-band monolithic amplifiers 88−19391
MMIC, radiation from via-hole current calc. 88−32459
MMIC, slow-wave propag. in crosstie overlay coplanar waveguide confirmation, band-reject grating appl. 88−70962
MMIC 14-GHz VCO and Miller frequency divider for low-noise local oscillators 87−59851
MMIC affordability through worst-case design optimization 88−44357
MMIC analog phase shifters and freq. multipliers for MM-wave phased array appl. 87−24452
MMIC analogue refl. phase shifter, 6 to 18 GHz, using dual-varactor refl. cct. 88−63962
MMIC and high-speed IC package, construction and materials 86−52289
MMIC and MIMIC, developments in United States *(Japanese)* 87−37558
MMIC broadband limiting amplifier design for EW systems appls. 88−7047
MMIC broadband packaged amplifiers for EW appls. 86−53048
MMIC cct. design and layout, microwave workstation using Touchstone and MiCAD programs 86−14539
MMIC channelised switched preselector, design for EW-receiver appls. 88−71083
MMIC components, skin-effect at high freqs., theoretical study using variational formulation 86−8464
MMIC design considerations and CAD software limitations 85−55172
MMIC device modelling using transfinite element method 88−71087
MMIC device technology for microwave signal processing systems 88−44360

monolithic integrated circuits continued
MMIC dielec. resonator oscillators, push-pull freq. doubling for C-/K-bands, design and performance 88−19413
MMIC distributed power amplifier, novel design approach 86−53066
MMIC FET oscillator, temp. stabilisation using Schottky diode as sensor 86−27576
MMIC high speed circuit testing using ultrafast optical techniques 88−38730
MMIC historical perspective 85−222
MMIC insertion using thick film processing, low cost assembly method 87−73731
MMIC ion implanted W-band monolithic balanced mixers for broadband applications 87−59891
MMIC limiting amplifier design for microwave FM receiver systems 85−55168
MMIC lumped broadband matching networks with arbitrary nonuniform losses, computer-aided-synthesis 88−71080
MMIC manufacture, cost reduction 87−6124
MMIC micro-coplanar-strip lines *(Japanese)* 87−73763
MMIC millimeter-wave monolithic passive circuit components using microstrip circuitry 85−40227
MMIC modules, distributed, for 20 GHz phase array fed antennas 87−39498
MMIC multiport chip carriers, design and characts. 86−35121
MMIC optically controlled phased-array technology for space communication systems 88−72698
MMIC passive elements, modelling using EM simulation tool 88−38733
MMIC power amplifier module, 6.5-16 GHz operation, design and characts. 86−27595
MMIC receiver, 30 GHz, config. and characts. 87−32073
MMIC receiver, 30 GHz configs. for Ka-band satellite transponder appls. 88−71081
MMIC single balanced mixer with integrated dipole receiving element for 30 GHz operation 86−27602
MMIC single-balanced mixer with integrated dipole receiving element, design for 30 GHz 86−20831
MMIC SP3T, SP4T switches designed for 30-dB isolation from DC to 6 GHz 88−63940
MMIC square spiral transformers, computer simulation and expt. study for CAD appls. 86−14532
MMIC square-spiral inductors, anal. and S-parameter meas. 86−47068
MMIC struct., 2D and 3D types, anal. using efficient iterative technique 88−25487
MMIC structures, computer-aided EM anal. and design 86−14534
MMIC structures, interactive CAD package 87−10583
MMIC technology and appls. 87−11031
MMIC technology and design in West Germany, state-of-the-art overview 87−73767
MMIC technology for advanced space communications systems, NASA program 85−23145
MMIC technology for EW system design, developments 87−37560
MMIC technology for satellite communications 88−19390
MMIC test equipment limits 88−997
MMIC testing, two-tier S-parameter de-embedding technique with calibration 87−52853
MMIC testing using microwave wafer probe, planar calibration standards verification techniques 88−50383
MMIC transmission line loss calc., variational approach 87−75502
MMIC transmit/receive modules for phase array radar appls., technological developments 88−9641
MMIC ultra-wideband amplifier, 2 GHz *(Japanese)* 86−58064
MMIC VCO module, 7 GHz operation, design, fabrication and performance 88−71072
MMIC X-band phase shifter, design, layout, fabrication and characts. 86−27598
MMIC-based T/R modules, optical control and interconnects using fibre optics 88−50375
MMIC/hybrid MIC technology for phased arrays, review 88−38731
MMIC/MIC 8-channel phased array receivers operating in I/J band 87−47404
MMIC/MIC-to-waveguide transition for single- and dual-polarization systems 85−17798
MMICs, analogue cct. techniques and implementations *(German)* 87−45221
MMICs, biasing and matching using thick film processing 87−59901
MMICs, CAD models of lumped elements on GaAS up to 18 GHz 88−32437
MMICs, charact. method and design formulae for micro-coplanar strip lines 88−25470
MMICs, comprehensive CAD approach for design up to MM-wave freqs. 88−32431
MMICs, conf., New York, NY, USA (May 1988) 88−62897
MMICs, coupled microstrip lines, performance on interconnections laid on insulating andMIS substrates 86−27579
MMICs, development for broadband system appls. 88−50372
MMICs, developments and modules for array radars 87−63041
MMICs, low cost designs for T/R modules in phased arrays 87−59856
MMICs, nonlinear type, unified mathematical concept for freq.-domain CAD 86−14537
MMICs, planar transmission lines with finite strip thickness and conductivity, anal. 88−63888
MMICs, slow-wave grating struct. for filters and resonators 87−73733
MMICs, symbolic anal. for CAD appls., SYBILIN simulation program 86−14540
MMICs, symposium, St. Louis, MO, USA (June 1985) 86−26471
MMICs, use in instrumentation, impact, advantages and appls. *(Italian)* 88−50357
MMICs, WAFFLELINE high-density packaging technique 85−55163
MMICs and MICs, coupling capacitance determ. of underpasses, air bridges and crossings 87−37537
MMICs and MM-wave ICs, equiv. cct. modelling of losses/dispersion in planar guided-wave structs. 88−32436
MMICs for low cost design of MM-wave receiver 87−59886
MMICs for use in EW systems, performance, cost and reliability aspects 88−3799
mobile radio receivers, IC components NE 602/4 *(German)* 87−69918
mobile radio systems, 90 MHz, linear phase monolithic crystal filter appl. *(Japanese)* 87−69946
modelling of components of solid-state integrated circuits using algorithms for successive transformations 85−17079

monolithic integrated circuits continued

radio-television complex semiconductor IC testing, meas. device automation *(Polish)* 86−15200
RAM, dynamic, array, dual recessed oxide technology 86−8221
RAM automated generation for semicustom ICs 87−5894
random logic layout synthesizer 87−38448
random processing phenomena modelling in CAD of IC 86−58564
raster scan memory for graphics/text generation and display 85−33924
RC all-pass networks with constant-phase different outputs 87−31991
RCA 723 regulated power supply chip *(Spanish)* 86−40906
read-out techniques for focal plane arrays 88−74474
receiver/transmitter IC design for capacitance keyboard *(German)* 87−17188
reconfigurable WSI microprocessor 87−1670
reduced design and manufacturing time by new semicustom standards and VLSI-design methodologies 88−20091
REF43, 2.4 V low power precision voltage reference circuit using operational amplifier 88−63506
reference refreshing-cyclic A/D and D/A convertors, fully differential types for monolithic implementation 86−67282
relay, integrated type with two optically-coupled thyristors, config. and performance *(German)* 85−11635
reliability, parameter assessment of service life *(German)* 87−10216
reliability for optical submarine cable system repeaters 88−47046
remote control ccts, appls. using IR, US and optical fibre techniques *(French)* 86−41262
monolithic integrated circuits continued
remote control using MC145030 IC 87−67344
repair using focused ion beam milling 86−35791
repeater ICs for 6.3 Mb/s or 8.2 Mb/s transmission systems 86−4453
rerouter for optimizing via count and wire length in channels and switchboxes for double-layer layout 87−46121
resistance of IC interconnections, mixed mode calc. method *(Spanish)* 88−64686
resistive interconnects for ICs, numerical simulation 86−35761
resolver-digital convertors with programmable resolution, 2S80 and 2S81, config. and appls. *(German)* 88−835
resolver/digital convertors, Analog Devices monolithic ICs 87−44955
resonant convertors, FM controller IC, LD405 88−30817
restructuring using focused ion beams 86−35790
Reticon 1024S type, solar spectrograph appl. *(Chinese)* 87−63261
Reticon detector, fibre optic illumination, noise improvements 87−77147
review of IC developments aiding growth in electronics industry *(German)* 88−64646
review of IC technology development *(Chinese)* 85−45740
RF and microwave circuit design, network synthesis CAD program 87−66550
RF integrated circuits, developments 88−20055
RF subsystem design for microwave communication receivers 88−21959
RGB HV video output amp., single chip 10 MHz 87−10696
RGG colour chip for TV sets *(German)* 85−58314
RMS/DC convertor IC, Linear Technology LT1088 87−45139
robotic flexible automatic moulding system *(Japanese)* 88−13491
role of the independent design house 87−10765
rotary servo actuator for head actuator of magnetic disc drives *(Japanese)* 88−24113
rotary transformer signals convertor, to successive-approximation angle code 85−61403
routeing for chip design *(Chinese)* 88−56396
RS232 driver/receiver, transceiver IC config. and appls. *(Italian)* 88−25295
RS232 transmitter/receiver with 5 V power supply *(German)* 88−35084
SAB 0529 timer start-stop control cct. using one key 87−5936
Saber/Cadat, mixed mode simulation tool 88−71633
Sanyo LA 1135 AM tuner with improved cross modulation characts., monolithic IC appl. *(Japanese)* 85−31176
satellite microelectronics, radiation effects 86−2313
SAW convolver/correlator on Si substrate 86−9352
SAW physical-electronic system for sensors 88−60712
SBIMOS, versatile technology for semi-custom system integration *(German)* 88−33282
SC ccts., applications, overview 88−12500
SC filter, TSG 8551, config., characts. and appls. *(Italian)* 88−50241
SC filters, construction, operation, problems, appls. 88−56745
scaled Hi-CMOS and Hi-BiCMOS technology for VLSI memory device appls. 88−33378
scan line approach to power and ground routing 87−38442
scanning ion microscope, in situ microsectioning and imaging of semiconductor devices 88−39036
scanning ion microscopy voltage contrast obs. of monolithic ICs 87−53594
scanning optical microscopy and integrated circuits inspection 88−39596
Score function channel router 87−67506
SCUIDS: a semi-CUstom Integrated Design System 86−984
second-generation integrable electronically tunable current conveyors 88−38615
self-aligned BiCMOS process optimises speed and power 87−46089
self-consistent Monte-Carlo particle model for analysis of semiconductor microcomponents of any geometry, comments and reply 87−58787
self-protecting switch ccts., monolithic device family for automated equipment control appls. *(French)* 86−52987
self-repairing semiconductor memory chip with improved availability/reliability 87−59479
SEM IC internal node analysis techniques *(Italian)* 87−11837
semi-custom design system design process 86−2330
semi-custom IC, types 85−35142
semi-custom ICs, conf. London, England (Oct. 1983) 85−32931
semi-custom ICs, current trends, conf., London, England (Dec. 1983) 85−27970
semi-custom ICs, overview of devices and technology 85−1630
semi-custom or microprocessor? 85−35143
semi-customised logic programme from Philips *(Dutch)* 85−33750
semiconductor, ICs manufacturing and service defects, elec. states, EBIC, SEM obs., *(German, English)* 85−55911
semiconductor chip protection, US and Australia 87−72743
Semiconductor Chip Protection Act and protection of USA chips in foreign countries 87−53632
Semiconductor Chip Protection Act in USA copyright/patent law 86−52198
Semiconductor Chip Protection Act of 1984 85−54077
semiconductor chips, reverse engineering legislation 87−36393
semiconductor device testability design, cost trade-offs 85−12229
semiconductor devices, LPCVD metallisation, review 85−45621
semiconductor housings, moisture meas. *(Dutch)* 88−11706
semiconductor IC technology trends 86−9254
semiconductor ICs, low level impurity measurement in sputtered dielectricfilms using the atomic absorption spectrophotometer 86−21759
semiconductor ICs, transient radiation effects testing using pulsed laser diode 85−18399
semiconductor integrated sensors for automotive appl., development 88−69886
semiconductor laser modulator, operation above 565 Mbit/s 87−75195
semiconductor lateral superlattices for MM-wave and microelectronic applications 85−34614
semiconductor market, long-term forecast, developments in USA and Europe *(French)* 86−19792
semiconductor market growth and technological developments *(Italian)* 87−67036
semiconductor markets, IC develop. and use of 3V industry standard 87−38355
semiconductor materials and devices for advanced microwave appls. 85−6541
semiconductor memory trends, review 87−24179
semiconductor microelectronic circuits, Rutherford backscatt. spectrometry 85−29263
semiconductor pressure sensors, with integrated signal processing, construction methods *(German)* 85−26289
semiconductor product development *(Italian)* 87−32607

monolithic integrated circuits continued
semiconductor sensors, simple designs to smart devices *(German)* 86−60220
semiconductor slice testing, computer-controlled data reduction *(Hungarian)* 85−61968
semiconductor surface specific analytical techniques 88−33285
semiconductor technology, high temperature electronics *(Norwegian)* 86−2246
semiconductor technology developments *(German)* 85−61966
semiconductor thin film pressure sensors with integrated signal conditioning, single package design *(German)* 85−52722
semiconductor wafer inspection, QC instruments, optical techniques 85−28065
semiconductors diffusion process modelling, dynamic methods 87−11725
semicustom alternatives for system design and manufacturing 85−22829
semicustom analogue ccts., development and product range *(Italian)* 88−50924
semicustom and full-custom technologies, definitions and implementation 86−28368
semicustom design verification based on probabilities 86−35789
semicustom gate array IC design for SLAC SLC timing control system 85−43290
semicustom IC, new market stage 88−57742
semicustom IC design using gate array and standard cell technologies *(Italian)* 85−29267
semicustom IC design workstations, Fujitsu's tools 86−41912
semicustom IC for software protection 86−58505
semicustom IC industry, UK's position in worldwide activities 85−23910
semicustom IC product families, reliability verification generic qualification 87−1599
semicustom IC revolution, technology, CAE tools and product development 85−1705
semicustom ICs, gate-arrays, standard cells and Si foundry aspects, technology and market trends *(Spanish)* 85−29300
semicustom ICs, technology, developments and appls. *(Spanish)* 85−45786
semicustom ICs, user research 85−22827
semicustom ICs' ratings and architectures aid analog- and digital-circuit designers 88−1698
semicustom ICs for military use meet rigid reliabilityspecs 86−28373
semicustom linear ICs, design considerations *(Italian)* 88−71645
semicustom logic ICs, CAD using standard cells approach *(German)* 86−20432
semicustom logic ICs, trends 85−22830
semicustom microelectronic in Canada 86−35788
semicustom microelectronics in Canada, R&D activities, overview 86−21659
seminar, Framingham, MA, USA (Sept. 1984) 85−32914
semistandard VLSI chip design, advantages 88−33290
sensor and signal processing electronics integration *(German)* 86−38365
sensor integration with signal-processing systems, challenges for Si IC technology 85−52751
sensor signal amplifier, Analog Devices AD 693 *(German)* 87−63327
sensor signal conditioning circuitry, on-chip type, influence on IC performance 87−70538
sensors, semiconductor types, integrated device developments *(German)* 85−64094
sensors, structs. and integrated signal processing features *(German)* 85−47927
sensors based on electrets 85−58663
SENTPEX, functional test pattern extractor for semicustom ATE 86−58575
servo electronics ICs for compact disc player 85−42790
servomotor IC, Motorola MC33030, characts. and overload protection *(Italian)* 87−53603
SGS-Ates L497 type IC, characts. and appl. in petrol engine electronic ignition systems 87−31057
shapable block placement for IC layouts, simulated annealing-based algorithm 88−64677
Si-monolithic microwave prescalar IC 85−1049
Siemens IC for satellite TV receiver *(German)* 86−24050
Siemens PSB4500/01 voice cct. with anti-clipping/AGC features, config., operation and characts. *(German)* 88−67150
Siemens SAS 231 L IC for contactless meas. of high currents *(German)* 85−52802
Siemens VENUS design system cell library using gate arrays *(German)* 85−11154
Sierra Semiconductor, IC simulator 87−25377
sigma/delta A/D convertor, 120 kHz baseband width, echo canceller front-end appl. 87−17185
signal conditioning circuit for remote interface between sensors and current loops 86−5177
signal processing and decoding ICs for stereo audio channels in TV-receivers, *(Italian)* 86−24049
signal processing IC for NTSC colour TV-receivers, AN5155K, config. and specifications *(Japanese)* 86−55423
signal processor IC for implantable neurophysiological telemetry system 86−38788
signal processor integration *(French)* 86−14271
signal processor series SP50, ICs *(German)* 87−46061
signal processors, comparative study 85−61312
signal-processing linear ICs for VHS VCRs *(Japanese)* 87−13972
signal-processing LSIs for high-quality TV receivers *(Japanese)* 87−49278
silicon compilation 87−38414
silicon compilation speeds design of complex chips 85−33563
silicon compiler spreadsheet 87−25410
silicon compilers, GENESIL 87−1666

static RAM, high-speed, using BiCMOS technology 88−763
static RAM overview of offering up to 256 kbit densities 87−46049
STEM: an IC design environment based on the Smalltalk model-view-controller construct *(German)* 87−67462
step motor chopper drive, UC3717 IC and LC filter, EMI and loss reduction 85−16290
stepping-motor IC for bipolar operation, control engng. appls. *(German)* 86−51657
stereo systems using semi-custom ICs, design 85−37364
STL's diode laser, review *(Dutch)* 85−18918
stripe-formed resistor zone 85−29282
structured custom design at Gould AMI Semiconductors 86−46495
sub-100 nm pattern fabrication in e-beam lithography 87−11917
submicron analogue ICs, trends and perspectives 88−39639
submicron devices, 1D Monte Carlo simulations using collocation methods 86−21479
submicron technology, developments *(German)* 86−47652
submicron VLSI memory cells/devices with alpha-particle induced soft errors, effective funnelling length study 87−25490
subscriber line interface, monolithic 70 V chip 86−4381
subscriber line interface circuit (SLIC) for digitalexchanges 86−10861
subscriber loops, 160 Kb/s transceiver for digital communications 87−62739
substrates, thermal characts. simulation 88−39619
supercomputer and high-performance appl. , semiconductor technology challenges 88−71654
surface emitting lasers for optical circuitry, interconnect technology 88−72327

monolithic integrated circuits continued
surface mount devices, moisture resist. improvement by ion-exchange process 88−1766
surface temp. distrib. mapping by holographic interferometry 87−18232
susceptibility to single event upset from heavy ions 86−35770
Swiss market *(German)* 88−269
switch level IC compiler 88−26467
switch mode power supplies, monolithic IC fabrication development 85−28379
switched capacitor AF oscillator with precision amplitude control, design and performance characters. 85−44918
switched capacitor chrominance base-band delay lines for colour decoders 88−15758
switched capacitor circuits, capacitor struct. and fabrication for tracking improvement 85−17638
switched capacitor IF filters *(German)* 86−20691
switched capacitor PLL realisation in monolithic IC form *(Japanese)* 87−10739
switched capacitor semicustom IC CAD 88−57772
switched-capacitor ccts. employing reset cycles, floating integrator technique 86−14340
switched-capacitor filter, low-pass performance limitations 86−57941
switched-mode power supplies gain improvements from IC technology 85−54651
switched-mode power supplies with multiple outlets, appl. of L296 and L4960 monolithic devices *(Italian)* 86−52657
switching mode power convertor, LT 1070 monolithic chip set with overvoltage prevention *(German)* 86−52648
switching module, UAF1780, Thomson-CSF loss-low device *(German)* 87−10654
switching regulator IC with integral power transistor, L296 device, design and characts. *(German)* 85−33633
switchmode power supplies and power converters. appls. of power ICs conf., Munich, Germany (June 1986) 87−43781
SX1601 and SX1602 LSI chips for fast moving dialogue between drive and controller 85−61953
SYCO silicon compiler and its environment 88−7696
Symbad symbolic layout system for IC design 86−58507
symbolic approach to building block routing 88−71681
symbolic layout tool for BIMOS 88−63477
synthesis, ADL algorithmic design language 85−1671
system-level simulation model, custom and ASIC components design 88−57787
tactile imager based on capacitive cell 85−58559
talking chips, IC speech synthesis, book 85−5637
TAXI chipset for parallel/serial conversion in high-speed data links and LANs 87−48757
TCA 1560/61 simplifies control of bipolar stepper motors 87−51262
TCA 785, for phase control of thyristor rectifier converter, cct. 86−20296
TDA1072A integrated AM receiver circuit 86−4812
TDA2086 and TDA2088 ICs for triac phase control *(Italian)* 87−36976
TDA2562, TDA2563 vertical scanning circuit *(German)* 87−70222
TDA3562A colour decoder chip for TV sets 88−7673
TDA 1072 A chip for AM receiver ccts. *(German)* 85−47655
TDA 2561 and TDA 2651, vertical scanning circuit, voltage supply *(German)* 87−76965
TDA 4601, SMPS with three output voltages appl. 88−44050
TDA 4716 for potential-free transmission of DC voltage signals using PWM 87−54843
TDA 5660P modulator chip from Siemens *(German)* 86−27152
TDA 7000/7010T single-chip FM receivers, for mono and stereo 85−14425
TDA 7272 controller IC for DC motor speed regulation *(Italian)* 87−43055
TDC1012 12-bit D/A converter chip races at video speed 85−61322
technical databases in electronics *(German)* 88−50906
technological trends *(German)* 85−29270
technology adaptable design rule database system 87−6843
telecommunication devices, development trends, review *(Dutch)* 88−59443
telecommunication ICs, measuring and constructional problems *(Polish)* 88−13527
telecommunications technology, overview 88−8950
telephone analogue line interfaces IC with adaptive transmission and extra facilities 87−34223
telephone call progress detector, four-channel narrow-band type, chip implementation 86−10865
telephone equipment multiterminal IC TAB for space saving *(Norwegian)* 88−38955
telephone modem on chip *(Italian)* 86−69503
telephone ringing call IC SAA 1094-2 with ceramic resonator connection *(German)* 86−30466
telephone set functions, Siemens ICs 88−59881
temperature influence on basic elec. parameters of sensing ICs *(Polish)* 85−3947
temperature meas. and sensing devices, monolithic type, characts, operation and performance *(Spanish)* 86−55622
temperature sensing with monolithic devices 87−8608
temperature sensor IC, LM35, design and characts. 85−58654
temperature sensor IC, pre-calibrated, Texas Instruments STP 35 device *(German)* 85−52723
temperature sensor series 86−44282
temperature sensors, Honeywell TD series, monolithic devices with Ni-Fe alloy resistive element *(French)* 85−47930
temperature sensors, modern devices *(Dutch)* 86−17924
temperature sensors, overview 87−21020
temperature sensors, semiconductor 86−24478
tensometric force sensor, electromechanical balances appl. *(Czech)* 85−42949
terminating SLIC and data access chip for modems and PBX trunks 87−20296
TESLA MDA ICs for PAL/SECAM colour decoder *(Czech)* 86−4825
testing techniques, signature analysis *(Polish)* 87−25404
Texas Instruments CAD system for half fabricated ICs *(Swedish)* 85−50627
Texas Instruments TMS 7000 monolithic microcomputer, programming *(Spanish)* 85−17473
thermal analysis, TXYZ computer program 85−1668
thermal trends in component level packaging 85−29233
thermionic IC for hostile environments, appl. to flip-flop 86−35765
thin film integrated solid-state sensors, review 86−65176
thin film resistors on Si ICs, functional laser trimming 87−18233

monolithic integrated circuits continued
third-generation motor driver ICs, clocked current control *(German)* 88−7645
Thomson integrated circuits for colour TV and VCRs *(German)* 87−70197
three layer router for VLSI layout 88−26445
three phase brushless DC motors, direct drive and control using monolithic IC 87−51236
three-bit monolithic phase shifter at V-band, design and performance 87−59889
three-dimensional ICs, device quality Si and SiO_2 layer process, CVD 85−61973
three-dimensional ICs, trends in design, architecture and fabrication technology, review 87−25450
three-stage resistive-feedback amplifier for 2 to 8 GHz band 86−41323
three-terminal wide-range temperature transducer with microcomputer interfacing on-chip circuitry 87−29109
thyristor phase control IC TCA 785, config. and AC-DC power convertor appl. *(French)* 87−44530
time and freq. domain testing different methods of deconvolution for electron beam measured waveforms 88−39583
time dependent dose enhancement effects on integratedcircuit transient response mechanisms 86−35774
TMS 32010 digital signal processing chip 85−45796
tone decoders, parameters and characts. *(Spanish)* 85−1666
transfer phenomena in semicond. devices and structs., num. anal. using universal program 87−38174
transformer coupled high-density circuit technique for MMIC 85−1050
transparent latch as a current element, microprocessor architecture appl. *(French)* 85−11362
trench planarisation process 87−11843
tunable oscillators with operational transconductance amplifiers, realisation in IC form 85−6218
TV power processor IC master slave concept 86−11261
TV receivers using digital technology, ICs from Thomson Semiconductors *(Italian)* 86−24048
TV VHF/hyperband tuner ICs 87−20690
two-port BiCMOS SRAM, 4 K×1 bit, 4 ns access time 88−63685
two-wire ratio-frequency converter, integrated design for sensor bridge signal conditioner appl. 87−24391
U2400B IC for accumulator charging control *(German)* 88−75716
UAA4002 for transistor power switch protection and control *(French)* 87−6667
UART, Intel 8256 *(French)* 87−59676
UC1860 IC for resonant mode power circuits control 88−50025
UC3906 dedicated IC for lead acid battery charging 86−26114
UCN-5804B smart BiMOS IC for improved unipolar stepper motor drive 88−49187
ULN-3750 family of power op. amps. simplify drive circuits 86−750
ULSI, microfabrication technology progress *(Japanese)* 87−74368
ULSI and WSI application specific ICs 87−1669
ultra high speed SLI devices, interconnect struct. study *(Japanese)* 88−7665
ultra-high-speed VLSI devices, structs., fabrication props. and developments, review *(Italian)* 88−20152
uncooled Reticon detector for Mauna Loa Solar Observatory Mark III K-coronagraph, stability and calibration 85−52653
unified design methodology and device architecture for multi-generation ASIC applications 88−71690
unipolar MMICs, coplanar waveguide and slotline struct. for hybrid device-realisation 87−52835
UNITE IC for linking ISDN and terminal equipment 88−20015
UNITE network-interface chip for ISDN terminals 87−69451
universal state-variable switched-capacitor filter ICs 88−70893
US Army frequency agile synthesizer program 87−23986
US Department of Defense, IC appls. reevaluation 85−23874
US military standards for ICs 87−6775
US Semiconductor Chip Protection Act of 1984, legal protection of mask work 86−15245
US semiconductor industry, current-trends, memory, logic, analogue, IC and power MOS products *(German)* 87−11836
USA-Japan semiconductor chip agreement, implications 87−36388
user-friendly CAD tools for microelectronics development *(German)* 86−629
user-specific ICs, procurement, vendor-customer relationship 88−50080
user-specific ICs developments in 1990 market 87−6819
user-specific integrated circuits *(German)* 88−1704
V/F convertor, AD650, appl. in low-phase noise freq. synthesizer *(German)* 86−46598
VA5470 BiMOS-E op-amps, bridge oscillator ccts. 88−63532
VAL: an annotation language for VDHL 88−26447
variable delay digital-to-time convertor, for pulse generation and time domain meas. 87−70533
variable phase shifter with operation into MM wave regime 86−58054
variable radix multistable integrated electronics, anal., implementation and performance 85−23916
VC2305 VLSI chip, protection of software and data *(German)* 87−18200
vector signal processor, VSP, using monolithic DSP IC 87−59570
versatile schematic capture set for custom-IC designers 87−53590
vertical structure, SEM investig. 85−50608
very high performance IC (VHPIC) development, UK Alvey programme 86−58585
very high performance ICs for radar, guidance and avionic systems, conf., Lisbon, Portugal (May 1985) 86−57113
very high-speed LSI/VLSI ccts., crosstalk anal. and reduction technique 85−23877
very high-speed LSI/VLSI chips, interconnection delay anal. using MIS microstrip line model 85−23878
VHSIC, French CITGV development programme *(French)* 88−6713
VHSIC, US Department of Defense R&D programme 86−58584
VHSIC developments in 1979-88, for military appls. *(Czech)* 87−67355
VHSIC programme of US DoD, technological developments 85−40806
VHSICs, appls. in US Army systems 85−23914
via sidewall shaping by projection image degradation 86−47658
VIDEL, Vendor Independent Design Library for ASICs 88−70616
video A/D and D/A convertors, Hitachi high-speed LSI device family 88−32279
video A/D convertor, 8-bit, high-performance monolithic design 87−24284
video absolute-value convertor *(Chinese)* 85−982
video D/A convertor, TDC 1018, high-resolution colour graphic system appl. *(German)* 86−1139

monolithic integrated circuits continued
video shift register with FIFO, 300 MHz bipolar-CMOS device *(German)* 87−59416
video-switch amplifiers, monolithic configs. and appls. 88−587
viewdata decoder in Switzerland, by Loewe Opta *(German)* 86−59588
VLACH−very large analog circuit hierarchicalsimulator 86−58565
VLSI, design methodology for defect tolerant integrated circuits 88−71693
VLSI, impact on radiation hardness of IC technologies, impact of VLSI 86−58587
VLSI ASIC technology 87−67368
VLSI CAE system for custom IC design 85−18436
VLSI cct. CAD *(German)* 87−60560
VLSI ccts., conference, Karuizawa, Nagano, Japan (May 1987) 88−6119

VLSI simulation program macro structures *(Italian)* 87−32657
VLSI technologies for military appls., comparison of radiation hardness 86−58586
VLSI testing, book 87−51715
voiceband 15 b interpolative converter chip set for digital codec appl. 87−20297
voiceband modems, line and receiver interface cct. for 4800 b/s 87−62756
voltage comparators, technology update 86−27498
voltage convertor IC, Siliconix SI 7660, design and charact. *(German)* 87−37487
voltage reference, MAC-01 monolithic IC *(Czech)* 87−5650
voltage reference circuits, principles and performance requirements, monolithic/hybrid device market survey *(Spanish)* 85−39916
voltage regulator, low voltage drop, LM2931 *(German)* 85−22634
voltage regulators, vertical PNP VLD type *(German)* 87−59144
voltage regulators SGS LX490X series, config. and Features, microprocessor appls. *(Italian)* 87−44545
voltage transients damage level, report 85−61877
voltage-controlled bipolar-MOS ring oscillators 87−73357
voltage-to-frequency convertor 88−38654
VTI compose−a powerful graphical chip assembly tool 85−45819
W-band monolithic balanced mixer 86−27630
W-band monolithic balanced mixer using Schottky barrier diodes 86−8476
wafer defect inspection system 86−26658
wafer dicing, automation trends 85−62026
wafer electrical test system, Lomac LM-80V, voltage sense and capacitance meas. 85−35106
wafer pattern inspection, automation, microlithographic process appl. 85−7051
wafer probing/inspection trends with increased densities 86−63365
wafer scale arrays, switch fault diagnosis 87−38458
wafer scale integration 87−1668
wafer scale integration; CAD and fabrication technology 85−62033
wafer scale integration, advantages and disadvantages 85−18402
wafer scale integration logic testing and diagnosis 85−40059
wafer-scale integration, modelling of performance parameters 85−40868
wafer-scale packaging technology 87−5241
water cooling, mini Conformal Cold Plate 85−191
waveguide switch using monolithic diode array, high-power broadband design for 35 GHz 85−17864
Winchester disc drive, servo signal and data path processor family 86−8345
Winchester drive control, analogue/digital chips 85−768
workstation approach to IC process characterization 86−41923
WSI: an enabling technology for systolic arrays 87−719
X31 high-speed data switching chip 86−4437
X-band analogue ccts. of third-generation MMICs from ELAB 87−11061
X-band high performance monolithic power amplifier using all RIE etch process 88−19407
X-band MMIC designs *(French)* 88−56941
X-band monolithic phased-array-radar T/R module, manufacturing cost anal. 88−9644
X-band monolithic series feedback low noise amplifier, three-stage, design and charact. 86−27596
X-band monolithic series feedback low-noise amplifier 86−8471
X-ray lithography, microfabrication of integrated circuits 86−63378
XTR 101 monolithic cct. for temp. meas. linearisation of Pt resistance thermometer *(German)* 88−74312
yield analysis modeling, design rule checker 86−20215
yield estimation for analogue ICs 87−74340
yield forecasts, crit. area modelling 85−61984
yield model for wafer processing line 87−25400
yield modelling, interval estimates 87−1587
yield models with defect number depend. 85−50643
YNCC: a new algorithm for device-level comparison between two functionally isomorphic VLSI circuits 87−38459
Yugoslav semiconductor industry, historical development and microelectronics state-of-the-art *(Slovenian, English)* 87−46062
Zener diode LM199 IC, on-chip temp. stabilisation, struct. and appls. *(Spanish)* 85−45788

monolithic integrated circuits continued
Zenith multichannel sound-demodulator IC for US TVsystems, M51376SP device *(Japanese)* 86−38022
Al encapsulated fine line interconnect, stress anal. 87−60514
Al interconnections, impedance in the 1 MHz to 1.3 GHz freq. range, expt. study 86−21766
Al metallisation corrosion, failure anal. 87−65220
Al-$CrSi_2$-Al_2O_3 thin film resistors fabrication 88−7218
AlGaAs-GaAs monolithic matrix-addressable visible LED arrays 86−63729
AlInAs-GaInAs resonant tunnelling diode based eleven-bit parity generator 88−50096
Ar, HgCdTe thin stripes recrystallisation 87−3481
$CoSi_2$ temperature-activated switch for IC fabrication 86−41864
$CrSi_2$ thin film resistors, with Al contacts, closed system fabrication, IC processing appl. 85−29303
Cu-alloy based metal DIP with superior thermal conductivity 87−51869
$Fe_{2.70}Ni_{0.14}Zn_{0.14}O_4$ ferrite-dextran multilayer film spray-spin-coating for microwave monolithic IC appls. 88−57922
GaAs 87−32100
GaAs 1 to 6 GHz MMIC linear attenuator with integral drivers 87−73713
GaAs 100 mm diameter wafer substrates for MIMIC manufacture, quality assessment 88−19400
GaAs D/A convertor, 1 GHz operation, design and performance *(French)* 87−66264
GaAs DIC, high-speed multigigahertz, packaging 88−39615
GaAs DIC, high-speed multigigahertz, packaging 88−44106
GaAs FET/Schottky photodiode monolithic integration for 0.8 μm appls. 86−4635
GaAs GA22V10 PLD programmable glue logic array 88−56563
GaAs Gunn oscillators, MM-wave monolithic type, design fabrication and performance 87−59877
GaAs HF switched capacitor filters, implementation developments 87−66368
GaAs IC amps. for radar and radio receivers 86−8524
GaAs IC applications in electronic warfare, radar and communications systems 88−50373
GaAs IC, benefits and appls. *(German)* 86−21637
GaAs IC chip preamplifier hybrid IC, reliability eval. 88−20160
GaAs, IC, dry-processing induced isolation degradation 86−21807
GaAs IC family for high-speed optical communication systems 87−34628
GaAs IC, fast structured logic design 87−10770
GaAs IC high-speed technology in comparison with Si 87−32644
GaAs IC in new Hewlett-Packard oscilloscope type HP54111D *(Swedish)* 87−29164
GaAs IC meas. using electrooptic sampling 88−19398
GaAs IC nonlinear transmission line for picosecond pulse compression and broadband phase modulation 87−32590
GaAs IC pilot line 86−28412
GaAs IC polyimide sloped vias, planarization isolation and etching rel. to process parameters 87−67348
GaAs IC technology and appls., book 88−55814
GaAs IC technology and available devices 86−21629
GaAs IC technology and devices, conf., Boston, MA, USA (Oct. 1984) 85−54034
GaAs IC technology and market developments, from lab to production line 86−2279
GaAs ICS, CAD formulas for cross talk anal. 87−74406
GaAs ICs, I-V charcts. of n-i-n structs. and backgating, effects of impurity compensation 86−9245
GaAs ICs and VHSICs, technological developments *(Dutch)* 86−35741
GaAs ICs, charcts., fabrication technologies and market growth aspects *(French)* 85−55913
GaAs ICs, commercial prospects 86−2352
GaAs ICs, comparison with Si for high speed digital appls. 87−46143

GaAs LSI, commercialising 86−53769
GaAs MESFET low noise 30 GHz amplifier, development 88−50417
GaAs MESFET, low-noise, monolithic integration of surge protection diodes 85−40753
GaAs MESFETs, accurate SPICE modelling 88−26359
GaAs MIC analogue freq. divider, 14 GHz band operation, design and performance 86−8458
GaAs MM-wave IC 86−35109
GaAs MM-wave monolithic FET amplifier 86−41321
GaAs MM-wave monolithic IMPATT VCOs 88−63956
GaAs MM-wave monolithic IMPATT oscillators 86−8479
GaAs MM-wave monolithic dipole antenna, MMIC compatible design 85−19262
GaAs MMIC 30 GHz receiver for satellite feed array appl., design and charcts. 88−19406
GaAs MMIC 6-port active circulator, design, realisation and charcts. 88−71121
GaAs MMIC 60 GHz CW IMPATT oscillator 88−63957
GaAs MMIC SPST switch, design and performance charcts., DC-6 GHz, LSW-210 88−25510
GaAs MMIC VCO, broadband design for 2.5-6 GHz range 88−71071
GaAs MMIC X-band amplifier yield evaluation 87−52871

monolithic integrated circuits continued
GaAs, MMIC active splitter and attenuator, surface mounted packages for 1-10 GHz levelling loop 87−32076
GaAs MMIC amplifier, TGA8061, broadband design for IF appls. 88−1001
GaAs MMIC amplifier for 0.5 to 3 GHz 88−50415
GaAs MMIC amplifier, freq. response meas. by electrooptic sampling 88−19360
GaAs MMIC amplifiers address EW appls. 86−53052
GaAs MMIC amplifiers, high-performance types, high-yield production technology 86−27601
GaAs MMIC applications 87−52824
GaAs MMIC, aspects of microwave device and circuit modelling andmeasurement 86−41353
GaAs MMIC balanced mixers and phase shifters, designs for X-band operation 85−50039
GaAs MMIC based power amplifiers, EG8017, dual device config., broad band 6-18 GHz operation 87−73699
GaAs MMIC broadband SPDT p-i-n switch, 2-18 GHz, design and charact. 87−11033
GaAs MMIC ceramic packages, design aspects 87−52870
GaAs MMIC distrib, amplifier for phased array transmit/receive module, optical gain control/PCM 88−71117
GaAs MMIC distributed amplifier, optical gain control 88−63927
GaAs MMIC elements, gamma ray radiation effects, expt. study 85−55170
GaAs MMIC elements in phased-array antennas 88−71037
GaAs MMIC fabrication, appl. of laser direct writing techniques 88−19408
GaAs MMIC fabrication facilities 86−20836
GaAs MMIC for GPS appls. 88−19388
GaAs MMIC freq. convertors, 8-15 GHz, design and performance 87−59882
GaAs MMIC freq. doublers with series varactors 85−17841
GaAs MMIC frequency converters, system appls. 87−37566
GaAs MMIC front-end for DBS appls., 12 GHz, design and performance *(French)* 86−55416
GaAs MMIC high-performance packages 87−52869
GaAs MMIC image rejection freq. converter, 4 GHz, design and charact. 87−32098
GaAs MMIC, investig. 88−50411
GaAs MMIC layout generator, CAD 88−25444
GaAs MMIC linear attenuator with integral drivers, 1-6 GHz, design and performance 87−59895
GaAs MMIC low-noise amplifiers for radar and communications appls. 85−603
GaAs MMIC, lumped-element components 86−8453
GaAs MMIC macrocell libraries, role in custom cct. design 88−38734
GaAs MMIC manufacture, automatic processes and controls 88−63937
GaAs MMIC manufacture, low cost packaging/reliability testing procedure 87−59902
GaAs MMIC mature technology 87−73669
GaAs MMIC nonlinear modelling and CAD 87−73710
GaAs MMIC, optimum substrate thickness for MM-waves 85−28710
GaAs MMIC phase shifter, 6-bit type, C-band operation, design, fabrication and performance 86−27600
GaAs MMIC phase shifter, L-band, continuously variable config. for radar appls. 88−7048
GaAs MMIC phased array signal distribution system using fibre optics 86−58072
GaAs MMIC power amplifiers, CAD and cct. simulation techniques 85−44914
GaAs MMIC process, microwave prober for yield validation 88−19376
GaAs MMIC, producibility 87−993
GaAs MMIC production, reproducible high yield technology 87−32063
GaAs MMIC reliability anal., microwave systems impact 88−7054
GaAs MMIC reliability and packaging 88−7058
GaAs MMIC research and development 88−12610
GaAs MMIC satellite down convertor, low-noise design for 6/4 GHz band 87−62922
GaAs MMIC satellite downconverter, 6/4 GHz band, low-noise design 87−76693
GaAs MMIC surface-mount package 87−6086
GaAs MMIC switches, driving technique 88−63939
GaAs MMIC system and subsystem appls., special design considerations 86−20845
GaAs MMIC, technology and design considerations 85−17823
GaAs MMIC technology, developments for space communications systems 87−11036
GaAs MMIC testing 88−38745
GaAs MMIC testing, electrooptic sampling meas. with polarised light 88−993
GaAs MMIC transmit/receive radar module for X-band phased array appls. 88−9643
GaAs MMIC wafers, laser chip separation method 88−63968
GaAs MMIC-based RF front-end for DBTV receiver *(Italian)* 86−59989
GaAs MMICS, use of lumped element techniques for yield improvement and size/cost reduction 88−19372
GaAs MMICs, MESFET technology, R&D and appl. 85−40236
GaAs MMICs, Manufacturing Technology for Solid-State Microwave Systems programme, progress report 88−50374
GaAs MMICs, VCO, freq. divider, power splitter for X-band PLL-stabilised local source 86−58051
GaAs MMICs, alloy attachment, expt. study and processing parameters development 88−25481
GaAs MMICs, alloy attachment process, via fracturing eval. 88−25457
GaAs MMICs, amplifiers and phase shifter, L-band radar transceiver appl. 86−35116
GaAs MMICs and bias networks, ionizing radiation transients, circuit response 87−37568
GaAs MMICs, appls. in receiver, amplifier and switch products 87−59862
GaAs MMICs, automated alloy attachment process, reliability eval. 87−59900
GaAs MMICs, automated alloy attachment, solder materials and process study 87−73730
GaAs MMICs, commercial appls. 88−63967
GaAs MMICs, design and realisation using Tektronix's CAD system *(French)* 88−44373
GaAs MMICs, development review and technological forecast 85−50038
GaAs MMICs, developments and appls. 87−37541
GaAs MMICs, fabrication and design, book contrib. 86−8470
GaAs MMICs for MM-wave IC radars 88−19379
GaAs MMICs for communication 86−27620

monolithic integrated circuits continued
GaAs MMICs for digital RF memory subsystems, design and performance 88−25477

GaAs integrated circuit testing using electrooptic sampling 88−38760
GaAs, integrated circuits, radiation hardening developments 85−50658
GaAs integrated circuits, review 85−12319
GaAs integrated driver for LED transmitter 86−43850
GaAs interfaces, unified defect model, appl. to ICs, book, contrib. 87−45692
GaAs laser-driven IC MEL500, development *(Japanese)* 86−58932
GaAs lattice mismatched epitaxial technology on Si substrates, IC appls. 87−25489
GaAs linear MMIC technology 86−41319
GaAs logic IC, fast, interconnection effects 85−54834
GaAs logic ICs, present status and R&D *(German)* 85−11159
GaAs logic and memory ccts., trends for high performance digital system appls. 87−59443
GaAs low cost monolithic ICs boost system performance 87−11057
GaAs low noise distributed amplifier with gain control 87−73722
GaAs low-loss *Ku*-band monolithic analog phase shifter 87−37554
GaAs low-noise MESFET monolithic amplifier, ion-implanted 87−73721
GaAs market outlook for digital ICs 86−8080
GaAs, material props, devices, and ccts., book 86−7372
GaAs, material props., devices, and VHF appls. *(French)* 86−35310
GaAs microelectronics, book 87−43759
GaAs microwave amplifier IC, distributed, 2 to 8 GHz, design 86−53050
GaAs microwave ccts. for defence electronics appls. 86−20835
GaAs microwave foundry chip, Europe's first 87−73668
GaAs microwave p-i-n diodes, surface orientated type with shallow trench struct., MMIC appls. 85−55167
GaAs microwave power MESFET, theory and practice 86−14500
GaAs millimeter-wave diode-grid phase shifters 88−50366
GaAs monolithic 6-18 GHz medium power amplifier 85−1056
GaAs monolithic DAC with on-chip current sources, 8 bit, design and charact. 87−31971
GaAs monolithic HF modulator IC for laser diode noise suppression 86−68600
GaAs monolithic Hall IC high-temp. position sensor, design automotive electronics for app. 86−38372
GaAs monolithic I-Q demodulator for microwave freqs. 85−1047
GaAs monolithic IC 6-4 GHz transponder for INTELSAT, design 86−55281
GaAs monolithic ICs, conf., Portland, OR, USA (Oct. 1987) 88−18324
GaAs monolithic ICs for military radar design 87−3232
GaAs monolithic IMPATT diodes for MM-wave appls. 85−34173
GaAs monolithic IMPATT oscillator, Q-band, MBE fabricated, design and performance 88−19403
GaAs monolithic MIC amplifier with 10-GHz bandwidth, resistive feedback, direct coupled 85−1051
GaAs monolithic MIC design procedures 86−47074
GaAs monolithic MIC design using EM field theory 88−12620
GaAs monolithic MIC manufacturing technology 85−34190
GaAs monolithic MICs, technology, CAD and ATE in last decade, review 85−34197
GaAs monolithic MICs, through substrate via holes, dry etching 85−28712
GaAs monolithic MICs, transmission line line modelling and charact. 87−6109
GaAs monolithic Schottky junction pairs for W-band crossbar mixers 87−66523
GaAs monolithic VCO, 14 GHz band, appl. to microwave PLL *(Japanese)* 86−27617
GaAs monolithic analogue frequency halver for 12 GHz 86−62823
GaAs monolithic digital phase/freq. discriminator, design and performance, PLL appl. 86−34629
GaAs monolithic distributed amplifier, 1 to 20 GHz, cascaded chip hybrid appls. 88−38741
GaAs monolithic downconvertor using UHF LO/mixer config., TV tuner appl. 86−38031
GaAs monolithic integration, guided wave device design and fabrication 85−29732
GaAs, monolithic integration of MSM photodiode and preamplifier 85−18819
GaAs monolithic microstrip balanced mixer, planar, 94 GHz 85−1060
GaAs monolithic microwave broadband feedback amplifier designtechniques 86−1379
GaAs monolithic microwave switch, SW-200, design and performance *(German)* 87−11035
GaAs monolithic multistage X-K_u-band amplifier, 6-18 GHz 85−1028
GaAs monolithic nonlinear transmission line with Schottky varactor diodes, ps elec. transients generation 88−20022
GaAs monolithic nonlinear transmission line, 3.5 fall-time shock-wave generation 88−56917
GaAs monolithic phase quantisation sampler, 3-bit, design, charact. and appl. 87−59668
GaAs monolithic power amplifiers, developments for microwave freq. appls. 86−35113
GaAs monolithic slow-wave variable phase shifter, cryogenic operation, expt. study 87−73688
GaAs monolithic transferred-electron devices formillimeter wave applications 86−8504
GaAs monolithic travelling-wave divider/combiner for 10-30 GHz freq. range 86−1361
GaAs monolithic wideband amplifier for 0.05 to 2.0 GHz band *(Czech)* 88−12600
GaAs monolithic wideband low noise RLC feedback amplifiers, design 85−11064
GaAs multi-GHz digital ICs, low-cost packaging 88−50119
GaAs multilayer MMIC design, CAD tool and interpolation technique 86−14528
GaAs multiplexer and demultiplexer, 10G040/41, designs for 2 GHz data rates *(German)* 86−55083
GaAs on Si, development 88−50918
GaAs optoelectronic integrated receivers, high-speed response charact. study 86−43820
GaAs p-i-n diode monolithic transmit/receive switch for millimeter-wave application 88−19404
GaAs patterned MBE growth on Si for monolithic integrated devices 88−49811
GaAs photoconducting pulse generator, picosecond response, monolithic design for ultrafast device testing 85−12752

monolithic integrated circuits continued
GaAs photoconductive detectors fabricated in heteroepitaxial layers 87−46706
GaAs photoconductors and FET, monolithic integration 86−58850
GaAs planar detector-amplifier circuits 88−25025
GaAs power monolithic MIC, Ka-band, source island via hole structure 86−27626
GaAs radiation-hardened digital ICs 86−34646
GaAs single balanced diode X-band monolithic mixer 85−34200
GaAs slow wave monolithic struct. realisation by ion implantation 87−45273
GaAs solid state 15 W 14-14.5 GHz power amplifier, development 88−50416
GaAs structure fabrication for FET and monolithic circuits by ion implantation 85−55671
GaAs substrates, arbitrarily shaped microstrip discontinuities, dynamic charact. 88−50401
GaAs switch modules for high performance applications 88−56942
GaAs systems, multiple component problem 86−53770
GaAs technology, application in high speed digital computation 86−47308
GaAs technology for MMICs and high-speed digital ICs, developments and economic forecast, review 86−21692
GaAs technology insertion in high performance digitalsignal processor design 87−5918
GaAs three-stage 30 dB MMIC amplifier for satcoms 85−37001
GaAs ultra high speed divide-by-4 prescaler IC, development *(Japanese)* 87−73376
GaAs ultra-high speed ICs, chip-carrier packages 85−45787
GaAs wideband phase-detector for homodyne reception 87−73723
GaAs/$Al_xGa_{1-x}As$ 3D ICs, selection rule for epitaxial growth techniques, LPE, MOVPE and MBE 87−23635
GaAs/AlGaAs LEDs, integration with Si MOSFETs on monolithic GaAs/Si substrates 87−46733
GaAs/Si and GaAs/SOS photodetectors, ps response, MBE fabrication and charact. 86−48286
GaAs/Si monolithic integration, recent developments 85−35127
GaAs-based VLSI, depend. of interconnection delays on driving mechanism 87−74347
GaAs-on-Si IC technology 88−39644
GaAs-on-Si technology, review of recent advances 88−44846
GaInAs-GaAs, planar monolithic integrated photoreceiver 86−63733
GaInAs-InP monolithic photodetector arrays for high-density WDM appls. 88−73906
$Ga_{1-x}In_xAs$-InP integrated PIN-FET, growht by MBE and device results 85−49561
GaP super-high brightness monolithic green LED flat display device, development *(Japanese)* 88−42235
HgCdTe MIS IR detectors, monolithic, floating-diode sense mechanism 87−8530
InAlAs/InGaAs heterostructure, Schottky photodiode and MESFET monolithic integration 88−64627
InGaAs PIN photodiode monolithically integrated on InGaAlAs ridge waveguides 88−45329
InGaAs p-i-n photodiode, high speed, grown on semi-insulating INP substrate suitable for monolithic integration 85−2155
$In_{0.53}Ga_{0.47}As$ p-i-n amplifier struct. for monolithically integrated optical receiver front-end 88−73921
InGaAs/InP p-i-n photodiode and InP MISFET, monolithic integration on stepless substrate 86−54055
InGaAs/InP:Fe monolithically integrated photodiode JFET 88−72220
InGaAsP/InP transmitter OEICs, monolithically integrated, devices and technologies 88−73976
InP based integrated optoelectronics, Esprit programme activity 88−40099
InP digital ICs, technology and commercial/military appls. 85−29306
InP for microelectronics technology *(French)* 87−25369
InP monolithic integrated circuits for MM-wave applications 85−6528
InSb IR staring imaging array 88−22655
$PbTiO_3$ thin film IR sensor, monolithic integrated pyroelectric 85−43003
Pd_2Si Schottky barrier detectors, monolithic IR imagers appl. 88−29454
PtSi Schottky barrier detectors, monolithic IR imagers appl. 88−29454
Si IC design at CNET *(French)* 86−34443
Si IC image sensors, single neutron interaction effects 86−38268
Si IC, interconnections on chip, side and bottom wiring 86−9197
Si IC, on-chip picosecond pulse generation and sampling using photocond. cct. elements 85−62465
Si IC sensor for temp. difference meas., based on Seebeck effect 85−42950
Si IC transducers and appls. *(French)* 86−24509
Si IC wafer test system *(German)* 88−24520
Si ICs and solder, component appls. *(German)* 87−44990
Si ICs, comparison with GaAs for high speed digital appls. 87−46143
Si ICs, developments and limits to growth *(German)* 85−12346
Si ICs, laser customization 87−53659
Si ICs, reliability and faults *(Italian)* 87−46044
Si ICs, transient response modelling for ionizing radiation 85−18398
Si MBE, strain-layer epitaxy to device appl. review 85−39766
Si MM-wave IC SPST switch 85−6518
Si MM-wave ICs for receivers and transmitters 88−63958
Si MMIC wideband power amplifiers, design and performance 87−37575
Si MOSFETs, integration with GaAs MESFETs and with GaAs/AlGaAs LEDs on monolithic GaAs/Si substrates 87−46733
Si VLSI circuits, impact on microelectronic systems 85−7037
Si VLSI device and cct. simulation of transient behaviour 86−21647
Si accelerometer technology, on-chip signal processing 87−29105
Si and GaAs MMIC technology, Earth-terminal design benefits 87−8230
Si chip, direct formation of solder bump on Al pad using ultrasonic soldering *(Japanese)* 88−26415
Si chip etching process using cathode chamber 85−23868
Si chip reliability, thermal fatigue investig. *(French)* 88−26379
Si, custom design 88−50913
Si diaphragm monolithic pressure sensor, KP100A, design, construction and appls. 85−20588
Si electronic components, devices and technologies evolution prospective *(French)* 86−41855

filtering, weighted normalized frequency domain LMS adaptive algorithm 88−66472
fluorescent lamp radiative transfer calc. by Markov statistics 86−52030
focused ion beam implantation, 2D distrib. of secondary defects 88−57436
focused ion beam implantation, alignment mark deformation by MBE overgrowth 87−53359
focused ion beams, diameter measurement 87−50081
frequency-hopping networks, Monte-Carlo mutual-interference-anal. algorithm 86−30608
functional inequality set solution 85−28089
furnace slab, radiative scattering effects 87−58499
future observations prediction intervals from inverse Gaussian distrib. 87−23404
gamma distributions, with unknown location and scale parameters, goodness-of-fit tests 85−22310
gamma ray bursts, methods for periodicities determ. 88−52409
gamma reliability data, fitting and optimal grouping 88−31542
gas blast circuit breaking arcs, Monte Carlo simulation 86−26217
gas Cerenkov detectors, Monte Carlo simulation 85−43244
gas mixtures, Monte Carlo calcs. of electron transport 87−63635
gas sampled hadron calorimeter, Monte Carlo simulation 88−29902
gas turbine safety improvement through risk anal. 88−75478
Gaussian channels, frame synchronisation 87−75686
generalized multi-loop feedback switched-capacitorstructure, filter design and sensitivity anal. 86−57957
generating system adequacy eval. using Monte Carlo simulation model 88−31616
generating unit unavailability impact on system heat rate, Monte Carlo simulation 87−9364
geothermal power development economics, GEVA venture analysis model 87−78535
hadron calorimeter, Monte Carlo simulation of response to 3.5-200 GeV/c protons, CALOR computer code 85−64477
Hankel matrix, standard, model reduction with alternatives 88−43761
HEMT, electron transfer dynamics between adjacent channels, Monte Carlo calc. 88−7636
HEMT, electron velocity distrib., ensemble Monte Carlo method calcs. 85−50539
HEMT, Monte Carlo study of quasi 2D electron gas 86−58489
HEMT and IGFET drift vel. characts. simulation, high-speed operation at reduced dimensions 88−33252
HEMT aspect ratio phenomena, 2D ensemble Monte-Carlo simulation 86−63339
HEMT modelling, importance of low-field drift vel. characts. 87−38263
HERA beam dump design, hadronic showers, Monte Carlo simulation for 40-1000 GeV 88−68178
heterojunctions, 2D electron dynamics *(French)* 88−19696
heterostructure growth by MBE, growth approaches to improve interface quality 87−266
HF digital transmission systems, computer simulation, use of importance sampling 87−28229
hierarchical clustering methods, Monte Carlo comparison on random data 86−30011
high pressure Xe gas time projection chamber, electron trajectories, Monte Carlo simulation 87−29477
HJBTs and HEMTs ballistic transport 88−39518
hodoscopic hadron and photon scintillation calorimeters, radial distrib. of shower energy release 87−50163
hot electron transistors, ballistic transport props. simulation 88−26347
hot-electron transistor employing supercond. base 87−68000
hot-wire calibration using Monte Carlo technique 85−15083
Hubble Space Telescope reliability and maintenance simulation 86−60870
human-body currents, elect. induced, Monte Carlo calc. 88−16794

Monte Carlo methods continued
HV electron beam lithography for thick resists and high resolution 87−38025
HV fields 3D calc. by floating random walk method *(German)* 86−63896
HV supergrid transmission fault data in England and Wales, anal. 85−9483
HV supergrid transmission fault data in SW England and Wales, anal. 86−6306
HV transmission line lightning performance, probabilistic anal. *(French, English)* 87−9210
HV variable-shape electron beam lithography systems, electron energy spread 88−26122
hybrid elements production simulation 88−18564
hydroelectric power plants, series connected, installed capacities selection using dynamic programming 85−9776
hydroelectric power system, composite power generation/transmission reliability eval., CONFTRA model 86−18637

III-V compounds 86−34338
III-V semiconductor, MBE growth with low-energy ion beam, Monte Carlo simulation 88−6444
III-V semiconductor diodes, large-signal charactn. at microwave and MM-wave freqs. 88−25459
III-V semiconductors, MBE grown heterostructs., intrinsic interface quality, thin multiquantum wells 86−415
III-V semiconductors, MBE growth kinetics, step density, RHEED studies 88−43871
III-V semiconductors, MBE growth Monte-Carlo simulations, RHEED intensity dynamics 85−39737
image correlation at low light levels, computer simulation 85−2873
image processing at low light levels, Monte Carlo method 86−3941
image recognition in presence of laser speckle 86−64344
image reconstruction from coded data, algorithms 85−36343
image restoration, adaptive trimmed mean filters 88−73185
image-recovery algorithm evaluation based on task performance 88−21356
IMPATT diodes, MM-wave, impact ionisation, particle simulation 85−50045
importance sampling in analysis of detection systems 88−34723
importance sampling simulations, optimisation, radar clutter appl. 88−27908
importance sampling technique for efficient simulation of digital communication system 88−34531
inductively coupled line systems, interference computation and Monte Carlo optimisation for compatibility guarantee 86−15939
inorganic materials for luminescent solar concentrators, Monte Carlo analysis methods 86−22228
InP, impact ionisation, Monte Carlo simulation 86−41537
insulator in vacuum, Monte Carlo simulation of charge distributions *(German)* 87−15335
integer factoring, Monte Carlo method, expectation of success 85−5918
interconnected power systems, optimal energy transactions, linear programming and Monte Carlo methods 86−18639
interference minimisation in a radiocommunication network, use of Monte Carlo and iterative methods *(Czech)* 88−67505
interior lighting design using Monte Carlo simulation *(Japanese)* 88−11485
inverse follow-the-leader feedback switched-capacitor structure 85−939
investment optimisation in project represented by Graphic Evaluation and Review Technique network 85−28145
ion beam stencil masks, contrast characts. 86−35499
ion chamber response to ^{60}Co, Monte Carlo simulation, interface anomalies 85−48362
ion chamber response to ^{6}Co, Monte Carlo simulation, wall correction factors 85−48363
ion implantation, 2D modelling with allowance for position depend. lateral moments 87−45772
ion implantation, 2D Monte Carlo simulations 87−6559
ion implantation, recoil phenomena, 3D Monte Carlo simulations 85−23632
ion implantation, theoretical problems 87−1380
ion implantation 2D profiles from 1D projections 86−21366
ion implantation in amorphous targets, Monte Carlo simulation model 87−74190
ion implantation-induced damage profiles, 2D modelling, Monte Carlo simulations 88−32994
ion range and damage 3D distribs. including recoil transport 87−32375
ionospheric radiowave propagation, Monte Carlo methods for statistical problems solution 85−7647
Japanese target systems, Monte Carlo calcs. 86−5761
Josephson junctions, highly hysteretic, percolating network Monte Carlo study 87−74599
Kalman filter/smoother computer program performance testing and validation 85−25942
L-band monopulse antenna, phase integrals evaluation, Monte Carlo and quadrature methods 88−2802
L-estimators in general linear model, numerical behavior 86−66761
Laplace and Mann aging trend test effectiveness 87−44072
large electric power systems, optimally operated, reliability evaluation, Monte Carlo simulation 86−50790
large-scale power systems reliability; eval. using Monte Carlo method 87−30016
laser, multimode CW, transient thermal self-interaction, partially coherent beam spatial statistics 85−24639
laser pumps, Monte Carlo method calcs. 86−9718
laser tomoscopy simulation in heterogeneous biological medium 86−60758
lateral surface superlattices, hot electrons, high freq. appls. 86−21231
layered materials, implantation process, Monte Carlo simulation 87−60291
LED, Monte Carlo model, minority carrier recombination and radiation re-emission 88−2136
light beam transmittance through turbid medium, multiply scattered radiation, meas. and calc. contributions 88−20920
light guides for large area scintillation counters, props. and parameters 87−14729
light transillumination through heterogeneous tissues, Monte Carlo model 86−32307
lighting design, technique for computer simulation of illuminated spaces 88−62737
limit distrib. of statistics of criterion of independence of dichotomous vectors 88−18566
linear and nonlinear Kirchoff's laws problems 86−40814
linear recursive adaptive equalization utilizing a modified Gauss-Newton algorithm 87−66382

Monte Carlo methods continued
liquid metal ion sources, virtual source size, Monte Carlo calc. 85−37862
liquid scintillation counter, γ-ray detection efficiency, Monte Carlo calcs. *(Chinese)* 88−68260
lithography, mark detection technology in electron-beam direct writing 85−6790
LOCA safety injection system failure modes *(Chinese)* 86−65843

low energy internal conversion electron source, energy loss angular depend. 88−68194
low-pressure RF glow discharges, transport equation soln. by staggered-mesh finite difference numerical method 88−64165
LWR statistical thermal margin anal., response surface method and Monte Carlo technique 86−56564
magnetic fine particle systems, interaction effects in size distribution, determ. by Monte Carlo method 85−24058
magnetic recording codes, Monte Carlo anal. 85−25025
magnetic tapes, anhysteresis, Monte Carlo calc. 87−46363
magnetic tapes, packing factor and coercivity, Monte Carlo treatment 86−42110
magnetron cathodic sputtering model, mass and energy transfer and thickness distrib. 88−18746
maintained system reliability and availability, confidence bounds determ. using Monte Carlo method 86−34080
manoeuvring multi-target tracking, investigation of correlation region 85−42628
manoeuvring platforms, radio communication between them 85−42501
MARKOV, KETTLE computer codes, system availability assessment, maintenance requirements optimisation 88−10804
MBE films, thickness distribution calc. 87−5424
metal-semiconductor Schottky barrier, current transport, Monte Carlo simulation, rel. to submicron device performance 85−29035
microcircuit components parameters, electrical parameters determ. 87−24648
microelectronics dimensional metrology in SEM 87−35200
microlithography simulation for electron and X-ray beams 88−57562
microvertex detector in FNAL E687 expt., Monte Carlo program and pattern recognition 87−3890
microwave amplifiers, component centering and tolerancing *(Japanese)* 87−73663
microwave device modelling techniques 87−73768
microwave digital radio, space diversity and adaptive equalisation, simulation study 85−52268
misclassification probabilities for quadratic discrimination 87−10246
MISFET structure, injection modulated, two-dimens. Monte Carlo simulation 85−50546
MM waves multiscattering effects, bistatic radar for rain meas., Monte Carlo simulation 88−52229
modelling methods 88−64615
MODFET ensemble Monte Carlo model including thequasi-two-dimensional electron gas 86−53647
modular homogeneous calorimeters electron-hadron separation, algorithm study 88−22921
monomode fibre characterization by numerical simulation of integrating sphere 87−74719
MOS devices, Monte Carlo simulator, MOS^2 88−33209
MOS integrated SC filters, Monte Carlo anal. 87−45051
MOS inversion layer, 2D electron transport, Monte Carlo simulation 88−1457
MOSFET, hot carrier transport, multi-window anal. 87−46011
MOSFET, hot electron energy anal. using high-speed Monte Carlo simulation 88−7617
MOSFET, hot electron gate current, Monte Carlo modelling 87−46010
MOSFET, short channel, surface scattering, Monte Carlo simulation 85−35024
MOSFET, short channel, threshold voltage sensitivity, Monte Carlo study *(Chinese)* 86−41779
MOSFET hot-carrier simulation using high-speed Monte-Carlo method 88−64571
MOSFETs, 0.25-μm, nonstationary carrier dynamics 88−33208
moving average parameter estimation algorithms based on high-order moments, perform. anal. 88−73075
multi stage Monte Carlo optimization applied to circuit design 87−73233
multi-radar tracking simulation 87−28676
multilayer targets, ion implantation profiles, Monte Carlo simulations, analytical models 87−32399
multilevel-multiresolution technique for computer vision via renormalization group ideas 88−52583
multiple PRF pulse Doppler radar, range ambiguity resolution 87−63043
multiple scattering of waves in random media containing non-spherical scatterers 88−52200
multiplier channel, electron gain modelling using Monte Carlo method and generating functions 88−71289
multistage Monte Carlo optimisation for solving nonlinear system of eqns., capacitance example 85−22611
multivariate analysis of variance, test statistic 85−33278
multivariate empirical Bayes classification with nonstationary priors, decision-directed learning strategy 88−3167
multivariate normality of data set, Friedman-Rafsky test 86−3937
muon energy loss mechanisms in 100 GeV-5 TeV region, Monte Carlo simulation, detector design implications 88−74762
muon spectrometer, momentum resolution at TeV energies, energy loss Monte Carlo results 88−4860
MUSIC and Minimum-Norm algorithms, planes waves in noise resolution, statistical performance 86−43226
n-p$^+$-n bipolar heterotransistors, transient electronic processes, numerical simulation 87−38197
nanolithography using high energy electron beams 88−57550
narrowband signals, coherent processing in channels with concentrated interference 86−37053
NASA 30/20 GHz test transponder using multi-h phase coded modulation 86−64940
NE 213 pulse height spectra, appl. of maximum likelihood unfolding method 88−54419
NE-213 scintillator pulse height spectra, Monte Carlo unfolding 88−54420
nematic liquid-crystal display cell, director config. calcs., simulated-anneal method 88−42206
network capacity planning with flow and reliability evaluation using Monte Carlo simulation 87−31332
Monte Carlo methods continued
network design centering, stochastic approx. theory *(Chinese)* 86−62330
networks, efficient tolerance analysis using control variates 85−54585
neutron dosimetry and microdosimetry, digital approach 86−18251
neutron dosimetry and microdosimetry, time-projection-chamber-based, digital approach 88−68256
neutron flux energy spectra calc. from activation and multisphere detector data 85−26800
neutron radiography, edge scattering distortion, Monte Carlo simulation 86−13880
nonlinear equations solution by Monte Carlo simulation 88−63234
nonlinear filtering, Monte Carlo methods 85−51665
nonlocality of the electron ionization coefficient in n-MOSFETs: an analytic approach 88−71554
nonparametric radar detection, suboptimum rank test 87−34640
nonplanar targets, ion implantation, Monte Carlo simulations, analytical models 87−32400
normal distributions, one-sided Monte Carlo tolerance limit factors 88−18565
nuclear plant, common cause failure rate distribs. for Monte Carlo anal. using binomial failure rate model 85−48766
nuclear power plants flammable pool fire damage, probabilistic model 87−4507
offshore oil and gas platform availability analysis 86−61832
on-chip massively parallel Monte Carlo cellular processors, random-number arrays, optical generation 87−39917
optical computing by Monte Carlo methods 85−36376
optical klystron or undulator, Monte Carlo simulation of harmonic generation 87−75153
optics applications 85−56264
optimal coverage of convex regions 87−16512
optimal estimation of time-varying delay 88−73106
optimal sample size for dependent components of random vectors in Monte-Carlo methods I. The two-component case 88−6360
optimisation, global, sequential stopping rules for multistart algorithm 87−72966
organosilicon bilayer resist images, electron beam exposure parameters and etching selectivity 87−38129
p$^+$n junctions, impact ionisation rates, field fluctuation effects, Monte Carlo simulation 87−32299
parameter tolerance design for electrical circuits 88−49966
particle beam fusion accelerator II (PBFA II), vacuum insulator stack failure mechanisms 87−21313
particle beams, charged, fast Monte Carlo simulation 87−39306
particle separation, collision limited OGMS process, Monte Carlo simulation 88−58813
passive position location estimation using the extended Kalman filter 88−14688
path dependent multi-ray propagation model 87−40671
PET, brain phantom MLE reconstruction, Monte Carlo transition matrix, statistical stopping rule 88−61253
PET, scatter fraction, collimation effect, Monte Carlo anal. 88−61252
phase retrieval by Monte Carlo methods 87−51932
phase retrieval by Monte Carlo methods 87−2585
photodiode, fast, time response, carrier diffusion effects 85−62451
photolithography, robust process develop., SAMPLE/Monte Carlo methodology 88−19875
photomultiplier image quality, effect of multidyne-screen system parameters 86−35275
photon-limited laser pulses, arrival time estimate in presence of shot and speckle noise 87−54454
photonic switching modules, rearrangeably nonblocking, traffic capabilities 86−30753
photoproton spectrometer, design, Monte Carlo calc. of transmission function 85−64503
photovoltaic system reliability studies and failure impact simulation 86−45304
planar multiterminal network reliability problem, Monte-Carlo algorithms 86−57531
planar resistors, conductivity fluctuations, model 87−52877
plane wave tone parameters, maximum likelihood estimation 88−27900
plane waves, multiple, angle of arrival estimation 88−72940
PLAs, random pattern testability 88−19097
plasma etch emission endpoint, Monte Carlo simulation 88−7498
PMMA:Si(Be), ion beam exposure characts., Monte Carlo simulation 88−33016
PMMA, ion resist, resolution limits and sensitivities 85−34721
PMMA films, X-ray lithography with synchrotron radiation, photoelectron and Auger electron prod. 86−8923
PMMA on Si, X-ray lithography exposures, Monte Carlo simulation 85−34710
PMMA resist films, energy dissipation, Monte Carlo simulation based on Mott cross section 87−38026
point objects in 2D sampled data, pulse amplitude and position estimation 86−3924
polar semiconductors, transport electrons, diffusion-to-streaming transition 85−40419
polarimetric target model with backscattered EH fields, real-time, statistical approach 88−46041
polymethyl methacrylate ion beam resist, light ion ranges, Monte Carlo calcs. 85−1460
polymethylmethacrylate resist film, X-ray lithography, electron scatt. effects 85−23615
positive contribution Monte Carlo method *(Chinese)* 87−65327
positive photoresists, pulsed laser exposed, percolational develop. and image form., computer simulation 88−13261
positron emission tomograph simulation, high spatial resolution, based on multiwire proportional chambers, imaging capabilities 87−77645
positron emission tomography, coincidence aperture function of narrow BGO crystals 86−60762
positron imaging, electron gamma shower for Monte Carlo calcs. 87−21461
positron imaging camera, EGS code for Monte Carlo calcs. 85−48262
power coatings, optical props. calc. by Monte Carlo methods 88−58333
power distribution function estimation 88−27902
power frequency elec. fields, induced currents in human bodies, two math. models 86−32219
power line induction effects on communication line, Monte Carlo method *(Czech)* 88−48570
power loss estimation for distribution networks using Monte Carlo methods *(Russian)* 88−75165

simulated annealing anal. for optimisation 86−52374
simulated annealing experiments 86−21342
simulated decoding of convolutional code, biasing/weighting procedure 88−21109
simulation of charged-particle analyser line shapes 87−21349
simultaneous import capability planning method accounting for transmission criticality and outage probability, Monte Carlo method 87−9138
single mode fibres, OH-ion content in statistical distrib. of losses in repeater sections 88−41682
single-family home hot water consumption survey and group load prediction 85−60577
single-mode waveguides, propag. props., Monte Carlo simulation 88−33709
slow frequency hopping BFSK system performance, convolutional coding in underwater acoustic media 88−73795
small geometry device physics and technology 87−25325
SOI MOSFET, 0.1 μm, modelling using Monte Carlo simulation 86−63315
solar energy in USA, generation system simulation model 86−12739
SOS resistors, 1/f noise, nonGaussian effects 85−34208
space vehicle nuclear power systems, liquid droplet radiator systems anal. techniques status 85−53116
spacecraft shielding against electron-bremsstrahlung, optimisation 87−71196
spacecraft using nuclear power, liquid droplet radiator for heat rejection system 85−48404
spallation breeding facilities, neutronics calcs. using Monte Carlo methods 87−9324
spatial randomness test based on k-NN distances 85−36325
SPECT, collimator divergence compensation, inverse Monte Carlo reconstruction 88−61277
SPECT, inverse Monte Carlo reconstruction algorithm 85−43359
SPECT, maximum likelihood reconstruction, with Monte Carlo modeling 87−50246
SPECT cone beam collimators, noise characts., comparison with parallel hole collimator 88−61306
SPECT scintillation camera, Monte Carlo methods 85−43355
SPICE, Monte Carlo anal. capability, MESFET ccts. 86−58625

Monte Carlo methods continued
spread spectrum systems, coded antijam performance with nonlinear processing, estimation 85−30882
SSB radio, mode detector 88−3803
SSC calorimetry, physics noise, unbiased events effect, Monte Carlo simulation 88−4830
SSC experiments and Monte Carlo simulations, conf., Berkeley, CA, USA (July, 1987) 88−70002
SSC physics, Snowmass 1986 conf., Snowmass, CO, USA, (June-July 1986) 88−38
SSNTD in cylindrical geometry, detection efficiency for fission isomers, Monte Carlo method 87−3907
static converter semiconductors, junction temp. statistical distrib. calc. using Monte Carlo methods *(German)* 87−30768
statistical cooling, general approach to combinatorial optimisation problems 86−7661
stochastic adaptive tracker based on noise-corrupted space-time meas. process 88−67463
stochastic functional analog-digital conversion, book *(Russian)* 85−60645
stochastic load flow calculation by Monte Carlo method *(Croatian)* 85−38459
stochastic properties of quadrature formulas 88−70289
streamer development 85−1209
submicron devices, 1D Monte Carlo simulations using collocation methods 86−21479
submicron devices, high field transport and advanced modelling techniques 85−34903
submicron devices, hot-carrier high field transport, physics and modelling 87−25197
submicron devices, physics and modeling of hot electron effects 86−21484
submicron devices, transport parameters, Monte Carlo and drift-diffusion models 87−6642
submicron MOSFETs, hot carrier anal., Monte Carlo simulation 88−26254
submicron MOSFETs, impact ionisation effects, Monte Carlo simulation 88−39445
submicron pattern eval., supercomputer anal. 88−71485
submicron semiconductor device modelling 87−67191
submicron-wide deep trenches, reactive ion etched, cavernous undercuts 88−26072
suboptimal filter design with pseudomeasurements for target tracking 88−47194
superconducting proton accelerators, Monte Carlo hadronic cascade calcs. 86−44495
superconductor-base hot electron transistor 86−58713
superlattice APD structs., electron and hole impact ionisation, Monte Carlo calc. 86−22241
superlattice APD structures, optimisation and modelling 87−68284
superlattices, hot electron diffusion study by Monte Carlo technique 87−24873
switched capacitor filters, low-sensitivity realisation using generalised multiple-loop-feedback topology 87−59708
system failure probability eval. using new Monte Carlo method 87−58717
System reliability anal., system component uncertainty importance meas. using Monte Carlo simulation *(Chinese)* 88−231
system reliability confidence limits using pass-fail data, modified Monte Carlo techniques 87−58727
target-oriented optical imagery simulation, Monte Carlo methods 88−21323
TEGFET, real-space transfer, Monte Carlo simulation *(French)* 88−19998
telecommunications link with delta modulation, computer-based optimisation *(Russian)* 85−25009
thermal power plant electric power production costing by Kapas 6 model 85−53538
thermal utilisation schemes for hybrid reactors, Monte Carlo method *(Russian)* 88−48873
thin film deposition in square groove, Monte Carlo simulation 87−5479
third-party financed cogeneration project uncertainty and risk reduction 87−70
three particle expts., data anal., Monte Carlo simulation 88−22935
three-wire transmission network anal. using two-wire generic model 85−25007
thyratron, linear, commutation, modeling, particle simulation 87−60059
time delay estimation for spread spectrum signals usinggeneralized cross correlation 86−10406
time projection chamber, Monte Carlo simulation of positron spectrum of muon decay data 88−61165
trajectory displacement and space charge effect, theory and Monte Carlo simulation 86−1957
trajectory estimation with angle-only measurements usingmultiple sensors 86−69834
transient signals, adaptive detection 87−19649
transition radiation detector at ZEUS, Monte Carlo simulation 88−68240
transmission line multiple refl. noise, periodic or quasiperiodic impedance disturbances, time domain 85−7679
transverse BGO compton suppression shield for Ge γ-spectrometer, expt. and Monte Carlo study 87−14805
tree growth simulation associated with dielectric breakdown 88−26566
tree network perform. anal. using Monte Carlo simulation of perform. Petri nets 88−3323
triangulation ranging, time delay meas. errors modelling by conditional beta density functions 87−69123
TRIUMF neutron source, gamma shower heat-up effects 86−5765
turbomolecular vacuum pump, rotor characteristics calc. 87−53108
ultra-small devices, boundary limited high field transport, Monte Carlo study 88−7556
unavailability evaluation in nonMarkovian systems withspare components 85−49403
unbiased Monte Carlo integration methods with exactness for low order polynomials 85−33358
underwater acoustics, track parameter estimation from multipath delay information 87−69117
undirected network, monte Carlo sampling plan for estimating reliability parameters and related functions 87−51931
variable shape electron beam lithography, proximity effect correction 85−29086
velocity modulation transistors, real space transfer devices, ensemble Monte Carlo simulation 88−57685
velocity-field characteristic determ. method, validity 86−8801
velocity-modulation FET, ensemble Monte Carlo simulation 88−1687
VENUS central drift chamber, charged particles, pattern recognition algorithm 87−3906

Monte Carlo methods continued
VLASIC: a catastrophic fault yield simulator for integrated circuits 87−23836
VLSI cct. layout design, component placement using const. pressure Monte Carlo method 86−35777
VLSI ccts. using concatenated structs., statistical timing behaviour prediction algorithm 86−8089
VLSI physical design, heuristics approaches 85−29230
VLSI yield simulator 86−34472
Weibull distribution, 2-parameter, sequential tests of hypotheses for system reliability 86−13553
Weibull distribution, 3-parameter, minimum-distance estimation of parameters 86−34116
Weibull distribution maximum likelihood estimators, tolerance and confidence limits 87−155
Weibull reliability and quantiles, confidence limits 86−248
Wilkinson power divider in microstripline, manufacturing pass rate predictions using CAD technique 88−25402
wind energy contrib. to power systems, economic assessment using Monte Carlo simulation method 87−30461
wind turbines cluster, Monte Carlo optimisation technique appl. 88−37130
X-ray mask heating during electron-beam patterning 87−38041
X-ray mask inspection, backscatt. electron signal anal., Monte Carlo simulation 86−13526
X-ray mask making using high resolution electron beam lithography 88−26123
yield approximation technique for circuit yield maximisation 85−496
YSPICE statistical optimization program for analogue ICs 86−2240
zero-dispersion of concatenated fibres, slope and wavelength statistics 88−67399
μ energy loss calc. in sampling calorimeters using two Monte Carlo codes 88−61146
Al drift-tube counters in VENUS, Monte Carlo simulations of delta ray effects 87−77539
(AlGa)As Gunn diodes with heterojunction cathode, space charge effects study using Monte Carlo simulation 88−38769
$Al_{0.45}Ga_{0.55}As$, hole transport, high field investig. 86−27868
$Al_{0.5}Ga_{0.55}As$ superlattice APD as solid-state photomultiplier, anal. 87−11398
$Al_xGa_{1-x}As$ HJBT base structs., electron transport, Monte Carlo eval. 86−63254
$Al_xGa_{1-x}As$ graded heterostructs., high field hot electron transport, Monte Carlo study 88−25930
$Al_xGa_{1-x}As$ heterostructure launchers for ballistic electron generation 87−45671
$Al_xGa_{1-x}As$, impact ionisation by electrons, Monte Carlo simulation, device appl. 88−57595
AlGaAs/GaAs heterojunctions, hot electron drift velocity 88−71329
AlGaAs/GaAs heterostructure MIS-like FET, ensemble Monte Carlo simulation 88−63899
AlGaAs/GaAs hot electron transistors, collector barriers, ballistic electron transport 88−39381
AlGaAs/GaAs hot-electron transistor, Monte Carlo simulation 86−47536
AlGaAs/GaAs modulation-doped heterostructs., hot electron vel. characts. 85−11982
AlGaAs/GaAs quantum wells, scatt.-induced negative differential resist. 86−21235
AlGaAs/GaAs/AlGaAs quantum wells, hot electron transport, Monte Carlo simulation 88−50649
AlGaAs/GaAs/AlGaAs single quantum well, negative differential mobility and drift vel. overshoot 87−24891
$Al_{0.3}Ga_{0.7}As/GaAs$ quantum well, photolum. in transverse elec. field, Monte Carlo calcs. 86−47344
AlGaAs-GaAs HBTs, base transit time, Monte Carlo simulation 87−38202
AlGaAs-GaAs bipolar transistors, collector transit-time reduction 87−1486
AlGaAs-GaAs, ensemble Monte Carlo simulation of semiclassical nonlinear electron transport across heterojunction band discontinuities 88−39121
AlGaAs-GaAs heterointerface, ballistic transport of quasi-2D electron gas 87−24877
AlGaAs-GaAs heterojunction bipolar transistors, Monte Carlo simulation 85−6902
AlGaAs-GaAs heterojunctions, diffusion noise of 2DEG, Monte Carlo study 88−32896
AlGaAs-GaAs heterostructure FET, modelling using Monte Carlo simulation 85−55827
AlGaAs-GaAs, modulation doped heterostructs., high field transient transport 87−6442
AlGaAs-GaAs multilayers, hot electron injection and intervalley transfer, appl. to Gunn diodes 88−32910
AlGaAs-GaAs quantum well device, electron diffusion coeff. and drift vel., Monte Carlo calc. 86−63090
AlGaAs-GaAs quantum wells, Monte Carlo simulation of scatt.-induced negative differential resistance 86−63081
AlGaAs-GaAs quantum wells, scatt. induced negative differential resist., effects of hot phonons and phonon-plasmon modes 88−32911
AlGaAs-GaAs single well heterostructs., nonlinear transport, Monte Carlo simulation 88−32892
AlGaAs-GaAs-AlGaAs single quantum well heterostruct., negative differential mobility and drift velocity overshoot 87−24876
$Al_xGa_{1-x}As$-GaAs thermionic heterojunctions for ballistic electron injection, space-charge reversal conditions 88−32843
$Al_xGa_{1-x}Sb$, steady-state high-field hole transport theory, impact ionisation reson. 85−34496
$Al_{0.25}In_{0.75}As$, transient transport in central-valley-dominated ternaryIII-V alloys 87−1201
AlInAs-GaInAs p-n junction quantum well APD, photodetector appls. 87−49746
Al_2O_3 layers, electron breakdown, Monte Carlo calcs. 86−35327
Ar ion laser, CW, electron beam pumped, Monte Carlo study 88−58426
Ar liq. calorimeter, electron response, Monte Carlo study 88−29875
Ar-CO_2 gas mixtures, drift and diffusion of electrons 85−37902
$Bi_4Ge_3O_{12}$ detector array, response to 0.5-21 MeV photons, Monte Carlo simulation comparisons *(Chinese)* 87−57019
$Bi_4Ge_3O_{12}$ photon detector for E<10 MeV, efficiency prediction using PEP-C Monte Carlo code 85−43207
CO_2 laser plasma in magnetised cathode glow, charge carrier dynamics 86−58862
CO_2-He-N_2 laser glow discharge, influence of magnetic fields on instability growth 87−2055
^{252}Cf neutron calibration flux distrib., Monte Carlo simulation 87−21370

Monte Carlo methods continued
GaAS/AlGaAs HEMT, Monte Carlo investigation 87−25344
$Ga_{1-x}Al_xAs$, Hall electron mobility, Matthiessen's rule and Monte Carlo method 86−8766
GaAlAs/GaAs heterointerfaces, two-dimens. electron gas transport props. 85−45430
GaAs 256×4 bit RAM with access time of 1 ns 87−31906
GaAs FET, submicron channel, intervalley process investig. using Monte Carlo techniques 88−19996
GaAs MESFET, AC charcts., influence of gate metallisation and gate geometry, Monte Carlo study 85−12286
GaAs MESFET, hot carrier transport, multi-window anal. 87−46011
GaAs MESFET, parameter extraction by Monte Carlo method 88−20005
GaAs MESFET, threshold-voltage fluctuations model 87−32516
GaAs MESFET with gate trench sloping towards source, Monte Carlo simulation 86−2158
GaAs MESFETs, intrinsic noise figure study using Monte Carlo particle model 86−21568
GaAs MESFETs, velocity overshoot effect, numerical simulation 87−74326
GaAs Schottky-barrier behaviour, Monte Carlo simulation 87−25203
GaAs, Si ion exposure damage effect, Monte Carlo simulation 88−33016
GaAs ballistic structures, Monte Carlo simulations 85−34512
GaAs bipolar diodes, submicron, HF current oscills., Monte Carlo simulation 87−18076
GaAs central valley conduction band electrons, phonon-electron scattering angle selection, analytical method 87−37883
GaAs, compensated, electron mobility and velocity 86−67671
GaAs devices, hot-electron effects, magnetophonon spectroscopy 86−1696
GaAs diode, submicron, with $Al_xGa_{1-x}As$/GaAs heterojunction cathode, near ballistic electron transport 85−23735
GaAs double-barrier transistor, base electron transport, Monte Carlo calcs. 88−71488
GaAs, electron impact ionisation rate in nonuniform elec. fields, simulation 87−17713
GaAs, electron mobility, influence of coupled plasmon-polar optical phonon modes 85−11925
GaAs, electron transient response and impact-ionised plasma instability at very high elec. fields 85−55470
GaAs, focussed ion beam implantation, alignment mark design using Monte Carlo simulation of ion trajectories 87−38078
GaAs, heavily doped, hot electron transport, mag. field effects, simulation 88−12932
GaAs, heavily doped, hot-electron transport 86−58261
GaAs, high field transport, degeneracy in Monte Carlo method 86−21130
GaAs, high-field diffusivity, many-particle Monte Carlo simulation 85−11927
GaAs high-speed Schottky-barrier photodiode 87−26210
GaAs, hot electron transport in crossed elec. and mag. fields, Monte Carlo simulation 88−32811
n-GaAs, hot electrons, Monte Carlo simulation of screening effect 87−53192
GaAs, hot electrons, Monte Carlo study 88−25887
GaAs hot photoexcited electron relaxation 87−46666
GaAs, hot, tepid, and temperature electrons, Monte Carlo particle model 86−35318
GaAs, impact ionisation 86−27876
GaAs, impact ionisation rate, band struct. depend., pseudopot. and Monte Carlo methods 86−47297
GaAs, ion implant depth profiles, channelling, Monte Carlo simulation 87−24786
GaAs multilayer targets, recoil range distrib., Monte Carlo simulation 87−60290
GaAs n^+-n-n^+ diode structs., stationary and transient charcts. 86−63246
GaAs $n^+n^-n^+$ sandwich devices, hot electron magnetophonon spectroscopy 86−21215
GaAs n^+nn^+ diodes, subMM-wave negative conductance 87−60144
n-GaAs ohmic contacts, resistance fluctuations due to discreteness of dopants 86−41587
GaAs p-n junction, forward-biased, hole-electron plasma formation, Monte Carlo particle simulation 86−41570
GaAs permeable base FETs, numerical simulation of electron scatt. processes 87−67256
GaAs permeable base ballistic electron transistors, elec. performance, Monte Carlo particle simulation 86−2137
GaAs permeable base transistor, Monte Carlo simulation 87−38207
GaAs permeable base transistor, nonstatic transport effects, two-dimens. multiparticle Monte Carlo anal. 85−34939
GaAs photoconductor, velocity overshoot in response, subpicosecond pulse excitation 88−65477
GaAs, photoexcited electrons, fs. energy relax., ensemble Monte Carlo simulation 88−32804
GaAs, photoexcited electrons, ultrafast relax., carrier-carrier interaction and intervalley transfer effects 88−32805
GaAs planar doped barrier transistors, high field spike, Monte Carlo simulation 85−34946
GaAs planar doped diodes and transistors, time depend. ensemble Monte Carlo simulation 85−61880
GaAs planar-doped barrier transistors, hot electron spectroscopy, Monte Carlo simulations 86−41757
GaAs, proton induced reactions, microdosimetric anal., Monte Carlo simulation 85−18055
GaAs, pulsed electron beam annealing, homogeneity, surface degradation, theoretical anal. 85−12219
GaAs, quantum well struct., 2D electron gas, velocity-field characteristics 85−11989
GaAs, quasi-ballistic transport, plasmon-induced losses, Monte Carlo study 85−23438
GaAs recessed gate MESFET, Monte Carlo study 88−57700
GaAs repeated overshoot structures, Monte Carlo simulation 85−61947
GaAs short channel MESFETs, electron transport simulation 86−63342
GaAs sub-micron gate self-aligned FET, p-type barrier layer, short channel effects suppression 86−2216
GaAs submicrometre channel, average electron vel., position depend., Monte Carlo method 86−1694
GaAs submicron MESFET with nonuniformly doped channel, two-dimens. Monte Carlo simulation 86−9165
GaAs submicron MESFETs, transient electron velocity charcts., compensation effects, Monte Carlo simulation 88−71612
GaAs submicron device modelling, simplified device eqns. and transport coeffs. 88−26188

Monte Carlo methods continued
GaAs submicron devices, conduction at 77K, dynamic Monte Carlo simulation 85−34904
GaAs submicron devices, hydrodynamic hot electron transport model 88−33128
GaAs submicron devices, quasiballistic electron transport, photocond. meas., Monte Carlo simulation 86−2099
GaAs, submicron electron transport at 77K, Monte Carlo model 85−1300
GaAs submicron gate length device, electron-beam fabrication using two-layer resist struct. 87−45731
GaAs transferred electron device simulation for microwave and MM-wave CAD 88−1007
GaAs, ultrafast relax. of hot photoexcited carriers, Monte Carlo study 88−32803
GaAs, velocity overshoot, transient hot phonon effects, Monte Carlo anal. 88−32810
GaAs:Si, maskless ion implantation, geometrical design of alignment mark 87−1394
GaAs/AlGaAs quantum wells, Monte Carlo study of hot electron transport 87−24892
$GaAs^+$/AlGaAs/$GaAs^-$ tunnel structs., carrier props. spatial coherence effects, Monte Carlo calcs. 86−35402
n^+GaAs-Al Schottky-barrier diode, MBE grown, hot-carrier transport effect determ. 88−50792
GaAs-$Al_xGa_{1-x}As$ heterojunction, electron transport at low temp., Monte Carlo study 88−32900
GaAs-$Al_xGa_{1-x}As$, heterostruct. hot electron diodes, electron transport modelling 88−71601
GaAs-$Al_xGa_{1-x}As$ heterostructures, selectively doped, electron transport in strong electric fields 87−17757
GaAs-AlGaAs doped quantum well avalanche photodiode, transport props. determ. 87−18848
GaAs-AlGaAs heterojunction, reduced intervalley transfer, Monte Carlo study 88−32898
GaAs-AlGaAs interfaces grown by MBE, intrinsic quality, atomistic Monte Carlo simulation 85−39730
GaAs-AlGaAs quantum wells, hot electrons, Monte Carlo study 88−25887
GaAs-AlGaAs quantum wells, subpicosecond dynamics of electron injection 87−74047
GaAs-AlGaAs submicron inverted MODFET, 2D Monte Carlo simulation 88−33263
GaAs-AlGaAs superlattice, electron impact ionization theory incl. pot. step 85−45426
GaAs-GaAlAs HEMT, effects induced by real-space transfer, Monte Carlo simulation 87−24470
GaAs-GaAlAs heterojunctions, hot electron injection, Monte Carlo particle model study 85−50497
GaAs-GaAlAs superlattice structs., impact ionisation coeff., lucky drift model 87−24883
GaAs-metal reflecting contacts effect on high field transport, Monte Carlo simulation 88−32932
$Ga_{0.4}In_{0.6}As$, transient transport in central-valley-dominated ternaryIII-V alloys 87−1201
$Ga_{0.47}In_{0.53}As$ and GaAs rectangular quantum wells, high-field electron transport 88−50653
$Ga_{0.47}In_{0.53}As$, electron vel. at 300K 86−63033
$Ga_{0.47}In_{0.53}As$, high field electron drift vel., Monte Carlo calc. 86−21141
$Ga_{0.47}In_{0.53}As$ n^+-n-n^+ transferred-electron devices, performance charcts. up to MM-wave range 85−12236
GaInAs-AlInAs APDs, MQW, graded barrier and doped quantum well, comparison 88−2119
GaInAs-AlInAs, doped quantum well avalanche photodiode, transport props. determ. 87−18848
GaInAs-AlInAs-doped quantum well APD, low-noise photodetector appls. 87−26196
$Ga_{1-x}In_xAs_yP_{1-y}$, electron and hole impact ionization rates, alloy scatt. effects 86−47302
GaSb, steady-state high-field hole transport theory, impact ionisation reson. 85−34496
Ge detectors, energy responses, spectra correction by Monte Carlo simulation 85−9090
Ge, detectors, interaction mechanisms and response functions by Monte Carlo simulations 86−32171
p- Ge, hole population inversion in crossed elec. and mag. fields 85−40430
p-Ge, hot electron transport, perturbed acoustic phonon distrib. effects, Monte Carlo anal. 87−32227
p-Ge layers, transverse negative differential mobility due to thenegative mass of ballistically moving heavy holes 86−27843
Ge:Li detectors, response to narrow beam of photons, Monte Carlo simulation 87−71003
Ge-Se inorganic resist, performance eval. using electron beam exposure and computer simulation 86−35517
^{74}Ge, ion beam deposition at low ion energies, ion-solid interactions 86−40772
Ge_xSi_{1-x}-Si, interfaces, Monte Carlo simulation of epitaxial growth 88−31800
^3H beta-ray spectroscopy, source thickness influence, Monte Carlo simulation 88−61199
He glow discharge, mag. field effect on growth instabilities, Monte Carlo simulation 85−50131
He-Ne light beam transmittance through turbid medium, multiple scattering effects 87−75451
He-SF_6 glow discharge, mag. control, electron energy distrib. 87−17434
^3He neutron spectrometer, response function, Monte Carlo calc. 88−68309
HgI_2 detector, Monte Carlo simulation *(French)* 87−77559
InAlAs, growth by MBE, alloy clustering, surface quality, role of kinetics and thermodynamics 87−16588
InGaAlAs/InGaAs/InGaAlAs NnpnN heterojunction bipolar transistors, expts. and Monte Carlo simulations *(French)* 87−67228
InGaAlAs/InGaAs/InGaAlAs nnpnn DH bipolar transistors, expt. charcts. 87−25254
InGaAlAs-InGaAs-InGaAlAs HJBTs, Monte Carlo simulation 88−33182
InGaAs, high-field autovariance coeff., diffusion coeff., and noise at 300 K 87−37900
$In_{0.53}Ga_{0.47}As$, hot-electron transport 86−14865
$In_{0.53}Ga_{0.47}As$, minority electron transport, Monte Carlo study 88−32809
InGaAs/InP hot electron transistor, Monte Carlo simulation of electron transport efficiency 86−2126
InGaAs-InP heterostructures, real space hot electron distribs. and transfer effects 88−32888

Si (111) surface oxidation, temporal struct., Monte Carlo simulation 85−29132
Si CCD imaging devices, Monte Carlo simulation of photoelectron crosstalk 86−24531
Si MOS devices, two-dimens. electron gas transport, Monte Carlo simulation 85−55596
Si Schottky barrier diodes, hot carriers generation by subpicosecond laser pulse, Monte Carlo study 87−25217
n-Si, electron-electron interaction and high field transport, Monte Carlo calc. 85−34460
n-Si, electronic transport, acoustic phonon scatt. anisotropy 85−55444
a-Si, film growth mechanisms, diode and triode glow discharge systems 88−56308
Si, homoepitaxial growth from ion molecular beams, ion bombardment effect, computer simulation 88−24737
Si, hot electrons, spectral density of current fluctuations, electron-electron interaction effect 86−63029
Si, impact ionisation coeffs. determ., (111)- and (100)-oriented samples, photocurrent meas. 86−21099
Si inversion layers, two-dimensional hot electrons, Monte Carlo simulation 85−61786
Si, ion implantation, 1D- and 2D-distribs. of particles and damage, Monte Carlo calcs. 88−57458
Si, ion implanted, defect distribution, Monte Carlo simulation 86−58383
Si, ion implanted, lattice damage, Monte Carlo simulation and double crystal X-ray diffr. 86−8992
Si, ion-implanted dopants, particle and damage distrib., Monte Carlo calc. 86−21361
p-Si layers, transverse negative differential mobility due to thenegative mass of ballistically moving heavy holes 86−27843
Si microstructures on CMOS gate arrays, direct laser writing, Raman microprobe anal., modelling of nucleation phase 86−63448
Si p-p^+ junction, longitudinal thermo-EMF due to hot holes, relaxation time, acoustic phonon scattering 88−71333
Si, proton induced reactions, microdosimetric anal., Monte Carlo simulation 85−18055
Si, reactive ion etching, near-surface damage and contamination 85−61854
Si, self-implantation, damage production kinetics 87−11602
Si, self-implantation-induced temp. depend. amorphisation, TEM and Monte Carlo simulation studies 87−6554
Si solar cell simulation by Monte Carlo modelling 87−4948
Si solar cells, 2D Monte Carlo simulation 88−18063
Si, strained, electron mobility, Monte Carlo simulation 88−57298
Si, submicron electron transport, 300K and 77K 85−23407
a-Si thin film growth by sputtering, Monte Carlo studies 87−52161
Si:B, hyper-abrupt doping transitions, SIMS studies 87−53348
a-Si:H plasma deposition, Monte Carlo simulation 88−63360
a-Si:H thin film growth, Monte Carlo simulations 87−52155
Si-SiO_2-Si layered struct., dose calcs. for X-ray and X-ray irrad. 87−32360
Si-SiO_x-SiO_2 MOS inversion channels, electron dynamics, Monte Carlo simulation 85−34685
Si-silicide-Si metal-base transistors, transport props., Monte Carlo study 85−18297
^{30}Si, ion beam deposition at low ion energies, ion-solid interactions 86−40772
β-SiC monocryst. thin films, ion implantation and annealing, amorphisation and recrystn. processes study 87−6555
$SiH_4+Si_2H_6+Ar+H_2$, plasma enhanced CVD of a-Si:H, integrated model 87−16693
Si(Li) X-ray detector response, Monte Carlo simulation 88−54394
Si(Li) detectors, interaction mechanisms and response functions by Monte Carlo simulations 86−32171
SiO_2 layers, electron breakdown, Monte Carlo calcs. 86−35327
Ta_2O_5 layers, electron breakdown, Monte Carlo calcs. 86−35327
U calorimeter with proportional chamber readout, Monte Carlo simulation study 87−41865
U calorimetry, Monte Carlo studies 85−64478
ZnO varistor, nonlinear conduction models 87−74338
ZnS layers, electron breakdown, Monte Carlo calcs. 86−35327
ZnSe MBE growth, surface kinetic reactions effects, Monte Carlo simulations 88−420
ZnSe, epilayers, MBE growth, Monte Carlo simulation 88−43891
$\bar{p}p$ physics at 546GeV, UA5 expt., detector, data anal., results 88−10288

Moon
American Astronautical Society 33rd Annual International Conference, Boulder, CO, USA (October 1986) 88−70028
extraterrestrial resources utilisation 86−50665
K_u-band Earth station antenna G/T determ., using Moon as RF source 87−14501
laser ranging, design of MLRS facility at McDonald Observatory 85−59423
laser ranging for space geodesy, precision laser tracking systems 85−59424
manned bases, conf., Houston, TX, USA (1988 April) 88−55843
satellite earth station, G/T meas. using Moon 86−11023
shadow on geostationary satellite, effect on solar power generation prediction and obs. 87−8986
VHF lunar reflections, near-space unwanted RF environment obs. 85−62801
VHF-UHF radar systems, the Moon as a calibration target 88−41742

Morin temperature

Mossbauer effect
backscattering detector with transmission window *(Chinese)* 88−36358
controller for electrodynamic drive of Mossbauer spectrometer 87−29689
current integration method, Mossbauer spectroscopy appl. 88−22512
digital free-programmable function generator for Mossbauer studies 86−50415
gamma laser, Mossbauer emission kinetics under thermal dynamic conditions in active medium 86−48378
gamma radiation meas. using gas-filled photoelectric detector 87−63704
gamma-ray lasers, Mossbauer effect expts. 88−58514
gamma-ray lasers, proposals, critical review 87−7289
gas scintillation detector for Mossbauer conversion electron spectroscopy 88−22913
magnetic recording tapes, easy magnetisation axis orientation, Mossbauer and mag. meas. 86−47960
magnetic recording tapes, particle orientation study using Mossbauer techniques 85−45983
magnetic tapes, transverse mag. field stability of mag. pigments 86−28681
magnetic thin films, conference, Strasbourg, France (June 1986) 88−64956
measurement of Mossbauer spectra, with high count rate 87−29681
Mossbauer analysis of magnetic storage media 88−51286
Mossbauer crystals, multi-beam Borrmann modes, γ-ray lasing conditions 87−7298
multi-channel data acquisition and processing system for Mossbauer spectroscopy *(Chinese)* 88−29929
multiscaler system for Mossbauer effect spectrometry 85−43313
permanent magnet for Mossbauer spectrometer 87−63698
programmable function generator for Mossbauer spectrometer 87−70667
rare earth alloys, $R_2Fe_{14}B$, permanent magnets, ^{57}Fe Mossbauer studies, hyperfine fields 86−15368
soft X-ray detectors for Mossbauer spectroscopy *(Czech)* 88−16635
spectra area meas., use of internal standard 87−29682
spectrometer motion controller 87−63701
spectrometer using microcomputer, performance 85−43299
spectrometer velocity nonlinearity *(Chinese)* 86−50456
SQUID sensor for subatomic displacement meas. of piezoelec. Mossbauer spectrometer 85−52754
time differential Mossbauer emission spectroscopy, new spectrometer 87−63693
wire chamber advances for Mossbauer spectroscopy expts. 87−21404
X-e^- coincidence Mossbauer scattering experiment for ^{57}Fe K-shell conversion electrons 85−64474
$BaFe_{12-2x}Co_xM_xO_{19}$, M=Ti, Mo, ferrite particles, synthesis, characterisation 87−67732
$BaFe_{12-2x}Co_xTi_xO_{19}$ fine platelet particles, prep. and mag. props. 88−51251
$BaO\text{-}V_2O_5\text{-}Fe_2O_3$ semiconducting glasses, elec. props., Mossbauer, EPR and X-ray diffr. studies 87−1213
$Ba_2Zn_2Fe_{12}O_{22}(Zn_2\text{-}Y)$ hexaferrite, mag. props. study of Mossbauer spectroscopy 85−12482
$CdSnP_2$/aqueous polysulphide system, photoelectrochemical cell studies 85−21776
$Fe\text{-}Al_2O_3$ perpendicular mag. recording medium, coercive force and Mossbauer spectra 86−35975
Fe-Co partially oxidized medium with perp. anisotropy 88−51184
$^{57}Fe/^{57}Co$ Mossbauer source with Pd matrix, industrial preparation 88−29790
Fe_4N thin films, ferromagnetic, arc-discharge-type ion-plating 85−22517
FeN-CoN thin films, mag. props 88−51231
$Fe_{14}Nd(Y)(Ce)_2B$ fine particles prep. by hydriding, mag. props., recording appls. 87−25762
$\gamma\text{-}Fe_2O_3$ mag. tapes, particle orientation distrib. meas. 88−51212
$\gamma\text{-}Fe_2O_3$ recording particles, high-field magnetism 87−46334
$\gamma\text{-}Fe_2O_3$ single domain particles belonging to mag. tapes, texture function 86−15394
Fe_3O_4 ferrimag. and superparamagnetic on Fe particles surface 88−51247
Fe_2O_3-based oxides, sintering behaviour rel. to MnZn power ferrite prod. *(German)* 86−53886
δ-FeOOH, magnetic structure and supermagnetic props. 85−24075
GaAs:Sn LPE layers, heavily doped, Mossbauer study 87−25072
GaAs:Sn, metalorganic VPE grown, Mossbauer spectroscopy 87−74001
$Ge_{28.5}Pb_{15-x}Sn_xS_{56.5}$ chalcogenide glass, anomalous impurity charge state, elec. cond. and Mossbauer meas. 86−53361
He-filled proportional counter for low temps. and appl. to cryogenic resonance-electron Mossbauer spectroscopy 87−35360
$LaFe_4P_{12}$ type cpds., struct., elec., mag. and Mossbauer spectra props. 85−23479
Li ferrite, prep. from solns., anal. of formation stages 86−516
$LiFeSnO_4$, ramsdellite, high- and low-temp. polymorph Li insertion compounds 86−66313
Nb_3Sn tape wires, supercond., critical current density anisotropy, texture and microstruct. 85−41042
Nd-Fe-B based hard mag. materials, mag. props. 86−21951
$Nd_{15}Fe_{77}B_8$, melt-spun, mag. props., influence of quench rate and H_2 absorpt. 88−64917
$Nd_{15}Fe_{77}B_8$ permanent mag., ^{57}Fe Mossbauer studies 85−24193
$Nd_2Fe_{14}B$, melt-spun permanent magnet alloys, Mossbauer study 85−18544
$(Nd_xFe_{1-x})_{82.5}B_{17.5}$ glasses, mag. and thermal props. 88−64920
Si:Co,P, phosphorus diffusion gettering of cobalt, Mossbauer study 86−8734
SnO_2 films, preparation and electrophysical props. 88−38243
$SrFe_{12}O_{19}$ small particles, prep. and mag. props. 88−51252
TiFe amorphous alloy thin films, heat treatment effects 87−52210
YIG:Sc^{3+} films, LPE, paramag., conversion electron Mossbauer spectra 88−11986

Mossbauer spectra *see Mossbauer effect*

motion control *see position control*

motion picture photography *see cinematography*

motor protection *see machine protection*

motorcoaches
4.5 kV 2 kA GTO thyristor availability for AC traction drive choppers 85−65500
Belgian State Railways, 'new generation' motorcoach development 86−51960
DC electric motorcoach, 211 suburban type, improvements *(Japanese)* 87−16118
DC multiple-unit regenerative braking economy rel. to feeder line voltage 87−36220
electric multiple unit develop. for municipal rapid transit system in West Berlin *(German)* 86−51983
electric multiple unit rebuilding, class 275, S-Bahn West Berlin *(German)* 86−51984
electrical equipment of the Manila light rail transit system coaches 87−9898
French railway traction, brushless induction and synchronous motor trials *(German)* 85−60492
French TGV rolling stock modifications for Atlantic services 85−53895
guided land transport technological development 87−36212
Hamburg underground railway vehicle drive with current-source invertor and contactless driving/braking controller 86−71107
Japanese National Railways' series 211 electric multiple unit 86−61788
Japanese Series 207 invertor-controlled induction-motor-driven commuter trains 87−79058
Lyons Metro power car control by GRAFCET-programmed microprocessors *(German)* 87−9923
motive power and rolling stock microprocessor control *(German)* 87−9925
multiple unit trains, information systems introduction into intelligent trains 88−18161
pantograph current or voltage drop definition and calculation *(Japanese)* 87−36209
Prague test loop facilities for power car component testing *(German)* 87−9924
railway vehicle drive digital control system with modular hardware and software 86−71108
rapid transit car three-phase drives for North America *(German)* 86−51938
rapid transit vehicle electrical protection systems 86−45772
rolling stock asynchronous motor prototypes, Alsthom Atlantique expts. 86−71105
Sanyo Electric Railway 5000 series unpainted coaches *(Japanese)* 87−51526
second-generation chopper-equipped rolling stock *(French)* 85−60486
Shinkansen regenerative braking system model expts. 86−33787
Shinkansen train microprocessor-based monitoring system development 86−33788
static invertor for 380 V auxiliaries of rail bound vehicles *(German)* 86−66453
TELOC-2000S tachograph for MI84 motorcoach, appl. 87−14555
thyristor control and regenerative braking characteristics 86−61795
Tokyu Railway VVVF invertor controlled railcar *(Japanese)* 87−36207
track circuit interference tests on chopper-controlled motorcoaches 86−71099
urban railway vehicle self-commutated convertors with evaporative cooling 86−71112
variable-voltage variable-frequency invertor drive control *(Japanese)* 86−51980

motors, electric *see electric motors*

motors, hydraulic *see hydraulic motors*

Mott insulator *see localised electron states*

Mott transition *see metal-insulator transition*

mouse controllers (computers)
drawing system for the motor disabled 88−48247
encoders interface low-cost tracker ball 85−54784
FIOS-6440, integrated flat I/O device, development 87−3442
IR linked cableless system mouse 86−11077
offshore steel structural flaw detection and sizing algorithm 86−66890
PROLEI process automation system using TV screen as control panel and mouse for functions *(German)* 87−77031
Siemens mouse for driving IEC bus *(German)* 88−35785
symbolic processor for complex chip design 85−33561

movements, atmospheric *see atmospheric movements*

moving-coil instruments
acoustic transducers, time delay and transfer function parameters estimation using wideband transient signals 88−75004
actuators for short-stroke motion 88−11343
analogue DC meter CAD 87−14383
core magnet type flat meter with disc magnet *(Japanese)* 85−64187
digital multimeter construction and use 88−29480
electrocardiometer, design 86−56158
meter, core-magnet type, moving coil, flat, indicating errors caused by external mag. field *(Japanese)* 87−3644
operational transfer function of moving-coil measuring system *(Polish)* 85−37666
phase trajectories of electrical analogue measuring instruments *(Polish)* 87−41535
SI ampere realisation at NPL, using moving-coil apparatus 86−38481

moving coil microphones *see microphones*

moving-iron instruments
phase trajectories of electrical analogue measuring instruments *(Polish)* 87−41535
temperature-sensing actuator with ferrite and rare earth cobalt magnet *(Japanese)* 85−42964

moving-magnet instruments
analogue DC meter CAD 87−14383
magnetic field computation, in presence of external magnetic field *(Rumanian)* 87−21133
phase trajectories of electrical analogue measuring instruments *(Polish)* 87−41535

multi-access systems
1.5 GHz band point-to-multipoint digital subscriber radio system for rural areas 88−60004
1.5-GHz band service-enhanced digital mobile radio, system philosophy 88−9458
1-persistent CSMA/CD systems, effect of acknowledgment traffic on performance 87−40042
1-persistent multichannel CSMA/CD protocols 88−3311
2-side moving-boundary access control scheme 88−21407
2-stage access algorithm for portable radio 88−73413
14/11 GHz satellite link with low elevation angles, site diversity expts. *(Japanese)* 86−49519
20/30 GHz transmission experiments via DFS-Kopernikus and OLYMPUS satellite systems *(German)* 88−60117
23 GHz radio equipments DTS 10-64 and FTD 23 87−34370
30/20 GHz band SS-TDMA transponder, development 86−64927
30/20 GHz multibeam array antenna for TDMA European satellite systems 88−2841
120 Mb/s K-band satellite regenerative repeater, digital transmission tests and SS-TDMA operation 86−30739
120 Mbit/s TDMA terminal for satellite communications, development 85−58037
120 Mbit/s TDMA/DSI equipment for satellite communications *(German)* 87−28465
900 MHz dig. land mobile radio system, hybrid transmission scheme 87−69926
900 MHz digital cellular mobile radio system for motor vehicles *(German)* 86−4500
AA/TDMA, adaptive satellite access method for mini-earth station networks 87−40816
access control protocol using instantaneous bandwidth reconfiguration 87−48568
acknowledgement based transmission control of random access communication channels 88−59371
adaptive assignment TDMA for VSAT networks 88−60095
adaptive baseband equalizers for narrowband TDMA/FDMA mobile radio 88−41546
adaptive correlation diversity for wideband TDMA mobile radio 88−3310
adaptive CSMA and CSMA/CD protocols with stable multiple-access charcts 86−30118
adaptive forward error control for digital satellitesystems 85−58046
adaptive multiple access protocol, dynamic behaviour and comparison with split-channel reservation multiple access protocol 87−27678
adaptive multiple access strategy for a channel with power capture 87−27134
adaptive reservation multiple access technique for data transmission 86−69213
adaptive TDMA systems for 20/30 GHz fade countermeasures 87−39393
adder channels, T-user multiple-access, with correlation type receiver, signature sequences construction 87−19699
advanced SS-FDMA architecture for mobile satellite systems of 1990s 88−46988
Air Force UHF SATCOM DAMA system concept 85−31008
Alcatel CD900 land mobile system, digital cellular approach using wideband TDMA 87−76606
all-optical synchronous multiple access fibre networks, design 87−28580
ALOHA, pure channel with arbitrary renewal arrival process, interdeparture time distrib. 85−42034
Aloha, slotted with multipacket reception capability, stability props. 88−66788
Aloha multi-access radio channel protocol, instability and geometric transience 88−41148
ALOHA networks, gatewaying 86−54628
ALOHA system, asynchronous, stability anal. 85−19560
ALOHA systems, effect of channel errors on delay throughput 86−54576
ALOHA-net/LAN distributed control scheme 87−55435
ALOHA-reservation satellite packet communication network, anal. of acknowledgment schemes *(Japanese)* 87−76687
ALOHA-type communication networks, erasure, capture and noise errors 87−55413
ALOHA-type multiaccess channels, flow control technique eval. 88−3303
ALOHA-type retransmission control policies in multiple access communication networks 85−30495
announced retransmission random access (ARRA) protocol for increasing channel capacity 86−23188
announced retransmission random access systems, stability and optimal retransmission control 86−16617
ASHA protocols for satellite communication networks, equilibrium-point anal. 88−47011
asymmetric multiple-access channel, iterative code construction 87−2440
asymmetric multiple-access channel for reliable transmission of two correlated sources 88−27712
asymmetric token-passing systems, approximate analysis 88−3302
asynchronous CDMA systems, throughput 87−55448
asynchronous direct sequence spread spectrum multi-access communications with polyphase sequences, anal. 88−46864
asynchronous direct-sequence multiple-access spread spectrum systems performance, code period effects 88−46865
asynchronous DS-SSMA system, multiple-tone jammer optimisation 88−28668
asynchronous fiber optic local area network using CDMA and optical correlation 88−9564
asynchronous multiple accessing for collision channel without feedback, mobile radio appl. 85−2914
asynchronous packet transmission system, multiaccess stack algorithm 88−3294
asynchronous random access CDMA systems, stability analysis 87−40040
asynchronous request centralised permission multiple access protocol, anal. 87−40026
asynchronous systems without feedback, estimation of effectiveness of error correction codes *(Polish)* 85−2742
ATP-1, adaptive multiple access protocol with mixed structure, analysis 87−27677
Australian telecommunications, digital radio and fibre optics 88−46857
availability drives computer network architectures, simulation expts. based on several protocols 88−3612

multi-access systems continued
band-limited memoryless multiple-access channels with soft decision demodulation, signal set design 87−75666
baseband waveform design for multi-user channel 87−62100
bidirectional bus network, very fast, behavior 88−9178
binary arbitration scheme for collision-free multi-access techniques 88−66975
binary DS-SSMA with random signature sequences, error probabilities 87−34353
binary feedback multiple access collision-type slotted channel, group testing protocols 85−57553
binary switching channel, zero-error capacity and quasisynchronised codes 88−59001
broadband LAN protocols 88−3312
broadband LAN using CSMA/CD 86−30346
broadband networks, attachment-unit-interface compatible 10 Mb/s CSMA/CD medium attachment unit 86−23543
broadband networks for LAN and radio appls. 88−73411
broadband-bus LAN, multichannel CSMA/CD method 85−42286
broadcast bus LANs, demand assignment multiple access schemes 85−19812
broadcast channel, limited feedback sensing algorithms 86−16609
broadcast channel decentralised access strategy, decomposition 87−55419
broadcast channel random access protocol, packet delay distrib. of tree conflict resolution algorithms 87−55408
broadcast communication channel, terminal-priority contentionless access (TPCA) protocol perform. anal. 85−42032
broadcast communication systems, random multiple access, buffer anal. 86−24008
broadcast networks, distributed algorithms for minimum-weight spanning tree 88−21368
buffered CSMA/CD protocols, queueing anal. 87−7882
buffered CSMA/CD system, performance anal. *(Japanese)* 86−54588
buffered CSMA/CD system analysis 88−8889
buffered random multiple access schemes, queueing anal. 87−2673
buffered slotted multiple access protocols, queueing anal. 85−25474
burst assignment algorithm for satellite-switched/frequency-hopping TDMA systems with uplink/downlinkcapability constraints 86−59394
burst modem for satellite communications, compact LSI- and MIC-implemented 88−46978
burst transients and channelization of a narrowband TDMA mobile radio system 88−73828
bus networks, FCFS-like group random access protocol, performance eval. 87−62411
bus networks, hybrid token-CSMA/CD protocol anal. 85−63294
business satellite communications, FEC combined burst modem 88−46979
business satellite communications, second-generation SCPC system 85−8361
business satellite systems with onboard processing, access protocol performance 87−40795
Buzz-net: a hybrid token/random access LAN 87−75967
C-band 120-Mbit/s TDMA QPSK modem for on-board satellite appls. 88−3899
Cantata, multiperson interactive real-time message exchange system for investigating protocols 87−34167
Capetanakis Collision Resolution Algorithm, robustness 88−52666
carrier sense multiple access with time-split collisiondetection and multi-tone tree search 86−49064
carrier sense multiple access with time-split collisiondetection and split channel reservation 86−16611
carrier-sense multiple access with fixed retransmission assignment 87−40027
carrier-sensed multi-access protocols, queueing anal. 87−55412
CATV system, 2-way, tree-structured, access scheme *(Japanese)* 87−70267
CDMA, orthogonal complementary pairs and sets of sequences, construction methods 86−29689
CDMA and FDMA, mobile radio systems. spectrum efficiency comparison 86−17275
CDMA channels, no-feedback distribution protocol anal. 88−21402
CDMA distributed reservation-based protocol that does not require feedback information 88−73393
CDMA distributed reservation-based scheme anal. 87−55406
CDMA fibre optic channel, optical orthogonal codes 87−54969
CDMA freq. hopping system, error probability study 88−21366
CDMA LAN, performance anal. 87−62640
CDMA multihop networks, acknowledgement protocols, performance comparison 87−33846
CDMA packet radio network, multi-hop, throughput performance anal. 88−41516
CDMA packet radio networks, code-assignment for multi-receiver nodes 86−55176
CDMA processing transponder, nonorthogonal coding technique 88−45931
CDMA systems, binary, multipath fading noisy channels operation 85−63515
CDMA-based network, implementation and experiences with local audio communication based on code multiplex access *(German)* 88−21538
cellular ALOHA network for mobile radio communication, spatial distrib. of traffic 88−41539
cellular digital mobile radio system CD 900, conception and perform. 87−76610
cellular digital mobile radio telephones for European markets 88−53183
cellular digital radiotelephone, slow frequency hopping multiple access 85−3368
cellular frequency hopped multiple access schemes, access procedure 87−28440
cellular mobile data network, spatial distrib. of traffic 87−56015
cellular radio, digital technologies for 800 MHz system 88−73835
cellular radio, narrowband TDMA system charact. 87−69969
cellular radio, narrowband TDMA system design, radio test perform. 87−69970
cellular TDMA system performance in severe time dispersion 88−46939
centralised multiple satellite networking, multiple access technique 88−53239
centralized multiple satellite network for real time global space, land, and mobile communications 88−22048
certainty equivalence nonlinear separation controlrule for random access channels: delay analysis 86−54595
channel access algorithms throughput with limited sensing 86−48719
channel access protocol analysis model 87−55434
channel access protocol for integrated voice/data applications 87−75963
multi-access systems continued
channel access protocols with preemptive priority in integrated networks 88−3306
channel assignment, distributed dynamic algorithm 88−52662
channel capacity allocation scheduling in multiple access networks 86−23191
channel exit protocols, finite population random access systems, performance effects 88−59372
channel with special source hierarchy, transmission 86−3733
channel with ternary feedback, conflict multiplicity estimation and batch resolution algorithms 88−46326
channels with feedback, anal. 85−30135
circuit-switched mixed-media networks, routing and preemption algorithms 86−30220
closed computer user group analysis, BNETD program system *(German)* 86−30388
code division multi-access frequency-hopping communication system, stack algorithm 87−55422
code division multiple access systems, replica subtraction, processing gain improvements 86−30605
code sequence allocation in a direct sequence spreadspectrum local area network 86−16902
code-division multiple access for wireless LANs 87−48311
code-division multiple access LAN, performance for voice transmission 87−33843
code-division multiplex communication system using linearly independent vectors over finite field 87−2669
coding problems of the multiple access channels *(Chinese)* 88−59340
coherent hybrid DS-SFH spread-spectrum multiple-accesscommunications 86−10596
coherent optical communication, appls. in network environment 87−13725
collision detection and multitone tree search for multiple-access protocols on radio channels 87−75972
collision resolution algorithm, robustness and performance is unshared feedback error environment 88−52658
collision resolution algorithms, throughput of degenerate intersection and first-come first-served algorithms 85−51521
collision resolution algorithms for a time-constrained multiaccess channel 88−34877
collision resolution protocol with simplified energy detection 87−75983
collision-free access protocol for packet radio networks 88−46858
combined ALOHA/reservation access methods, charact. and stability anal. *(Japanese)* 88−21396
combined ALOHA/reservation access schemes for AA/TDMA system, channel partition methods, eval. *(Japanese)* 88−21397
combined fixed and demand assignment satellite multiple access protocol for integrated circuit and packet switching 87−27719
common alternative routeing system using terrestrial and satellite ccts., public switched network appl. *(Japanese)* 88−14870
communication channel, packet delay under golden ratio weighted TDM policy 87−55374
communication channels, asymptotically nonadaptive algorithm for conflict resolution 85−51831
communication channels, joint polling/convolutional coding, performance anal. 86−54460
communication system using frequency-time-hopped multi-level FSK *(Japanese)* 86−10601
communications, stochastic approx. methods for decentralised control 85−51825
communications networks 87−62469
comparison of sequences for local area networks using spread-spectrum multiple access 88−34860
computationally efficient bounds, spread-spectrum multiple-access system in jamming environments 88−53123
computer network, large-scale, design using limited scan spot-beams satellite system 88−9171
computer network, multichannel, different probability access when finding carrying signal 85−13673
computer networking, conf., Washington, DC, USA (April 1988) 88−62893
computer networks, GENESIS graphical environment for modelling and performance anal. 87−28162
computer-aided evaluation of satellite networks in hostile environments 88−73891
COMSAT's TDMA traffic terminal 86−4576
conflict resolution by multiplicity estimation 88−14858
contention resolution algorithm 87−55366
contention resolution algorithm, 0.487, delay anal. 87−7884
contention-based access protocols with reservations for local networks with non-homogeneous traffic demands 85−8223
contention-based multiple access technique for data transmission systems with arbitrary number of users 87−62518
contention-based random access systems, Q-ary collision resolution algorithms 85−51827
contention-based TDMA technique for data transmissions through satellite 88−15406
cordless telephone systems, dynamic channel allocation schemes, traffic capacity study 85−47120
cordless telephone using multi-channel-access technique 85−13789
COSMONET bus type local network system using twisted pair cable *(Japanese)* 85−25527
CS communication satellite, TDMA experimental results *(Japanese)* 85−25818
CS satellite, frequency switching TDMA system rainfall attenuation countermeasure, experiments *(Japanese)* 85−25817
CSMA, multichannel, cellular mobile packet radio anal. 86−4501
CSMA, priority virtual time, anal. 87−33844
CSMA, slotted nonpersistent and virtual time, distributed retransmission controls 87−55802
CSMA and CSMA/CD protocols, packet output processes 88−46351
CSMA LAN's interconnection via bridge, throughput delay charact. 88−9170
CSMA LANs interconnection, frequency division approach 87−69662
CSMA multihop packet radio networks, throughput anal. 87−40649
CSMA protocols, asynchronous, linear (bus-like) networks, stochastic struct. 87−33849
CSMA protocols, simultaneous use on same LAN 87−27723
CSMA systems, persistent, throughput anal., comments 87−40005
CSMA with collision detection for radio channels 85−19576
CSMA with priority acknowledgements on intrabuilding power line LAN, performance 88−67036

multi-access systems continued
CSMA-CD, 1-persistent type, unslotted anal. *(Japanese)* 87−55385
CSMA-CD, dual-channel LAN, performance analysis 88−3592
CSMA-CD, priority access schemes 85−63131
CSMA-CD anal. with variable slot size 87−48255
CSMA-CD analysis for arbitrary slot size 85−42031
CSMA-CD LANs with heterogeneous population of buffered users, queueing anal. 88−67035
CSMA-CD protocol for radio channels 86−4086
CSMA-CD with priority fns. to each terminal, successful transmission probability, LAN appls. 87−69414
CSMA/CA protocol, simulation model 88−52605
CSMA/CD, dynamic, priority scheme 86−54636
CSMA/CD and movable-slot TDM protocols, performance analysis 88−3301
CSMA/CD broadband LAN using beat signal level detection, 10 Mbit/s operation, improvements *(Japanese)* 87−34136
CSMA/CD broadband network, beat signal level detection method appl. 85−42128
CSMA/CD broadband network using a beat-signal level detection method *(Japanese)* 87−33953
CSMA/CD buffered system, approx. anal. 88−73395
CSMA/CD bus LANs, timed Petri net models for performance anal. 88−15060
CSMA/CD computer communications protocol, Extended Control and Simulation Language for performance studies 86−30119
CSMA/CD computer network, theory and information transmission *(German)* 88−41300
CSMA/CD fibre optic LAN, star type *(Japanese)* 87−13396
CSMA/CD fibre optic networks, collision detection methods 86−23866
CSMA/CD IEEE 802.3 compatible fibre optic LAN standardisation, physical topology 87−40362
CSMA/CD industrial networks with short delivery time for messages 88−35098
CSMA/CD LAN, Imminent Access Recognition protocol for integrated traffic 88−52889
CSMA/CD LAN, multichannel transceiver based on IEEE Std. 802.3 *(Japanese)* 87−76353
CSMA/CD LAN based on IEEE Std. 802.3 *(Japanese)* 87−76354
CSMA/CD LAN integrated data/voice station design 87−20181
CSMA/CD LAN interface, specification and implementation using abstract data types 87−55790
CSMA/CD LAN with heavy load, behaviour study *(German)* 88−35134
CSMA/CD LANs, multirate voice coding for load control 86−59633
CSMA/CD LANs, priority based multiple access 87−20173
CSMA/CD LANs with overload detection and protection 86−59634
CSMA/CD local computer networks, load balancing effects on response time 86−16991
CSMA/CD medium access protocol implementation for low speed/cost LAN 86−30120
CSMA/CD multi-channel protocol, non-slotted model anal. 87−75961
CSMA/CD multi-channel protocol for broadband bus LANs, anal. using non-slotted model *(Japanese)* 86−30099
CSMA/CD multichannel method using hybrid load distrib./region distrib. scheme *(Japanese)* 88−34864
CSMA/CD multichannel systems, throughput model 86−30075
CSMA/CD network, waiting time distribution 86−54597
CSMA/CD network priority analysis 86−54598
CSMA/CD networks, 10 Mb/s operating on CATV-type broadband media, physical layer hardware design 85−8203
CSMA/CD networks, delay characteristics 88−52612
CSMA/CD optical fibre LAN 86−54910
CSMA/CD protocol, computation time reduction technique *(Japanese)* 85−2924
CSMA/CD protocol for LANs 87−75964
CSMA/CD protocol for packet channel of integrated services terminal bus 88−59722
CSMA/CD protocol with deterministic contention resolution, performance anal. *(Japanese)* 86−4084
CSMA/CD protocol with deterministic contention resolution, anal. 87−48256
CSMA/CD protocols, effect of random message size on performance 86−54579
CSMA/CD ring network, integrated token passing 87−27725
CSMA/CD system, buffered two-user, mean packet queueing delay 86−10600
CSMA/CD system transmission error control simulation *(Japanese)* 86−69423
CSMA/CD system with finite population of buffered users, dynamic behaviour 86−54583
CSMA/CD system with link level flow control, performance anal. 88−46609
CSMA/CD systems, slotted multichannel, throughput anal. 86−54608
CSMA/CD systems with prioritised-retransmission, performance comparison *(Japanese)* 88−73407
CSMA/CD with priority, performance anal. *(Japanese)* 85−13675
CSMA/CD with tree algorithms, performance and channel stability, bus topology LAN appl. *(Japanese)* 88−46334
CSMA/CD-compatible protocols for real-time voice transmission 88−3315
CSMA/CD-DFT asynchronous system, interdeparture and response times anal. 88−46347
CSMA/CD-token passing hybrid protocol, optical fibre LANs for mixed data traffic 88−28349
CSMA/CM-based protocol with dynamic segmentation 87−2665
CSMS and token LANs, data transfer engine design 85−52087
cutoff points for roll-call protocols 85−57808
D-TASI over mobile radio fading channels, access strategies performance 88−28713
DAMA benefits and mechanisms in SCPC satellite networks 87−62920
DAMA communication systems, bursty traffic conditions, queuing performance 87−33845
DAMA protocol issues 86−30403
DAMA satellite communication systems, optimal capacity allocations strategies 86−23831
DAMA satellite communication systems, strategies for optimal capacity allocations 86−37807
DAMA satellite system for rural communications 88−60111
DAMA system, satellite-based 88−67307
DAMA system for Indian national network 88−28765
data communication, multiple-access schemes, performance 87−2666

multi-access systems continued
data communication networks, routing and multiple access, team theoretical approach 85−25208
data communication random access, stability during time left by speech packets 86−16604
data distrib. via satellite using VSATs *(German)* 88−60115
data transmission, two-bit contention-based TDMA technique 87−20212
data transmission systems organisation for microcomputer-based automation plants *(German)* 87−55835
data transmissions, adaptive reservation multiple access, simulation study 85−30509
decentralised control for slotted and reservation ALOHA, and LANs 88−59361
decentralised control of multiple access networks 87−55411
decentralized random access systems, timeout distributions 86−54577
defense satellite communications, new FDMA modem 87−40824
dehopped FDMA M-ary FSK satellite signals, SAW based demodulator 87−40822
dehopped FDMA M-ary satellite signals, SAW-based meas. system 88−41601
delay behavior of reserved priority channels operatingon a CSMA/CD protocol 86−16616
demand assigned multiple access algorithms in satellite communications systems, simulation analysis 88−35457
demand assignment procedures in video TDMA system 87−40038
demand assignment TDMA protocol for video teleconferencing-voice data optical networks 87−40424
demodulation, linear multiuser detectors, asymptotic efficiency 87−55206
determined CSMA technique for broadcast channels 85−19892
Deutsche Bundespost ISDN pilot project *(German)* 88−46670
DFS Kopernikus satellite communication network, TDMA technology appl. 87−76690
differential adaptive reservation multi-access technique for data transmissions, performance 87−40018
differential offset-QPSK modulation/demodulation technique for point-to-multipoint radio systems 88−45852
digital communications system, time delay device 88−8897
digital FDMA systems, link budget calc. program *(Japanese)* 88−41135
digital mobile radio systems, comparison of TDMA, FDMA, CDMA and hybrid FDM/TDM schemes 87−76608
digital point-to-multipoint radio system, 19 GHz, for local distribution 86−23690
digital regenerative satellite, INTELSAT inorbit testing 87−76652
digital satellite communication, book 85−10326
digital satellite communications, cost-effective networking using multicarrier TDMA 85−14179
digital satellite communications, multi-access closed network 88−3927
digital subscriber radio system, 26SS-D1, 26 GHz, for high speed digital transmission 86−23689
digital subscriber radio system in 26 GHz band 85−20031
direct access FDMA satellites using narrowband techniques, potential for mobile communications 87−40857
direct sequence PSK spread spectrum system, error probability eval. *(Polish)* 87−55962
direct sequence spread spectrum multiple access communication systems with narrowband jamming, SNR improvement due to filtering *(Japanese)* 86−49062
direct-sequence spread-spectrum modulation, probability of error 87−40702
direct-sequence spread-spectrum multiple access system, adaptive interference cancellation 88−46866
direct-sequence spread-spectrum multiple-access communication over Rician fading channels 87−3040
discrete memoryless asymmetric multiple-access channel with arbitrarily correlated sources 85−57578
discrete memoryless multiple access channel, capacity region 87−55395
discrete memoryless multiple-access channel withcribbing encoders 85−57180
discrete time memoryless additive white Gaussian noise channel 87−75678
discrete-time priority queues with partial interference 87−75973
disjointly shared networks, capacity anal. 86−29659
distributed algorithm for minimum-weight spanning tree in fully connected broadcast network 85−19575
distributed reservation protocol for integratedline-and packet-switched networks 86−49063
distributed scan channel multiple access model 86−54637
diversity receivers, random access protocols, performance eval. 87−62826
Domestic Data Bus for multiple access small area network 85−19839
domestic digital satellite system, 30/20 GHz, complete coverage of Italy 86−55275
domestic SS-TDMA satellite system role in network evolution strategy towards ISDN 86−55274
double-tier access-control schemes using polling backbone for MANs and interconnected communication networks 88−21477
DS-CDMA asynchronous system for VSAT satellite networks 88−53238
DS-CDMA spread spectrum, performance analysis 87−56103
DS-CDMA system using wideband noncoherent MFSK 88−46373
DS-SSMA communication systems using FIR and IIR filters, S/N ratio and anti-interference characts. 88−46855
DS-SSMA communications in impulsive channels, hard-limiting correlation receivers 88−28646
DS-SSMA performance of orthogonal codes 88−21375
DS-SSMA performance of orthogonal codes, impulsive noise 88−28647
DS-SSMA performance under interference and jamming 88−21940
DS/SSMA communications, nonGaussian effects 85−30897
DS/SSMA communications in impulsive noise, performance, linear correlation receivers 88−15317
DS/SSMA hard limiting receiver performance in nonGaussian noise 86−30576
DS/SSMA systems with random signature sequences, anal. 87−55972
DST-100 TDMA system fòr German domestic satellite 86−64941
DTS 10-64 23 GHz digital transmission system, design 87−34416
dual channel-based LAN architecture, design and performance evaluation 87−27727
earth-station antennas for multiple satellite access 87−2359
EHF satellite communication, frequency hopping spread spectrum 87−62908
end-to-end availability of satellite communication networks 87−27714
enhanced service cordless telephone system usingmulti-channel-zone-access scheme 86−64583

multi-access systems continued
equalization of TDMA links using in-service impulse response measurement 85−7957
equivalent complex baseband notation for a QPSK/TDMAchannel 87−2677
erasure, capture, and random power level selection in multiple-access systems 88−41130
erasure, capture and random power level selection 87−62415
erasure, capture and random power selection 87−55398
erasures and noise in splitting multiple accessalgorithms 86−54596
Ethernet and higher level protocol LSIs, optical bus 85−42290
Ethernet system, transmission components development and charact. *(Japanese)* 85−42234
Ethernet-compatible fibre optic LAN, transceiver design and implementation experience 85−8202
Ethernet-like local networks, pessimism of analytical models 85−42289
European Communications Satellite network, Swedish earth station with TDMA/DSI and computer control *(Japanese)* 86−30711
European GSM mobile communication system, solutions survey *(Norwegian)* 87−8199
Eutelsat and Intelsat, satellite digital telephony development *(Swedish)* 85−42527
EUTELSAT TDMA reference and monitoring station *(Japanese)* 87−13647
EUTELSAT TDMA/DSI system, low rate encoding for system capacity increase 87−56055
Experimental Mobile Satellite System for Communication using ETS-V, TDMA system design *(Japanese)* 86−49524
F2-R satellite CSSB-AM system performance for voice traffic 85−42547
fast frequency hopping multiple-access communication system, interference anal. 86−30105
fast frequency hopping type CDMA mobile radio communication schemes, performance eval. 87−40769
FDMA digital narrow-band cellular system 87−69967
FDMA regenerative satellite links, partial response digital FM with noncoherent detection 85−19316
FDMA satellite communications, coded M-ary modulation 85−42538
FDMA system, partial response CPM with optimum MSK-type receivers, effect of adjacent channel interference 87−68940
FDMA vs. TDMA 86−23597
FDMA/TDM hybrid system for spacecraft transponder in mobile satellite service 87−28496
FDMA/TDM user-oriented satellite systems, clock and carrier synchronisation 88−9499
feedforward tracking filter, principle and tracking behaviour 88−27931
FFH/CDMA cellular mobile radio system, fading induced capacity reduction 87−76576
FH-FSK spread spectrum system, error probability in multiple access *(Polish)* 87−20390
FH-MFSK satellite communication systems, dynamic CDMA algorithm for time acquisition 87−40831
FH-noncoherent M-ary FSK with list decoding, multiple access performance 88−21067
FH/DS spread spectrum communication system, multiple-access interference, BPSK *(Chinese)* 87−69886
FH/DS spread-spectrum communication system, multiple-access interference, DBPSK *(Chinese)* 87−69887
fibre optic network digital interface 87−56194
fibre optic networks, random access strategies 88−73919
fibre optic spread-spectrum multiple-access communication system, dimensioning 87−56172
fibre optics CDMA, fundamental principles 88−3309
fibre-optic networks, random access strategies 87−56195
fixed TDMA with finite buffer capacity, blocking and delay 85−8215
flow-controlled communications systems under bursty traffic, performance 87−40188
FODA-TDMA demand assignment protocol 85−63628
Framed ALOHA scheme with capture effect, performance eval. and optimisation *(Japanese)* 88−34863
framed movable boundary protocol for integrated voice/data in LAN 87−20196
frequency dehopped M-ary FSK signals for multiuser systems, frequency offsets in windowed reception 85−30898
frequency hop DS-SSMA system, appl. in speech communication 87−69885
frequency hop spread-spectrum communication, multiple access capability 86−30601
frequency hopped demand assigned multiple access scheme 86−16624
frequency hopping spread spectrum multiple access system, signal design using pseudorandom sequences 85−30895
frequency hopping spread spectrum multiple access system, signal design 87−55967
frequency hopping spread spectrum techniques appls., overview 87−3042
frequency-hop multiple-access packet radio network with noisy side information 87−55971
frequency-hop spread spectrum communication, multiple-access capability 87−55973
frequency-hop transmission for satellite packet switching and terrestrial packet radio networks 87−13182
frequency-hopped multiple access channel throughput, partially overlapping interference effects 86−43353
frequency-hopped multiple-access channels, coding rule 85−19291
frequency-hopped multiple-access DPSK spread spectrum systems, multiple-user interference 86−30082
frequency-hopped spread-spectrum random-access communications with multiple-reception capability 87−55407
frequency-hopped spread-spectrum signal detection and synchronisation 86−48957
frequency-hopping system, code acquisition 87−48867
full-duplex multiple access optical networks, transmissive star couplers 86−37874
fully variable demand assignment SS/TDMA satellite systems 86−59851
Gaussian asynchronous multiple-access channels, minimum probability of error 86−48721
Gaussian multiple access channel capacity, doubling by feedback 88−27711
Gaussian multiple access channel capacity, doubling by feedback 87−55396
geometrical analysis of stability for adaptive strategy of decentralized random multiple access 88−52631
GI/M/m multiserver queues, optimal prediction of queue lengths and delays 85−13553

multi-access systems continued
GMSK modulation, 1.2 GHz band premises data transmission system 88−45703
golden ratio control policy for multiple access channel 85−2705
group testing for heterogeneous population of users 87−39574
group testing for multiaccess communications 85−51516
group testing schemes using auxiliary slots for randomaccess communication 86−69313
H-network, CSMA/CD with adaptive and nonadaptive backoff protocols, throughput and packet delay anal. 88−15087
H-network, performance evaluation through simulation 86−43599
hand limiting direct-sequence spread spectrum repeater, multiple access modelling using phasor anal. 88−73892
hardware island bridges in networking, data transfer and exchange *(German)* 88−73576
heterogeneous population of users, multiple access algorithms via group testing 87−62410
high capacity land mobile communication system, radio link control 87−48948
high capacity TDMA radio system for rural communications in Canada 88−59988
high speed computer communications via satellite, developments 86−59871
hybrid access method in a multiple access channel 86−54622
hybrid contention-based TDMA technique for data transmissions 87−40416
hybrid multi-access scheme for satellitecommunications 86−30122
hybrid multiple access protocol analysis 87−55436
hybrid multiple-access protocol, anal. 88−66789
hybrid scheme of TASI and random access for integrated voice and data transmission over a satellite channel 87−69428
IBM's information management system causes protocol convertor failure 85−13889
IBM LAN strategy, incompatibility between baseband and broadband networks 85−13885
ICMA/CD, multiple-access for packet mobile radio, performance anal. 88−46916
idle-signal casting multiple access with data-slot reservation (ICMA-DR) for packet radio communications 88−3881
IEE standards for LANs, CSMA/CD access method and physical layer specifications 86−43571
IEEE 802.3 standard for fibre optic interrepeater link, CSMA/CD active star LANs appl. 88−35143
indoor digital radio networks 88−46878
indoor radio communications, distributed antennas 88−21020
indoor wireless communications, systems approach 88−46944
INELSAT TDMA/DSI system, introduction and operation 86−4574
instability conditions arising in analysis of some multiaccess protocols 87−40057
integrated burst/stream traffic in multi-access broadcast channel, access control scheme *(Japanese)* 87−40023
integrated LAN, advanced reservation multiple access protocol 87−34140
integrated multiple access radio network system for electric power utilities 86−49491
Integrated Satellite Business Network using M/A-COM's Ku-band VSAT network architecture 87−28528
integrated small ground station network, efficient multiple access protocol use 87−49008
integrated voice/data land mobile satellite expt., adaptive multiple access scheme 85−42542
integrated voice/data network for remote rural areas 88−41419
INTELSAT, intermediate data rate and TDMA systems implementation and operating costs comparison 88−53211
INTELSAT, TDMA terminal acquisition and synchronization 87−8223
INTELSAT digital services for international ISDN 87−28449
INTELSAT for global thin-route services, digital and analog solutions 85−47487
INTELSAT operations center TDMA facility 86−4581
INTELSAT satellite using PSK/FDMA system, multichannel digital TV transmission at 15 and 30 Mbit/s 87−34487
INTELSAT services and their evolution 88−3928
INTELSAT SS/TDMA system, microwave switch matrix development 85−20140
INTELSAT system, 120 Mb/s TDMA traffic terminal use 86−4585
INTELSAT system, Italian TDMA-DSI terminal 86−4586
INTELSAT system, satellites, earth stations and transmission techniques, Republic of South Africa participation 86−23791
INTELSAT TDMA burst mode link analyser 86−4590
INTELSAT TDMA commercial service, 120 Mbit/s and forward error correction codecs performance 87−8222
INTELSAT TDMA control subsystem, reference terminal equipment 87−8232
INTELSAT TDMA data channel, block orthogonal convolutional coding 85−57220
INTELSAT TDMA link design and transmission simulation 87−20433
INTELSAT TDMA monitor and control subsystem, CADC and OMC 87−8235
INTELSAT TDMA network, 120 Mb/s QPSK modem use 86−4587
INTELSAT TDMA network, TNS computer simulation package development 87−20443
INTELSAT TDMA network control facility 87−20431
INTELSAT TDMA system, acquisition and synchronisation control procedures 86−4577
INTELSAT TDMA system, Australian implementation 87−3160

multi-user system, modelling of secure data communication 87−55774
multi-user systems or LANs, selection 88−15116
multibeam packet satellite networks, uplink ALOHA random-access/downlink TDMA techniques, performance study 85−13668
multibeam packet satellite systems with freq. reuse, optimal TDMA assignments, anal. 87−28498
multibeam satellite, combined random/reservation access for packet-switched transmission with onboard processing 85−14165
multibeam SS-TDMA design considerations related to theOlympus Specialised Services Payload 86−59813
multicarrier demodulators for FDMA/TDM user-oriented satellite systems 86−55071
multicarrier system, TDMA/PSK, error probability variation due to nonlinearity caused by on-off bursting 85−14095
multichannel CSMA/CD, priority schemes for advanced multimedia networks 88−46350
multichannel LANs and MANs, connection-based media access 88−9119
multichannel local and metropolitan area networks, connection based media access 88−52922
multichannel multihop packet radio networks, architectures and performance 87−75970
multichannel multihop packet radio networks, performance 87−28380
multihop packet radio network, 3D CSMA/BT-CD 86−10607
multihop packet radio network, use of multitone, multiaccess with collision detection 87−27724
multihop packet radio networks, channel access schemes, performance evaluation by simulation 87−28360
multihop packet radio networks, channel spatial reuse and access protocols 87−33833
multihop packet radio networks, local Markov models, CDMA appl. 87−28381
multihop packet radio throughput calcs. 87−75969
multihop radio networks, fairness algorithms for maximal link activation 87−69884
multihop random access radio network with spread spectrum signals 87−48915
multilink open LAN for personal computers 85−25475
multimedian TDM system, advanced, for closed networks 88−9289
multimicroprocessor system communication structure static mode charact., comparative anal. *(Bulgarian)* 88−21658
multiple access channels, class of efficient contention resolution algorithms 85−30143
multiple access technique for centralized multiple satellite networking with on-board processing in the central node 88−52659
multiple radio channels, radom access system without retransmission discrimination discipline using packet switching 86−30096
multipoint 19 GHz digital radio system, low cost, local distrib. appls. 85−20036
multipoint microwave communications for local network needs 85−3357
multipoint radio for local networks 87−34415
multipoint telecommunication conferencing VLSI cct., based on twin-tub CMOS technology 87−2810
multiprocess protocols, performance modeling 88−52654
multiservice loss systems with access control, exact eval. 88−34539
multisubchannel direct-sequence spread-spectrum multiple-access communications over multipath fading channels 88−73416
multiterminal cordless telephone system 88−41457
multiuser asymptotic efficiency, optimum 87−7881
narrowband TDMA, channel equalisation principles 87−8162
narrowband TDMA mobile radio system, burst transients 88−67244
NASA developments of satellite communications, tracking and robotic vision technology 88−28816
NASA links satellite Earth stations with ISDN 86−49508
NB-TDMA mobile radio link, performance of DPM, Viterbi equalisation and channel coding 88−15385
nearly geostationary satellites, diurnal error bound in predicted ranges 87−40784
NEC Digital Radio Multiple Access Subscriber System (DRMASS) 88−28725
network access protocol for bar-type networks *(Spanish)* 88−73405
network communications reorganization, distributed evolutionary algorithm 86−30107
network decomposition into number of interconnected subnetworks 88−35188
network or multi-user system , pros and cons of each *(German)* 88−73608
networks and multi-user systems, differences and similarities 87−40373
noisy multiple-access channels, upper bounds on decoding error probability 87−39653
non-persistent and slotted non-persistent CSMA/CA protocols, throughput anal. 88−28165
noncoherent direct-sequence spread spectrum multiple access communications 86−10338
noncoherent hybrid DS-SFH spread-spectrum multiple-access communications 87−8155
nonhomogeneous LAN, availability driven multiple access network architecture 87−55791
nonhomogeneous trellis codes for the quasi-synchronous multiple-access binary adder channel with two users 87−27174
nonlinear optical elements in fibre optics CDMA 88−20772
nonpersistent carrier-sense multiple-access mobile packet radio protocols 87−48310
nonrepeating PN codes for code division multiple access, selection 86−30602
nonslotted random access radio channel with higher utilisation 87−34372
Nostradamus digital subscribers multi-access and cross-connect system, review 87−2713
NPCSMA scheme, optimal packet size in mobile fading channels 87−55450
NTT domestic satellite communications system 86−64893
office services and communication architecture integration *(German)* 86−4274
Olympus-1 satellite, specialized services payload for SS-TDMA expts. 88−10472
onboard processing for user oriented communication systems 87−20438
one-coincidence sequence sets for frequency-hopping multiple access communication systems 85−14098

multi-access systems continued
one-step throughput maximisation, independent stations algorithm 87−75975
optical communication multiple access channels with point-process obs., optimum demodulation 87−13711
optical digital link using SSMA technique, in-house data transmission, theoretical study *(Japanese)* 86−43844
optical fibre communication links for distributed antennas in space station 87−76796
optical fibre secure data networks, multiple-access technique using transmissive star couplers 86−49587
optical hypergraph, resource sharing, open loop locking 88−3628
optimum time-hopping patterns 88−41134
output process approximation of multi-user random access communication networks 88−52651
p_i-persistent protocol for unidirectional broadcast bus networks 88−289
p-persistent CSMA/CD, dynamic behaviour using cusp catastrophe 87−69406
packet access protocols for mobile data communication systems, performance *(Japanese)* 85−25778
packet broadcast channels with acknowledgement feedback, distributed control, stability 85−57572
packet broadcast systems under limited buffer conditions, protocol performance study 86−59391
packet mobile radio communications *(Japanese)* 86−69646
packet radio network architectures and protocols 87−34446
packet radio networks, carrier sense multiple access with busy tone and collision detection 85−8319
packet radio networks, receiver-initiated busy tone multiple access 88−59964
packet radio networks protocols, performance comparison 86−30594
packet radio networks using code division multiple access supernodes 86−30592
packet radio networks using spread spectrum signalling, multi-access capability and protocols 87−34448
packet satellite communications, scheduled-retransmission multiaccess protocol 88−3295
packet satellite systems with low duty factor terminals, two-level multiaccess schemes 85−63606
packet switched satellite communication, reservation multiple access scheme *(Japanese)* 86−64376
packet switching network access protocols for multi-mediapacket communications 86−64657
packet switching network with conflict-free multiple-access, optimal channel assignment 86−4075
packet transmissions over a combined digital cellular mobile radio-LAN system 87−7893
packet voice on a local area network with round robin service 87−7883
packet-switched low altitude multiple satellite system, crosslink communication architectures 87−34494
packet-voice performance evaluation of two multiple access protocols with the use of an 8086-based real-time simulator 85−19849
packetized speech interpolation for small earth stations 88−3296
PAM/FM techniques for digital mobile radio 87−62843
pan-European mobile radio system, multiple access methods 87−8211
pan-European mobile radio system, multiple access methods 87−8212
Pareto optimal flow control in a multiclass environment 88−35190
passive star all-optical ultra-fast networks 87−69684
passive star-configured optical LAN using CSMA/CD 88−3598
payload prototype for satellite with time-space-time stages *(Italian)* 85−25790
PCM-TDMA subscriber system and direct digital interface to digital exchange 88−59938
PDAMA satellite access protocol, performance evaluation 86−59870
PDTS test equipment for Intelsat TDMA/DSI system *(German)* 85−47468
performance analyais of multiple access protocols, book 87−2929
performance evaluation of multiple-access networks: introduction and issue overview 87−75962
performance limitation for multiple accesscommunication without feedback 87−2460
permutation invariant symmetric multiple access channels, theoretical study, spread spectrum system appl. 88−21365
persistent CSMA systems, throughput anal. 85−62938
persistent CSMA/CD, delay and throughput anal. 88−46352
PN sequences for spread spectrum communication and a new class of CDMA codes *(Chinese)* 88−35337
point to multipoint microwave subscriber radio, SR500 system in Canada 86−59783
point-to-multipoint digital radio system for rural subscriber areas 88−60014
point-to-multipoint high capacity subscriber radio 87−34383
point-to-multipoint radio systems, random-request demand-assigned TDMA protocol 86−23692
poisson contention resolution problem with feedback based on conflict intensity 88−45803
Poisson multiple-access contention with binary feedback 85−19550
polling backbone for metropolitan and packet-radio networks, random-access reservation 88−9401
polling of two queues with synchronized correlated inputs and zero walktime 87−62418
polling system with single message buffer at each station, interdeparture process anal. *(Japanese)* 88−14867
polyphase periodic sequences without crosscorrelation andtheir application to asynchronous SSMA systems *(Japanese)* 86−23202
portable communications, digital, universal system, applied research perspective 87−28439
portable communications environment, delay spread effects on digital modulations 88−8672
portable radio system, diversity selection using coding 88−9457
prioritized demand assignment protocols and their evaluation 88−34850
prioritized multiaccess protocol for distributed real-time applications 88−8914
prioritized-virtual-time CSMA: head-of-the-line priorityclasses without channel overhead 86−16618
priority acknowledgement schemes for 1-persistent CSMA-CD systems 88−3300
priority CSMA/CD LAN, voice transmission, efficient protocol using hybrid switching 87−20195
priority multichannel CSMA/CD protocol 87−27713
priority user protocol for CSMA/CD and anal. 85−42288
protocol, behaviour, countable Markov chain theory appl. 85−51838

multi-access systems continued
protocol, performance and stability of simple gated conflict resolution algorithm 87−62401
protocol for multihop radio networks 86−10599
protocols, group testing design and analysis 85−63147
protocols, modelling and evaluation 86−30106
protocols for optical fibre based LAN, priority implementation 87−20189
pseudo-coherent demodulation of MSK type signalsadapted to frequency hopping transmission *(French)* 86−48749
pseudo-star LAN, with geographically centralised logically distrib. topology 86−30430
PSK group problem for satellite communications 87−56047
PSK-TDMA carrier recovery, transient probability response of cycle slip 85−13462
public key authentication scheme for multiple users by single key 88−27802
QPSK, maximal length nonbinary m-sequences 88−52334
QPSK transmission, 120 Mbit/s, adaptive equaliser design 88−3900
QPSK/TDMA demodulation system with least-squares link anal., equalised, design 87−76017
QPSK/TDMA satellite channel, burst-mode link analyser with least squares algorithm 88−53208
QPSK/TDMA satellite channel and burst-mode link analyser, computer simulation 88−28762
quadrature MSK demodulator, code word selection for burst synchronisation 87−12932
QUANTANET 12.5 Gbit/s fibre-optic network using all-optical processing and TDMA 87−56130
R-CACC scheme for multiaccess computer networks 86−16623
radio, forwarding schemes in a single-hop multi-stationpacket-radio network 86−30607
radio channels, multiple access protocols collision detection technique 88−3822
radio equipment for trunk TDMA systems 85−14216
radio networks using ALOHA random multiple-access system, packet transmission 86−23668
radio systems, multi-access, with local random access, main principles *(Polish)* 85−36926
radio systems, multiple access techniques, conf., London, England (Oct. 1986) 87−5155
random access algorithms, finite and infinite population models relationship 88−14857
random access channels, instability of exponential back-off protocol for acknowledgement-based transmission control 87−48268
random access channels with bandwidth and energy overhead, collision resolution protocols 85−42033
random access for a multibeam satellite with dynamic transponder switching 88−52660
random access interconnected channels, stability region 87−55405
random access multibeam packet satellite with buffer and arbitrary transition overhead 85−30999
random access protocol based on tree conflict resolution algorithms, delay anal. 86−54620
random access protocols, appl. of multiuser coding for throughput enhancement 88−73396
random access schemes, steady state behavior, unified anal. 86−23438
random access system, optimisation by biased source blocking 86−4081
random access systems 87−69427
random access systems with intelligent central node, performance anal. 88−9391
random burst allocation in the CS-2 TDMA demandassignment satellite communication system 86−43797
random channel capacity, improved upper bound 87−54798
random coding bound and codes produced bypermutations for the multiple-access channel 86−29725
random constant composition codes for multiple access channels 85−36195
random multiple access algorithms 86−37192
random multiple access algorithms, unified method for delay anal. 86−54398
random multiple access stack algorithm for local networks, characts. 88−73403
random multiple access system, upper bound on capacity 88−52619
random multiple access system with impatient packets 86−4082
random multiple access system with stack algorithm, packet delays 85−51833
random multiple access system with unmodified treelike algorithm, upper bound on packet delay 87−40020
random multiple-access algorithms, delay calcs. 87−75974
random multiple-access channel with unknown interference probabilities, adaptive algorithm 87−55423
random multiple-access communications, stack algorithm anal. 85−51828
random multiple-access communications, survey of USSR contributions 85−51824
random signal levels for channel access in packet broadcast networks 87−75971
random-access communication system, nonhomogeneous user population 88−40772
random-access communications, queueing problems 85−51515
ranging and processing mobile-satellite, cooperative surveillance and data link service 88−46962
real time satellite position determination for TDMAsystems 86−23795
Reed-Solomon coded freq. hop spread-spectrum communication systems, multiple-access capability 87−40703
regenerative TDMA satellite communication system, synchronisation technique for onboard master clock 86−4567
repeat call models, efficiency of numerical methods 87−75986
reservation access control scheme for multi-access broadcast channel, optimal channel partition *(Japanese)* 87−33840
reservation multiple access, tree algorithm 86−16612
reservation protocols with tree-type reservation channel, throughput analysis 87−69419
reservation type random access protocols 88−52632
resolvable-contention ring, access control for ring-typed LANs 88−3304
resonant p-i-n FET receivers for lightwave carrier systems 88−47052
retransmission schemes for CSMA/CD networks 86−16621
reverse control channel characterisations in cellular system and total access communication system 87−76615
RF coverage and antenna systems for space station 87−40869
ring data transmission system, high speed, of LAN, control method and device for multiple access 87−27672
robust coding for multiple-access channels 87−2435

multi-access systems continued
robust collision resolution algorithm for the random access system with a noisy channel 87−55433
roll call protocols, cutoff points 87−75981

satellite communications, present and future appls. *(German)* 86−69710
satellite communications, TDMA traffic terminal 87−8221
satellite communications network control simulation 86−30734
satellite data communication, priority-oriented reservation multiple access scheme 85−25787
satellite digital communication service, SDCS 87−48983
satellite digital communication service, TDMA system 87−48984
satellite digital communication service, TDMA system *(Japanese)* 87−34470
satellite digital communication system, multicarrier demodulator 88−45854
satellite digital communications circuit-switched system 87−48987
satellite ground stations, low cost, general purpose TDMA LSI develop. 87−28513
satellite ground stations, small, spread spectrum 86−64912
satellite ISDN, on-board processor for a TST/SS-TDMAtelecommunications system 86−4444
satellite link design 87−34502
satellite links with TDMA, optimal traffic assignment by set covering and column generation 87−40802
satellite multiaccess protocols for single channel data networks 87−40806
satellite multiple access protocols, simulation models for performance eval. 88−34846
satellite network to terrestrial LAN connection *(Japanese)* 88−28391
satellite networks, adaptable multiple access technique for varying traffic intensity *(German)* 85−25198
satellite networks, digital, space segment cost functions 85−42544
satellite packet communication networks using multiple-access protocols, performance comparison 85−14181
satellite relay FDMA traffic representation and associated on-board routers 88−46957
satellite relay systems, multiple access techniques 88−73875
satellite switched TDMA communications system, channel reallocating onboard baseband switch 88−46348
satellite switched TDMA system with digital intersatellite links, onboard baseband processor 88−46993
satellite switched time-division multiple access systems, frame synchroniser 86−30695
satellite switching center with switching diagnostics for SS-TDMA system 87−40820
satellite system, network configuration 85−42526
satellite system, parallel search PN code acquisition for TDRSS multiple access system 88−47010
satellite system, TDMA and random access techniques integration 85−42541
satellite system integration with telecommunication network 87−13638
satellite systems, digital, adaptive forward error control and time-frequency resource sharing techniques 85−30981
satellite systems, digital, transmission design requirements 86−55276
satellite systems, modulation and coding 85−36968
satellite systems, terrestrial interface architecture, DSI/DNI 87−8224
satellite systems with time diversity and multistation access (TDMA) signal code constructions efficiency 86−37819
satellite TDMA systems from Mitsubishi Corporation for network appls. *(Japanese)* 87−40799
satellite TST/SS-TDMA telecommunications system: from cable to switchboard in the sky 85−14159
satellite-switched TDMA systems, synchronisation technique 85−47456
satellites, onboard processing, systems and benefits 87−76643

multi-access systems continued
SCI-net, low cost CSMA-CD network for personal computers 86−4325
SCPC equipment for satellite business systems 85−14214
SCPC mobile satellite radio service, demand assignment system design 86−17342
SCPC signal demodulator, 400 channel, chirp transform and correlation detection scheme 88−44216
SCPC/FDMA system, intermodulation distortion in presence of dominant carrier 87−62900
SDCS, satellite digital communications service *(Japanese)* 87−34469
SDI communications system alternatives, computer aided eval. 88−53147
security techniques 87−19413
segmentation algorithm for Air Force packet-DAMA 86−30110
Segnet LAN protocol performance, simulation study 88−15059
sequential decoding algorithm in multiple-access channel 86−48777
sequential decoding for multiple access channels 87−55393
serial MSK modems for TDMA satellite equipment 87−20319
session admission control 87−55447
SHF 900 digital cellular system, development 87−28445
Simula package for communication systems simulation, layered approach 87−40692
simulation model for a class of contention-based multiple access, multihop packet radio networks 87−40051
single channel, perform. eval. of interval-searching conflict resolution algorithms 87−54797
single-user detectors for multiuser channels 88−27909
Skylink mobile satellite service, 806-902 MHz, system config. using multi-access techniques 85−14157
SKYNET 4 system testing, multiaccess traffic simulator development 86−30701
slotted ALOHA multi-access systems, thrashing cusp, catastrophe theory 86−23187
slotted ALOHA multihop packet radio networks, throughput-delay charact. 86−23190
slotted ALOHA packet radio networks, delay anal. 88−3831
slotted ALOHA performance in cellular radio environment with channel capture 88−46931
slotted ALOHA system, multiple access protocols, approx. performance evaluation 86−30117
slotted ALOHA systems, lightly loaded, optimal retry distrib. 85−63132
slotted ALOHA systems that achieve stability, control procedures 87−19980
slotted ALOHA-code division multiple access systems, effect of acknowledgement traffic on performance 85−13662
slotted multiple access OR channel with feedback, coding scheme 85−2923
slotted nonpersistent CSMD-CD systems, acknowledgment traffic anal. *(Japanese)* 86−23203
slotted protocols in multi-segment LAN environment, performance anal. method 86−30121
slotted random access spread spectrum (frequency-hopped) packet radio networks 87−40039
slotted random access spread-spectrum networks: an analytical framework 87−75968
slow-frequency-hop packet radio networks, side information and code rate tradeoffs 88−3814
small aperture optical intersatellite link terminal, tracking system optimisation 88−22171
SMD 30/1.5 point-to-multipoint TDMA radio system 88−3827
software for communications meas. system with multiple access 86−30197
space division multiple access protocols for a satellite switched spotbeam communication network 85−14201
space station communication system requirements, FDMA system design and anal. 87−34525
space station multiple access communications system 87−40870
space-time models of asynchronous CSMA protocols for local area networks 87−75965
Spacetel, satellite-based solution to long-distance communications 88−3958
spanning multiaccess channel hypercube interconnection network, performance eval. 87−55811
spatial resolution of coherent ALOHA collision sources 85−36471
spatial TDMA, collision-free multihop channel access protocols 86−4077
split reservation upon collision, SRUC, protocol for satellite packet communication 87−7885
splitting multiple access algorithms, erasures and noise errors effects 87−40015
splitting protocols in presence of capture 85−51830
spread ALOHA, simulation results on error rate performance 88−66798
spread spectrum, multiple access communication system, experimental results 86−10964
spread spectrum, slotted code division multiple access network, performance anal. 85−30886
spread spectrum CDMA systems, generation and correlation props. measurements of Gold codes 88−40790
spread spectrum CDMA systems, Gold and Kasami code sets selection 87−55946
spread spectrum channel, throughput anal. for code division multiple accessing 85−2913
spread spectrum communication, frequency hopping code sequence designs with large linear spans 85−42441
spread spectrum communications, book 86−13339
spread spectrum fibre optic LAN using optical processing 86−64751
spread spectrum for low cost satellite services 86−37830
spread spectrum LAN, communication protocols 85−13945
spread spectrum multi-access systems, correlation props. of dual-BCH, Kasami and other sequences 88−28644
spread spectrum multiple access, pros and cons, appl. and theory 87−55404
spread spectrum multiple access communication systems using delay transform method, interference noise 85−13656
spread spectrum multiple access system, group random access scheme 85−42017
spread spectrum multiple access systems using wideband M-ary FSK 88−28761
spread spectrum multiple-access communication systems, performance eval. *(Japanese)* 88−21921
spread spectrum optical transmission systems, crosstalk charact. *(Japanese)* 88−9592
spread spectrum synchronous access communication system, performance by orthogonal sequences 87−13558
spread spectrum synchronous access communication system using orthogonal sequences, performance study *(Japanese)* 85−47415

multi-access systems continued
spread spectrum systems, outage probability due to autointerference 87−40672
spread spectrum techniques, modulation, interf. and multiple access considerations *(Hungarian)* 86−4469
spread spectrum-based synchronisation of digitalsatellite transmissions 86−59392
spread-spectrum multiple access for spacecraft service functions 87−48975
spread-spectrum packet radio networks, direct-sequence, throughput anal. 88−41514
spread-spectrum random-access monohop networks, with adaptive packet protection 88−41517
spread-spectrum slotted ALOHA satellite packet networks, performance anal. 88−21412
Spreadnet, spread spectrum LAN using DS-SS-CDMA techniques 87−34124
SR500 microwave radio system with random-request demand-assignment TDMA 85−57977
SS-FDMA, nonregenerative payload technologies 87−76651
SS-FDMA satellite systems, user oriented, onboard technologies 88−3926
SS-TDMA, short-interval onboard master clock control scheme *(Japanese)* 87−56082
SS-TDMA frame synch. unit, model 88−8924
SS-TDMA multi-beam, onboard baseband switch config. *(Japanese)* 87−28479
SS-TDMA regenerative repeater for communication satellite, integration and testing 87−70000
SS-TDMA satellite system performance 88−28764
SS-TDMA satellite system using onboard regenerative repeaters and baseband switch 85−20142
SS-TDMA satellite system with onboard time/space/time switching facility 85−20141
SS-TDMA switch matrices using optical technology 87−76649
SS-TDMA synchronisation scheme using onboard burst generator 86−17347
SS-TDMA systems, burst scheduling algorithm *(Japanese)* 87−28478
SS-TDMA systems, regenerative, bit and burst synchronisation 86−17350
SS-TDMA telecommunication system for a small country, ITALSAT programme 88−3946
SS-TDMA time slot assignment algorithm 85−7961
SS/TDMA equipment, real time configurable, for French satellite project 87−76647
SS/TDMA satellite system, fully variable demand assignment, time slot assignment selection 86−17340
SS/TDMA satellite system, switching mode allocation, dynamic reconfiguration, throughput gains 86−55265
SS/TDMA system, adaptive telecom. network, time slot assignment updating scheme 86−69204
SS/TDMA system, minimum number of switchings 85−57552
SS/TDMA system with min. switchings, schedule length minimization 86−54600
SS/TDMA systems, scheduling algorithms for SS/TDMA systems improvement 85−31000
SS/TDMA systems, switching optimisation 85−30871
SS/TDMA systems, time-optimal algorithms, switching modes 87−40009
SS/TDMA systems with intersatellite links, time slot assignment 87−62897
SS/TDMA traffic assignment, practical approach 86−17341
SSMA communications, multipath diversity reception 88−15318
SSMA frequency hopping system, direct sequence technique, spectrum spreading effect *(Spanish)* 87−69902
SSMA in-house digital wireless optical link, design 87−76727
SSMA systems, frequency-hopping code sequence designs having large linear span 88−45899
SSMA systems, modulatable orthogonal sequences and their appl. 88−45846
stability and throughput in virtual time CSMA 86−16597
stack algorithms for random multiple access networks with asymmetric noisy feedback 88−46346
star couplers, transmissive, for full duplex channels 86−43870
star networks, semaphore-based access protocol 87−62679
statistical multiplexers, delay-throughput and buffer utilisation charact. 87−69788
strong converses for multiple-access channels 87−75681
subscriber synchronised code multiplex system for speech transmission in multi-access LANs *(German)* 86−59717
summing multiple access channel with feedback, zero-error encoding 88−72755
symbol-asynchronous Gaussian multiple access channels 87−55392
synchronized spread-spectrum local area network 87−34125
synchronous and channel-sense asynchronous dynamic group-random-access schemes 85−57554
SYRACUSE, satellite communication system using spread spectrum multiple access 85−25845
TDMA, computer-controlled satellite communications monitoring system design 85−58042
TDMA, contention-based technique for mobile data communication systems 86−69679
TDMA, random-access environment, performance overview 85−13665
TDMA, satellite communication appls. 88−3924
TDMA and SCPC systems, onboard digital signal processing 87−56049
TDMA and TD/FDMA wideband systems for digital cellular mobile radio, simulation study 87−8213
TDMA appls., bandwidth efficient DPSK 88−66276
TDMA channel, zero-IF digitisation and entropy anal. 87−76016
TDMA control signals, parallel transmission scheme for block error rate reduction *(Japanese)* 88−21390
TDMA demand assignment control based multi-service satellite communication system 86−55264
TDMA experimental mobile radio link 88−73827
TDMA for advanced land mobile communications system *(Japanese)* 87−56010
TDMA for digital communication systems *(German)* 85−30955
TDMA for small Earth stations 85−14215
TDMA high speed satellite communications, 5-tap adaptive IF transversal equaliser appl. 88−46977
TDMA hybrid contention-based technique for data transmissions 88−34856
TDMA microwave radio, technology and appls. 88−3850
TDMA mobile radio channels, software package for simulation 88−60033
TDMA mobile radio networks, centralised time-slot allocation problem *(Spanish)* 87−69989

multi-access systems continued
TDMA mobile radio systems. nonlinear adaptive equalisation structs. 87−76611
TDMA network with voice and data traffic, anal. 85−13660
TDMA networks with bursts of traffic, nodes calc. *(German)* 86−54396
TDMA point to multipoint systems, architecture and concepts 87−34413
TDMA QPSK satellite channel, equalisation 88−3908
TDMA QPSK satellite channel, equalisation 87−3159
TDMA real-time voice services on tree-shaped multi-media network *(Japanese)* 87−28327
TDMA satellite channels, demand-assigned, network efficiencies 85−42512
TDMA satellite communication system *(Japanese)* 88−15411
TDMA satellite communication system, onboard master clock generator, synchronisation technique 86−17348
TDMA satellite communication systems *(Japanese)* 87−76659
TDMA satellite communication systems *(Japanese)* 88−9475
TDMA satellite communication systems 86−23788
TDMA satellite communication systems, microwave implementation of serial MSK filters 86−27437
TDMA satellite communication systems, synchronisation *(Japanese)* 88−15410
TDMA satellite earth station, frequency-storage-type AFC circuit for burst demodulator *(Japanese)* 87−23998
TDMA satellite network, low C/N modem design 87−34259
TDMA satellite system, Reed-Solomon codes appl. 87−40830
TDMA satellite systems for the future *(Japanese)* 85−47466
TDMA satellite transmission network with a new technique for variable channel allocation 85−42543
TDMA scheme operating under preemptive priority discipline, message delay anal. 88−46366
TDMA system, network control processor design 88−53200
TDMA systems; switching transient problem 87−8164
TDMA systems, burst interference anal. 86−37718
TDMA systems, multiple channel utilisation considering interdependent traffic sources *(German)* 87−40132
TDMA systems, PLL design 86−29928
TDMA technique, fixed allocation with finite buffer capacity, anal. 87−69410
TDMA TUTOR computer-based training concept 86−4592
TDMA wide-band systems, channel estimation and synchronisation technique 88−28155
TDMA-arrangements, telecommunication ground equipment operations *(German)* 85−36962
TDMA-cellular narrow-band mobile radio system, expts. 88−9459
TDMA/DSI and companded SSB satellite transmission techniques, analytical comparison of capacity 85−14178
TDMA/DSI equipment for trunk telephony systems 85−14213
Telecom-1 satellite communications project, review 85−3397
telecommunication channels, perspective, information theoretic approach 85−51514
telecommunication channels, sequential decoding 88−66294
teleterminal system for mobile data communication 88−73821
terminal-priority contentionless access algorithm 86−54582
Thailand rural telephone service 88−28277
throughput analysis of a DS-CDMA system in a multipath fading channel 88−73415
throughput and delay analysis of free access tree algorithms with mini-slots 87−55432
time constrained communication, controlling window protocols 88−28151
time division bus system simulation, SLAM model 85−25210
time division multiplex access local area networksusing fibre optics 86−54908
time multiplex networks with multiple access and burst traffic, node computation *(German)* 86−37209
time slot assignment in SS/TDMA systems withintersatellite links 86−54599
time slot assignment updating system for an adaptive telecommunication network employing an SS/TDMA system *(Japanese)* 85−25206
time-domain multiple-access satcom network, burst-limitation 86−30700
time-hopping and frequency-hopping communications 87−55970
time-space-time SS/TDMA on-board processor system 86−55087
token passing access protocol with priority fns. for ring-shaped LANs, approx. anal. 86−43370
Tokyo Earth station, construction *(Japanese)* 88−28769
totally asynchronous multiple-access channel, capacity region 85−51826
transaction passing in a multi-user access to database *(German)* 85−19773
transceiver population estimation for multiple access channel 87−28379
transmission control scheme, infinite source model and ternary feedback 88−8893
transmission format and receiver logic for random access strategies in a fiber-optic network 88−67437
tree algorithms for random access channels in local area networks 87−27726
tree and trellis codes, error probability and free distance bounds 87−55394
tree conflict resolution algorithms on multiple-channel networks 87−55559
tree conflict resolution algorithms using constant size window access, performance anal. 88−14855
tree-based multiaccess protocols where collisionmultiplicities are known 86−4078
trees, analytic properties 85−51519
TST-TDMA satellite telecom., on-board processor design 86−30693
TST/SS-TDMA system, variable origin algorithms 88−67287
TST/SS-TDMA telecommunication system 85−14230
two-priority packet broadcast channel, stability conditions 85−57574
two-way channels and multiple access channels, upper bounds for capacity region 85−57198
UDS 10-64 data transmission system on TDMA microwave radio 85−57978
UHF demand assignment multiple access SATCOM system, PC based design tools 88−22034
UHF MILSATCOM demand assignment, one layer vs. two layer 88−22041
UHF SATCOM, DAMA management system 85−31007
UHF uplink satellite channel, generalised model for multi-user acquisition 87−56086
uncontrolled multiaccess system, remote access 85−42069
United States, digital network architecture for cellular radio 88−46915
Unix, communications using uucp, cu and getty and spooling and file transfer *(German)* 88−73604
variable bandwidth IF amplifier with band-pass filter charact., TDMA receiver design appl. 87−59207
variable slot size nonpersistent CSMA-CD, anal. *(Japanese)* 86−23204
vehicular communications technology, conf., Philadelphia, PA, USA (June 1988) 88−69998
VHF/UHF radio systems 86−17208
video teleconferencing-voice data optical networks, hybrid protocol anal. 86−64623
virtual time CSMA, new algorithm 86−4076
virtual time CSMA protocol, performance anal. 86−54635
virtual time CSMA protocols for hard real-time communication 87−69413
virtual token passing networks 88−73592
voice-data integrated protocol for unidirectional broadcast bus networks 88−53031
voice-data integration, hybrid FARA/CSMA-CD protocol 85−46992
voice/data radio network, design considerations for code division multiple access 85−30896
VSAT communications networks, overview 88−60081
VSAT networks, multiple access protocols for data communications 87−70001
VSAT satellite data networks, multi-access protocols 87−76653
waveform and architecture concepts for a highefficiency TDMA satcom system 86−59852
white Gaussian multiple access channel with feedback, capacity 85−2751
wide-area radio data network, integrated, architecture 87−19975
wideband klystron amp. for digital satellite communications 86−21041
wideband TDMA signals reception in multipath environment 86−37795
window protocol for transmission of time constrained messages 88−66802
window random-access algorithms, delay distribution anal. 88−41147
Yamaguchi satellite communication station, TDMA/DSI traffic office facilities, test results *(Japanese)* 87−34491
Yugoslavia 3, ground station for satellite transmission and TDMA terminal *(Croatian)* 88−22022
zero error feedback capacity region of a certainclass of multiple-access channels 86−3731

multi-user systems *see multi-access systems; multiprogramming; time-sharing systems*

multichannel analysers *see pulse height analysers*

multicriterion problems *see operations research*

multidimensional digital filters
see also two-dimensional digital filters
1-D and multidimensional wave digital filters, roundoff noise evaluation *(German)* 87−17232
1-D to N-D highly parallel computing structures for IIR digital filters 87−66402
2-D recursive, design, 2-variable VSHP generation method 86−52964
2-D state-space, with fewer multipliers 86−52965
2D and 3D digital filter design in digital image processing 88−21364
2D FIR/IIR filter recursive and nonrecursive realisation 87−52755
3 D separable-denominator recursive digital filters, approx. and min. roundoff noise synthesis 88−19276
3-D, design, transformation techniques 86−67402
3-D, symmetry results 86−67403
3-D digital filtering of biomedical images from computerised axial tomography 87−50291
3-D FIR, spherically symmetric, design 86−52966
3-D separable-denominator digital filters, singular-value decomposition design *(Japanese)* 87−66390
3-D separable-denominator digital filters, min. roundoff noise, synthesis *(Japanese)* 87−32020
3D digital filters, optimal design method, image processing appls. *(Japanese)* 88−6992
3D linear phase FIR filter design by 1D digital filter transformation 87−24361
3D rational approx. using second order information 87−66415
3D recursive digital filters, state-space stability criteria 88−19275
3D recursive filters, design for image processing appls. 85−57468
3D separable denominator digital filters with minimum roundoff noise, synthesis 88−25327
3D state-space digital filters, separable denominator, direct design 87−59751
3D type, design using 2D rotated filters and stabilisation procedure 88−25331
3D type, rational approx. 87−52746
3D type, symmetries and their appl. to filter design 86−62767
3D-recursive digital filters with symmetry, design technique *(Japanese)* 88−70922
adaptive 3-D recursive cone filters, highly selective, design 87−66421
adaptive algorithm for active cancellation of wideband random field 86−41240
adaptive three-dimensional recursive cone filters, highly selective, design 87−66381
analog circuits, relationship with multidimensional digital filter algorithms 86−62784
BIBO stabilisation considerations 86−62766
BIBO stability of *n*-D linear shift-invariant filters 86−62765
bilinearly degraded images, restoration 86−64366
CAD techniques 86−67401
closed loss behaviour type, design technique 87−45084
decimation and interpolation filters, joint optimisation, time-varying imagery appl. 87−24359
design and implementation problems of multivariable networks and systems 86−62341
digital TV subsystems, structures *(Japanese)* 86−17608
doubly loaded lossless two-ports simulation, comparison and generalisation 88−50275
efficient multidimensional spherically symmetric recursive digital filter design satisfying prescribed magnitude and constant group delay responses 87−59731
FIR 3-D digital filters, optimal design by linear programming *(Japanese)* 87−73566
FIR and IIR realisation based on decomposition theorem 85−23046
FIR filters design using interpolatory approximation method 87−19790
frequency-domain design and stability 86−20734
HDTV fields, spatio-temporally subsampled, multidimensional interpolation of progressive frames 87−63151
HDTV signals, pre- and post-filtering for sampling rate reduction and display up-conversion 88−29077
high speed delayed multipath 3-D FIR digital filterstructure 86−67387
high speed processing appl. 87−59734

multidimensional digital filters continued
highly selective 3D recursive beam filters, elimination of passband orientation warping 86−62737
IIR block digital filters, derivation and stability anal. 87−59772
IIR general-support filters, anal. 85−23047
Kharitonov's theorem and stability test ofmultidimensional digital filters 86−67388
linear shift invariant digital filters, three- and higher-dimensional, stability props. 86−1269
linear shift-invariant type, PLSI polynomials and BIBO stabilisation 86−20736
local state models for *m*-dimensional operators 86−1267
McClellan transformations for multidimensional FIR digital filters with complex coefficients *(Japanese)* 88−19278
modular realization 85−34088
multidimensional digital filters, approximation and implementation 88−63816
multipath separation by global optimization 87−12971
nonlinear filters, theory and realisation 87−19793
NTSC colour multiplexing improvement by multidimensional filtering 88−66683
PAL home TV receivers, quality improvement by adaptive inter-intraframe processing *(German)* 86−49799
PAL TV signals, 3D pre- and post-filtering 88−41027
partitioned matrix representation for time- and freq.-domain anal. 86−62768
performance analysis of multidimensional block state-space models 87−66413
recursive, n-variable rational approximations 87−45020
recursive digital filters, stabilisation method 87−66384
recursive filters, stabilisation using LSI polynomial technique *(German)* 88−52454
recursive filters, stabilisation using LSI polynomials 85−34084
recursive forms of optimal multidimensional filters for image reduction 87−59729
recursive type, stabilisation using reciprocity concept 87−24330
recursive type derived from analog reference transfer fns., realisation technique 87−24347
recursive/nonrecursive filters design 88−6990
second order adaptive cascade filter, fast least squares algorithm *(French)* 88−21260
signal processing and appls. 88−27877
single-input single-output, optimal realisation 87−59775
spatial temporal filter, optimal detection system for multidimensional stochastic signal, response anal. 88−46056
spherically symmetric IIR digital filters with sum of powers-of-two coeff. 87−66424
stability results 88−899
stability test method 86−62732
state-space analysis and minimization of roundoff noise in separable denominator multi-dimensional digital filters *(Japanese)* 88−6996
symmetry appl. in design 87−904
theoretical review 85−17046
unified approach to the minimization of quantization effects in separable denominator multi-dimensional digital filters 88−25343
video signals, source coding using methods with band separation *(German)* 85−31200

digital network service capabilities 88−3394
digital PPM amplitude division multiplex system with bandwidth compression *(Japanese)* 88−21857
digital subscriber loops, wave difference timing recovery technique 85−57827
digital systems 85−30490
digital systems, encoding of signals and data transmission *(German)* 88−46654
diode laser, multilongitudinal mode, electro-optical modulation at 850 nm with coherence multiplexing 87−68578
direct broadcast TV signals, truncation and threshold noise effects for time compression multiplexing 86−30941
direct sequence spread spectrum systems, tracking errors due to multipath waves, reduction method 88−15312
direct-multiplexed liquid crystal data displays 86−50177
directly addressed matrix liquid crystal display panel with high information content 87−8668
discrete time $G^{[X]}/D/1$-S queueing system analysis, appl. in packet switching 88−52649
diversity reception techniques development, S/N improvement methods *(Czech)* 85−20081
dot-matrix displays with guest-host CNPT mixtures in homeotropic orientations 85−14930
DOTAN experimental integrated optical broadband subscriber network, multiplex technology *(German)* 85−47057
DRAM design, data refresh and address multiplexing 86−14208
DS3 format for synchronous transmission 85−42030
DS3 multiplexer, synchronous transmission 86−69510
DS3 standard for synchronous transmission 87−40022
dual FFT-processor for digital processing of vector signals in real time *(Russian)* 87−47698
dual-frequency addressing of liquid crystal matrixdisplays with three drive frequencies 86−11642
duplex current-controlled PWM inverters, multiplexing control scheme 88−24067
dyed dot matrix LCD 86−5424
dynamic flow control protocols for packet-switchingmultiplexers serving real-time multipacket messages 86−49049
EDTV using video carrier quadrature modulation with inverse Nyquist filter 88−15780
electrochemical sensor interfacing and processing techniques 86−56095
electrode, implantable, for monitoring evoked responses in cerebral cortex, design 87−29784
Elsam's radio monitoring network for HV power transmission networks *(Danish)* 86−12366
enhanced TV, IBA progressive experience 86−4855
enhanced-quality TV distribution *(French)* 86−37990
EURO-COST 215 project for Gbit/s optical transmission systems 88−47106
facsimile broadcasting system multiplexed with TV, experiments 86−4799
ferroelectric LCDs, flat-panel appls. 87−56775
ferroelectric liquid crystal display, capable of video line address times 87−70711
ferroelectric liquid crystal light shutter array 88−13950
ferroelectric liquid crystal screen in multiplex drive, dynamic picture 87−70721
fibre multiplexing of interferometric sensors using phase-generated carrier techniques 87−53980
fibre optic birefringent temperature sensor, with passive multiplexing 88−36033
fibre optic broadband networks, data channel multiplexing 88−47158
fibre optic displacement sensor using diode transceiver 88−36050
fibre optic Fabry-Perot remote sensing system, coherence multiplexing, temp. meas. appl. 88−42119
fibre optic interferometric sensor system, optically multiplexed 87−18687
fibre optic interferometric sensors multiplexed using partially coherent light, expected noise levels 87−18683
fibre optic local networks planning *(Croatian)* 86−69777
fibre optic multi-sensor networks development 88−33679
fibre optic sensors, interferometric, recent advances in demodulation/multiplexing techniques 88−16179
fibre optic sensors, multiplexing by FM, cross-term considerations 86−36187
fibre optic sensors developments and appls. 88−7867
fibre optic temperature sensors using liquid crystals, multiplexing methods 88−16176
fibre optics, conf., London, England (April 1987) 88−18303
fibre optics, Norwegian telecommunications system developments *(Norwegian)* 88−15489
fibre optics in multiplexing 86−37634
fibre optics used in telemetry, multiplexing signals in unbroken fibre 87−49129
fibre-optic interferometric sensing system using combined freq. and time division multiplexing 88−39869
fibre-optic interferometric sensor, coherence multiplexing 86−22117
fibre-optic subscriber line, coherent bidirectional four channel broadband 86−49698
film, video and the computer, interrelationships 85−31212
filter banks analysis and synthesis, sub-band coding and transmultiplexing 87−45006
filters, digital acousto-optic, architecture, use of multiplexing 85−35559
FIR delta-modulation filter, modified delta-adder and delta-multiplier for multiplexing 85−13661
floating drive schemes for dual-frequency addressing ofcomplex liquid crystal displays 86−11641
frequency hopping patterns for simultaneous multiple-beam sonar imaging 87−63078
FSK subcarrier multiplexed optical fibre communication system, 20 channel config. for video distrib. 88−67341
fully connected network with DAR and trunk reservation, implied cost methodology and software tools 88−73441
GEC advanced aircraft communication system 88−60039
harmonically related carrier cable TV systems, nonlinear distortion 85−58368

multiplexing continued
HDTV, high definition MAC development 87−49222
HDTV signals transmission, bit rate reduction 87−56374
HDTV transmission system, optical fibre type with subscriber loops and trunk lines *(Japanese)* 86−31026
helicopter A129 Integrated Multiplex System, multiprocessor-based control, reliability anal. 85−9344
hierarchic time multiplexing and PCM *(Croatian)* 88−21062
high-definition television systems, NHK proposal using MUSE encoding 85−52471
high-level multiplexed nematic LCD, contrast variations study 86−65233
high-speed printing head, using multiplexed ferroelectric liquid-crystal shutter array 88−13951
higher order digital multiplex 86−10890
holographic, rainbow contouring 88−40372
holographic cinematography, long series, speed record, spatial multiplexing techniques 85−2434
holographic imaging, real-time, 3D, based on multiplexing techniques and optoelectronic holograms 88−40370
holographic interferometry, multiplexing technique using multiple reference beams *(Chinese)* 88−14290
holographic message visualisation multiplexed display *(French)* 86−10025
holography, information display, 3D 88−40371
holography, multiplexed image emulsion thickness influence 85−51290
holography appl., conf. The Hague, The Netherlands (April 1987) 88−37815
horizontal/vertical zoom mode in anti-alias video display 86−38041
Hungarian national load dispatching centre, computerised control 86−12307
hybrid voice-data transmission in 64 Kbit/s digital lines, models and traffic charact. anal. 85−30503
IBCN, service, network, economic changes 88−3343
IC in-circuit testing, use of multiplexing *(German)* 88−11707
IIR digital filter with changeable charact. using CSD code *(Chinese)* 86−62725
image reconstruction from coded data, algorithms 85−36343
in-circuit test pin architectures, FLEXPIN system 86−1574
in-circuit testing using multiplex techniques, advantages and disadvantages *(French)* 85−54113
INFONET, broadband integrated service LAN architecture 88−46605
INS Model System, fiber-optic broadband subscriber system 86−10652
INS Model system field trials, fibre-optic subscriber testing system 86−49608
Integrated Digital Transport Network incompatibility resolution 86−23306
integrated voice/data multiplex struct., multi-capacity-limits prop. for data delay perform. 85−19567
integrated voice/data multiplex structure, data traffic delay, multi-capacity-limits property 86−43411
integrated voice/data multiplexers with slotted and nongated packet services 88−34857
integrated voice/data multiplexing, anal., using simpler approach 85−25202
integrated voice/data multiplexing with voice blocking and limited waiting room for data 85−42117
interconnected CSMA LANs, throughput-delay performance 88−21623
interferometric, fibre optic sensor arrays, series topology, relative optical path delays 87−46476
interferometric fibre optic sensor, multiplexing techniques overview 88−45126
internal communication with LANs for offices and factory automation *(German)* 87−55708
international interworking between digital networks using different multiplexing standards *(Italian)* 87−48394
intra-LATA communications, single-mode optical fibre networks 86−17404
ISDN, broadband, multiplexing and line coding schemes 87−27841
ISDN, West German integrated services equipment, pilot project *(German)* 88−21778
ISDN basic rate interface, D-channel based approach to physical layer maintenance 87−40616
ISDN broadband subscriber access, protocol and prototype 87−76142
ISDN flexible multiplexer role and use 87−2768
ISDN moveable boundary multiplexing 87−40229
ISDN subscriber line transmission equipment and multiplexing *(Norwegian)* 87−48355
ISDN traffic model for subscribers *(German)* 88−52999
Japanese, audio multiplex and character multiplex telecasting. II 86−4234
junction networks, transmission optimisation 85−13744
keyboard control signalling 85−17286
KiloStream service from British Telecom, networking and management 86−54671
LAN protocols, review *(German)* 87−13356
LCD, multiplexed twisted nematic, legibility based on colorimetry and matching tests 87−54122
LCD, supertwisted nematic, multiplexability and crosstalk ratio 88−26894
LCD addressing, multiplexing appls. 85−14892
LCD displays, highly-multiplexed modules 85−48026
LCDs, highly multiplexable dyed types 85−64202
LED-based ccts. *(German)* 87−24374
LEDs, multiplexing circuit design 88−70884
light wave subcarrier multiplexing systems employing multiple optical carriers, optical interf. 88−22069
lightwave networks, multiple-access, subcarrier multiplexing 88−3994
line-of-sight digital radio links, book 88−55815
linear thermopile infrared detector array withon-chip multiplexing 86−55746
liquid crystal dot-matrix display, using multiplexed guest-host effect 86−11640
liquid crystal dye displays, highly multiplexed, design 87−1987
liquid crystal matrix displays 86−50150
local digital video distribution, family of frame structures 86−55446
logic error testing in multifacility digital transmission problems 87−31827
London Buses, electronic systems, developments 86−52014
low altitude multiple satellite system, packet-switched, crosslink communication architectures 87−34494
low-rate channel multiplex equipment, units diagnostics 86−49365
M-link multiplexing over the quadrature communications channel 85−7962
MAC debate 86−4070
MAC packet broadcasting, data multiplex managing 87−13832
MAC signals, glass-fibre transmission *(German)* 88−35697
MAC video signals, subsampling and adaptive interpolation for FM transmission 87−13059

multiplexing continued
MAGNET, Columbia's integrated network test bed 86−16985
maximum likelihood receiver for an orthogonally-multiplexed QAM system 85−13578
memory array chips, data gate multiplexing and I/O orthogonally 85−22892
microprocessor systems, introduction, book 86−13337
microwave-multiplexed optical fibre links for broadband networks 88−67361
military communications, sequential adaptation technique and its application to the MARK XII IFF system 87−20399
mobile telephone system access channel, throughput-delay charact. and stability 85−14142
modem with mixed multiplexing and fanout functions, principle 87−8097
monolithic superlattice pin waveguide detector, dual-wavelength demultiplexing 88−67396
monomode fibre transmission system, 4.5 Gbit/s, transmitter and receiver 88−47109
monomode transmission system with 1300 and 1550 nm DFB lasers at 2.23 Gbit/s 88−4018
MOSFET switches, AC, signal transmission errors 87−11788
muldex, higher order digital equipment, mixed synchronous/plesiochronous approach 87−76438
muldexes, telegraph network appl. *(Polish)* 86−37348
multichannel data acquisition and transmission system using optical pick-ups *(German)* 88−35863
multichannel sound modulator for USA TV *(Japanese)* 88−4175
multicore optical fibres for sensors, core division multiplexing 87−18689
multifibre networks, pattern code modulation and optical decoding 87−56187
multilevel QAM systems, coding and hardware imperfections influence on bit error structure 86−55078
multimedia services, 64 kbit/s digital frame *(French)* 87−8103
multimicroprocessor system communication structure static mode charact., comparative anal. *(Bulgarian)* 88−21658
multimode fibre, 1D image transmission, holographic optical elements for angular multiplexing 87−32978
multimode two TV channel fibre link using multimode laser diode and path-difference multiplexing 87−13694
multiple image correlation by binary phase-only code division multiplexing 88−28075
multiplexed and distributed optical fibre sensor systems 87−70580
multipoint video teleconferencing system 86−11330
MUSE, single channel bandwidth compression transmission system for HDTV satellite broadcasting *(Japanese)* 85−52316
network architecture options, new technologies and transport service requirements 86−23305
Network Planning System (NPS), inter-office transmission network planning 87−40170
network processors, management position 87−8101
network systems on multiplex basis, data transmission aspects *(German)* 87−62478
new sequences for asynchronous frequency-hoppingmultiplex 86−54387
NTSC and MAC television signals in noise and interference environments 85−8362
NTSC colour multiplexing improvement by multidimensional filtering 88−66683
on-line speech/voiceband-data discrimination for statistically multiplexed data and telephone conversations 87−2977
operating system mechanisms for multi-media applications 88−59711
optical code-multiplex transmission by gold sequences 85−42005
optical communication, multiplexing method for pulsed analogue and digital signals *(Japanese)* 87−20569
optical correlation design, wavelength-angle multiplexing appl. 87−13099
optical distrib. network, multiplexing techniques, technical and economic comparison 85−57577
optical fibre cables installation, splicing and multiplexing methods *(French)* 87−34566
optical fibre communication lines with spectral multiplexing of channel, noise immunity 86−30819
optical fibre communications, modulation, detection, multiplexing, demultiplexing, future develops. 88−47174
optical fibre data transmission, field test *(Dutch)* 86−4643
optical fibre data transmission within and between switchgear plants *(German)* 87−4464
optical fibre interferometers, performance anal., radar systems analogy 85−35478
optical fibre modules with serial electrical standard interfaces *(German)* 88−35483
optical fibre sensor systems, multiplexed and distributed, review 87−46565
optical fibre sensors linkage in process control appls. 86−2808
optical fibre transmission with waves and cores switching *(Polish)* 85−47529
optical fibre WDM LED spectral slicing for single-mode local loop applications 88−41625
optical fibres, duplex and multiplex transmission *(Dutch)* 85−25857
optical fibres, multimode, polaris.-modulated signals transmission and holographic multiplexing 87−18735
optical fibres multicore, long length, coupled/noncoupled wave transmission 86−9543
optical PPM channel, multiplex operation and BER study *(Japanese)* 88−41705
optical storage, wavelength-multiplexed-recording materials, Japanese research 87−60879
optical switching systems, review on classification 86−59716
optical transmission systems charact. *(Slovak)* 85−20179
optical-code multiplex, fully orthogonal, for broadcasting 88−60167
optimal multiplexing of heterogeneous traffic with hardconstraint 86−64381
orthogonal complementary pairs and sets of sequences, construction methods 86−29689
orthogonally multiplexed QAM system, max. likelihood receiver 85−13538
packet satellite systems with low duty factor terminals, two-level multiaccess schemes 85−63606
packet speech multiplexer with limited delay accurate anal. method 88−45976
packet switching implementation in ISDN 86−37305
packetised voice and data traffic and related statistical multiplexer, Markov modulated characterisation 87−12869
PAL teletext multiplex sound system *(Japanese)* 88−46522
parallel scrambling techniques 87−40538

multiplexing continued
partial concentrations, asymptotic results 88−34854
passive bus user network interface with multiplexed channels, performance anal./transmission characts. *(Japanese)* 85−30840
passive bus user network interface with multiplexed channels, performance anal. and transmission characts. 87−2722
pattern code modulation and optical decoding, code-division multiplexing for multifibre networks 86−23186
pattern recognition with a wavelength-angle multiplexedoptical scanning correlator 86−64351
PCM frame time distrib. in multiplexed digital transmission, performance eval. 87−27699
pedestal drift and cable pickup problems in multiplexed analog signal transmission 88−61175
phase-converted signals, multiplexing and separation 88−21380
pilot-tone stereo signal generation; mixed digital method and encoder realisation 87−41177
polyphase reference sinewave generator using multiplexing technique 87−551
port-multiplexed register file, architecture and operation 86−8224
power plant computer control using remote multiplexing data communications 85−43867
power stations, microcomputer appls. to multiplexing and distributed control 86−33106
process control, input signal conditioning and multiplexing 85−42944
process data collection and strain gauges *(Dutch)* 88−53599
programmable multiplexed digital signal processing for launch vehicle instrumentation *(Spanish)* 87−77755
pulsed analogue/dig. signals, optical multiplexing 88−41019
pulsed power for angular multiplexed laser fusion drivers 85−2248
radio systems, Astec 3 CAE software package, functional modelling approach, design and evaluation 86−37801
random access schemes, steady state behavior, unified anal. 86−23438
RF multiplexing techniques applied to video distribution in local networks 88−46776
ring-division multiplexing, potential throughput increase in ring networks 88−59342
satellite business systems, voice and data distrib. using receive only terminals 85−58079
satellite networks, digital, space segment cost functions 85−42544
satellite radio broadcasting, multiplexing for audio-visual services *(French)* 85−25830
scheduling-function-based distributed access protocol using code division multiplexing 87−48267
SDLC high-speed link, voice/data multiplexing in multi-signal processor synchronised architecture 86−30078
sequency-division multiplex 88−59360
sequential circuit internal state encoding, multiplexer and decoder systems *(Polish)* 87−59326
serial quaternary-to-analogue converters 87−802
signature ct. for LSI testing, analysis and proposal 88−19079
single-mode optical fibre link, expt. system for narrowband and broadband services *(German)* 86−43824
slotted broadband networks, packet multiplexing scheme 88−59387
SMATV, wideband multiplexing use for user number increase 86−55452
software controllable multiplexers 87−48768
software package tool for planning and designing hybrid data communication networks 88−9176
Sonet, synchronous optical network, world standard acceptance 88−47023
sound programme transmission using 2 Mbit/s multiplexing system 85−42702
sound system for satellite TV broadcasting in Japan 85−20166
sound transmission, digital, multiplexing scheme 85−57576
space division multiplexing for high speed optical LAN based on flooding 88−73585
Spread Spectrum modulation technique for cost effective multiplexing 87−2411
spread spectrum multiplexing in LAN 86−37516
spread spectrum radiocommunication systems *(Czech)* 86−4475
start/stop ASCII and synchronous SDLC 86−906
statistical multiplexers 86−30490
statistical multiplexers for optimum multiple asynchronous lines 86−69508
statistical multiplexers with randomly changing input characteristics, stochastic model 87−7873
stereo decoders, switched capacitor, for TV and radio receivers 86−11241
stray-insensitive switched capacitor networks using op-amps, time multiplexing, filter appls. 87−37444
submarine optical cable branching units, digital multiplexing 88−9333
submarine optical cable networks in the future 88−47188
subscriber loop interface for ISDN basic access 86−49421
subscriber loops, DC-balance mB-nB codes for analog and digital amplitude-domain-multiplexed signal transmission systems 85−19325
subscriber synchronised code multiplex system for speech transmission in multi-access LANs *(German)* 86−59717
superposition arrival processes characterisation in packet multiplexers for voice and data 87−13171
switched capacitor filters, design techniques 85−40168
switched capacitor filters, VLSI implementation using standard cell approach 86−57960
switched-capacitor realization of *N*th-order transfer function using a single multiplexed op-amp 87−37447
switching, computation at molecular size level 85−1181
synchronised multiplex system, overload handling 87−7876
synchronized multiplex system, overload handling method *(Japanese)* 87−2679
synchronous data communications, anal. 85−25238
synchronous digital transmission, slip impairment model 87−39565
synchronous DS4 multiplexer with cross-connect function 87−34264
synchronous DS4 multiplexer with cross-connectfunction and its impact on the network 86−55088
synchronous spread-spectrum multiplex communication system using modified M-sequence 85−36903
SYNTRAN add/drop multiplex, network planning 87−40551
SYNTRAN for digital transmission terminals 86−17111
T1 based fast packet voice switch design 88−9365
T1 networking functionality distribution between customer premises and service node 88−9009
tandem packet voice network, end-to-end packet loss fractions 86−16627
TCM and echo canceller, noise considerations, loop coverage comparison 87−13490
multiplexing continued
telecommunications and networks, technology, architecture and implementation review 88−66849
telemetering, measurements on rotating machinery *(French)* 88−67695
telephone systems, small, TDM and space-division-multiplexing, economic comparison 86−16598
telephone trunking, low density, fibre optic transmission 86−17405
test structures for IC process evaluation 88−18459
three-channel multiplexing using light polarisation 87−7889
timing sources, multiplexed, for accurate VLSI testing 86−28376
train computer control using optical data communication system 85−31017
transmission for telecommunications, IEE Summer School, Birmingham, England (July 1985) 86−7394
transmission networks optimisation under resilience constraints 86−64506
Transportation electronics, conf., Dearborn, Michigan, USA (Oct. 1984) 85−63246
TV studio video signal encoding, techniques standards and compatibility aspects *(Spanish)* 87−8417
TV transmission via satellite using MAC 86−49770
twisted nematic liquid cryst. cells, dual frequency addressed, multiplexing limits 87−38871
two-wire digital data subscriber transmission system *(Japanese)* 87−55939
UK optical wideband subscriber loops for CATV and LANs 85−20227
universal digital cross-connect system using DCS technology 87−34267
user level network protocol 88−21654
variable configuration hybrid space and packet switching network 85−25518
variable rate speech coding and network delay analysis for universal transport network 88−52395
vehicle multiplex harness systems, development considerations 86−52018
vehicle multiplex wiring, low-cost intelligent load switching system 86−52024
vehicle multiplexing, active star system appl. 88−5991
vehicles multiplexing system for digital transmission and processing 88−18185
VICS-1 LAN for automobiles, develop. *(Japanese)* 88−69872
video signal switching and multiplexing, technology overview 88−4190
video switching cct. design 87−63136
VLSI circuits, test observability enhancement 87−46086
voice signals, ADC and PCM primary multiplex group 87−75763
voice/data multiplexer, fluid approximation model 88−53029
voice/data multiplexing technique with correlated sources, performance analysis 88−53027
waiting time jitter reduction by synchronizer stuff threshold modulation 88−45853
weighing multiplexing in data acquisition system 86−24409
wideband multiplexing broadens SMATV use 87−8215
wiring systems, high performance standard 88−3717
X.25 access lines support on statistical multiplexers 85−42018
GaAlAs laser diode for multichannel video transmission employing multiplexed UHF subcarriers 87−49024
GaAs based optical wideband data transmission system signal processing 88−60150
GaAs planar digital ICs, electro-optic sampling 86−14091
GaInAs photodiode, optoelectronic nonlinear effect and appl. to multiplexing systems 88−26973
InGaAs, LPMOCVD multiplexed SWIR photodiode arrays for SPOT IV satellite arrays 88−58368
InSb, photovoltaic detector array using FET-switched multiplexing 87−20930
KrF laser, multiplexed short-pulse amplification, transient dynamics 88−58424
$LiNbO_3$ integrated one-to-four optical switch, time demultiplexer appl. 85−41197
Nd:glass laser multiplexing for X-ray backlighting 86−15815
a-Si:H TFT, self-aligned, for LCD panels 85−64196

multiplexing equipment
1.5-Gbit/s GaAs multiplexer/demultiplexer for fibre optic links, 10G040, 10G041 86−30774
1.6 Gb/s optical transmission expt. with monolithic ICs 85−20221
1.7 Gbit/s multiplexing-demultiplexing system for a high-bit-rate optical link 85−47387
1×2 optical switch for WDM transmission systems , phase plate/liquid cryst. config. 88−73908
2.4 Gbit/s asynchronous serial and data transparent bus 88−73965
2's complement 12-bit data, reduction to 8-bit 87−10775
2 to 140 Mbit/s synchronous multiplex system 87−69789
2-TV multiplex system for CATV *(German, French)* 87−49340
2/12 GHz-band PCM-PSK medium capacity multiplex radio relay equipment, review *(Japanese)* 87−62831
3 GHz 12-channel time-division multiplexer-demultiplexer chip set 87−18335
3-channel WDM transceiver module using LEDs for multimode fibre transmission systems 88−15484
4.5 Gbit/s optical fibre transmission system, components realisation using Si and GaAs ICs 88−73948
5-Gbit/s Si integrated regenerative demultiplexer and decision circuit 87−56147
6.3 Mb/s single-mode fibre optic system for subscriber loop 87−34609
6 Gbit/s multiplexer and regenerating demultiplexer BIC for optical transmission 87−8264
12 GHz 12 channel contiguous multiplexer for satellite applications, computer modelling and optimisation 85−17807
12 GHz channel demultiplexers for communications satellite appls. 88−28817
12-channel contiguous band multiplexer for satellite application, design for 14/12 GHz freq. band 85−17808
12-channel time division digital multiplexer 87−76429
14.4 kbit/s modem employing viterbi algorithm 87−8091
16×140 Mbit/s TDM transmission over 53 km single-mode fibre 88−9600
30-V row/column driver for flat panel LCDs 88−51006
32 kbps ADPCM transcoder 86−55090
32-kb/s ADPCM in the Western Electric D4 digitalchannel bank 86−55089
45-140 Mbit/s second-generation digital multiplex equipment, review 87−55888
60-channel transmultiplex equip., network and technical aspects 85−14024
64 kbit/s channel sub-multiplexers 85−63434
64 kbit/s sub-multiplexers 87−55886
64 kbit/s time division multiplexers 87−20326
74LS253 tristate Mux as read only port, cct. 85−33762

multiplexing equipment continued
200 kb/s ping-pong transmission equipment, surge protection circuit design 85−47310
256 Mbit/s optical time switching using laser diode switch modules, TDM system appl. 86−4639
400 Mb/s bidirectional optical video transceiver equipment with WDM *(Japanese)* 88−28862
565 Mb/s coaxial line muldex system, field trial on Zurich-Winterthur route 85−47394
'PRESS'−a PCM regenerator surveillance system 88−21885
A/D converters, improvements in error reduction *(German)* 86−27401
adaptive filter instantaneous freq. meas. receiver with switched multiplexer, config. and operation 88−23230
adaptive multiservice multiplexer for medium-capacity transmission supports *(French)* 85−3266
algorithm for optimal logic design usingmultiplexers 87−631
algorithmic state machines based designs, use of multiplexers in their synthesis 86−57528
all-packet integrated voice/data multiplexers 88−21858
analog IC switches, and multiplexer 86−28372
analog multiplexer microcircuit for automatic channel switching 87−62765
analog processing system for liquid Ar calorimeter, sampling and multiplexing hybrid test results, SLAC SLD project 87−41404
analog/digital μC interface circuit, gate array vs. standard cell realisation 87−16996
analogue chopper multiplexer for oscilloscope recording of single-shot events 88−35912
analogue data acquisition IC, 16 12-bit channels *(Italian)* 87−77157
analogue switches, product selection guidelines 88−64034
analogue switching and multiplexing ICs 87−59796
analogue/digital video signal component multiplexing *(Russian)* 86−60040
angular division multiplexer using graded-index rod lenses for fibre communication 85−8412
Antiope decoder, DECAN 2002 TH *(French)* 85−25407
argon, ILA-120 laser, holographic grating fabrication 87−75266
asynchronous high speed digital multiplexing 87−3008
AT&T's BCM 3200 bit compression multiplexer, development 85−14027
AT&T's digital multiplexed interface for voice and data communications 86−4261
AT&T and Philips digital video multiplexer 8TR 634 and digital sound programme multiplexer 8TR 638 88−35279
AT&T Bell Labs. BCM32000 bit compression multiplexer, development 85−3260
AT&T Western Electric 1 Packet Switching System, remote packet module software implementation 85−42108
audio routing in an integrated digital studio 87−28808
audio signal transmission at 64 kbit/s using 32 kbit/s ADPCM channel banks 88−40784
Australian digital radio concentrator system−DRCS 88−59986
automatic crossconnection equipment in British Telecom's KiloStream network 87−40546
automobile control multiplexing and data communications network 87−43611
automobile multiplexing system using optical fibre network 87−13498
automobile wiring, microprocessor-based serial multiplexer system with momentary switches 86−26385
AVMUX, audio/video switching and multiplexing system 86−30497
baseband switches and transmultiplexers for use in anon-board processing mobile/business satellitesystem 86−59814
BBC multiplexer for local radio stations 85−37182
bidirectional-wavelength-multiplexing integrated module development 85−31020
bipolar 4:1 time division multiplexer IC, 5.5 Gbit/s operation, design, fabrication and charact. 87−17200
bipolar TDM IC for bit rates up to 6 Gbit/s 87−5791
birefringent filters and wavelength multiplexers, four waveplate dual tuner 88−2081
birefringent-fibre polarisation coupler, output coupler of Mach-Zehnder interferometer, appl. to multiplexing 85−2022
bistable laser diode memory for optical time-division switching network, operational charact. *(Japanese)* 87−76803
bistable wavelength switching device using two-electrode DFB laser, optical wavelength multiplexing appl. 88−65416
BK-12-E-2 twelve-channel FDM transmission systemfor symmetric cable pair from TERTA 86−43631
BMX 264 digital cross-connect 87−40547
BMX 264 multiplexer and scrambler of 64 kbit/s ccts. for Transmic network 88−46792
broadband filters and contiguous channel multiplexers, design for electronic support measures appls. 87−37437
broadband microstrip diplexers 87−45212
broadband user-network interfaces to ISDN 88−3773
broadcast satellite transponders in 12 GHz band, channel multiplexers 85−47470
broadcasting satellite transponder, output multiplexer, dual mode canonical filter design *(Japanese)* 87−24437
broadcasting satellite transponders, dual-mode filter for output multiplexer 88−25301
broadcasting satellite transponders in 12 GHz, channel multiplexers 86−69707
broadcasting satellites, spacecraft technology, an update 85−36958
buyer's guide 88−28587
buyer's guide to modems and multiplexers 86−10876
buying evaluation selection 86−43633
CA3450 video op-amp line driver IC builds HF ccts. 88−32011
cable cost reduction, in LANs 86−17114
CCD, multiplexers, controllable piecewise linear output cct., design and operation, image sensor appl. 86−2385
CCD photocurrent multiplexer, 64×64 config. for IR photodiode array 87−28977
CDMA-based network, implementation and experiences with local audio communication based on code multiplex access *(German)* 88−21538
central network supervisory system, rack interface for control and alarm signal indication *(German)* 88−14944
Centrex line sharing by data/voice multiplexers 86−37631
channel multiplexer design for 12 GHz operation in DBS transponders *(Japanese)* 85−14188
channel multiplexers for broadcasting satellite transponders in 12 GHz band *(Japanese)* 85−30785
circuit multiplication equip., history and technological capability 85−47291

multiplexing equipment continued
CMOS analogue multiplexer, 8/4 channel *(Japanese)* 86−59718
CMOS half-flash ADCs, 8-bit, MAX 154/158 devices with integrated multiplexers *(German)* 88−32270
CMOS LSI for multiplexing/demultiplexing (DN1811), development *(Japanese)* 88−26521
CMOS LSI framer chip, 140 Mbit/s operation, broadband ISDN local access system appl. 88−35210
CMOS multiplexer-amp combo tames losses in wideband circuits 87−76960
CMOS narrowband signalling filter for FDM systems, switched-capacitor networks 85−28638
CMOS select 1 of n multiplexer 85−6277
CMOS select 1 of N multiplexer, cct. config. and operation 85−1744
CMOS self-decoding complementary pass gate multiplexer 86−14140
CMOS sequential ICs, MHB series, props. and dynamic parameters *(Czech)* 85−23967
CMOS time-switch LSI for digital still picture exchanges 87−7914
CMOS video multiplexer/amplifier, MAX455, 50 MHz operation, config. and charact. 88−573
CMOS video switches, multiplexers, crosspoints and buffer amplifiers 87−73570
CMOS VLSI framer chip for a broadband ISDN local access system 88−9367
codec, 565/680 Mbits type, design techniques, multiplex and optical fibre transmission system appls. 85−36783
codec, monolithic, 565/680 Mbit/s operation, semicustom design techniques, multiplex/optical fibre transmission appls. 85−36814
Colorado springs area EMP hardening project 85−37008
combinational logic circuits with multiplexers, synthesis *(Slovak)* 86−46679
commercial fibre optic components 88−58130
communication controller scanner device and multiplex link interfacing technique 85−25514
communication line multiplexer card for multiple interface ports and single communication facility 87−28283
communications using optical fibre cables, cable type, construction and LANs 88−9532
compact multiplexer for business information network *(Japanese)* 88−28589
composite logic gate element and multiplexer for optical computing and optical communications 87−33312
computer communications, cost savings 87−34327
computer network multiplexer, fault-tolerant config. 85−25515
computer networks, applications, improvement and development 86−30384
computerised aerodynamic model of hydraulic turbine *(Czech)* 87−70871
concentrator, new robust system development for Datex *(Swedish)* 87−69798
concentrator design, cost analysis *(Spanish)* 87−76432
concentrators and multiplexers for data networks 88−73757
concurrent fault detection in TST switches for on-board satellite systems 88−28756
contiguous band multiplexers, waveguide manifold type, design, computer optimisation and tuning 86−62817
control automata construction using programmable logic devices 85−17264
CRO multiplexer, dual-trace capability addition 85−20655
CRO multiplexer for eight simultaneous channels 86−18020
Cromemco multiplex communication controller and the mainframe server *(Chinese)* 88−21854
cross-connect systems, digital, control services 87−34266
cross-connect systems, digital, customer control, new service opportunity 86−55113
cross-connect systems, digital, design and deployment of control services 86−55114
cross-connect systems in transmission networks, assessment 88−46801
D/CMOS analog multiplexer for video signals 88−4191
D/CMOS high-voltage multiplexer, function-isolated/dielec. isolated compatibility 87−32689
D/CMOS processes for analogue multiplexers 87−67563
DAMA system, satellite-based 88−67307
data communications equip., market review 86−55079
data communications networks, advances in multiplexing 86−55084
data logging device, 32 position indicator system with dual multiplexer control, development *(German)* 85−37505
data multiplexer development by KDD *(Japanese)* 87−62770
data multiplexer using data set interface and universal digital loop transceiver chips *(German)* 87−20322
data network, optimization method for multiplexer locations 85−57851
data network using modems and multiplexers 86−54870
data networks, multiplexers and concentrators appl. 86−10891
data over voice solution for corporate network 88−21497
data transmission system, single chip computer appl. 86−49172
data-over-voice multiplexers, for reduced cabling costs 86−10937
data-over-voice multiplexing for cutting computer cabling costs 86−23434
data-voice multiplexer technologies for packetswitched networks 86−69511
DBS, 12 GHz, Region 2, RF channel charact. and performance 86−64919
DCFL chip set for multiplex/demultiplex appls. at gigabit/sec. data rates 85−54855
DDM-1000 optical multiplexer for subscriber loop appls. 87−62933
Deltamux, second generation, review 86−4407
demultiplexer, hologram, waveguide communication system with wavelength-division multiplexing 85−20214
demultiplexer/decision cct., Si bipolar implementation for gigabit optical fibre communication systems 87−28634
demultiplexers for multichannel networks 88−67176
demultiplexing and tapping device using a spherical geodesic lens 85−47526
design approaches 87−69792
developments in modems and multiplexers 88−3702
developments in multiplexers 86−10887
DG536 16-channel video switch *(Italian)* 87−55923
DG536 monolithic 16-channel wideband video switch 86−63438
DG53x family of monolithic video multiplexers direct 300-MHz data in 300 ns 87−69860
Dialogic's AMX/81 family of Audio Multiplexer products, review 88−14645
DIDON data communication system for broadcast data transmission *(French)* 85−25406
dielectric guides in integrated optics, wavelength multiplexer/demultiplexer *(German)* 87−33004
dielectric loaded rectangular metallic mesh quasi-optical diplexer, noise temp. charact. 86−48711

multiplexing equipment continued
dielectric waveguide channel dropping filter using 3 dB couplers and bandstop gratings, multiplexer appls. 88−32376
differential voltage-to-current convertors preliminary signal conversion appl. *(Russian)* 85−61407
digital, address input selection 85−881
digital, for trunk and long distance routes 87−62762
digital automatic switches for Proteo system, computerised system for design/installation support *(Italian)* 85−30789
digital color TV multiplexing equipment 86−55454
digital correlator speed improvement, TDM techniques 85−57555
digital data interpolation multiplex equipment, design and construction *(Japanese)* 86−17110
digital data transmission multiplexing using active impedance-free circuits *(Russian)* 88−9335
Digital Equipment's DC 349 octal asynchronous receiver transmitter 85−805
Digital Equipment DZ11, DH11 multiplexors 85−19937
digital group demodulation system for multiple PSKcarriers 86−64813
digital microwave radio system *(Japanese)* 85−8312
digital multicarrier demultiplexer for mobile satellite communication on-board appl. *(German)* 88−67289
digital multiplex convertor for interworking hierarchy, devel. *(Japanese)* 88−28583
digital multiplexers for 30-channel hierarchy 85−52131
digital multiplexing, techniques and equipment *(Japanese)* 87−8106
digital optical service-integrated subscriber line system, plesiochronous signals multiplexing 86−17081
digital speech interpolation equipment using VLSI signal processor, satellite communications appl. 85−42532
digital storage, analogue inputs for microprocessors *(German)* 85−34001
digital synchronous terminal equipment using octet multiplexing, LSI codec and line concentrator *(Japanese)* 85−19938
digital telecommunications switching, trunk interface and control system *(Japanese)* 85−3264
digital time switch LSI using low-power source coupled FET logic 86−27229
digital transmission equipment for wide-coverage data transmission 85−13741
digital transmission over 30 km of fibre 86−49694
digital transmission system maintenance, by integrating performance monitoring data with alarm information 85−13760
digital TV studio multiplexed routing system, advantage and requirements 87−28810
digital TV studio multiplexed routing system, ancillary signal requirements 87−28812
digital TV studio multiplexed routing system, technical details 87−28811
digitally-multiplexed telemetry link, design 88−52805
distributed access for large packet networks 87−48662
distributed circuit switcher for a network usingoptical fibres 86−43849
distributed data processing appls. 88−46798
DMI in ISDN environment 87−7943
DMIX, digital multimedia information multiplexer, for leased line service in Japan 86−55112
double-step multiplexer DTM-2/34 *(Croatian)* 88−3712
downtime in cellular radio systems, methods of reduction 88−35387
DPCM optical video transmission equipment with wavelength division multiplexing *(Japanese)* 88−28865
DPN-10 concentrator for packet network 87−34271
DS3 multiplexer, synchronous transmission 86−69510
DS3 networking, technology 87−55539
dual-gate MESFET switching and multiplexer operation for high-speed fibre optic systems 88−22085
duplex, symmetry/asymmetry wavelength division multiplexer/demultiplexer combined in a small module 85−14035
duplexer with Butterworth characts., design 86−59166
duplexer with hybrid integrated light emitter and detector 86−4688
dynamic TDM concentrator system ZD-D, review 85−30585
dynamic TDM packet assembler and packet multiplexer, design architectures 88−46430
echelon grating multiplexers for hierarchically multiplexed fiber-optic communication networks 87−62925
ECL monolithic integrated bipolar 4:1 time multiplexer for bit rates up to 5.5 Gbit/s *(German)* 87−40541
edge-triggered multiplexer with self-generating reset scheme 86−57777
efficient digital calculation circuit using 9 gates per bit position 85−28485
electro-optical modulator array for coherence multiplexing 88−20440
electro-optical switch for TDM and data encoding, digitally controlled 87−18755
electro-optical TDM using PCM laser diode 88−20656
electro-optical tunable filters for WDM optical communication systems, design criteria and characts. *(Spanish)* 88−60160
electronic support measures appls., filters and multiplexers design 87−31997
EPLDs, glue logic of tomorrow *(German)* 88−19036
Ericsson MX3 digital multiplexer for 24 channel hierarchy 88−15260
Ericsson optical fibre security system ZAT 4 87−62964
Ericsson single-board digital multiplexers for the 30-channel hierarchy 87−62768
ESM appls., filters design 85−24880
ESM appls., suspended substrate stripline filters design 85−57941
etalon filters, multiple angle-tuned for optical channel selection in WDM and FDM systems 88−73931
Euromux switching multiplexer, review 88−21852
European market prospects 87−20320
extended MAC encoder for flexible information transmission 85−37290
F-1.6 G multiplexing line terminal equipment *(Japanese)* 87−56113
Fabrey-Perot demultiplexers for WDM single-mode systems, crosstalk characts. anal. 85−58097
Fabry-Perot filters for wavelength demultiplexing, optical monitoring method during growth 87−54150
Fabry-Perot wavelength demultiplexer, miniature 88−41672
facilities management systems 88−67197
FACOM 2663 Digital Multimedia Information Multiplexer *(Japanese)* 86−17109
fault diagnosis using DORIS expert system 86−65114
FDM config. based on abrupt band-pass filter, FM-FM telemetry system appl. 86−4229
FDM-FSK star network with a tunable optical filter demultiplexer 88−3972
FDM-TDM transmultiplexers, optimal filters design 87−28292

multiplexing equipment continued
FDM/TDM transmultiplexer, non-regenerative on-board satellite config., design and performance *(Japanese)* 87−28488
ferroelectric liquid crystal printing head 88−40009
fiber optic communicating system for Pipe Line Searching System *(Japanese)* 85−37082
fiber optic DC magnetometer, single mode, for multiple-point meas. 88−42124
fiber optic devices and integrated optics *(Japanese)* 88−2035
fibre devices, conf., London, UK (June 1988) 88−62904
fibre devices using polarisation-maintaining fibres 88−13805
fibre optic and laser sensors, conf., San Diego, CA, USA (Aug. 1987) 88−37823
fibre optic based position sensing on aircraft, time and wavelength division multiplexing 88−48276
fibre optic components for communication appls., developments review 86−65012
fibre optic coupler, WDM, 12-channel Littrow-type, anal. 87−12180
fibre optic data bus for shipboard appls. 88−41674
fibre optic data multiplexer channel unit 88−28895
fibre optic demultiplexer using graded index lenses 86−49629
fibre optic distributed sensors and sensor networks 87−26032
fibre optic Fabry-Perot interferometer high-speed thermometry appl. 88−47550
fibre optic fused biconical monomode directional couplers, power transfer wavelength selectivity control 87−25920
fibre optic monomode wavelength division multiplexer/demultiplexer 87−13730
fibre optic multiplexer-demultiplexer, 5-channel for multimode WDM systems 87−48771
fibre optic multiplexing system for use on motor car 86−36201
fibre optic multiplexing using passive star coupler 85−65579
fibre optic sensor readout, wavelength division multiplexer appl. 87−68015
fibre optic systems, 2.4 Gb/s, low power multiplexer/demultiplexer 87−40968
fibre optic systems, low cost components, development 88−35539
fibre optic temperature sensor, based on Fabry-Perot interferometer 88−47552
fibre optic wavelength division multiplexer/demultiplexer, single-mode 85−8405
fibre optic WDM coupler, six channel LED Littrow-type 87−12181
fibre optics appl. to power system protection and control 86−37901
fibre optics appls. in automobiles 85−24271
fibre optics in multiplexing 86−37634
fibre Raman amplifier module with semiconductor laser pump source 88−45394
fibre ring resonator, using 3×3 optical fibre coupler 88−65282
fibre-coupled Fabry-Perot wavelength demultiplexer 85−25870
fibre-optic communication systems, transmission charact. and capacity *(German)* 85−42580
fibre-optic devices for an optical fibre communicationsystem *(Japanese)* 85−58106
fibre-optic metropolitan area network for multiple Gb/s 87−28631
fibre-optic passive components for communication systems, review 86−48150
fibre-optic wavelength-division single-mode multiplexer/demultiplexer 86−23855
fibre-optical systems, wavelength division multiplexing 85−63683
field multiplexer reduces process control costs 86−37633
field multiplexer requirements *(German)* 87−55885
filter-IC-based demultiplexing cct. 87−10998
financial transactions and ATMs, multiplexers use 85−52130
FIR filter controller simplifies transmultiplexer design 88−6999
fixed stuffing, effects on multiplexer waiting-time jitter 88−46805
flat passband birefringent wavelength-division multiplexers 87−34550
FLEXCOM, communication customer network management and control services 86−54728
flexible access systems for service integration 88−14960
FLEXPIN, an in-circuit tester multiplexingalternative 86−8638
FLM-1 for multiplexing local data on single fibre 87−76721
focal plane beam multiplexing, short haul free space optical communications appl. 88−67378
four channel audio and video multiplexing system 87−28807
four-port filters, switched multiplexers having low amplitude and group delay ripple 88−25385
frequency division equipment noise immunity increment, multibeam signal appl. 85−8254
FSC multiplexer IC, ^{60}Co testing, comparison of conventional dose rate and low dose rate 86−35876
Fuji Electric remote terminal telemetering and telecontrol systems using optical fibres 86−17854
functions of 85−30545
fused fibre WDM couplers for multiplexer/demultiplexer devices 88−65280
fused taper/filter hybrid single-mode wavelength division multi/demultiplexer 88−33716
fused tree WDM with high wavelength isolation over wide wavelength range 88−13859
GaAs 8:1 multiplexer and 1:8 demultiplexer chip set for high-speed transmission of television and digital data 87−49091
generic integrated maintenance interface for network elements 88−52858
gigabit/s 16:1 multiplexer and 1:16 demultiplexer chip set, implementation using DCFL 88−19250
grating multiplexer in Littrow configuration with wide pass band 86−4689
guided optical structures in military environment conf., Istanbul, Turkey (Sept. 1985) 86−66552
guided-wave multi/demultiplexer using embedded gradient-index waveguides, design for optical communication appl. 87−76744
guided-wave multi/demultiplexers with compensation for centre wavelength shift by fabrication process fluctuations 87−70034
Hasler DMX-8 digital multiplex equipment, second generation 88−3731
Hasler TCON, the T203+ telex concentrator 88−3448
heterojunction bipolar transistor ccts. for high-speed lightwave communication systems 88−15502
hierarchic time multiplexing and PCM *(Croatian)* 88−21062
high-speed digital multiplex, network construction *(Japanese)* 87−69795
high-speed digital networking, T1 systems 88−8999
higher order digital equipment of third generation 85−47333
holographic demultiplexer in optical fibre communication system with FDM 88−41707

multiplexing equipment continued
holographic filters, position tunable, in dichromated gelatin, use in single-mode-fibre demultiplexers 85−46241
holographic optical element for demultiplexer for lightguide communication system 88−14301
holographic optical element wavelength multi-demultiplexer in near IR 87−12614
hospital application, inexpensive 4-channel time-division multiplexer 85−26829
HP54100 A/D digitising oscilloscope, high performance probe system 86−60273
HP 48000 RTU meas. and control unit 86−60114
hybrid local area network system 85−13930
hybrid multiplexer with circuit setup delays for ISDN 88−41473
IBM-PC compatible interface card for signal processing in Spacelab expts. 88−16823
IC multiplexer, Si bipolar technology, injection laser modulation and signal regeneration up to 2 Gbit/s 86−11111
ILA-120 laser, holographic grating fabrication 87−75266
indirect measurement techniques in multi-sensor systems *(German)* 87−56660
information distribution selection and options 87−20312
Infotron TL300 low-cost statistical multiplexer, appls. 85−47312
INMARSAT B cross-coupled diplexer 87−45218
INS, digital subscriber loop multiplex transmission system for digital one-link services 85−57899
INS user-network interface for high speed/multiplexed access *(Japanese)* 85−57618
INS using time compression multiplex transmission system for 88 kb/s digital communication 85−19981
instrumentation tape recorder multiplexer for 16 channels 86−5338
insulation resistance monitoring using remote-indication equipment with time-code multiplexing, nuclear plants *(Russian)* 87−34992
integrated combo codec IC 87−28239
integrated multiplexing and switching technique foradaptive delta modulation 86−43667
integrated optic grating demultiplexer design 86−11134
integrated optic WDM system for optical fibre communication systems 88−9565
integrated optical multiplexer-demultiplexer realised on Si *(German)* 87−76817
integrated optical wavelength multiplexer/demultiplexer foroptical communication 86−11133
integrated optical wavelength multiplexers 88−58225
integrated optics demultiplexer for 1.3 μm wavelength 88−28880
integrated optics demultiplexer using Bragg couplers 87−12145
integrated services broadband transmission system with high-rate optical subscriber lines *(German)* 86−49133
integrated wavelength division multiplexes using monolithic LED array 88−67411
integrated-optical multichannel wavelength multiplexer for monomode systems, anal, and realisation 85−2055
intelligent equipment for digital networks 88−59896
intelligent networks development 88−35277
INTELSAT Business Service (IBS) system, config. and equipment *(Japanese)* 88−46966
INTELSAT TDMA control subsystem, reference terminal equipment 87−8232
INTELSAT TDMA monitor and control subsystem, CADC and OMC 87−8235
INTELSAT TDMA transmission subsystem-1, traffic terminal and associated equipment 87−8233
INTELSAT TDMA transmission subsystem-2, digital speech interpolation 87−8234
INTELSAT TDMA/DSI system, Yamaguchi TDMA facilities *(Japanese)* 87−3135
interference filter demultiplexing system, light scattering from surface irregularities, crosstalk study *(French)* 88−60123
interference filters, rejection rates meas., optical demultiplexing appl. *(French)* 88−60122
interferometric sensors with short path imbalances, multiplexing systems 88−16040
ISDN, flexible multiplexer role 87−48823
ISDN, new products 86−55081
ISDN, survey of preparations for introduction *(German)* 88−41410
ISDN, tactical planning issues 88−41391
ISDN, West German timetable for introduction *(German)* 88−35207
ISDN basic access, modular chip set with multiplexing capability, design 87−34003
ISDN flexible multiplexer role and use 87−2768
ISDN for broadband services *(German)* 87−40607
ISDN realisation, costs reduction by digital line appls. *(Japanese)* 88−41406
ISDN subscriber loop transmission, echo canceller LSI 88−3650
ISDN time-division switch, 512 Mbit/s 87−8130
ISDN VLSI solutions for integrated services digital [multiplexed] networks 88−3781
Japan CS (Sakura) communications satellite expts., FDMA 86−64904
Japan CS (Sakura) communications satellite expts., spread spectrum multiple access 86−64905
Japan CS (Sakura) satellite expts., TDMA 86−64903
Japanese VAN multiplexing systems 86−55080
jitter, accumulated, in digital transmission system, anal. 88−28689
Josephson multiplexer using functional AND gates 85−49820
Josephson multiplexer with AC-powered master-slave latches 88−25098
JUK-110 series small-capacity PCM-4PSK multiplex radio equipment 88−41507
Keele terminal multiplexer 86−16953
key telephone system, integrated, with digital bus architecture *(Japanese)* 87−76193
Kilostream, multiplexer products 87−20018
KiloStream and MegaStream digital links, multiplexing voice and data 87−62776
KiloStream multiplexer software development 87−20325
KiloStream network from British Telecom, introducing automatic cross-connection 86−16771
Ku-band contiguous multiplexer employinglow-loss, odd-order, mixed dual-triple mode cavityfilters 86−11041
λ/4 shifted 1.5 μm DFB laser diode filter, 100 Mbit/s two-channel WDM expt. 88−35475

multiplexing equipment continued
LAN, 200 Mbit/s synchronous optical loop for multiservice integration 86−23458
LANs, fibre optic, selective broadcast interconnection 86−23483
large capacity non-blocking digital cross-connect system using high speed optical links 87−40534
laser diode, single transverse mode, tunable, amplification props., multiplexing appls. 88−20647
LDD self-aligned gate FET enhancement/depletion technology 87−32719
light-guide system for connecting computer terminals 88−9150
linear pyroelectric detector arrays with on-board multiplexers 88−29401
Lintott modular multiplexer system as in-plant telemetering system, for data transmission 85−13828
LM604 Mux-Amp, multiplexer-op amp IC 87−46050
local interconnection, LANs and their alternatives 88−35062
logical function synthesis from splitting frontiers of Karnaugh map 86−930
long haul transmission system, multigigabit/s, joined TDM and WDM 88−35533
low cost networks aid data acquisition 86−16911
Low Rate Multiplexer, development 85−30791
low-rate channel multiplex equipment, units diagnostics 86−49365
LSI for Radio Data System broadcasting receiver *(Japanese)* 88−29044
Mach-Zehnder waveguide freq. translator, freq. multiplex in optical system 86−17372
market survey of multiplexers *(Swedish)* 85−52132
market trends in modem and multiplexors 87−40525
matrix of gradient microlenses fabricated by electrostimulated diffusion, optical connectors development 87−18598
MAX452 video-multiplexer-amplifier in CMOS-technique *(German)* 88−25013
MC 240, remote multiplexer-concentrator for local appls. 85−47351
MC-240 time division remote concentrating module for digital exchanges 86−23572
MELPAX 1000 packet multiplexer, development, fns. and implementation *(Japanese)* 88−46796
memory array testing using GHz multiplexer demultiplexer controller 85−54870
micro-optical single-mode multi/demultiplexer for fourwavelength channels 86−23598
microprocessor based control and monitoring system for Florida telephone 87−13501
microprocessor based digital audio codec for stereo sound on UK TV service 85−52527
microprocessor compatible clock chips with display multiplexer *(French)* 85−6404
microprocessor controlled programmable telegraph channel, slow frequency hopping provision 86−23366
microprocessors and LSI chips appl. 86−43621
microprogram control unit with BIC for motor control, and data ports for multiplexed data networks 87−43612
microwave dielectric resonator output multiplexer for C-bandsatellite applications 86−11040
microwave filters and multiplexers, conf., London, England (May 1987) 87−43820
microwave multifunction components with single compact housing, product review 88−50379
microwave multiplexers for satellite appls., computer aids for design and simulation 85−42350
microwave quasi-optical diplexers, characts. *(Japanese)* 86−27446
microwave switched multiplexers 87−40059
microwave-multiplexed wideband lightwave systems using optical amplifiers for subscriber distribution 88−67343
millimetre-wave quasi-optical components, design aspects 87−11027
Mitsubishi Electric MELMUX digital multifunction multiplexer and demultiplexer 86−10886
Mitsubishi MELMUX MX-7100 series high-speed digital multiplexers 88−35274
Mitsubishi optical transmission system MP-2000, development *(Japanese)* 88−28854
mM-wave contiguous diplexer designed with printed-circuit elements 87−45193
MM-wave diplexers/multiplexers, parallel-connected, anal. and CAD 88−70983
MM-wave technology, printed-element triplexer design 86−27762
MM-wave triplexer with printed cct. elements, design for 88-100 GHz range 85−17805
modem with mixed multiplexing and fanout functions, principle 87−8097
modular data distribution system, connection to telephone cables 87−20225
modules and equipment for fiber optic transmission *(Japanese)* 88−28889
monolithic 1.6 Gbit/s 8:1 multiplexer and 1:8demultiplexer subsystems using CDFL 86−35915
monolithic analog multiplexers for high voltage applications 85−19941
monolithic IC video switches, multiplexers, crosspoints and buffer amplifiers, appls. 88−4168
monolithic multiplexer/demultiplexer chip set, 12:1 config. for fibre optic communication system appl. 87−34629
monolithic signal processor IC for implantable neurophysiological telemetry system 86−38788
monomode 280 Mb/s optical trunk transmission system 85−20226
monomode planar optical waveguides, distributed coupling, wavelength optical multiplexing study *(French)* 86−11056
Montana Power Company digital telecom. equipment for voice and data communications 87−76437
MOS VLSI circuits, physical faults, models 88−20139
MP-5000 optical multiplex transmission system develop. *(Japanese)* 88−67375
MTXD 8/50 remote telegraph line multiplexer, review 87−62763
muldex, higher order digital equipment, mixed synchronous/plesiochronous approach 87−76438
multi-demultiplexer, low-loss optical equipment for subscriber-loop system 85−3265
multi-media multiplexer, appls. *(Japanese)* 87−69793
multi/demultiplexer for WDM subscriber loop systems using analog baseband video transmission 86−64986
multichannel analog signal measurement system with intermediate frequency conversion 88−4346
multichannel demultiplexer for optical communication lines 85−8435
multigigabit multiplexer design 88−53081
multimedia multiplexer and digital PBX connection *(Japanese)* 87−69794
multimedia services, 64 kbit/s digital frame *(French)* 87−8103

multiplexing equipment continued
multimedia TDM multiplexer, advanced *(Japanese)* 88−21851
multimedia TDM system architecture *(Japanese)* 88−21850
multimode fibre guided-wave optical wavelength-division multi/demultiplexer using high-silica channel waveguides 85−35448
multimode fibres, broad passband multi-demultiplexer using diffraction grating and retroreflectors 88−28581
multimode optical fibre digital transmission systems, 140 Mbit/s, bit error rate as function of crosstalk 86−55291
multimode optical transmission lines, planar microoptical multiplexer/demultiplexer 87−40920
multimode optical waveguide components, photofabrication 88−13924
multiplexable liquid crystal data representation devices, image contrast calc. *(Russian)* 86−15525
multiplexed electrode VLSI cct. layout for monitoring evoked responses in cerebral cortex 87−63794
multiplexer-demultiplexer, custom hybrid, field failure rate 85−28876
multiplexer/demultiplexer construction for signal transmission in white light *(French)* 86−17119
multiplexers, low cost networking 88−9336
multirate digital filters, narrowband characteristic realisation *(Japanese)* 88−38632
multirate switched capacitor system approach to frequency division multiplexing 88−46793
multirate TDM/FDM intertranslation and its digital realization 85−25630
Mux processor, VLSI for multiplexing and circuit termination functions 87−31947
MX3 compact dig. multiplexer 87−40548
MX3 digital multiplex equipment 86−4406
MX3 digital multiplexer RC-28D, development 87−48770
MX-7100 Series high-speed digital multiplexers, architecture and system config. *(Japanese)* 88−46794
MX-7100 Series high-speed digital multiplexers, struct. and fns. *(Japanese)* 88−46795
MXA-H data multiplexer 85−30783
MXB.2 64 kbit/s data multiplexer for 2nd generation CCITT X.50 of Swiss data network *(German)* 88−15263
MXB.2 data multiplexer and VZS branching cct., assembly and testing *(German)* 88−15266
MXB.2 data multiplexer/VZS branching cct., power supply with current limiting/surge protection *(German)* 88−17734
MXB.2 data multiplexer/VZS branching cct. rack system, construction using backplane cct. boards *(German)* 88−15265
MXB.2 data multiplexers/and VZS branching network, software packages for microprocessor-based supervision unit *(German)* 88−15264
MXC.2 multiplex equipment for telegraph lines, new generation in Switzerland *(German)* 87−40568
N-channel multiplexer with branched cascaded struct., simulation and sensitivity anal. 85−40221
narrow-band resonant optical reflectors and resonant optical transformers for laser stabilization and wavelength division multiplexing 88−2032
network configuration aided by expert systems 87−34107
network solutions using fiber-optic links 86−64964
NKT Optimux 32, optical digital multiplexer 85−14034
NMOS digital multiplexer, design for optical fibre link appls. 85−47512
NMOS multiplexing IC for fibre-optic transmission 86−55299
nonredundant repairable multiplexing unit, reliability anal. 86−4404
nonuniform holographic gratings for WDM fabrication 87−75266
Northern Cross radiotelescope microprocessor-controlled voltage stabilisation *(Italian)* 86−24001
NTT 6312 kbit/s synchronous multiplexer with cross-connect function 87−2986
NTT F-1.6G multiplexing line terminal equipment, review 87−62771
NTT private communication systems, state-of-the-art 88−21853
on-chip multichannel analogue signal switch *(Swedish)* 87−20323
open system access equipment for public telephone network, microprocessor controlled for ISDN appls. *(German)* 85−52230
optical branching devices, principles and structures *(Japanese)* 88−28887
optical broadband receiver module for freq. multiplexed signals, hybrid cct. realisation *(German)* 88−28857
optical communications, conf., Barcelona, Spain (Sept. 1986) 88−62879
optical couplers and multiplexers for use in LANs *(Spanish)* 87−49104
optical data link for automobiles 85−39285
optical data multiplex transmission system *(Japanese)* 86−59891
optical demultiplexer using Ebert mounted Si grating, design, aberration reduction 85−14267
optical demultiplexers for unidirectional fibre optic transmission systems minimum spacing of band-pass filters 86−64990
optical FDM system intermodulation interference 88−60175
optical FDM transmission expt., 8 channels 5 GHz spaced 88−47137
optical FDM transmission system with eight 5-GHz spaced channel 87−70037
optical fiber devices using polarization-maintaining fibers 88−7869
optical fibre, transmission system, 45/90/135 Mbit/s 85−63646
optical fibre 4 Gbit/s transmission over 103 km using electronic multiplexer/demultiplexer 86−23873
optical fibre cable transmission capacity improvement by hybrid integrated multiplexer system *(German)* 86−30788
optical fibre communication links with spectral multiplexing using multimode semiconductor laser 85−14282
optical fibre communication techniques, coupling, interconnecting and multiplexing components review *(German)* 87−13717
optical fibre couplers, encapsulated, WDM 88−65279
optical fibre data buses, design and realisation 85−42606
optical fibre four-wavelength-division multiplex transmission system, config. and equipment, videoconferencing appl. *(Japanese)* 85−8430
optical fibre interconnection methods and devices *(French)* 88−60155
optical fibre matrices, channel selective for high density WDM systems 88−65281
optical fibre signal processing appls., wideband multiplexers 85−29638
optical fibre system, multiplexing components for transmission capacity improvement 86−30806
optical fibre systems, high capacity, tolerant WDM 87−40977
optical fibre telecommunications research, current status and future trends 85−8421
optical fibre WDM transmission, design aspects, 4 wavelength subscriber loop appl. *(Japanese)* 85−31058
optical fibres, two-core low-loss birefringent single mode, wavelength-multiplexing system appl. 85−24300
optical FMD transmission, guided-wave multi/demultiplexer 88−67409

multiplexing equipment continued
optical guided-wave multi/demultiplexer using embedded gradient-index ion exchange waveguides 88−67408
optical guided-wave multi/demultiplexers with high stopband rejection 87−46572
optical guided-wave multi/demultiplexers with high stopband rejection 88−9518
optical link passive components, principles and connection methods *(French)* 88−41713
optical low cost two-channel multiplexer for local areanetwork 86−49681
optical multiplexer-demultiplexer for the photonic streak camera 88−51647
optical multiplexer/coupler with tapered graded-index glass fibres and GRIN-rod lens 86−2835
optical multiplexer/demultiplexer for analog subscriber loop, design and performance 86−43863
optical multiplexing techniques and equipment *(German)* 87−3199
optical routing system for tomorrow's television studio centers 88−4183
optical switching, using different switching principles 87−76491
optical time division space switches using time-struct. directional couplers 85−58093
optical time-division multiplexed fiber transmission using $Ti:LiNbO_3$ waveguide switch modulators 88−45206
optical transmission equipment for 800 Mbit/s 8-channel multiplexed PCM-TV signal *(Japanese)* 88−28860
optical tunable birefringent wavelength-divisionmultiplexer/demultiplexer 85−58094
optical waveguide four-channel multi/demultiplexer for optical FDM transmission 88−35503
optical waveguide horn-grating demultiplexer circuit, single-mode operation 87−34579
optical waveguides, silica based, appl. to guided-wave optical interferometers 88−72095
optical wavelength multiplexer/demultiplexer module for single-mode fibre communication systems *(Japanese)* 88−47054
optical wavelength multiplexers, planar structures design *(German)* 88−60144
optical WDM equipment, environmental testing 87−76784
optical WDM for fibre-optic communication systems *(Japanese)* 88−28888
optical WDM multiplexer/demultiplexer, tunable birefr. 86−49679
optical WDM system, four channel for monomode fibre 86−11098
optical WDM transmission systems design 86−69768
optically-driven electro-mechanical actuator for fibre multiplexing 88−26794
optimal design of multi-cavity filters and contiguous-band multiplexers 85−8256
Optimum 32 optical digital multiplexer *(Dutch)* 85−58098
optimum TDM assignment in constrained hierarchical switching systems 88−52615
OPTIMUX integrated optical line and multiplex systems for local networks 88−60197
orthogonal RAM technique for TDM, CMOS VLSI implementation 88−59900
overvoltage protection for ADC multiplexers *(German)* 86−30492
PABX or data multiplexer, voice and data integration 85−57592
packet switching network for electric power utility companies, development, implementation and equipment *(Japanese)* 85−42267
packet switching networks, node efficiency evaluation *(German)* 86−30367
packet-speech multiplexer 88−14854
packetised voice and data traffic and related statistical multiplexer, Markov modulated characterisation 87−12869
packetized voice traffic in statistical multiplexer approximations 85−7969
PANDA fibre multi/demultiplexer utilising polarisation beat phenomenon in birefringent fibres, WDM appls. 86−30780
parallel scrambling techniques 87−40538
passive fibre optic components using dispersion shifted fibre, biconical fusion technique fabrication 87−38843
PCM 30 primary multiplexer for synchronous and asynchronous transmission of data channels *(Slovenian)* 88−67171
PCM Multifunctional Terminal equipment, review *(Japanese)* 85−52133
PCM multiplex equipment, development 86−17112
PCM multiplex equipment, digital exchanges, loss and level definitions appl. *(German)* 86−10884
PCM multiplex terminals for 10 and 30 channels with single channel codec (DTM-2) 86−23602
PCM test equipment, design 86−31313
PCM-TV signal optical transmission system using GaAs MESFET ICs 88−47154
peripheral device control and data reception/transmission signals, multiplexer system 85−3262
photocurrent multiplexer for IR staring array appl., 64×64-element 87−56523
photonic I/O's at the PWB and chip level? 87−45451
photonic switching technology, engineering perspective 85−42609
photonics diagnostic systems using fibre optics 88−58131
Piedmont Airlines integrated voice/data network 88−73754
Polish telegraph and teleinformatic networks, design problems *(Polish)* 88−73504
polyvinylidene fluoride, multitransducer platform scanning, distributed multiplexing architecture 86−53878
power stations, microcomputer appls. to multiplexing and distributed control 86−33106
PP2 process peripheral, analogue functions *(German)* 86−44206
price/performance ratio improvement, buyer's guide 86−69501
primary PCM multiplex equipment, fourth generation 87−28290
private ISDN using high speed digital path, present status and future trend 88−28499
process control, input signal conditioning and multiplexing 85−42944
program-controlled signalling multiplexers by TERTA 86−43632
programmable optical demultiplexer using 32-element Si photodiode array *(Japanese)* 88−60194
PU 104 DC interface multiplexer for secure data transmission 88−53083
pulse stuff synchroniser, jitter transfer function anal. 86−43635
pyroelectric linear arrays, low signal multiplexing system 87−3518
quaternary adder, subtractor and multiplier using quaternary multiplexer 88−6752
quaternary multiplexer using CMOSICs, cct. configs. and appls. 86−67161
radio broadcasting, digital, multiplexing and modulating devices, Usingen TV-SAT ground station *(German)* 86−43953
radiofrequency circuits use of hybrid networks 85−20019
RASE−recording and alarm scanning equip. 88−28578

multiplexing equipment continued
Raytheon digital multiplexing systems 86−23592
real-time analogue data acquisition, time factor *(German)* 88−9894
remote data processing equipment, Robotron range *(Czech)* 86−16981
remote networking over telco lines 85−47315
remote subscriber multiplexer (RSM) in the AXE 10 system *(Croatian)* 87−20330
rural subscriber services system using multiplex radio relay links 88−59987
S-M13 asynchronous dig. multiplexer for fibre optics 87−40951
S/H amplifiers, amplifiers, multiplexing to hide glitches 87−52386
Salplex Series 4000 automotive multiplexing system, config. based on time-slot assignment 86−52011
satellite earth station terminal equipment, use of logic cell arrays *(German)* 88−25093
satellite microwave multiplexers, CAD and simulation 85−25808
satellite on-board baseband message processor for Ka-band systems 85−25833
satellite switching centre with onboard diagnostics 87−76431
second-generation PCM 30-channel basic system with E and M-signals *(German)* 87−55887
self-heterodyne multiterminal system concepts for frequency division multiplexed fiber-optic communication 88−73755
sensor array scanning using maximal length sequences, with ultrasonic appl. *(Japanese)* 87−70620
septate E-plane multiplexers with PC elements, low cost/insertion loss microwave/MM-wave design 88−70982
sequential circuit internal state encoding, multiplexer and decoder systems *(Polish)* 87−59326
serial interface between modem and data multiplexing box 85−47300
serial pulses control analog multiplexer 86−30491
services integration and multiplexing for broad-bandcommunication systems 86−64434
shortwave transmitters, techniques for feeding several to one antenna 88−67539
SHOWMUX SA-7057 fibre optic multiplex transmission equipment *(Japanese)* 88−53303
SHOWMUX series fibre optic signal multiplex transmitter for control and meas. signals *(Japanese)* 87−62989
Siemens digital multiplexer family for 2 to 565 Mbit/s 87−20324
Siemens FM100 field multiplexer for petroleum industry, flameproof *(Spanish)* 86−59715
Siliconix DG536 16-channel multiplexer *(German)* 87−40540
simulation and sensitivity anal. of multiplexing networks 86−40869
single mode high channel density wavelength division multiplexers design 88−47060
single mode optical fibres, multichannel WDM technique 88−45099
single path multiplier-free transmultiplexer scheme foran adder-based digital signal processor 86−62662
single-mode fiber-optic demultiplexer, props. 87−76771
single-mode fibre optic WDM 87−13729
single-mode fibre WDM in the 1.2/1.3 μm region 86−43869
single-mode fibres, optical couplers multi/demultiplexer development *(Japanese)* 88−41658
single-mode optical coupler, wavelength-flattened 8×8 star config., design and performance 87−12111
single-mode optical fibre wavelength-tunable WDM coupler, design and performance 87−56127
single-mode passive fibre components, automated coupler manufacturing system development 86−63681
single-mode wavelength division multiplexer/demultiplexer for two channel bidirectional transmission 88−47150
single-path transmultiplexer scheme with multirate wave digital filters 85−14032
SL undersea lightwave system, terminal transmission equipment 85−37047
SMD-3 subscriber loop multiplex system for digital one-link service areas expansion 86−30493
soft multiplexers 87−13500
software controllable multiplexers 87−48768
sound programme transmission using 2 Mbit/s multiplexing system 85−42702
space division switching unit for TV signals *(Italian)* 87−69796
spacecraft telemetry and control baseband bus 86−50713
spare parts calculation for the multiplex systems *(Serbo-Croatian)* 87−2985
speech codecs, low bit rate and wideband *(Japanese)* 88−21818
speech data adaptive multiplexer 85−8279
spherical waveguide multiplexer-demultiplexer using hemispheric geodesic lens 86−69793
spherical waveguide multiplexing device, refl. grating coupled to geodesic lens 86−11132
splitters, fused biconical taper, wavelength depend., meas. and control 86−42339
SS-TDMA switch matrices using optical technology 87−76649
standard local network for industrial use, based on MIL-STD-1553 86−17104
standards for data communication speeds *(Dutch)* 85−63423
standards selecting data communication equipment 86−49367
star couplers, transmissive, for full duplex channels 86−43870
star network multiplexer for Elektronika-60 microcomputer and peripherals *(Russian)* 88−73756
Statiscan TDM 4 system for safety system telemetering 85−3259
statistical multiplexer, 8-channel, microprocessor-based implementation 85−25525
statistical multiplexers, delay-throughput and buffer utilisation charact. 87−69788
statistical multiplexers, devels. 88−53080
statistical multiplexers, features 87−62764
statistical multiplexers, market considerations 88−67174
statistical multiplexers, T1 challenge 88−15267
statistical multiplexers, technical differences 86−23591
statistical multiplexers, telecommunications efficiency improvements and cost savings 86−43637
statistical multiplexers for data communications 87−40410
statistical multiplexers for multiterminal networks 86−4400
statistical multiplexers for optimum multiple asynchronous lines 86−69508
statistical multiplexers of North Carolina Educational Computing Service 85−36825
statistical time-division multiplexing equipment 85−63433
statistical voice/data multiplexing systems with voice storage, performance anal. 85−63432

multiplexing equipment continued
stereo coders, component compensation by subcarrier third harmonic 86−4399
strip-line directional filters and multiplexers coupled to a resonator loop 88−19340
stuffing jitter accumulation, fifth order bit rate operation *(German)* 88−28585
stuffing jitter in multiplex systems for broadband signals *(German)* 87−28285
submarine optical cable branching units, digital multiplexing 88−9333
subminiature diplexing filter for 900 MHz cellular radio 86−17263
subscriber loop noise and time compression multiplexing appl. range 86−17082
superposition arrival processes and performance of voice/data multiplexers 86−54611
superposition arrival processes characterisation in packet multiplexers for voice and data 87−13171
Swedish micromechanical engineering developments *(Swedish)* 87−68304
Swiss PTT digital data network for 2400, 4800 and 9600 bit/s transmission, equipment aspects *(German)* 88−14942
switched MOSFET multiplexer, blocked-impurity-band detector focal plane arrays appl. 87−49550
switched-capacitor equalisers for time-compression multiplex digital transmission 85−3268
switching matrix, wavelength selective all-fibre 88−39917
symmetrical systems for subscriber network digitalization 88−15237
synchronised multiplex system, overload handling 87−7876
Synchronous Data Link Control hardware dynamic multiplex 85−3263
synchronous DS3 add/drop multiplexer with cross-connect 87−40549
synchronous DS4 multiplexer with cross-connect function 87−34264
synchronous DS4 multiplexer with cross-connectfunction and its impact on the network 86−55088
synchronous hubbing transmission in the local loop 88−28850
synchronous optical network compatible multiplexers, appl. 88−67383
SYNTRAN for digital transmission terminals 86−17111
T1 and X.25 type multiplexers, review 86−17113
T1 basics, understanding for network changes 87−40266
T1 multiplexer growth for economical and ISDN voice and data services 88−9363
T1 multiplexers, comparison shopping 88−15268
T1 multiplexers, issues and evolution 87−69791
T1 multiplexers, market trends 88−28580
T1 products, multiplexers sales growth 85−36823
T1 services, integrated access networking 88−9364
TDM, channel assignment of measured values *(German)* 86−30494
TDM, programmable time window cct. 86−17105
TDM for digital networks, development 85−36829
TDM MSI 4:1 multiplexer/demultiplexer, bipolar design with 4.8 Gbit/s operation 85−30781
TDM system for analogue data recording on audio tack of videotape 86−60719
TDX-1, application of CMOS gate array integrated circuits to switching network and digital line concentrator *(Korean)* 88−46808
telecommunication cables, protection of connector unit equipment and HF channel multiplexing equipment *(Russian)* 85−8285
telegraph and data signal multiplexing, test prototype of equipment *(Hungarian)* 88−59899
telegraph messages transmission by multiplexer 86−17106
telegraph signals transmission multiplexer control microprocessor, review *(Polish)* 87−62556
telemetry, transducer excitation and conditioning 85−64110
telephone distribution points and drop wire 86−17115
telephone subscriber loops developments, microelectronics implementation *(Czech)* 86−30470
teleprocessing line speedometer 86−43626
telewriting terminal for simultaneous transmission of voice/encoded handwriting signal over telephone channel *(Japanese)* 87−40302
terminal multiplexer branching technique for rural and dedicated networks *(Slovenian)* 88−67172
terminal multiplexor, structure and control *(Czech)* 86−4405
TERTA processor controlled signal multiplexors for PCM transmission *(Hungarian)* 85−57850
thermal dosimetry, computer-controlled temp. multiplexer 85−9238
thin film electroluminescent panel, multiplex drive 85−14948
third generation digital multiplex equipment 87−13497
time switch LSI design for 1.5 Mbit/s×128 channel digital still picture switching system 87−20328
time-division switch, stuck-type fault detection, tester architecture 87−76430
TM7800-M1 60-channel CCITT transmultiplexer 85−14031
TM 45/140 interface multiplexer for the Europeanand American standard digital hierarchies 86−4401
TNE1-3G PCM system for interexchange transmission 85−3270
token-passing linear multiplex data bus, robust fibre optic active star coupler 88−67071
transmission equipment for 12-channel DPCM video signals *(Japanese)* 88−28861
transmission networks, submerged optical multiplexing techniques 88−47189
transmit-receive multiplexer for broadcasting satellite transponders, 12-14 GHz band *(Japanese)* 86−69723
transmultiplexer, 60 channel FDM/PCM system 85−57856
transmultiplexer, TM7800-M1, 60-channel device with CCITT standards 85−57854
transmultiplexer 2×PGM 30/60-FDM *(Polish)* 88−15261
transmultiplexer as analog to digital network interface, techniques and equipment *(Spanish)* 86−55085
transmultiplexer for the 24-channel hierarchy 86−23594
transmultiplexers, digital signal processing problems 88−59178
transmultiplexers, technical requirements and realisation methods *(Polish)* 88−15262
tunable eight-channel wavelength demultiplexer using acousto-optic. light deflector, fibre communication appls. 86−55288
tunable optical multi/demultiplexer for optical FDM transmission system 85−42576
tunable superlattice p-i-n photodetectors: characteristics, theory, and application 88−65481
TV, component codec and line multiplexer 88−41838
TV programs analog and digital transmission using single EAS trunk 88−67510

multiplexing equipment continued
TV transmission, program distribution via glass fibres *(German)* 88−22311
twin grating wavelength multiplexer in single-mode optical fibre 88−67412
two-channel multiplexers, 0.8 to 1.3 μm *(French)* 86−11127
U1001C and U1011C PCM ICs, review *(German)* 87−826
UK telex transmission modernisation 87−27902
ultra high speed optoelectronic multiplexer bus as an integral design component for a parallel computer 87−40623
ultrafast optical multi/demultiplexer utilising optical Kerr effect in polarisation-maintaining single-mode fibres 87−49033
universal digital cross-connect system using DCS technology 87−34267
Universe Project, satellite transmission protocol 85−8127
Usingen TV-SAT earth station, multiplexing and modulation equip. for dig. sound *(German)* 87−13499
variable speed adapter for data transmission 85−30784
vehicles multiplexing system for digital transmission and processing 88−18185
very-high-speed line terminating multiplexer operating up to multi-Gbit/sec 87−40550
video network, high-speed time division switch operating at 256 Mb/s 86−17162
video-speed switches, multiplexers and crosspoints, configs. and appls. 88−587
videocommunication optical network, multiplex system 87−76489
viewport priority circuit 85−28470
VLSI demultiplexer for regenerative satellite, design 87−56087
VLSI PCM-FDM transmultiplexes, CAD custom design 86−34995
voiceband data modem, 19.2 kb/s, based on orthogonally multiplexed QAM techniques 86−23590
W-band broadband finline diplexer with >20 GHz bandwidth, design 86−8434
Wandel-Goltermann PCM Subrack, modification and extension *(Hungarian)* 88−28584
wavelength demultiplexer, mech. tunable single-channel, using monochromator with GRIN lens optics 85−8396
wavelength demultiplexer using echelette grating on Si substrate 85−37002
wavelength division multiplexed fibre optic telemetry link for an absolute encoder 88−47088
wavelength division multiplexer, technological trends 88−9606
wavelength division multiplexers for optical telecommunication *(French)* 85−20200
wavelength division multiplexers/demultiplexers using fused taper couplers, insertion loss and isolation 88−45098
wavelength multiplexer, industrial fiber optic, for three channels and duplex transmission *(French)* 86−11126
wavelength multiplexer, six channel single mode, with waveguide concentrator 85−3478
wavelength multiplexer and demultiplexer, six-channel, for single mode systems 86−23595
wavelength multiplexing components for fibre optics communications systems *(German)* 86−4615
wavelength-selective directional couplers using dispersive materials 88−33662
WDM, birefringent, bit error rate and power penalty anal. 88−41638
WDM, integrated-optical, multichannel, for monomode systems 86−4691
WDM, SAW-controlled multilayered tunable optical separators, temp. independence improvement 86−22176
WDM at 1.5 μm for single mode fibre high capacity optical transmission 86−69792
WDM components for optical communication, review of single mode devices 85−8413
WDM demultiplexer with chirped grating, design 87−40552
WDM fibre systems, planar optical demultiplexer with chirped grating 85−2060
WDM filters, 4-channel transmission of 2×565 Mb/s and 2×140 Mb/s on single-mode fibre 86−11115
WDM grating manufacture by ion beam etching on glass 86−4690
WDM module, development by NTT *(Italian)* 88−53262
WDM multi/demultiplexer, broad-passband width optical filter design 85−47502
WDM multi/demultiplexers, for two-channel single-mode transmission systems 85−14266
WDM optical communication system, min. insertion loss, mux/demux 88−28878
WDM optical fibre communication, wavelength divider equipment *(Japanese)* 85−8428
WDM system using 3 wavelength-selective fused single-mode fibre couplers as multiplexers 88−67410
WDM technology for optical communication, review 85−8419
WDM technology review, demultiplexer designs 85−52365
WDM transmission systems, equipment review *(Polish)* 85−19939
WDM/demultiplexing system, optical intersatellite communication 87−70083
wide area networks using modems and multiplexers 86−54869
wide passband grating multiplexer, for multimode fibres 85−63667
wide-area network links campuses 87−28126
wide-band guided-wave periodic multi/demultiplexer with a ring resonator for optical FDM transmission systems 88−73924
wideband combline triplexer for AMSU-B 87−45217
wideband guided-wave periodic multi/demultiplexer with a ring cavity for optical FDM transmission systems 88−35473
wideband speech codecs and low-bit-rate speech codecs 88−41449
wideband strip VHF multiplexers using tandem directional couplers 87−48769
X25 packet switch standard multiplexers 88−46791
Yugoslavia 3, ground station for satellite transmission and TDMA terminal *(Croatian)* 88−22022
AlGaAs laser diode transmitter for free-space communication 88−60166
GaAs 2 GHz multiplexer and demultiplexer using DCFL/SBFL circuit and the precise V_{th} control process 87−32727
GaAs DCFL 4:1 Multiplexer and 1:4 demultiplexer 88−28586
GaAs MESFET 4×4 crosspoint switch 87−31850
GaAs SCFL multiplexer/demultiplexer with high yield and low power 87−32726
GaAs cryogenic multiplexer for spaceborne appls. 87−41419
GaAs detector array/CCD multiplexer for acousto-optic spectrum analyser 85−14689
GaAs digital IC, DCFL and SBFL circuits 88−28876
GaAs digital signal processing chips for optical transmission to 2.3 Gbit/s *(German)* 87−40918

multiplexing equipment continued
GaAs diode coupled MESFET 2.4 Gbit/s 8-channel multiplexer, design simulation and testing 85−17883
GaAs high-speed MSI IC multiplexers for bit rates up to 1.9 Gbit/s *(French)* 88−56598
GaAs multifunctional LSI using buried p-layer SAINT FETs 87−31979
GaAs multiplexer and demultiplexer, 10G040/41, designs for 2 GHz data rates *(German)* 86−55083
GaAs multiplexer and demultiplexer ICs for fibre optics data transmission systems *(German)* 87−2984
GaAs multiplexer/demultiplexer pair using MSI BFL. 16/8-bit, 2 Gbit/s, design and testing 88−70694
GaAs universal multiplexer/demultiplexer using low power source coupled FET logic 86−69512
GaInAs-InP monolithic photodetector arrays for high-density WDM appls. 88−73906
GaInAsP-InP laser, five-wavelength integrated DFB with quarter-wave-shifted structures for WDM 87−68475
HgCdTe IR CCD, two-dimensional, with increased cell capacity 87−49552
HgCdTe focal plane arrays for remote sensing appls. , using FET switch imager 88−74482
HgCdTe hybrid focal plane array using Si CCD readout interfaced to epitaxial HgCdTe 85−8731
HgCdTe hybrid focal plane development 87−20929
InP based integrated optoelectronics, Esprit programme activity 88−40099
$LiNbO_3$ guided-wave devices for single-fibre video and bidirectional voice/data transmission 88−73923
$LiNbO_3$ integrated-optic wavelength multiplexers based on two-mode interference 88−72145
$LiNbO_3$ integrated-optical wavelength multiplexer/demultiplexer for single mode systems 87−76816
$LiNbO_3$ low-insertion-loss tunable WDM 87−74829
$LiNbO_3$:Ti fast directional coupler switch/modulators, TDM and data encoding 85−2089
$LiNbO_3$:Ti optical waveguide couplers, MUX/DEMUX designs for WDM transmission systems 88−9567
PtSi IR focal plane array with MOS/CTD readout 88−47568
Si CCD multiplexer for InGaAs photodiode arrays, SWIR imaging appl. 87−49553
Si CCD multiplexers for SWIR focal plane , using InGaAs photodiodes 88−74478
Si bipolar ICs for 565 Mbit/s optical fibre system, old technology comes good 86−47783
Si monolithic bipolar TDM multiplexer for semicond. injection laser PCM 85−24572
SiO_2 planar optical multiplexer, thermo-optic tuning mechanism frequency response 88−2039
SiO_2:P waveguides, integrated four-channel Mach-Zehnder multi-demultiplexer 88−72147
SiO_2-TiO_2 guided-wave hybrid optical transmitting-receiving module 86−69782

multiplier phototubes *see photomultipliers*
multipliers, electron *see electron multipliers*
multipliers, frequency *see frequency multipliers*
multipliers, voltage *see voltage multipliers*

multiplying circuits
1.3-μm CMOS/bipolar standard cell library for VLSI computers 88−50933
2-D state-space filters with fewer multipliers 87−906
7.4 ns CMOS 16×16 multiplier *(German)* 87−59414
8×8 bit pipelined parallel multiplier using self-aligned gate n^+-(Al,Ga)As/GaAs MODFET IC technology 88−19110
8×8b parallel multiplier in submicron technology 86−8181
10 MHz analogue multiplier 86−27501
12×12-bit signed multiplier 86−34919
16×16 bipolar TTL multiplier, IDM29516-30, high performance, features 87−658
16×16 ECL-compatible Cray multiplier 88−6771
16-bit parallel multiplier using SST macrocell 86−67177
24-bit serial multiplier circuit design *(Hungarian)* 88−32107
25 MHz 16 bit×16 bit pipelined multiplier macrocell 85−34021
32×32 bit multiplier using multiple-valued MOS current-mode circuits 88−733
32-bit multiplier, design using bipolar 18K gate variable-size cell masterslice 87−17025
40 ps HEMT 4.1 K gate array IC 88−51038
64 Bit coprocessor for floating point calculation, architectural features *(French)* 86−20575
280ps/gate ECL 5000-gate array, use in 16-bit multiplier implementation 86−973
4089 CMOS IC, counting appl. 85−17577
±Quinary parallel adding circuit and multiplication *(Japanese)* 88−44140
acousto-optic matrix-matrix multiplier 88−45248
adaptive digital lattice filters, bit-serial architecture 87−66380
adaptive filter using lattice elements as adaptation molecule, design *(Japanese)* 86−35021
adder-based multiplication unit for customised digital signal processors 87−27464
analog computing transducers for electrical quantities, constructed using integrated analog function circuits *(German)* 85−20566
Analog Devices AD539 analog-multiplier IC, signal processing tasks, applications 85−6456
analog multiplier error correction 88−70942
analogue, based on transconductance amps. *(Spanish)* 86−41260
analogue combinatorial cct. with adders and multipliers, racing conditions 86−40981
analogue computing cct. design 85−28657
analogue four-quadrant CMOS multiplier-divider with switched capacitors 88−909
analogue module, TD4206, logarithmic type, charact and appls. *(Chinese)* 86−20746
analogue module, TD4214, based on Gilbert's multiplication element, appls. *(Chinese)* 86−20746
analogue multiplier integrated circuits developed inArgentina *(Spanish)* 85−49786
analogue multiplier using Si bipolar super self-aligned technology, radiation hardness 86−58003
analogue multiplier/divider realised in CMOS/TTL compatible technology *(Chinese)* 87−37478
analogue multipliers, anal. *(Spanish)* 86−14438

multiplying circuits continued
analogue multipliers, developments and products 87−45123
analogue multipliers, signal processing techniques 86−31328
analogue multipliers errors correction, by switched modulation conversion method 87−3541
analogue OTA multiplier without input voltage swingrestrictions, and temperature-compensated 86−52692
array multiplier, design *(German)* 85−34020
array multiplier with high-speed low-power operation 86−34923
array multipliers, two's compliment, design 87−31832
array two's-complement multiplier and square function 88−645
asynchronous, efficient CMOS implementation 88−63662
AT^2-optimal Galois field multiplier for VLSI 88−1757
automated generation of highly regular VLSI ccts. layout 86−21768
automatic gain control cct. uses analog multiplier 87−951
B3018 ECL sub 10 nanosecond multiplier 87−66076
baud rate spectral lines detection by delay and multiply receivers, minimisation 87−39837
binary multiplication, recursive algorithm and VLSI layout 86−52769
binary multiplier and stochastic time-division multiplier circuits for energy meas. appl. *(German)* 88−6737
binary multiplier IC, ROM implementation of squaring function 85−49962
binary permutators using CMOS building blocks 86−57806
bipolar, macrocell array, 2500-gate, design and appl. 86−20437
bipolar parallel multiplier-accumulator, 32-bit, using 107 K-component VLSI macrocell 87−31842
bipolar VLSI building blocks yield fast 32-bit microprogrammed CPUs 87−37107
bit serial, design philosophy 86−20659
bit-serial complex multiplication and sum-of-product computation using distributed arithmetic 87−24092
bit-serial multiplier elements, error detection codes 88−70657
bit-serial multipliers, testing 86−46728
bit-serial quasicyclic encoders, VLSI architecture 87−10945
Booth multiplier, 16×16 bit array in NMOS and CMOS technologies, design and comparison 86−20672
Booth multiplier, modified, parallel architecture 88−50173
branching wave digital lattice filter design with (N+1)/2true multipliers 87−933
buyer's guide to multiplier-accumulator ICs and technological overview 87−59293
C-testable array multipliers, test generation 88−32175
C-testable Booth multiplier, designed for a silicon compilation environment 88−25165
cascade current multiplier *(Czech)* 87−44554
CMOS 16×16 bit multiplier with multiplication time of 5.6 ns 88−7749
CMOS 32-bit 1 micron IEEE format floating point chip for digital signal processing 86−2424
CMOS 32-bit Wallace-tree multiplier-accumulator 87−18336
CMOS 8×8 bit multipliers with sub-10-ns speeds, low temp. operation 87−31806
CMOS analog current squaring cct., three transistor config., design and appls. 87−24384
CMOS analog multiplier, four-quadrant type, 20 V operation, design and performance 86−35869
CMOS analogue building blocks for instrumentation 87−34954
CMOS analogue ccts., square-law characteristic of MOS transition utilisation 87−53715
CMOS analogue four-quadrant multiplier-with resistor, monolithic design and characts. 85−45149
CMOS analogue multiplier, +/−5 V supplies 88−20116
CMOS analogue multiplier, four-quadrant 86−35043
CMOS analogue multiplier, four-quadrant, using linearised transconductance stages 87−17275
CMOS array multiplier based on Booth's algorithm 87−53747
CMOS fast 16×16 bit asynchronous multiplier 87−24138
CMOS floating point multiplier, 32-bit 85−22800
CMOS floating point multiplier/divider, 32 bit, high-speed design using precode/recurrent scheme 88−734
CMOS floating point multiply/accumulate chip, 1.25 microns 86−2423
CMOS four-quadrant analogue multiplier 88−12529
CMOS four-quadrant analogue multiplier using quarter-square technique 88−20114
CMOS implementation of a multiplier over GF(64) 87−731
CMOS LSI multiplier, 32×32 bit implementation using multiple-valued current mode ccts. 88−32111
CMOS multiplier chips, nuclear radiation test, cct. design 87−5785
CMOS multiplier core, four-quadrant, with lateral bipolar transistor 85−17750
CMOS multiplier-accumulator with 1-μm technology, TMC2160 85−6396
CMOS multiplier-accumulators, 32-bit 86−34916
CMOS multipliers, 8-bit, cryogenic temp operation, sub. 10 ns speed 86−8192
CMOS multipliers and multiplier-accumulators for signal processing 87−657
CMOS multipliers for reduced power consumption *(German)* 85−55946
CMOS parallel multiplier, 16×16 bit, sub-10 ns, design using 0.6 μm technology 88−6740
CMOS parallel pipelined multiplier, 8-bit×8-bit, 70 MHz 87−622
CMOS stuck-open self-test for an optimal-time VLSI-multiplier 87−53726
CMOS two-quadrant analogue multiplier based on transient response of op amp 85−11476
CMOS VLSI chip, on-chip parallelism, empirical study 88−71788
CMOS VLSI floating point unit, fast multiply and divide 87−60684
CMOS/SOI gate array fabrication by laser recrystn. technique 86−41078
CMOS/SOS multiplier-accumulator, very high-speed 85−897
complex digital signal processing structures, VLSI implementation 88−63642
complex-data digital signal processing, chip-set 88−8801
computer lSI building blocks let you define your own architecture 87−66072
converter-type mutators using three current conveyors *(Japanese)* 86−20717
cosine transform processor, 100 ns 16-pt CCD IC 87−59622
Cray multiplier, 16×16 flow through IC, Monolithic Memories SN54/74S556 85−17593
current multiplier inductive store with multiple exploding foil switching 85−23075
current/voltage hybrid multiplier using combined voltage-based/current mode logic implementation 88−63600
D/A convertor, tangential multiplying type *(Russian)* 85−28596
multiplying circuits continued
DACs with multiplication facilities, appl. guidelines 86−34902
DCMS, digital circuit multiplier systems, for interconnection and compatibility of telephone circuits 87−34246
delta-sigma sequences of same clock freq. 85−2735
design using subcritical waveguide with capacitive discontinuity *(Czech)* 87−66506
digit-served multipliers, systolic/semisystolic designs 87−59412
digital IC, information algorithm for limiting contact pins 88−636
digital multiplier devices, processing algorithms for high performance arrays 86−1181
digital multipliers arrangements for optical cables *(Polish)* 88−60198
digital optical linear 3×3 bit combinatorial systolic multiplication array 87−55298
digital single-sideband modulation with Hilbert-transformation *(German)* 87−47467
distracted arithmetic appl. for multiplier-adder of modulus m *(Polish)* 87−31792
dual phase multiplier-accumulator digital filter for television scan line decimation 87−32023
ECL Cray multiplier, 16×16 bit high-speed operation, gate array implementation 87−73433
ECL fixed point arithmetic elements 88−6770
ECL MAC for 80% reduction in processing times 87−16983
ECL multiplier, 16×16 bit, using standard cell design methodology 88−12351
ECL multiplier and multiplier-accumulator, bipolar VLSI building blocks 87−73435
ECL multiplier-accumulators, sub 15 nanoseconds, design 88−727
ECL sub 10 ns low power bipolar 16×16 bitmultiplier 86−67974
ECL VLSI sub 10 nanosecond multiplier 87−59430
error analyzer for analog signal multipliers and functional converters 85−8883
exact calculations, implementation in hardware 87−59306
expandable arithmetic block macrocell in CMOS VLSI 87−44762
extending Booth's algorithm for *N* cascaded multipliers 86−67198
fast 16×16 ECL CRAY multiplier 87−59428
fast 1-D serial-parallel systolic multiplier 88−662
fast digital optical matrix-vector multiplier, implementation 88−13971
fast function generation using DSP multipliers 86−830
fault simulation, concurrent hierarchical, performance model, 400 gate multiplier example 87−37228
fault simulation and matrix multiplication, $O(n^2)$ complexity bound 87−66142
fault tolerant arrays for integer arithmetic multipliers 88−25348
fault-tolerant FFT networks 86−1017
feedback systems, time-varying, nonlinear, Riesz-Thorin and L_p-stability 87−73250
Fermat number, integers modulo a multiplication, VLSI design 86−14324
FET multiplication cct., modification for errors elimination *(Polish)* 87−17274
FFT microprogrammable peripheral unit and algorithm 85−47880
FGE2500 gate array based 16×16 ECL Cray multiplier 88−728
FGE2500 gate array fast 16×16 ECL Cray multiplier 87−66074
finite field multiplication in VLSI 87−52549
FIR delta-modulation filter, modified delta-adder and delta-multiplier for multiplexing 85−13661
FIR digital filters, multiple- and memory-based for Nyquist channels, quantisation noise 86−14417
FIR filters as tapped cascaded interconnection of identical subfilters 88−6982
floating point chip set, WTL 1165 multiplier and WTL 1165 ALU, 6 million FLOPS 85−54914
floating point multiply/accumulate chip, 32-bit device using 1.25 μm CMOS technology 86−20630
floating-point multiplier, double precision IEEE-754 type, 100 MFLOPS throughput; bipolar VLSI implementation 88−70696
floating-pt. chip sets from Bipolar Integrated Technology 87−44729
four quadrant MOS analog multiplier 87−59805
four quadrant time division analogue multiplier, design using pulse-interval amplitude-modulation 86−8365
four quadrants switched capacitor analog multiplier 85−34003
four-quadrant all-MOS multiplier ccts., continuous-time type, op-amp topologies *(German)* 87−66364
four-quadrant analog multiplier, design and implementation 85−916
four-quadrant analogue multiplier, integrated cct. design 88−38654
four-quadrant analogue multiplier based on PTM format 86−14431
four-quadrant CMOS analogue multiplier using linearised transconductance stages 87−66443
GaAs 12×12 bit expandable parallel multiplierLSI using sidewall-assisted closely-spaced electrodetechnology 85−49842
Galois field multipliers for channel coding *(German)* 88−53062
gate-controlled photodiode for optical matrix multiplication applications 87−54189
HEMT gate array LSI, 4.1 K gates, parallel multiplier 87−59377
high-speed multiplication using a minimum redundant P-ary representation *(Japanese)* 88−38483
high-speed multiplier using a redundant binary adder tree based on E/D NMOS 87−37166
HP's MM wave sources and instrumentation 88−38712
inductive energy transfer circuit, Meatgrinder 87−22799
integrated multipliers, development and technological aspects *(German)* 85−877
inverted HEMT, MBE growth and processing, LSI appls. *(Japanese)* 87−60489
iterative logic arrays, fast and easily testable implementation of arithmetic function 87−667
Josephson 4 bit×4-bit parallel multiplier with critical path delay of 280 ps 86−20442
Josephson logic LSIs, gate array and multiplier 87−31843
Josephson parallel multiplier, 4×4-bit, resistor coupled logic 86−8197
Josephson threshold logic cct. implementations for 4×4 bit multiplier and 3 bit counter 87−66022
layout generation for multipliers in VLSI-digital signalprocessing 85−62109
LDD self-aligned gate FET enhancement/depletion technology 87−32719
linear sinusoidal VCO 88−63563
linearising A/D converter with binary rate multiplier *(Polish)* 88−19228
log and anti-log ccts. 85−28658
long-tail pair cct. appls. 86−753

multiplying circuits continued
LSI chips for multiplier-accumulator and pipeline struct. *(Japanese)* 88−25108
LSI multiplier chip using redundant binary adder tree 85−33965
matrix multipliers, arithmetic expander using feedback *(Russian)* 85−61190
matrix multipliers constructed on basis of LIC-multipliers *(Russian)* 86−41252
memory used for logic ccts., arithmetic, table mapping, switching, microcode engines, data matching, etc. 88−6856
microprogrammable signal processors, CMOS components *(German)* 85−14697
microwave conference, Liege, Belgium (Sept. 1984) 85−5654
modified Booth algorithm type multiplier, method to reduce sign bit extension 87−5928
modulo $(6 \pm 5i)$ inner product computer 88−72189
modulo multiplier for finite field GF(F), VLSI architecture 88−735
modulo-3 residue checker, performance and cost, when providing concurrent self test for pipelined serial multiplier 88−44262
MOS continuous-time transconductor, four-transistor config. and appls. 87−73531
MOS four-quadrant analogue multiplier using switched capacitor technology four analogue signal processor ICs 85−61395
MOS LSI multiplier and divider using redundant binary representation 87−60683
MOS multiplier layout generator 85−1750
MOS transistor as multiplier, anal. *(Czech)* 86−47018
multicell-typic logic 12 bit×12 bit super high speed multiplier *(Chinese)* 88−6725
multiple-valued logic, multiplier using bidirectional current-mode ccts. 87−52559
multiplier/accumulator, 30-MFLOPS CMOS IC 87−59422
multiplier/accumulators represent developments in 1 μm CMOS technology *(German)* 85−7072
multiplying computers, pipeline-programmed, architecture and implementation *(German)* 85−49965
n-p-n transistors with sidewall base contact struct., appl. to high-speed ccts. 87−32681
negative constant multiplier circuit design using parasitic-free switched-capacitor building block 85−28632
NMOS 4×4-bit multiplier, parallel implementation using modified Booth's algorithm 88−63616
NMOS high-speed low-power ccts. with submicron dimensions 86−28493
NMOS high-speed parallel multiplier *(Chinese)* 86−62515
NMOS multiplier test chip for image processing systems 86−34933
nonplanar systolic architectures, performance improvement through increased fan-out 87−66213
offset quadrature PSK, symbol rate detectability by delay-and-multiply receiver 88−52332
online error-detectable high-speed multiplier with redundant binary adder tree 86−62572
optical arithmetic/logic unit based on residue arithmetic and symbolic substitution 88−51624
optical phase reconstructor based on a multiplier-accumulator approach 86−49016
optical transatlantic cable, digital cct. multiplication *(Swedish)* 88−60187
optimal-time VLSI-multiplier, easily testable 87−18299
parallel array multiplier, 8×8 bit, 2.7 ns high speed operation using sidewall base contact struct. 87−66023
parallel multiplier, 24×24 bit, based on modified Booth's algorithm 86−2326
parallel multiplier, easily testable 88−70740
parallel multiplier, practical scheme with ROMs *(Chinese)* 88−63589
parallel multiplier based on negative-base binary system, digital signal processing appls. 86−62661
parallel multipliers with NOR gates based on G-minimum adders 85−889
parallel VLSI algorithm design 86−46654
parallel-by-bit arithmetic computational techniques 87−5819
PDSP 16112 monolithic multiplier for complex numbers *(German)* 87−44737
PDSP family CMOS building blocks shrink and speed up FFT systems 87−66010
pipelined array multiplier performance, systematic exploration 86−14326
pipelined bit-serial multipliers 87−37243
pipelined bit-serial squarer, digital signal processing appl. 88−19101
pipelined multiplier macrocell, 16 bit×16 bit, implementation in 1.5 μm CMOS/BULK technology 85−45130
pipelined multiplier unit and its hardware architecture for VLSI technology 88−44814
pipelined multiplier unit and its hardware architecture for VLSI technology 87−17041
plug-in module for K1520 microcomputer *(German)* 85−22975
PMOS four-quadrant analogue multiplier 86−27506
product-of-sum Josephson logic for addition and multiplication *(Japanese)* 85−28435
quasi-parallel multiplier for microprocessors using TTL ICs *(German)* 86−52790
quasi-universal VLSI multiplier with signed digit arithmetic 88−44847
quaternary adder, subtractor and multiplier using quaternary multiplexer 88−6752
radix-4 multiplication without carry-propagate addition, VLSI realization 88−19307
radix-4 signed-digit no. system in VLSI arithmetic 86−57810
rectangular matrix multiplication, area-time complexity 86−63421
recursive digital filter sections which suppress subharmonics fordiscrete-time periodic input signals with period P ora divisor of P 86−67420
redundant signed digit numbers, high speed multiplier design 88−25167
regulator based on K580IK80 microprocessor *(Russian)* 86−67241
residue arithmetic, systolic array implementation 86−1185
residue multiplier, modulo Fermat number, VLSI implementable 86−1186
residue number multiplier cct. for VLSI-oriented digital signal processor 85−28616
reverse engineering for standard cell design, rel. to fast arithmetic processors 87−24147
RF analogue CMOS circuits for data communication appls. 86−47811
RNS multiplication in VLSI 87−5817
scaled inverse of input squared, cct to generate 87−5732
self-testing 2-μm CMOS chip set for FFT applications 87−37164
serial multiplier for fixed point numbers with self checking capability, design and implementation 88−70668
multiplying circuits continued
serial multipliers and systolic arrays, error detection codes 88−39609
serial/parallel automultiplier 87−44733
shift-add multiplier design, expert system paradigm appl. 87−5831
signed bit-sequential multiplier 87−10807
signed digit multiplier chip with multiple-valued bidirectional current-mode logic circuits 88−50086
signed-digit number system, in multiplier design, VLSI implementation 88−44153
single chip parallel multiplier by MOS technology 88−32121
single-port MAC for DSP, Analog Devices ADSP-1110A 87−10774
solid-state imaging device with nonvolatile on-chip memory and its application to spatial multiplier *(Japanese)* 87−77274
SPST switch cct. using analogue multiplier 86−41251
statistical characts. of output signal of multiplier unit of digital-freq. computing device *(Russian)* 85−28609
stuck-at fault detect. in arithmetic ccts., residue and AN codes appl. *(Japanese)* 85−17578
switched-capacitor four-quadrant analogue multiplier-divider, design and appls. 86−62688
switched-capacitor multiplier/divider with digital/analog outputs, config. using successive approx. ADC 85−929
symmetric parallel multipliers, design approaches 87−24089
syntax design of a 16-by-16-bit multiplier with theanalog simulation of the part circuits *(Hungarian)* 86−14318
systolic multiplier 85−11368
systolic multiplier for large numbers *(French)* 88−50124
systolic multiplier unit and its VLSI design 86−1010
systolic multiplier unit for 2's complement numbers, layout design 86−41061
systolic multiplier unit for 2's complement numbers, VLSI layout design 86−46725
systolic VLSI multi-precision polynomial evaluator and matrix multiplier 85−62054
temporal logic for multilevel reasoning about hardware, appl. 85−40143
ternary arithmetic ccts. with three's complement representation *(Japanese)* 88−32159
three phase AC system transformations and their implementation in silicon 88−5815
time division multiplier using D/A convertors, high-accuracy, power meas. appl. 85−37552
time-division multipliers for power meas., simulation of current input signals *(German)* 87−41455
trigonometric D/A multiplier, ROM appls., code conversion 86−8321
TRW LSI Products CMOS floating point arithmetic chips 85−62121
two's complement multiplication-division array based on the restoring division 85−17325
two's complement multiplication-division arrays, config. 86−57802
two's complement multiplication-division arrays, config. and eval. 87−44756
two's complement multiplier, optimising structure *(Russian)* 85−54976
two's complement multiplier circuit, hardware design 85−54816
two-dimensional separable-denominator digital filters with lattice structs., realization *(Japanese)* 86−35024
U 882 single chip microcomputer, hardware multiplier *(German)* 88−56595
ultra-high-speed Josephson multipliers, feasibility 87−38688
video processing, digital, new multiplier-adder LSI 85−8606
VLSI architecture for finite field multipliers using dual, normal, or standard bases 88−64790
VLSI architectures for computing multiplications and inverses in $GF(2^m)$ 85−55897
VLSI bit-parallel implementations of recursive digital filters 88−893
VLSI chip set for FFT implementation 86−20636
VLSI complex integer multiplier, using quadratic-polynomial residue system 87−66025
vLSI design and implementation of a multiplier co-processor utilizing a systolic multiplier unit 88−25168
VLSI design for diminished-1 multiplication of integers modulo a Fermat number 88−44869
VLSI floating point units, implementation of shifters, multipliers and dividers 87−60609
VLSI high-speed multiplication algorithm with redundant binary addition tree 86−2261
VLSI layout of a pipelined multiplier 88−71811
VLSI matrix multipliers, regular layout 85−49963
VLSI multiplier, fast, in finite field 86−41185
VLSI PLA appl. in construction theory of multiple-valued logicfunctions on GF (2^m) by bit code assignment *(Korean)* 87−633
VLSI programmable signal processor design 87−61968
VLSI quaternary serial multiplier, high perform., using CMOS-SOS technology 88−19306
VLSI realization of a fast multiplier in finite arithmetic 88−722
VLSI systems for matrix multiplication 87−66153
VLSI time and space complexities of a class ofsystolic multiplier units 86−63436
wafer scale integrated ccts., fault tolerant testable module *(Italian)* 87−67414
wideband tracking frequency multiplier 86−23984
AlGaAs-GaAs self-aligned gate superlattice MODFET parallel multiplier cct. 87−16991
GaAs 2.5 ns 40 mW 4×4 multiplier in 2's complement mode 87−24137
GaAs 6000 gate array with fully functional LSI personalisation 87−31849
GaAs 6K-gate array with fully functional LSI personalization 88−51039
GaAs 8×8-bit multiplier/accumulator using JFET DCFL 87−624
GaAs FET self-biased freq. multiplier 85−11572
GaAs MESFET 5×5 bit multipliers, high speed and ultra-low power 87−31847
GaAs configurable cell array using buffered FET logic, parallel multiplier implementation 85−22803
GaAs direct-coupled FET logic gate array, 2K-gate, 42 ps gate delay 86−8191
GaAs gate array, 1K gate, appl. to 6×6 bit parallel multiplier cct. 85−22802
GaAs gate array, 2K gate, with WN gate self-alignment FET process 86−20440
GaAs high-speed 4×4-bit parallel multiplier using super capacitor FET logic 87−44734
GaAs multiplier in two's complement mode 87−52522
GaAs parallel multiplier implementing modified Booth's algorithm, design and performance 88−19108

multiplying circuits continued
GaAs parallel multipliers, low-power DCFL implementation for high-speed DSPs 88−19109
GaAs/AlGaAs high-speed 4×4 bit parallel multiplier usingselectively doped heterostructure transistors 86−35918
GaAs-AlGaAs inverted HEMT, MBE growth and LSI appls. 87−60500
Si NMOS high-speed high-density 8×8-bit parallel multiplier 87−37167

multiport networks
2-D multiport network function modelling, state-space approach 87−471
2-port device cascades, noise calcs. 88−56376
2n-ports with controlled sources, cascade, anal. 85−40170
3-port tuned amp. stability 87−44637
4-port resistive reflectors, for synthesis of nonlinear circuit elements *(Czech)* 85−39889
active RC realisation of voltage gain matrices with prescribed ranges of passive RC element values 87−867
adaptive multiple beam system concept 87−54732
adaptive spectral response modeling procedure for multiport microwave circuits 88−25440
arbitrary linear resistive multiports, synthesis using switched-capacitor technique 86−34979
bilateral optocirculation circuit with three ports 88−8059
bit-slice multiport register-file chip for the CHoPP supercomputer 87−73485
bivariate lossless two-ports, scattering transfer matrices factorisation for cascade synthesis 85−22580
black box bounds, time domain signals failure norms 86−13911
branched cascaded networks, CAD, simulation and sensitivity anal. 86−62375
broad-band internally and externally matched lumped elementsymmetrical 5-ports, realisation and characts. 86−20683
broad-band matching, scattering matrix theory for lossless reciprocal equaliser 85−908
broadband forward coupling quadrature hybrids, anal. 88−56367
broadband matching, complex normalised scattering matrix appl. 86−62389
broadband matching of multi-port networks withfrequency-dependent loads 86−686
broadband matching of networks terminated in freq. dependent loads 86−46424
Brune and Darlington 2n-ports, canonic forms 85−22607
CAD of lossless two-ports for microwave circuitry 88−50406
CAD of microstrip patches and arrays, multiport network modelling 88−2732
canonic wave digital filters, design using Brune and matched four-port adaptors 87−59735
cascade realisation via factorisation of rational matrix functions 87−405
cascaded passive nonreciprocal geometrically tapered two-ports 85−49703
cascaded two-port networks, 1 dB gain compression point considerations 88−63438
CMOS double port RAM 86−27288
compatibility impedances, unified theory 88−56366
competitive power extraction from linear n-ports 85−33612
complex reflection coeff. meas. by 3-port network and variable attenuator 86−18092
complex reflection coeff. meas. by 4-port network 86−18093
complex-normalized reflection coefficients 88−56412
complex-normalized reflection coefficients of a terminated lossless two-port network 88−63437
CVI-DC variable invertor drives, cascade system anal. 88−69782
D-R mutator, appl. to high-pass filters *(Japanese)* 86−14363
DC/DC PWM power converters, LF operation study 88−75720
differential phase shifters, 90° type using meander-line networks, design and matching *(Japanese)* 85−17786
digital filter structs., doubly loaded lossless two-ports simulation 88−56812
digital filter structures, doubly loaded lossless two-ports simulation, comparison and generalisation 88−50275
digital filters, leapfrog type, delay free loop elimination using redundant unit elements *(Japanese)* 88−25342
digital lattice filters with multi-output, design method and appl. to branching filters *(Japanese)* 88−38638
discrete frequency passivity conditions for n-ports 85−45156
dissimilar n^{th} order symmetric sign patterns, similarity of graphs and enumeration 85−28116
distributed four-ports conservation-laws, theoretical study 85−33615
distributed networks with two coupled propagating modes, synthesis method 86−62391
doubly-terminated multivariable network synthesis using polynomial partial derivatives 85−40159
dual polarised line source feed for cylindrical reflector antennas 87−75636
duplexer with Butterworth characts., design 86−59166
embedded noisy two-port networks, noise parameters 85−22603
field to wire coupling and crosstalk problems, multiport antenna model 88−2696
filters, sensitivity formulas for terminated lossless two-ports 85−45140
fin line planar cct. six-port with diode detectors, design, network analyser appls. 87−11059
four-pole active networks, appl. of S-parameters *(German)* 88−6588
four-port broadband directional coupler, design for dielec. and image waveguides 85−34149
four-port filters, switched multiplexers having low amplitude and group delay ripple 88−25385
frequency independent N-port junction of passive network, wave variables correlation 86−62383
gyrator realisation using second-generation current conveyor, rel. to active filter synthesis *(Japanese)* 85−933
HF linear network parameter meas. in China 86−65155
HF power oscillators, analytic design using two-part devices 86−27139
Hitachi HD63310, smart dual-port RAM 87−37274
Hurwitz polynomials, multidimensional discrete reactance and immittance 86−62676
ideal op amp semi-indefinite networks, charactn. and Hilberman's theorem 88−32317
identification of non-common node ports for multiport network synthesis 88−56374
integrated optics switch array network decomposition 86−48207
integrated symmetrical four-part microwave networks, HANSA II anal. *(German)* 86−67482
interconnected multiport network, wave anal. of noise for LCAD program appls. microwave 87−36939

multiport networks continued
interconnected two-port networks, noise parameter transformations 87−36936
interdigital microstrip capacitor as a four-portnetwork 86−47047
invariance of scatt. matrix *(Chinese)* 86−62332
junction, simultaneous phase and amplitude meas. on optical signals 85−8973
lattice filters, digital, extended design 87−45065
LC transformerless ladder two-port networks of compatible impedances 86−57921
linear distributed n-ports, absolute k-stability 85−17109
linear distributed n-ports, time-invariant active type, stability anal. 85−54617
linear multiport networks, computer-aided noise anal., microwave cct. CAD appls. 86−26996
linear multiport networks, computer-aided noise anal., microwave cct. appl. 87−36934
linear n-ports, energy and maximal power transfer behaviour 86−57605
linear network anal., scattering network matrix decomposition 86−66969
linear noisy two ports network, noise scatt. parameters 85−33611
linear two-port network parameters derivation from cofactors of node admittance matrix *(Chinese)* 87−65761
lossless two-ports, general sensitivity formula 85−28289
low-sensitivity second-order digital filters basedon lattice structures *(Japanese)* 86−14385
lumped linear time-invariant k-ports, and ccts., hidden modes and stability study 85−54615
lumped parameter, broadband matching using complex normalised scattering matrix 86−7914
(M+N)-port network, synthesis theorem for topology *(Chinese)* 85−44826
macromodel of nonlinear continuous radioelectronic systems 87−59121
magnetic structures, multiply excited, two-dimensional AC finite element anal. 86−29300
matched symmetric five-port junction synthesis from scattering matrix 87−5563
matrix equations for transformation two-ports and multi-ports *(Slovak)* 85−11392
matrix signal flow graphs, heuristic topological method, gain formula 85−22582
maximal power transfer problem 88−49984
maximal power transfer to resistive load 85−22576
measurements on frequency-converting twoports using test receivers 88−36116
MESFET, dual gate, microwave mixer, anal. 87−24443
MF directional arrays, simplified coupling network 86−681
MIC 4-port circulator, ferrite loaded microstrip-slot coupler based 85−55104
microstrip four- and five-port disc ccts., S-parameter anal. and design methodology 86−27546
microstrip inverting four-terminal microwave networks with a symmetrical transfer-constant characteristic 85−6487
microstrip N-way resistive dividers/combiners, design, construction and characts. 88−56870
microstrip ring-star 5-ports, optimised design for broadband 6-port meas. appls. 85−17800
microstrip three-port ring discriminator 86−27539
microwave cct. design for 88−32408
microwave interconnected multiport networks, computer aided noise anal., wave approach 88−56901
microwave lossy two-ports, linear time-invariant type, const. freq. synthesis 85−54993
microwave network analyser using single six-port reflectometer, design, calibration 86−55819
microwave networks, signal flow graph reduction using computer-generated algebraic formula, BASIC listing 87−31644
microwave noise meas., receiver noise removal method 88−29612
microwave resonator embedded in impedance-transforming lossless reciprocal two-port, unloaded Q-factor determ. 86−62820
microwave transistor, independent six-port representation, parameters determ. 86−41343
microwave two-port active mixer anal. 86−27622
microwave two-port active mixers, anal. method 86−20823
microwave two-port networks, noise parameter meas. considerations 86−50206
MM-wave automated multiport network analyser, concept 86−38216
multi area power system economic dispatch soln. by multiport network approach *(Chinese)* 86−50859
multi-output second-order digital filter withoutlimit cycle oscillations 86−1278
multi-port immittance convertor network anal., computer-aided calcs. 87−966
multi-six-port network analyzer, calibration and meas. of multi-port networks 88−4338
multidimensional lossless two-ports, factorisation of scatt. transfer matrices 86−1189
multifunctional integrated negative differential resistance device, design and appls. *(German)* 87−66366
multimode S-matrix for ferrite planar multiport circuits 88−50302
multiplication theorem for two-variable positivereal matrices 86−20155
multipole or n-port network, arms admittance or impedance parameters detect. 85−49677
multiport devices anal. using nodal transfer functions 86−46510
N-channel multiplexer with branched cascaded struct., simulation and sensitivity anal. 85−40221
N-line 2N-port coupled transmission line system, network function characts. 86−3604
N-port, sensitivity, perturbation matrix analysis *(Polish)* 86−605
N-port network, admittance matrix simulation and sensitivity anal. 85−22625
N-port networks state equation formulation by Rosenbrock method *(Polish)* 85−17045
N-ports, linear reciprocal without active and reactive power, anal. *(German)* 85−10943
near-field antenna meas., six-port receiver use, design and anal. 88−14480
negative resistance device synthesis, analytical and topological guidelines 85−6426
neutralized bipolar differential pair, variable-gain type, bandwidth and gain characts. 86−34566
nonblocking multiconnection networks 87−16847
nonlinear, uniqueness of steady state for small source amplitudes 85−22613

multiport networks continued
nonlinear active, large signal parameters, theoretical definition *(French)* 85−49972
nonlinear DC analysis of network eqns., formulation 85−17122
nonlinear microwave two-ports, magnitude and phase meas. method 88−70498
nonlinear multiport with time-dependent sources, steady state and transients anal. 85−538
nonlinear multiports, freq. conversion and stability study 87−5645
nonlinear n-port network synthesis/anal., sectionwise piecewise polynomial functions 85−6129
nonlinear network synthesis using transformation multiports and M, N matrix description 88−49996
nonlinear networks, negative resistance curve tracer 85−54624
nonlinear resistive maximum power theorem extension 86−66981
nonlinear resistive two ports, infinite cascades, driving-point immittances 85−6416
nonlinear single op-amp ccts., design, cook-book approach 85−54626
nonlinear switched-capacitor networks: basic principles and piecewise-linear design 85−45154
nonlinear two-ports, accuracy considerations in approximate representation 87−487

online computer systems for power stations, architectural develops. 88−30456
online FASTBUS processor for LEP 87−14635
optically connected multiprocessor, Schur's algorithms perf. 87−62268
optimal diagnosable system design usingfull-difference triangles 87−2431
optimal synchronous multiprocessor implementations from serial algorithm specification 88−66580
packet switching equipment, loosely coupled multiprocessing architecture *(Japanese)* 86−64639
packet switching network, administration and management, architectural approach 85−51932
packet switching systems, small and medium capacity *(Japanese)* 88−35283
parallel algorithms for multiprocessors using broadcastchannel 86−30391
parallel implementation for backtracking control strategy *(Chinese)* 88−13448
parallel iterative methods implemented on multiprocessors 87−23557
parallel multiprocessor restructurable systems, performance/efficiency evaluation using analytical modelling techniques 85−13940
parallel processing, conf., Pennsylvania, USA (Aug. 1985) 86−26505
parallel proton tracking application 87−14636
parallel solution of eigenproblems 88−40926
parallelism in space-time tradeoffs 86−21727
pattern recognition, multiprocessor architecture using dynamic programming 87−19465
PC LANs, use and advantages of multiuser micros 86−59657
PCM time-division switching system E10S operating system *(Spanish)* 86−23609
performance, conf. Raleigh, NC, USA (May 1986) 86−61835

multiprocessing systems continued
performance analysis and modelling, conf., Paris, France (May 1984) 86−26499
performance evaluation of multiprocessor computer systems in case of collisions in block-structured common memory 87−27673
Pixel Interpolation Engine, VLSI image synthesis device 86−8343
polarity correlator, real-time microprocessor based system using skip algorithm 86−62618
polymer viscosity measurement using multitasking FORTH-based system 86−11787
pooled resource multiprocessor computer organisation, performance analysis 85−2926
power system analysis computing, transient studies using a multiprocessor 85−21051
power system digital simulator, multiple processor based 86−12245
pre-design tool for a class of parallel processingsystems 87−424
pressure-sintering machine, ECE-450 multiprocessor based control system *(German)* 87−64998
probabilistic diagnosis methods assessment, microprocessor system design 86−17789
problem-mesh VLSI chip, design 87−67387
process-processor assignment in multiprocessor systemswith global and local store resources for the controlof switching processes *(German)* 86−16603
queueing models for multiprocessor switching system 87−55430
radar ESM systems, multiprocessor-based, objected-oriented programming appl. 88−22203
radar real-time simulation using multiprocessor hardware/software 88−4114
radio-communication facilities operating frequencies selection 88−74107
real-time digital correlation and spectrum anal. multimicroprocessor system with distributed common memory 86−16450
real-time image processing, multiprocessor architecture for spatial domaindigital filters 86−1313
real-time meas. signals analysis, using dedicated FFT processor 87−3538
real-time multiprocessor performance monitoring tool 87−28929
real-time optical laboratory linear algebra solution of partial differential equations 87−55300
real-time power system simulator for hydro-turbine plant tests 87−15589
real-time video signal processor 88−25264
real-time video signal processor, architecture 87−20709
real-time video signal processor configuration by multiprocessor approach 87−20710
reconfigurable experimental network, REN, emulates 90-node network 88−3616
relaxation-based electrical circuit simulation, multiprocessor implementation 85−519
residual number system/systolic design method for VLSI processors 86−57879
ring communication networks evaluation in data-flow computer 85−13943
ripple-signal load management system operating experience 85−64839
Rockwell RC5C00/21 CMOS dual-processor 85−17532
rolling mills, Hitachi control systems, new developments 86−19647
rotating-priority multiprocessor systems, processor bus access delay 88−39664
RPM graphics controller for electrostatic plotting 86−27348
satellite broadcast company, microcomputer appls. 85−31149
satellites, image-data-compression multiprocessor 86−32453
SAW convolver appl. as fast special processor in multiprocessor system *(Japanese)* 87−60761
scaleability of a binary tree on a hypercube 86−52749
SCAPE: a VLSI chip architecture for imageprocessing 86−34886
self similarity ULSI oriented interconnection network 86−67988
shape preprocessing unit 88−22513
shared memory, low-cost system for data acquisition 85−45034
shared memory multiprocessor, domain partitioning impact on performance 87−65443
shuffle/exchange network switching element, gate-array implementation, multiprocessor system appl. 86−20484
signal preprocessor high operational rate *(French)* 85−2825
signal processing module, TSM 32010 or 32020 based, architectures *(French)* 88−19247
signal processors for rapid communications in multiprocessor system *(German)* 88−8758
simulation machine, VLSI architecture for circuit simulation 86−47718
simulators, conf., Coventry, England (Sept. 1986) 87−10023
single- and multi-microprocessor systems with 8-bit and 16-bit microprocessors 85−22900
single-chip VLSI implementation, multiprocessor network 85−17485
SLAPP, special purpose multiprocessor array for signal processing and linear algebra 88−40933
software configuration for computer complex with optical loop 88−21666
software package for the analysis of generalizedstochastic Petri net models 86−7643
solar plant, heliostat array field, multiprocessor distributed control *(French)* 86−39648
sonar, acoustic signal processing systems, simulation of signal slow graphs 85−52450
Space Shuttle main engine simulation, using SIMSTAR multiprocessor, using ACSL language 88−68538
speech recognition, DADO/DSP multiprocessor applics. 87−19466
speech signal processor 87−20823
speech synthesiser, multipulse LPC technique based, architecture design 85−46713
spread spectrum code acquisition, multiprocessing approach 86−30582

AC generator driven by windmill or turbine, multi-input multi-output control 86−12797
aero gas turbine engine, integrated inlet control model using nonlinear multivariable closed-loop approach 87−42191
bank-to-turn missile, digital controller for CLOS guidance 88−36701
bank-to-turn missile, digital controllers for CLOS guidance 88−42719
bank-to-turn missile autopilot, multivariable design method 88−48411
boiler combustion product meas. for multivariable trim control 88−37014
BWR, digital control strategy 86−39501
CANDU 600 MWe nuclear power plant, multivariable controller design using INA method 85−15789
coal gasification, multivariable digital control appl. 85−32348
coal gasification power plants, coordinated control design method 85−9760
computerised telecontrol delays, discrete-time optimal linear regulator for decentralised large-scale systems 88−21581
continuous moving web processing machine multimotor drive state observer 86−71084
control design with transfer functions associated to higher order Volterra kernels 87−58214
controller for unregulated synchronous machines, design using decoupling techniques 86−12787
current source inverter fed induction motor drives, multivariable control strategies 86−40211
current-source invertor-fed induction motor drive, simultaneous stator voltage and slip frequency control 87−22376
DC motor generator set, digital precompensator design 88−37241
DC motor optimal PI speed controller 87−22405
DC motor-AC generator system, feedback control system synthesis 86−39810

multivariable control systems continued
DC motor-generator set, microcomputer-based digital multivariable control 88−48999
decentralised control subject to nonlinear perturbation, robustness problem 85−27030
decentralised multivariable feedback system, robustness improvement 87−71538
decentralised optimal feedback control of large-scale linear stochastic systems *(German)* 86−18645
decentralised pole placement 86−56381
detuned minimum variance self-tuning feedforward controller for multivariable electric furnace heating 86−45830
digital filter, narrowband for linear multivariable system identification 87−27364
distribution feeder reconfiguration and volt/VAr control in normal operating conditions 87−78105
drum boiler control using multivariable self tuning regulators 87−9333
economical information structure for decentralised control, synthesis methods *(Chinese)* 87−54770
fast transistorised drives, modal control synthesis, controlled variable feedback *(Russian)* 87−43498
flight control system, display dynamics w.r.t. pilot behaviour 88−68564
fluidised beds for chemical processing and steam generation appl., control and optimisation for energy conservation 86−12664
foamed-insulated-cable manufacture, multivariable control *(Japanese)* 85−16762
frequency control of HVDC transmission links, using control system CAD 85−32116
gas turbines, robust adaptive digital set-point tracking PI controllers design 88−37066
gas turbines robust adaptive digital set-point tracking PI controllers design 88−43060
generator excitation and speed governor system, multivariable optimal control 86−25971
generator optimal control system, appl. of multivariable control theory *(Japanese)* 86−33292
generators, digital multivariable optimal control system 86−66029
governor/exciter stabilizer design in multi-machine power systems 87−9090
heat and power supply units, multivariable freq. domain approach *(Chinese)* 88−48771
holonics control of room air conditioners *(Japanese)* 88−6042
HVDC linked remote ABWR nuclear power park with multivariable control system 88−30445
hyperthermia phased-array system, optimal temp. control 86−60750
induction motor, current-space inverter fed drives, linear multivariable controllers, digital implementation 87−31036
induction motor drive, current source inverter fed, microprocessor based controller design 88−30724
induction motor speed control, multivariable controller designed by inverse Nyquist Array method 85−27419
integrated gasification combined cycle, advanced control aspects 85−9758
interconnected power system load-frequency control, multi-input multi-output decentralised servocompensator approach *(Chinese)* 87−50679
interconnected power systems, decentralised controllers design 86−18703
interconnected systems, decentralised self tracking control 85−32097
linear guide for manufacturing instrument magnetically suspended, multi input-output control 85−24221
linear turbogenerator-exciter model order reduction by partial fraction expansion 87−30547
LMFBR boiler feedwater system, multivariable control scheme design 88−23610
maximum likelihood receiver for an orthogonally-multiplexed QAM system 85−13578
MIMO feedback control system, optimal, motor-generator control appl. 88−17521
missile autopilot, IEEE benchmark control problem 88−68691
missile autopilot analysis, structure singular value approach 88−68710
multi-area interconnected power systems, decentralised load freq. control 87−42375
multi-area power systems, decentralised controllers and observers for automatic generator control 85−32096
multi-channel automatic instrument for temperature measurements *(Polish)* 87−35228
multichannel active sound control, stochastic gradient algorithm 88−10640
multichannel cross coupling systems, dynamic props. 86−30863
multilevel control and optimisation appl. 87−31107
multimachine power system, generating units identification 88−61813
multimachine power system decentralized multivariable excitation controllers 88−30245
multimachine power system performance with local optimal controllers 87−42394
multimachine power systems, multivariable control, design optimisation 87−71609
MVPACK, CAD package for nuclear plant control system design 86−56548
naval diesel generators, multivariable control strategy 88−11113
naval electrical power generation systems, control using multivariable frequency domain techniques 88−37697
nonminimum phase pilot plant, self tuning control 85−59993
nonrotatable tube butt joint TIG welding in Ar, automatic control system 87−79242
nuclear power plants, multivariable control systems design for robust control 88−36962
nuclear power plants, nonlinear multivariable control system design 88−36933
nuclear power state feedback computer control 86−18938
nuclear reactor optimal control system design by generalised spectral factorisation 88−55148
nuclear reactor turbine system, model reduction technique appl. 88−5433
power plant boiler, appl. of multi-input multi-output one-step-ahead adaptive controller 86−6582
power plant boiler, multivariable self tuning controller appl. 85−4904
power plant multivariable control systems design and appl. 87−71969
power systems, decentralised stabilisability conditions 85−53278
power systems stabilising signal derivation, multivariable freq.-domain/time-domain approaches 86−65650
quasi-resonant converters, multi-loop control 87−72309
robust decentralized load frequency regulator forinterconnected power systems 85−64841
self-tuning decoupling controller, generalized, appl. 87−5094

multivariable control systems continued
solid-fuel boiler, multivariable controller design using inverse Nyquist array technique 85−15869
stabilisers for power systems using multivariable time and frequency design methods 87−42354
Stewart platform commensurate positioning for six-axis machining 88−49315
stochastic interconnected systems, model order reduction for decentralised control 85−4581
store and forward computer network, decentralised adaptive flow control 86−54939
successive pole assignment method for nonidentical actuator power distrib. *(German)* 88−75878
superconducting magnets, electrically/magnetically coupled, multivariable current control 86−28761
superconducting turboalternator with discrete multivariable state-space controller 88−69318
synchronous generators, adaptive control, MIMO systems 85−21597
synchronous machines, interconnected, decentralised variable structure control 88−5673
synchronous motor variable speed drives, sliding mode speed control 88−31072
synchronous motors, robust position servo system design using sliding mode control 88−69339
thermal generating unit, coordinated control system design *(Chinese)* 88−48775
thyristor bridge/DC motor drive system, state feedback control using microprocessor-based controller 85−27705
turbogenerator, multivariable adaptive control 87−42822
turbogenerator, multivariable adaptive controller appl. 86−39702
turbogenerator excitation controller design via exact model-following techniques 88−30661
turbogenerator load feedback control tuning with allowance for turbine power-frequency control *(Chinese)* 86−39579
turbogenerators using optimal and multivariable controllers 86−39669
wind turbines, variable speed, optimal multivariable control 88−5623
X-29 aircraft, multivariable control law design 86−12078

muon detection and measurement
Aleph test hadron calorimeter, pion/muon identification using discriminant analysis 87−8865
brass tube chambers for L3 muon filter 87−63651
CDF central muon chambers, electronic levelling system, operation and readout 88−48019
CDF central muon detector, design, construction and performance characts. 88−48018
CDF detector at Fermilab, overview, physics capabilities and subsystems 88−74741
CDF forward muon system, PSL TDC and UW HOPU module operation 88−48020
CDF muon detection system 86−11848
chambers of ARGUS detector, design, testing and use 87−29514
CLEO II detector construction at Cornell electron storage ring 88−48002
conference, St. Vincent, Italy, April 1985 86−65376
cosmic ray muon detection using Cherenkov detector in ocean 86−65370
cosmic ray muon spectra, 0-10 TeV, momentum spectra measurements 86−5847
drift-tube counters and readout electronics of VENUS muon detector 87−77538

muon detection and measurement continued
EAS-TOP air shower array at Gran Sasso Laboratory, performance 86−65378
electromagnetic shower background in air gap magnetic muon spectrometer 88−74773
ELMUD, electron-muon detector for Higgs physics 88−16631
EM streamer tube calorimeter, muon detection 87−71032
energy loss mechanisms in 100 GeV-5 TeV region, Monte Carlo simulation, detector design implications 88−74762
Fermilab Collider Detector 86−50301
hadron shower characteristics in iron and muon identification 87−8854
high resolution muon detector for multi-TeV collider experiments 87−41882
JADE muon detector, construction and operation 85−64456
JADE muon detector, identification of high energy muons 85−64457
L3+1 detector at SSC, reconstruction of isolated 500 GeV muon 88−74763
L3 detector, drift chamber amplifiers, automatic test system 88−23013
L3 high resolution muon drift chambers, systematic errors in track position meas. 87−21413
L3 type detector for SSC 88−10276
large are plastic scintillation counter for TOF system with on-line microcomputer *(Chinese)* 85−48192
liquid Cherenkov counter to measure muon proportion in 300-460 MeV/*c* pion beams 85−20814
muon spectrometer, momentum resolution at TeV energies, energy loss Monte Carlo results 88−4860
pion muon identification in the ALEPH detector using the discriminant analysis 88−22950
rectangular drift tube for muon identifier 87−63665
sampling calorimeter, μ energy loss calc. using two Monte Carlo codes 88−61146
scintillation detector, active charged-particle protection of neutral-radiation detectors with polymethylmethacrylate scintillator 87−8869
second level software trigger used in CERN NA10 expt., structure and results 85−59213
spectrometer with calorimeter dump used in beauty search at CERN SPS 87−29686
SSC physics, Snowmass 1986 conf., Snowmass, CO, USA, (June-July 1986) 88−38
streamer tubes with time difference readout 88−29854
superferric storage ring magnet design for AGS muon g-2 expt. 88−68107
TOPAZ-TPC cosmic ray test 87−41842
trigger and measurement system for small-angle scattering 87−8852
UA1 limited-streamer tubes muon detector, electronics and parallel readout system 87−29545
upgraded muon detection system for UA1 based on limited streamer tubes 87−29544
water Cherenkov counter sensitive to nonwaveshifted ultraviolet Cherenkov photons 87−14732
wire chambers as transition radiation detector for cosmic ray muons 87−41858
ZEUS detector at HERA, charged particle tracking 88−48008
Al drift-tube counters in VENUS, Monte Carlo simulations of delta ray effects 87−77539
Pb-glass hadron calorimeter for shower detection by Cherenkov radiation, particle characteristics 88−54407
U liq. Ar calorimeter performance 88−22953

muscle
action potentials, raster display and vertical array ccts. 86−56127
adaptability of arm muscle function, interaction with computer aided assistive devices 86−70436
amputee limb-function discrimination method using EMG signals for the control of multifunctional powered prostheses *(Japanese)* 87−42015
angle-foot orthoses for paraplegic subjects using functional neuromuscular stimulation 88−61463
antagonist muscles, elec. stimulated, control algorithms testing, cat model, neural prosthesis appl. 87−4043
ARMA models of human operators *(Spanish)* 85−9121
artificial arm, multiple degree of freedom, control inputs using EMG signals 85−43439
back analysis system, computer-aided, for evaluating muscular deficiencies 88−54594
back and trunk musculature, devices for dynamic evaluation and rehabilitation, review 87−3938
backward stepping, electromyographic study for development of elec. stimulation patterns 88−61391
beef, muscle recognition by automatic image anal. 87−48052
biceps brachii, innervation zones, position investigation by surface EMG 85−38148
biofeedback expts. in rehabilitation, microcomputer use 88−48208
bladder function continuous stress-free meas. using portable telemetric system, pelvic muscle EMG *(German)* 85−43346
cardiac action potentials and twitches, real time acquisition and analysis 87−35418
compound muscle action pots., propag. meas. with small surface recording electrodes 88−30009
computerized signal processing techniques for the quantification of muscular activity 87−63771
conduction velocity meas., polarity correlator 85−4336
contraction tests using BBC microcomputer 85−37988
deep tissue perfusion meas. using single-fibre laser Doppler flowmetry 87−57090
deep-tumour hyperthermia, performance characts. of Helios thirty-beam ultrasound device 87−57229
diaphragm EMG, spectral anal. during periodic and normal breathing in infants 86−50591
diaphragmatic EMG during fatigue in men, time domain anal. 85−15324
dielectric props. of muscles meas., dipole probe development 86−44639
ECG, R-wave detection in the presence of muscle artifacts 85−15321
EEG, muscle contaminated, readability improvement using multichannel switched capacitor 6-pole filter 88−61351
EEG frequency analysis, filtering and aliasing of muscle activity 87−3987
electric and magnetic fields in medicine and biology, conf., London, England (Dec. 1985) 86−19749
electro-spinal instrumentation: implantable muscle stimulators for scoliosis treatment in children 88−74862
electro-surgical generator nerve and muscle stimulation, spectral anal. interpretation 88−74854
electrodes, implantable stimulating, in longit. and transverse direction to skeletal muscle, long-term threshold behaviour 88−16784

EMG as a control signal for functional neuromuscular stimulation: autoregressive modelling 88−42564
EMG as a control signal for functional neuromuscular stimulation: signature discrimination 88−42565
EMG automatic analysis with ANOPS computer, monopolar electrode use 87−3993
EMG based prosthesis controller, status and prospects *(Korean)* 86−32364
EMG chamber, in vitro, to monitor neuromuscular function 88−68422
EMG channel, effect of sweating, microcomputer-based gain control 88−48161
EMG controlled forearm prosthesis, sensory feedback of gripping force 88−74873
EMG electrode, impedance obs. and model 87−41966
EMG evaluation, descriptors for automatic analysis 85−31844
EMG expert system prototype 88−61385
EMG fine wire connections technique 87−14895
EMG of marine animals in situ, US biotelemetry system to obtain 87−4012
EMG pattern analysis and its classification for aprosthetic arm 86−56136
EMG pattern mapping for controlling elec. stimulation of paraplegics to facilitate unbraced walker-assisted walking 88−68447
EMG pattern recognition: comparison of 3 muscle site configs. 86−56138
EMG patterns during locomotion, effect of SACH foot and single axis foot, comparison 86−60826
eMG positioning of electrodes in subcutaneous peroneal stimulation 88−48158

muscle continued
EMG posture mapping-based control of elec. stimulation of paraplegics, evaluation 86−56166
EMG power spectra, interference type, stat. procedures for spectra estimation 86−60788
EMG processor based on the amplitude probabilitydistribution 86−38789
EMG profile of elec. stimulated muscle, rel. to feedback in closed-loop control scheme 86−56135
EMG prosthesis control with trained computers 86−56190
EMG recording and 2D jaw tracking 88−68424
EMG recording of uterine activity, foetal monitoring by improved data acquisition 85−31839
EMG recording techniques selectivity, simulation study 86−18338
EMG signal, characterization of the complexity of the actionpotential through spectral analysis 85−53085
EMG signal data acquisition, low-power multichannel system 87−50340
EMG signal on-line analysis, microcomputer based neurophysiological measurementsystem 87−3994
EMG signal parametrisation, approach based on simulated signals 85−4333
EMG signal processing, comparison of adaptive and kalman filtering using computer simulation 86−32340
EMG signal processing, inservice aid 86−11988
EMG signal processor, digital, anal. in dynamic conditions 85−38152
EMG signals for discrimination between upper limb movements 88−68414
EMG signals processing 86−18347
EMG signals processing for proportional control *(Korean)* 85−15323
EMG signature identification for posture mapping in paraplegics stimulation 85−53086
EMG spectrum, surface recorded, changes with muscle length 88−23085
EMG study of side step for development of elec. stimulation patterns 87−14906
EMG system for online gait analysis 85−9188
EMG telemetry device using upper-line-shift diode and IR radar *(Japanese)* 85−26774
EMG training device with automatic data storage for amputees *(German)* 88−61445
eMG variation in spatial pattern recognition for prostheses 85−43445
EMG with surface electrodes, appl. to walking of cerebral palsy patients 85−31842
EMG-activated feedback alarms for the treatment of nocturnal bruxism: current status and future directions 88−30022
EMG-based device for human skeletal muscle fibre composition eval. 88−74851
EMGs, automatic interpretation, hybrid decision system 85−31856
EMT characterisation for real-time control of prosthetic devices 86−60833
ENG signal processing using linear prediction *(Korean)* 88−48150
envelope EMG spectral analysis in the studies ofphysiological and pathological tremor 87−3989
epimysial electrical stimulation: short-term therapeutic applications 88−61413
epimysial electrodes, monopolar and bipolar, recruitment props. 86−60815
ergometer to test dynamic and static props. of mammalian muscle 87−41916
extraocular muscles, elec. stimulation, strabismus treatment appl. 88−54599
eye muscle surgery, roles of expert systems and biomechanical models 86−50605
fallopian tube, EMG and motility monitoring 88−54559
fatigue, real-time microcomputerized monitor based on median freq. shift in electromyographic signal 88−54593
fatigue monitor: IBM PC based meas. system 88−42559
fatigue monitor based on EMG signal tracking 85−38151
fatigue monitor design, using eight-bit microprocessor, muscle fibre action pot. meas. 88−4952
fatigue related changes, real-time meas. in surface EMG 88−23081
feedback controllers for electrically stimulated muscle 85−48338
fibre conduction vel., on-line meas., microprocessor-based polarity correlator 86−32318
fibre conduction vel., on-line meas. system using surface EMG 88−23079
fibre conduction velocity meas. using surface electrode arrays, optimal conditions 85−64594
fingers/hand movement estimation by EMG time series processing *(Japanese)* 85−26781
flaccid paralysed muscles, functional training by electrotherapy 85−48317
for meas. and training in patient rehabilitation 85−38181
force regulation by recruitment modulation using a digital closed loop controller 87−41898
force regulation in human lower extremity using functional elec. stimulation, control system design and eval. 88−54629
frog muscle fibre during recovery cycle, changes in action potentials and membrane and ionic currents 88−54548
functional electrical stimulation, sensors for use with 86−44631
functional neuromuscular stimulation, computer-controlled multichannel stimulation system 85−53094
functional neuromuscular stimulation, portable system for paralysed upper extremities 87−57199
functional neuromuscular stimulation exercise, electrical stimulator 88−61409
functional neuromuscular stimulation hand grasp, combined open and closed loop system 88−68479
functional neuromuscular stimulation system, implantable and externally powered, development and eval. 88−48237
functional neuromuscular stimulation system, modular approach: portable control hardware 88−68478
functional/therapeutic elec. stimulation of neuromuscular system, developments 86−18359
gastrointestinal myoelectric activity, computer-aided anal. 85−43399
grasp control during functional neuromuscular stimulation, force/position feedback 87−14924
heart muscle, active state, deconvolution of time-varying systems by Kalman filtering 86−50461
hip extension and abduction affected by trunk activity, functional electrical stimulation 88−61390
implantable gait stimulation, EMG and trunk acceleration as trigger sources 86−25317
implantable neuromuscular stimulator, 4-channel, for functional elec. stimulation 88−48236
implantable stimulator, multichannel, for versatile control of paralysed muscle 87−71169
implants for nerve stimulation in paraplegic patients, gate array appls. 87−21663
muscle continued
interference pattern analysis, clinical uses, effect of load, dynamic studies 87−3995
intestinal EMG, canine, microcomputer anal. and display 88−23082
intestinal spike bursts, detect. using a microcomputer 88−54588
intramuscular electrodes for neuromuscular stimulation 88−61460
intramuscular EMG signal estimation from surface EMG signal anal. 87−29782
isometric muscle strength and endurance measurements usingan apple computer 86−25185
leg electromyostimulation, technique for muscle force quantification 87−57070
leg orthosis for functional electrical stimulation-assisted paraplegic mobility 88−61465
limb-function discrimination method using EMG signals for the control of multifunctional powered prostheses 88−42579
locomotor EMG patterns, linear envelopes, automated extraction of activity features 86−65437
locomotor rehabilitation, progressive partial weight bearing training system 87−57193
Macro EMG pots., electrode for concentric trigger 88−74849
magnetic field sensomotoric effects in man, objective and quantitative investig. *(German)* 86−50604
magnetic nerve stimulator design and instrumentation 85−20964
Masseter muscle silent period meas., microprocessor based instrumentation *(Korean)* 86−5945
measurement of muscle strength, endurance and range of motion, computerised system 88−54482
mechanical properties and heat generation, instrumentation for study *(Japanese)* 87−50209
mechanical properties of systems with random length changes, improved freq. response analysis methods 86−50459
microcomputer system for muscle function anal. 87−21517
microdifferential holography appl. to muscle contraction imaging 86−9978
microelectrodes, nerve and muscle stimulation and recording appl. *(Japanese)* 85−15326
motor control performance tracking accuracy quantification system 87−14845
motor performance quantification equipment, microprocessor-controlled 87−57061
motor unit action potential generation rel. to neuromuscular disorders, electrodiagnostic model 86−50563
motor unit action pots., interface device for display on TV screen 86−5950
motor unit action pots., reliable myoelec. signal detector based on propag. characts 87−4000
motor unit potentials with varying loads, automatic analysis 87−3996
motor unit twitch force meas., circuit for improving the precision of the spike-triggered averaging technique 87−71138
MR 1.4T whole-body images, in vivo MR spectroscopy of human subjects 86−50536
multichannel time series myoprocessor for A/K prosthesis control 87−57238
multiple-contact EMG recording array for mapping single muscle unit territories 88−16739
muscular endurance index eval. and recording using digital dynamometer with accessory 87−50214
myocardium, Ar laser ablation, electrophysiological correlates and thermal characts. 88−23111
myoelectric B/E prosthetic system for youngchildren 86−25311
myoelectric conduction vel. and median freq. estimates, effects of electrode location 87−50337
myoelectric control, amplifier input impedances 87−4036
myoelectric control of a remote device, prosthetic and robotics appl. 88−30044
myoelectric control of fingers in a prosthetic hand 86−56193
myoelectric control of prostheses 86−38810
myoelectric control of prosthetic devices, skin-electrode interface model 86−12032
myoelectric control of upper limb prostheses, response time and control accuracy 87−57232
myoelectric control system, implantable, with sensory feedback 85−26797
myoelectric elbows proportional control mode selection, cocontraction approach 87−14938
myoelectric evoked pot. recordings, suppression of stimulation artifacts 88−48160
myoelectric filter, adaptive, for prosthetic arms control, optimisation 85−43442
myoelectric filter, adaptive for prosthesis control 85−43443
myoelectric hand prosthesis for children with a below-elbow absence 86−32367
myoelectric limb controller, microcomputer based 86−25315
myoelectric prosthetic control with functional visual feedback using microprocessor techniques 85−26795
myoelectric signal amplifier design 86−60820
myoelectric signal analysis/identification, multimicroprocessor system 86−50586
myoelectric signal data compression, muscle force estimation, long-term monitoring *(Japanese)* 88−54557
myoelectric signal generation model *(Chinese)* 86−70417
myoelectric signal processing, nonstationary, some aspects 87−41970
myoelectric signal processing/identification, microprocessor-based workstation 88−23095
myoelectric signal vs. force optimisation in functional neuromuscular stimulation 88−48202
myoelectric signals, automatic decomposition 87−57169
myoelectric signals, automatic decomposition 88−48157
myoelectric signals, real-time median freq. estimator, prototype instrument 88−68432
myoelectric signals, selected needle-detected, automatic decomposition 88−30010
myoelectric signals decomposition, knowledge-based signal processing 88−68408
myoelectric signals of neck and head, speech information 87−19414
myoelectric temporal signatures for activation of prostheses and orthoses, stochastic anal. 85−20966
Myopathy diagnosis, human muscle fibre cond. obs. 85−43391
neural excitation, electrical models 88−74782
neuromuscular block induction during surgery, microcomputer-based controller 85−64608

muscle continued
neuromuscular blockade monitoring using integrated electromyography 87−50336
neuromuscular diseases diagnosis: comparison of concentric needle EMG, quantitative EMG and single fibre EMG 85−4331
neuromuscular stimulation, functional, role of sensors 85−38186
neuromuscular stimulation system, portable, for spinal cord injured persons 86−56167
neuromuscular system, all-poles representation for EMG signal compression 85−9177
non-invasive physiological monitoring with microwaves 86−70409
orthosis and computer-controlled movement 86−12043
osteoporosis due to disuse, effect of functional neuromuscular stimulation 88−61410
palatoglossus muscle, comparison of electromyographic signals from different electrode placements 86−11977
papillary, subjected to rapid temp. steps, pot. meas. using isolated microelectrode amplifier 87−57153
paralysed, electrically stimulated exercise, tetanic endurance and twitch moment 88−61412
paralysed fingers, improvement of movement by elec. stimulation of intrinsic muscles 88−48201
paralysed leg muscle stimulation, computer-controlled system for walking simulation *(German)* 85−15348
paralysed muscles, closed-loop stimulator for exercising 86−25318
paraplegia, feedback designs for functional neuromuscular stimulation balance control 85−48339
paraplegia, functional neuromuscular elec. stimulation of the lower extremities 88−48203
paraplegic and quadriplegic patients, aerobic exercise trainer with physiological monitoring 86−44683
paraplegic electrical stimulation control via EMG-based posture-mapping 85−38180
paraplegic EMG-controlled elec. stimulation, critical review 88−42562
paraplegic males, electrically-induced leg and voluntary arm crank exercise, haemodynamic response 88−61407
paraplegic standing aid using functional neuromuscular stimulation 88−61473
paraplegic walking system, functional neuromuscular stimulation, trunk control implementation 88−61474
paraplegics, EMG-controlled stimulation limb function discrimination using Karhunen-Loeve expansions 87−29777
paretic muscle, voluntary strength gains after hybrid exercise training 88−61408
patient monitoring, muscle strength testing with FET system, computer aided 88−54488
peripheral nerve and muscle, long-term recordings from normal and dystrophic mice, method 87−50341
phantom, microwave hyperthermia applicators eval. 88−54615
power spectra estimators of muscle conduction velocity 87−57172
pressure sore prevention by functional electrical stimulation of gluteus maximus muscle 87−21645
programmable implantable stimulator with percutaneous optical control 88−61454
prosthesis, upper limb neural, command channels 88−61464
prosthetic hand, functional neuromuscular stimulation system, control using man/machine interface 88−61466
proteins, time resolved X-ray studies using MWPC 88−61293
quadriceps and hamstrings, stimulation with surface electrodes 86−25275
quadriceps contraction, conversion to digital signal for microcomputer system 87−50381
quadriceps muscle, elec. stimulated, input-output response in paraplegic patients 86−25276
quadriceps muscle response to functional neuromuscular stimulation during isokinetic exercise and walking 88−61240
quantitative EMG rel. to noise 87−3990
rehabilitation R&D progress reports (1986) 87−50413
relaxation monitor and controller, microcomputer-based, for surgical appl. 86−18282
response monitor for children with cerebral palsy, motor performance quantification 87−14840
RF heating, focused, using coaxial applicator, expt. and theoretical study 85−4353
selective activation using peripheral nerve electrodes 85−48321
self-adaptive myoelectric processor, automatic calibration to amputee's muscle movements 87−29818
signal processing approach to estimation of intramuscular potentials, book contrib. 86−29926
skeletal muscle, impedance meas. from 1 Hz to 1 MHz, high-speed data acquisition system 86−56149
skeletal muscle stimulation parameters, cardiac assist appl. 87−50395
sleep, human, stochastic models for monitoring based on EEG, electrooculogram and EMG 88−61346
Smart Trigger for real-time spike classification of nerve and muscle signals 87−50362
smooth muscle impedance meas. and appl., microprocessor-based data acquisition system 87−57163
spinal spasticity modification, effects of elec. stimulation parameters 87−63802
stimulator, portable, for direct elec. stimulation of denervated muscles in lab. animals 88−68326
stimulator, totally implantable, with automatic daily cycling 86−18376
striated muscle, asymmetrical diffr. spectra, high-speed transient-recording microprocessor system for anal. 86−32256
stroke patients, microcomputer-based assessment and treatment-planning 87−71140
surface electrode array for detecting actionpotential trains of single motor units 86−5940
surface electromyographic signals, computerised statistical classification and diagnosis *(French)* 88−23092
surface EMG signal adaptive modelling and classification 87−50355
surface EMG signals, optimisation of digital processor 86−25232
surface EMG with appl. to fatigue, autoregressive modelling 87−50350
thermographic obs. of absorption of microwave energy by muscle models and birds 86−56200
tissue equivalent phantom materials for negative pions 87−35437
tissue US attenuation meas., phase-cancellation artefact obs. 87−3964
tissue-equivalent phantom distrib. of heating by US applicators 87−4027
torque motor design and characteristics for hypotonic muscle reflex contraction meas. 87−22438
muscle continued
UNB universal myoelectric trainer 87−71176
upper arm muscle and fat areas, determ. using elec. impedance meas. 88−36473
US meas. of trunk muscle atrophy produced by lumbar spin orthoses 87−14889
uterine activity, elec. and mech., computer analysis, algorithms 86−60789
uterine electrohysterogram processing for obstetrical monitoring 87−29772
uterus, fast elec. activity, external recording and processing in human parturition 85−9187
voltage-clamp technique, 3-microelectrode, generalisation to allow unequal, electrode spacings, muscle meas. appl. 87−50338
walking period prediction by 2-channel EMG data for prosthetic control *(Japanese)* 86−12026
walking system, computer-controlled using orthosis with functional electrical stimulation 86−65460
walking using long leg braces or functional neuromuscular electrodes, relative energy cost 87−21681

fibre optic sensors, subsea wellhead monitoring, requirements 87−12152
flowmeter selection for liquefied natural gas thermal power plants *(Japanese)* 87−35814
fossil fuel power plants, coal and LNG trends in Japan 88−48760
gas pipe diagnostics equipment using magnetic method *(Polish)* 85−39566
gas turbine drives, utilisation for future development of gas industry, summary 85−5616
gas turbine electric power generation for oil and gas technology apps. 87−51691
gas utilisation project in Malaysia, telecommunication and SCADA systems *(Japanese)* 87−27797
gas-fired boiler proliferation in industrial power plants 87−31085
gas/oil drilling platforms with DC motor drives 85−22046
geotechnical engineering, appl. of dynamical holographic interferometry and photoelasticity 87−26558
geothermal research and development, technology spinoff potential 86−18926
global energy shortages, forecast energy consumption compared to world supplies *(German)* 87−35709
Great Plains Gasification Project progress report (May 1985) 86−32919
Hohi geothermal area, SAR image lineament analysis rel. to soil gas surveys 86−6062
hyacinth wastewater treatment for methane production 85−27893
induction generators, natural gas engine-driven, surplus, for reducing power costs on oil fields 85−21497
Klaipeda city air pollution reduction programme *(Russian)* 87−77893
Kongsberg, KG5 gas turbine-generator sets for Heimdal gas production platform 86−26460
land-based oil and natural gas exploration power systems *(Croatian)* 87−51686
leak detection methods for gas pipelines using extended Kalman filters 88−11725
liquefied natural gas (LNG) cryogenic power generation system in Japan 86−33226
LNG tank, wire-drum type liquid level gauge *(Japanese)* 86−31382
magnetic flaw detection of pipelines, eddy currents as interfering factor 87−16740
main-line gas transportation using elec. drives 88−24304
market modelling system of USA Energy Information Administration 86−12545
Mellach CHP station boiler plant for coal and natural gas firing *(German)* 88−23726
microprocessor controlled recorders, comparison with strip-chart recorders 85−14878
mining machine drives using unitised thyristor convertor control units. 88−43528
Morison eqn. modification for nonlinear steady potential wave drift 85−4480
motion of large moored barge in irregular beam seas., digital simulation 85−4478
NEC Communications System for Offshore Complex *(Japanese)* 85−57635
New Zealand Synthetic Gasoline Plant 86−32918

natural gas technology continued
NK-16ST gas turbine drive for gas main compressor stations, summary 85−5617
Nokia dedicated telecommunications networks for the oil and gas industry 88−3420
Norwegian gas fired power stations, design considerations *(Norwegian)* 88−62144
offshore cables, 6 kV, fireproof and fire resistant *(Danish)* 87−72649
offshore continental shelf oil and gas development 85−4493
offshore drilling platform, power plant for thyristor elec. drives 88−43523
offshore drilling platforms for oil and gas fields, AC/DC elec. drive appl. 88−43521
offshore electrical cables, quality assurance *(Danish)* 87−72651
offshore electrical installations, earthing *(Danish)* 87−72647
offshore installations, cables, design and testing *(Danish)* 87−72648
offshore oil and gas platform availability analysis 86−61832
offshore platforms, differential pressure transducers *(Danish)* 87−72650
offshore platforms, SCADA system for remote network communication 87−76273
on-line instrument for N_2 concentration meas. *(German)* 88−74629
onsite fuel cells, opportunities in commercial market, benefits of gas industry 87−43403
open access transportation implications 87−42562
photovoltaic applications in the oil and gas industryinstrumentation field 86−11402
pipeline automated inspection service, British Gas experience 87−51891

FAA activities in air traffic management development, communication, navigation and surveillance services 86−50724
Ferguson patch based method for representation of 3-D scenes 87−62312
fibre optic gyroscope using polarisation holding single mode fibre *(Japanese)* 85−29586
fibre optic sensors appl. to automobiles 88−43469
fibre-optic gyroscope, noninertial quality rate, and appls. 86−2693
fishing boat maneuverability anal., digital autopilot appl. *(Japanese)* 85−52457
flight control and navigation integration, comparison with separate systems 88−61556
Gamma Guidance technique for IUS-2 missions 85−15388
geodetic positioning at sea, international activities in AD 1979 to 1983 period 86−4768
geographical and digital databases, cost effective combination 88−35620
geophysical surveys based on time and frequency service means 88−5112
goniometers in electronic air navigation 88−28991
ground based flight control of very long endurance aircraft 86−43920
ground support facilities in Japan *(Japanese)* 87−57301
ground vehicle, positioning and guidance by laser and corner cube 86−59002
height finding radar, NAMS, for relative vertical distances distrib. of aircraft pairs *(Japanese)* 85−31093
helicopter avionics system design and development *(French)* 88−54712
helicopter guidance and control systems for battlefield support 85−39442
heuristic guidance system for automated vehicles 86−4760
human errors caused by system design, mind-machine system 85−38314
hydroacoustic differential−range finding system for determining position *(Russian)* 88−47238
hydrographic charts and books for mariners 88−36719
hydrographic surveying of bathymetry, different positioning systems *(Japanese)* 85−32002
ice hazard detection using electric dipole field 86−22598
IEEE standard definitions of navigation aid terms 86−43919
inner solar system space probes 85−31125
integrated marine navigation systems, Kalman filter designs 85−42673
intelligent vehicle with laser rangefinder, navigation algorithm 86−59001
ISTAC-series codeless GPS dynamic marinepositioning 86−55395
JTDIS relative navigation with measurement sharing 85−38297
Kalman filter possibilities for integrated navigation systems 87−39855
keying multiple devices in future aircraft 88−3888
laboratory aircraft, accurate navigation system 85−15376
land vehicle, active multispectral 3D vision sensor image evaluation 88−53733

navigation continued
laser gyroscopes, optimum correction in spatial stabilisation and guidance systems *(Russian)* 87−68671
laser navigational aids, prototype design, development and testing 86−36627
laser vision mapping applied to vehicle route guidance 88−35619
liability aspects of electronic charts 87−36417
lighting at Zurich international airport *(German)* 86−71119
long baseline acoustic navigation−a flexible approach to custom applications 85−31116
low-altitude spacecraft, IR horizon scanning sensors 85−59382
low-thrust navigation to comets or asteroids 88−5100
LRNS, long-range navigation system receiver design in quasi-rangefinder mode 85−37124
magnetic compass-bowl motion and directional system, error relationship *(Japanese)* 85−58254
marine navigation, methods and computerised systems 86−30904
marks, discrimination meas. at night *(Japanese)* 85−31121
merchant shipping ownership and manning forecast (2000) 87−41124
merchant ships, use of desk-top computer for navigation *(Japanese)* 86−30900
MIISA, multifunction integrated inertial sensor assembly, for US military aircraft 88−16998
military systems, guidance and control, conf., London, UK (Oct. 1986) 88−11610
mobile robot navigation system, perception control architecture in image processing 86−4232
mobile robots, adaptive navigation algorithm 88−3246
mobile robots, navigation, dynamic world model using rotating ultrasonic ranging device 86−4764
mobile robots, position referencing and consistent world modelling 86−4941
Model 350 sonar: a high resolution, electronically scanned, dual frequency, multiple beam obstacle avoidance sonar 85−31117
motor vehicle passenger compartment electronic developments 86−26388
motor vehicles, position finding and navigation systems, semiconductor and CD-ROM appls. *(German)* 87−43604
naval navigation, operational requirements 87−41125
NAVTEX automatic warning system, structure, message codes and C18501A receiver *(Danish)* 85−58243
NEC Advanced Graphic Display Controller for navigation system 88−69891
NNSS, Navy Navigation Satellite System, current evaluations and accuracy improvement *(Japanese)* 86−30895
North American street maps, navigable database development 88−69889
NS 1000 navigation processor 86−55396
ocean current forecasting *(Japanese)* 88−41773
ocean wave forecast model *(Japanese)* 88−41772
oceanography technology, conf., San Diego, USA (Feb. 1986) 86−55383
optical sensing off height, speed and attitude from airborne vehicle, correlation-based method 87−71245
passenger car navigation systems 87−51600
passive navigation by triangulation and tracking of undistinguished features in successive high-resolution images 85−38296
performance evaluation, using nonlinear filtering formulation 88−66602
plane finder for navigation system 85−31391
Plessey adaptive compass for unmanned aircraft navigation 88−16845
position, location and navigation, conf., San Diego, CA, USA (Nov. 1984) 85−32918
precision guided weapons, integrated strapdown avionics 86−60894
printed circuit microstrip patch antenna array operating at Ka-band 87−47398
proportional navigation, time-varying smoothing appl. 86−4739
radars, echo signals improvement *(Japanese)* 86−30897
real-time navigational information systems for port and harbor operations 86−60950
relative GPS positioning, carrier signal multipath interference effects 88−54729
road vehicle route guidance systems design 85−36779
road vehicles, onboard navigation system 85−37150
robot spacecraft trajectory guidance decision tree for inflight data processing 86−12110
robots, autonomous, mobile, sonar-based mapping and navigation system 86−59959
route guidance for freight transport 85−36780
Russian applications of lasers, review presentation *(French)* 88−27364
safety, work of International Maritime Organisation sub-committee 87−41126
satellite navigation systems; status and future *(Japanese)* 86−30896
satellite orbit estimation, review 85−59375
scene analysis, finding of objects moving against a static environmentby a moving observer *(Japanese)* 86−69170
seafloor mapping, NECOR Sea Beam data collection and processing 88−30180
self calibrating acoustic transponder (SCAT) system 85−31113
sentence generation method of a route guidance system using a text-to-speech synthesizer *(Japanese)* 88−59107
SFIM products and development trends 85−38285
ship, manoeuvring systems, data analysis *(Japanese)* 88−28998
ship navigation package 88−35602
ship positioning using acoustic location method, calibration procedure 86−60947
shipboard electronic chart systems, electronic correction updating 88−35608
ships, collision avoidance action decisions using fuzzy reasoning model *(Japanese)* 87−34669
ships, position fixing, automatic, by matching between radar images and simulation images *(Japanese)* 87−34666
short-base acoustic ranging systems, source location accuracy, receivers comparison 87−28699
SODERN image detectors used in star trackers 88−10482
sonar, running times eval. of acoustical model signal by cross correlation *(German)* 86−55381
sonar, Sea Beam shipboard data collection and processingenhancement 86−55384
sonar beamforming and signal processing 87−56275
sonar mapping for mobile robots 86−4762
sonar transponder net self calibration algorithm 85−31114
space based orbital manoeuvring systems, navigation and control considerations 85−15389
spatial orientation of aircraft during execution oflateral manoeuvres *(Russian)* 86−25358
navigation continued
spatial representation system for mobile robots 86−4763
spectral approach for synthesis of adaptive systems for complex processing of navigational data *(Russian)* 88−14701
spread spectrum techniques for satellite systems for navigation and telecommunication *(German)* 88−46960
standoff weapons guidance system design and development tradeoffs 87−15012
strapdown navigation matrix, SVD for optimal orthonormalisation 86−43876
strapdown single gyro attitude and heading reference, design, performance and test results 85−8841
suboptimal recursive algorithms for navigation-system estimation 88−21173
tactical standoff missile, precision delivery of unguided submunitions 87−15015
Tansei-maru hybrid navigation system, calculated sea current *(Japanese)* 88−15707
target detection simulation by passive sonobuoy field for aircraft-carrier task force protection 88−68682
technologies, education in use of onboard microcomputer *(Japanese)* 86−30898
terrain and obstacle avoidance for tactical aircraft, sensor blending algorithms 85−7946
Transportation Electronics conf. Warrendale, PA, USA (Oct 1986) 87−43789
tsunami tidal wave energy flux angle, use of navigation computer *(Japanese)* 88−41774
underwater acoustic transponder navigation system *(Japanese)* 86−55382
underwater transponder navigation using harmonic mean sound speed 85−31115
universal acoustic deep ocean transceiver with RF command data link 87−42257
Uno-Takamatsu sea area radar watch in dense fog *(Japanese)* 87−34656
US instrumentation, underwater appl. 85−4516
USSR mercantile marine navigational aids, status and development prospects 87−41136
VDO Citypilot self-contained car navigation system 85−37618
vehicle position finding, automatic, laser appl. 86−59003
vehicle route guidance, colloquium, London, England (Jan.1985) 85−32929
VLSI and navigation systems 87−67378
Voyager Uranus mission, in-flight engineering changes, navigational and communication problems 87−29877
West German road network, electronic aid systems for drivers *(German)* 86−69630
worldwide navigation into 21st Century, conference, Brighton, England (Sept.-Oct. 1986) 87−36335
X-band FMCW navigation radar 88−15661
Cs atomic clocks, config., operation and appls. 86−31571
GaAs-GaAlAs laser with high energy brightness appl. 87−46884
Li D-size cell performance and safety for oceanographic use 88−43366

NDT *see nondestructive testing*

near edge structure, X-ray absorption *see XANES*

necking
Von Mises stress, determ. from neck of tensile-test specimen 85−44818

Neel temperature
$LaCrO_3$ based ceramics, synthesis, elec. and mag. props., conducting lead appl. 85−39817
MnTe, resistivity critical behaviour around Neel temp. 88−12964
Tb-Fe garnet, double umbrella mag. structure 85−24101

negative feedback *see feedback*

negative feedback control systems *see closed loop systems*

negative impedance convertors
AC resonant bridges with negative resistances, capacitances and inductances of higher orders *(Polish)* 88−32307
all-pass circuit, second-order, using negative impedance convertors *(Japanese)* 85−55028
balanced integrator using NIC, config. and filter appls. *(Japanese)* 88−38621
bipolar transistor cct. with translinear implementation, appl. to bandpass filter and current-controlled current source 86−46978
class A current inversion type, performance comparison with translinear implementation 87−31993
floating negative immittance convertor, network realisation and synthesis appl. 88−871
ideal convertors approximation, using transformer quintuple port *(Czech)* 87−59704
inverting amplifier, NIC compensated, optimum design and sensitivity study 85−17178
LC resonance loop size reduction *(Russian)* 86−20345
linearisation of Pt using one operational amplifier *(Czech)* 85−3937
lossless tunable floating FDNR simulation using two current conveyors and current inversion NIC 87−52715
multiple feedback filter compensated with a negative-impedance converter, design and sensitivity anal. 85−23024
operational amplifiers, inverting type, active compensation using NIC 88−56467
operational transconductance amplifier cct. implementation 88−56751
switched capacitor first-order all-pass cct. using two-terminal negative input impedance building block 87−24314
thermometer with reference voltage source *(Czech)* 87−21055
thermometers sensor characts, linearisation, with Pt-100 metering resistors *(German)* 86−70127
thin wires loaded by negative impedance amplifiers, numerical analysis 86−22791
third-order elliptic low-pass filter using single balanced-type neg. impedance convertor *(Japanese)* 85−49983
three-port D-R mutator realization, high-pass filter appl. *(Japanese)* 85−34058
transistor realisation and anal. method, elliptic low-pass filter appl. 85−17659
video frequency active filters using balanced type NICs *(Japanese)* 85−40184
video frequency active RC filters using NICs, design and performance 85−17658
wideband floating FDNR implementation using CCII-current conveyor 86−1222

negative proportional transformers *see negative impedance convertors*

negative resistance
AC resonant bridges with negative resistances, capacitances and inductances of higher orders *(Polish)* 88−32307
active high-pass filter using floating freq. dependent negative conductance *(Japanese)* 85−11418
active-R nonlinear negative resist. oscillators 86−46608
alloy-junction transistors, negative emitter input and collector output resists. *(Japanese)* 85−55788
analog opto-coupling cct., optical link controllable config. using optoelectronic negative resistances 87−54184
analogue opto-coupling cct., optically controlled, constructed with series combination of optoelectronic negative resists. *(Japanese)* 85−56441
ballistic camel diode, optoelectronic negative resistance device, LED integration for bistable memory element 88−58353
bidirectional characteristics and applications of temperature-sensitive magnetic semiconductor *(Japanese)* 88−19910
bidirectional negative resist. transistor *(Chinese)* 85−35029
bipolar amplifying and negative resist. devices 85−50499
bipolar tunnelling FET transistor, 3 terminal negative differential resist. device, high speed 88−50868
chaotic phenomena in cct. with negative resistance and ideal diode switch 88−6635
CHIRP superlattice devices, negative differential devices 86−2229
CHIRP superlattice diode, design 85−55771
circuit reflector synthesis appl. *(Japanese)* 88−38620
CMOS overtone crystal oscillator cct. 87−60716
CMOS Schmitt trigger based on lambda neg. resist. config., design and characts. 85−17230
controlled negative resistance devices 85−22617
crystal oscillator, computer anal. of characts. *(Japanese)* 86−2498
crystal oscillators with fundamental freqs. in UHF and microwave regions, design procedure 88−12587
DDR heterostructure Impatt, MITATT mode, characts. 87−45865
device synthesis, analytical and topological guidelines 85−6426
devil's staircase route to chaos in a nonlinear circuit 87−10635
dielectrics, breakdown and prebreakdown phenomena, phenomenological models 87−53753
diffuse discharge switch, electron beam controlled, with negative differential, conductivity 86−63010
double barrier diodes, resonant tunnelling and sequential tunnelling 87−45866
double barrier heterostructure diodes, resonant tunnelling effect *(Japanese)* 87−6440
double quantum well structs., parallel electron transport studies 87−24864
double-barrier resonant-tunnelling oscillators, freq. limit 85−61446
driven relaxation oscillator with negative resistance device, transition to chaos, expt. study 87−10714
electronically variable general-resistance circuit 86−34978
FDNR floating impedances simulation for LF active filter design 86−41219
FDNR simulation, floating ideal tunable type, using current conveyors, cct. modification 85−34048
ferrite, magnetic semiconductor, temperature-sensitive, nonlinear negative resistance 88−51268
FET, microwave oscillator appls. 85−55853
FET, tunnelling transfer, negative conductance device 87−32506
floating FDNR using ground capacitor, realization 85−33690
free-running oscillators, dynamical stability 85−54715
frequency dependent negative resistance applications to active filters, experimental study 85−11404
graded gap base diodes, negative differential resistance *(Russian)* 85−1547
Gunn diode, high Schottky barrier, negative resistance studies *(Russian)* 87−45863
hardware neuron model, Λ-shaped transistor utilisation 87−477
HBTs, inverted mode, HF characts. 88−1636
HEMT, structured gate, negative differential conductivity obs. 88−1694
heterostructure hot-electron diode, switching mechanism 88−33139
heterostructure hot-electron diodes, switching mechanisms 87−74245
heterostructure insulated gate transistor, negative resist. regime at high gate voltages 86−41797
hot electron injection theory for negative resistance FET 87−38292
HV gated diode switches, dielec. isolated, negative resist. in forward I-V characts. 86−63238
Integrable wide-dynamic-range negative resistance circuits 85−45148
JFET, submicron vertical, voltage-controlled negative resist. 85−18359
JFET negative resistance characts., expt. study 85−1582
Josephson triode, micro-contact type, config., fabrication and characts. 88−13758
lambda phototransistor, model, theoretical/expt. study and appls. 86−36337
λ-bipolar transistor with adjustable negative-resistance *(Chinese)* 88−57608
lateral surface superlattices, applications as millimeter wave devices 86−67493
LC oscillator, chaos generator based on a quasi-harmonic oscillator 85−44920
linear negative resistance cct. using FET voltage-controlled resistor 86−20703
linear resistive dipoles equivalence theorems 87−10976
long S-diodes, I-V characts., thermofield impurity ionisation effects *(Russian)* 86−47504
metal-insulator-semiconductor struct., negative absolute hot-electron resist. 85−50314
MIM device, voltage controlled negative resistance, conduction charact., functional form 85−55604
MIS switch with tunnelling insulator, negative resist. in forward and reverse directions 85−34922
MOS power transistor characts., temp. effect *(Chinese)* 87−67289
MOS voltage controlled negative differential resist. ccts. for VLSI adaptive systems 86−34659
MOSFETs, short-channel, breakdown 85−45730
MOST, first and second breakdown limitations *(French)* 85−12308
MOST, I-V characts. modification by self-heating 85−34993
MOST, second breakdown limitations on safe operating area 85−40768
multifrequency negative-resistance oscillators, stability criteria, theoretical and expt. study 85−6205
multifunctional integrated negative differential resistance device, design and appls. *(German)* 87−66366
multistable cct. using Λ-shaped negative resistance devices, freq. divider appl. 87−52710
multistable circuit using Λ-shaped negative resistance devices and its application to frequency divider *(Japanese)* 85−28676
NERFET logic ccts., output voltage switching 85−54814

negative resistance continued
network transformations for incorporating nonideal simulated immittances in the design of active filters and oscillators 87−59706
nonlinear model for negative resist. devices 85−10949
nonlinear networks, negative resistance curve tracer 85−54624
optically controlled microwave devices and subsystems 88−7071
oscillator cct., periodic-chaotic transition sequence, expt. study 86−46973
oscillator controlled by DC current pulse, chaotic phenomena 86−67070
oscillators, design using dispersion parameters *(Spanish)* 87−65919
p-n heterojunction, reverse-biased graded, negative differential cond. 86−28011
passive bipolar-JFET-MOSFET negative resistance devices 85−23068
period-adding route to chaos in a two-transistornonlinear circuit 86−67083
photodiode structures, low-bandgap, near-intrinsic, negative resistance with Auger suppression 88−14028
physical origin of the negative output resistance of heterojunction bipolar transistors 88−39383
planar p^+-i-n^+ diode with junction gate, negative resist. obs. 86−67829
planar p-i-n diode with guard ring, negative resistance, voltage gating effect 87−38187
polymer monocrystal electronic devices 88−57702
power MOSFETs, self-heated type, negative differential output conductance study 87−6704
power negative-resistance device by using complementary SIT 87−18157
power tetrodes, parasitic oscills. model 87−11283
quantum well oscillators, freq. and power limit 86−46600
quantum well oscillators, high freq. amplification 86−67078
quantum well tunnel triode 88−26249
quantum-well optical bistability device with good on/off ratio, high speed 88−27281
quasisinusoidal quasistatic negative-conductance oscillators, refinement and extension of Belevitch's criterion through perturbation techniques 88−70589
real space transfer devices, ensemble Monte Carlo simulation 88−33262
resonant bridge with frequency-dependent negative resistance 88−60859
resonant tunneling transistors with controllable negativedifferential resistances 86−28323
resonant tunnelling devices, negative transconductance FET and monolithically integrated tunnelling diodes 88−50890
resonant tunnelling diodes, microwave and MM-wave, cct. appls. 87−45291
resonant tunnelling FET, negative transconductance 87−74283
resonant tunnelling struct., 2D electron gas, negative transconductance device 86−21172
resonant tunnelling structs., extrinsic bistability, simulation 88−71492
resonant tunnelling transistor with quantum well base, high energy injection, negative differential resist. device 86−2130
resonant-tunneling FET appls. 88−39502
resonant-tunnelling diode, quantum transport simulation 87−45875
resonant-tunnelling FET, negative transconductance device 87−67265
Reversible NDR two-ports 86−57534
semiconductor alloys for high-speed-electronics, transport props. 88−25890
semiconductor devices, nature of inductance and negative resistance 88−25918
semiconductor ohmic contacts, ambipolar thermal drift, I-V characts. 85−23396
semiconductors, hot electron intervalley transport, submillimeter negative differential cond. calcs. 86−35278
semiconductors, instabilities, domains, filaments and chaos 87−53154
single-transistor emitter follower circuit design 86−27096
SIPOS power MIS switch device, design and characts. 88−64572
SIS mixer to HEMT amplifier optimum coupling network, theoretical study 88−19364
SIS quasiparticle mixer, 100 GHz, 10 dB coupled gain 88−12603
SRAM cell based on negative resistance charact. of UJT, performance and integration aspects 88−50143
synchronized oscillator as a twopole with controlled parameters 85−6207
TEGFET, real-space transfer, Monte Carlo simulation *(French)* 88−19998
transferred electron devices, stability of stationary domains computer simulation 88−19374
triple-well resonant tunneling diode for multiple-valued logic application 88−71506
tunnelling injection FET struct. for negative differential resistance three-terminal high-speed devices 88−71022
two-step barrier diodes 88−39360
two-transistor no-resistor cct. cannot exhibit negative differential resist. 87−65780
UHF oscillator design time reduction using FORTRAN PC program 88−44081
vaporization and breakdown of thin columns of water 87−32750
variable radix multistable integrated electronics, anal., implementation and performance 85−23916
vertical double-diffused power MOSFET drain current variation with temp. *(Korean)* 87−11807
VHF Colpitts oscillator CAD using S-parameter technique *(Portuguese)* 87−65925
$AgGaSe_2$ single cryst., negative photocond. due to negative photogalvanic effect 88−58341
Al/SiO_x-Bi_2O_3/Al, MIM sandwiches, voltage-current characts. 86−1851
Al-Al_2O_3-Ag, switching effects and negative resistance 87−67029
Al-Al_2O_3-Al/Ag(Cu), upper bilayer electrode, differential negative resist. 86−28072
Al-Al_2O_3-Au sandwich struct., forming process in high elec. field *(Japanese)* 87−11492
Al-Al_2O_3-Au sandwich structures, forming process 87−67027
Al-Al_2O_3-Au thin film struct., voltage-controlled negative resist. *(Japanese)* 86−28073
Al-Al_2O_3-Au/Ag(Cu), upper bilayer electrode, differential negative resist. 86−28072
Al-Cu/SiO-Al MIM sandwich structs. I/V characts. rel. to series resistance 86−21288
Al-GeO-Al, switching effects and negative resistance 87−67029
Al-MgF_2-Au device, reverse negative differential resist. studies 86−58343
Al-Si-Al, switching effects and negative resistance 87−67029
Al-SiO_x-Ag(Au) device, reverse negative differential resist. studies 86−58343
AlAs/GaAs/AlAs quantum well heterostruct., reson. hole tunnelling study 86−1783
AlAs/GaAs/AlAs resonant tunnelling diodes with atomically controlled barrier width 86−47528

spatial light modulators using nematic liquid crystals 86−36262
super twisted birefringence effect LCD's, fundamental characteristics 87−74881
supertwisted layers, birefringence retardation compensation, multiplexable black-white display appls. 88−29545
supertwisted liq. crystal displays, optical mode interference 87−77332
supertwisted nematic LCD, black-and-white, configuration and parameters 88−16361
supertwisted nematic LCD, developments 88−16281
supertwisted nematic LCD, high pretilt angle generation by rubbing 88−42217
supertwisted nematic liquid crystal displays 87−49839
surface alignment, use for high speed light modulation 88−7996
surface resistance induced nematic liquid crystal display, fast writing and erasing 87−60978
thin film, wave front conjugation, gain and self-oscill. obs. 86−9937
thin nematic liquid crystal cells, electro-optic behaviour 87−12269
TN-LCD using polarizers as the main body 86−31510
transient nematic liquid-crystal image bar for electrophotographic printers 88−13952
TV real-time pseudocolour-encoding, X-ray transparencies appl. 87−38875
twist nematic liquid crystal cell, molecular orientation control 85−56372
twisted, light transmission 87−54131
nematic liquid crystals continued
twisted cells with tilted boundary conditions, optical threshold 86−9630
twisted configurations with nonzero pretilt angles, director patterns, numerical calcs. 87−7182
twisted layers, electro-optical props. 88−58249
twisted nematic cell, principles and display appls. *(German)* 85−37680
twisted nematic cell, time response, chiral dopant effects 87−54127
twisted nematic LCD, colour props. cell-thickness depend. 86−9629
twisted nematic LCD device, very highly multiplexed 86−5402
twisted nematic LCD modules for harsh environmental conditions 86−5403
twisted nematic LCDs, development and technology 86−11654
twisted nematic LCDs, directly multiplexed *(French)* 88−10084
twisted nematic LCDs with axially symm. mol. orientations for improved viewing angle characts. *(Japanese)* 88−47651
twisted nematic liq.-cryst. displays, field-off state optical props. study 88−74526
twisted nematic liquid cryst. cell, polarisation anal. using Poincare sphere *(Japanese)* 87−33010
twisted nematic liquid crystal displays, optical mode interference 88−16356
twisted-nematic and guest-host field-effect displays, new materials *(Japanese)* 85−14904
twisted-nematic liquid crystal display, with very high multiplexing *(Japanese)* 85−46219
twisted-nematic liquid-crystal full-color display panelwith reduced rotary dispersion 86−31513
two-wave mixing, degenerate 88−58686
waveguide, nematic liquid crystal overlayered, low-voltage driving 86−48114
$Si-SiO_2$, elec. active defects in oxide film, visualisation using nematic liq. crysts. 88−64342
NEMP *see electromagnetic pulse*
nephelometry *see turbidimetry*
Nernst effect *see thermomagnetic effects*
Nernst-Ettingshausen effect *see thermomagnetic effects*
nerve conduction *see neurophysiology*
nervous system *see brain; neurophysiology*
network analysers
16-216 GHz full coverage MM-wave scalar network analyser 88−60641
18 to 26.5 GHz waveguide load-pull system using active-load tuning 87−77390
94 GHz diode-based six-port network analyser, evaluation 85−20717
500 kV transmission system switching overvoltage meas. by transient network analyser and EMTP *(Spanish)* 86−25558
6407/6409 portable RF SNAs contain sweepers 86−55586
Acurrel 3010 dynamic range extender operates over 100 dB at 2 to 20 GHz 88−67717
algorithm for *Q*-factor measurements using a network analyzer 87−56831
amplifier and transistor chip meas. using universal fixture 87−66549
amplifier S-parameters, meas. and calibration technique for accurate meas. 87−77182
Anacat computer aided testing software for network analyser DP *(German)* 88−35784
ANACAT computer-aided test PC software complements vector network analyzers 87−29006
ANACAT computer-aided test software for RF ATE/network analyser appls. 87−77106
analogue cct. fault finding, automatic system *(German)* 86−31305
Ando Electric AE-5105 protocol analyser for data network 87−49620
Anritsu MS3401A network analyzer with 10 Hz to 30 MHz frequency range and a high-speed synthesizer *(Japanese)* 88−67707
antenna measurements using an automatic microwave measurement system 85−15010
arc furnace filter circuits, harmonic current interruption phenomena 85−16434
automated network analysers, digital signal processing, appls. 85−8751
automated pulse reflectometry, accuracy increase 87−3384
automated time-domain network analyser, error corrections 87−14236
automatic homodyne network analyser with phase shift keying and baseband data sampling 85−14734
automatic microwave cct. analysers, with 12-pole reflectometers 87−3730
automatic microwave reflectometer calibration, airline appl. 85−14999
automatic microwave scalar network analyser, design and performance *(German)* 85−14702
automatic network analyser, dual six-port type, computer-controlled, calibration and appls. 85−26192
automatic network analyser, HP 8510 A based, 30-60 GH_2 operation; design and features *(German)* 86−5145
automatic network analyser measurements, errors, simulation model and statistical anal. 87−77064
automatic network analysers, meas. config. and errors *(Spanish)* 86−50019
automatic network analysers, strip line calibration with TSD method *(German)* 88−67708
automatic vector network analyser, HP 8510B, design and characts. 87−56579
automatic vector network analyser with 12-parameter error model, TRL calibration method 86−31119
bistatic radar cross section measurement facility 88−4611
bit-error rate test principles and tester survey 85−47879
bit-error-rate testers for data links on networks 87−40353
bridge circuit design, four-element two-terminal network parameter measurement 88−16000
broad-band permittivity measurements using thesemi-automatic network analyzer 86−24700
broadband automatic homodyne network analyser with binary phase modulation, config. and X-band operation 86−70074
broadband band II amplifier, high efficiency, high power class C device characterisation 85−44915
broadband homodyne network analyser with binaryphase modulation, microcomputer-controlled system 86−17786
buyer's guide *(German)* 85−26182
CAD/CAM microwave modeling with six-port automatic network analyzers for microwave ICs 85−6529
calibration with 12-term system-error correction 86−31301
characteristic-function analyzer, random voltage 87−35011
coaxial dual six-port automatic network analyser, waveguide characts. meas. appl. 86−24735
coded phase reversal modulator for optical freq. domain reflectometry 88−67721

network analysers continued
complex permittivity measurement method, scalar network analyser appl. *(Russian)* 88−47661
computer-controlled network analyser system for quartz crystal oscillator parameter meas. appl. *(German)* 88−9867
computerized microwave measurement techniques 86−17804
Comstate programming techniques for Atlantic Research data analysers *(German)* 85−26183
configuration and techniques for linear component charactn. 87−21006
constellation analyser, HP3709B *(French)* 88−29285
crystal resonator 87−60725
crystal resonator parameter measurement, network analyser technique 87−18447
crystal resonators and bipoles, precision parameter measurements system 86−42062
data analysis and network testing 85−25237
data communication equipment testing 88−14963
data communication network analysis and data debugging equipment 86−10840
Data Highway Detective instrument based on Tandy portable computer 88−22471
data network protocol analyzers *(German)* 88−53574
datacom analyzers, evolution 85−20550
dielectric parameters of materials meas. using automatic network analysers 88−4589
digital, amplitude and phase determ. without knowing frequency 87−70515
digital microwave network analyzer 85−14730
dipole antenna, radiation pattern meas., network analyser time domain gating appl. 85−41753
dipole antenna radiation pattern meas. using HP 8510 network analyser 86−29610
disturbance analyser, Liebert model 3600A *(Italian)* 85−8761
Dolch Compact Logic Tester instrument *(German)* 86−38302
double channel FFT dynamic systems *(Italian)* 86−5148
dual 7-port automatic network analyser with swept-frequency real-time response 87−63305
dual seven port automatic network analyser with real time swept-frequency response 87−21014
dual six port network analyser with waveguide star junction, matching, sensitivity, Ka band meas. 86−11512
dual six-port automatic network analyser, online accuracy assessment, systematic errors calc. 87−14252
dual six-port automatic network analyser, online accuracy assessment 87−14253
dual six-port automatic network analyser, online accuracy assessment, nonmatching connectors appl. 87−14254
dual six-port automatic network analyser, online accuracy assessment 88−16461
dual six-port automatic network analyser, online accuracy assessment 88−16462
dual six-port automatic network analyser, online accuracy assessment, expt. results 88−16464
dual six-port automatic network analyser, online accuracy assessment 88−16465
dual six-port automatic network analyser, systematic errors analysis 88−16463
dual six-port automatic network analyzer and its performance tests 85−20482
dual six-port network analyser, dynamic range extension technique 85−52708
dual six-ports or four-ports calibration for meas. two-ports with any connectors 87−8731
electrochemical analysis appl. 87−63563
EM susceptibility studies and meas. on electro-explosive devices 86−29489
embedding network characterisation, low-loss meas. appl. 87−14454
end, phase distrib., expt. study 85−11502
equipment trends and appl. of microprocessors *(French)* 85−26345
Ethernet debugger LANalyzer 86−59643
Ethernet testers and analysers 87−56468
Ethernet testing using logic analyser *(French)* 86−16956
FETs, constant intermodulation loci measure for power devices using HP 8510 network analyzer 88−74308
FFT based signal analysers, excitation signals survey 88−74304
file analysers for new standards *(Italian)* 87−49614
fin line planar cct. six-port with diode detectors, design, network analyser appls. 87−11059
five port circular disc structures for six port analysers 86−11509
fixture-network analyser characterisation for scattering parameters meas. 85−26469
FM radio receivers with IF filters, distortion meas. and calc. 85−14431
four-pole networks phase-amplitude response meas., accuracy improvement 86−70191
four-port automatic network analyzer, performance and calibration 85−64069
four-port automatic network analyzer theory 85−64070
HEMTs, scattering parameters meas. at W-band using six-port network analyser 87−59871
Hewlett Packard 4953A and 4951A data network analyser *(German)* 85−31416
Hewlett Packard HP 8753A network analyser *(German)* 86−44213
Hewlett Packard programmable scalar meas. bench *(French)* 85−14717
Hewlett Packard software package in BASIC 87−21015
Hewlett-Packard, accuracy prediction 85−14720
Hewlett-Packard 4971S LAN protocol analyser 86−70066
Hewlett-Packard equipments, review *(German)* 86−11495
Hewlett-Packard protocol analysers *(Italian)* 87−41433
Hewlett-Packard protocol analyzers *(Dutch)* 85−8165
HF linear network parameter meas. in China 86−65155
high-power automatic network analyzer for measuring the RF power absorbed by biological samples in a TEM cell 85−3854
high-speed network analysis using 360 network analyser from Wiltron 88−15946
homodyne, computer-aided error analysis of microwave systems with mixers 86−24450
homodyne, digital triple phase modulation and baseband sampling technique 85−58632
homodyne network analysis by digital triple phase modulation 86−24737
HP3577A for appl. in telecom. *(Italian)* 86−31289
HP4953A protocol analyzer for EDP centers and fieldservice 85−64065

network analysers continued
HP8510A microwave network analyser using internal high speed processor 85−8713
HP8720A microwave network analyzer is completely integrated 88−47450
HP's family of MM-wave detectors for scalar network analyser 88−38421
HP 3562A analyser, curve fitter for pole-zero analysis 88−4329
HP 3562A Dynamic Signal Analyser, control-system design appl. 85−20543
HP 3562A dynamic signal analyser, FFT-based 88−4326
HP 3562A low-freq. analyser, meas. modes and digital modulation 88−4327
HP 3562A signal analyser for synthesizing freq. response of linear systems 88−4328
HP 35677 A/B S-parameter test set, broadband two-port 85−20537
HP 3577 network analyser with S-parameters for crystal resonator parameter measurement 87−18448
HP 3577A network analyser A/D convertor 85−17546
HP 3577A network analyser and HP 35677A/B S-parameter test set 85−20536
HP 4951A, low-cost, portable field service protocol analyzer 85−64067
HP 4953A, serial data acquisition and simulation for a high-speedprotocol analyzer 85−63975
HP 4953A protocol analyser for monitoring and simulating serial data 85−64066
HP 8409C automatic network analyser, modifications extend coverage to 50 GHz 85−31307
HP 8510 automatic network analyser, use of internal error correction to meas. de-embedded device data 86−38300
HP 8510 B vector network analyser, performance and applications 87−77161
HP 8753A network analyser, nonlinear meas. capability 88−53581
HP 8753A vector network analyser for RF engineers 86−55585
HP 8757A scalar network analyser 86−70072
HP 8981A vector modulation analyzer, statistical calibration 88−60626
HV network transient analyser for power system planning 86−25538
Innovative Measurement Solutions adaptive calibration software for HP network analyzers 88−60634
integrated fin-line 6-ports for mm-wave network analyzers 87−8732
ISDN interface test system 87−13259
large signal pulse network analyzer operation 85−20558
linear control system freq. response meas. using dynamic signal analysers 86−50012
low-pass filter, modelling 87−37449
MAP line monitor *(Japanese)* 88−29230
MFA 103 metering computer for signal and networkanalysis *(German)* 86−70088
MI6500 transmission line test system 88−60896
micro-wavelengths transmission meas. with error correction, device under test modification 85−14733
microcomputer based network analyser config. for power dissipation meas. of passive components *(German)* 88−60853
microcomputers in microwave measurement appls. *(Chinese)* 86−70204
microwave, 26 GHz to 40GHz band 86−38539
microwave, automatic, speed and accuracy improvement 86−24734
microwave, automation and error correction facilities using IBM PC and Elf program 88−60627
microwave, Marconi Instruments 6500, design and features *(French)* 86−44332
microwave, using single six-port reflectometer, design, calibration 86−55819
microwave and millimetric components meas., conf., London, England (Nov. 1986) 87−16305
microwave ATE systems, scalar network analysers appl. 85−3841
microwave circuit, reflection matrix meas. using network analyzer 87−63500
microwave circuit analysers, multipole meas. transducer selection criteria 88−22758
microwave conference, Liege, Belgium (Sept. 1984) 85−5654
microwave frequencies, digital meas. of group delay 85−8944
microwave hybrid probe network analyser 87−29274
microwave impedance measurement, book 86−26483
microwave meas. in 27 to 110 GHz band *(French)* 87−8724
microwave measuring instruments and techniques, product review *(French)* 85−31431
microwave network analysers, development *(German)* 87−49601
microwave network analyzer calibration using offset shorts 88−60628
microwave power and energy: national standards 86−38536
microwave scalar network analyser with desk-top computer and menu-driven software 85−63966
microwave vector analyzer speeds power-sensor calibration results 88−4332
Millimeter-Wave Polarimeter for remote sensing 88−5143
millimetre scalar network analyser, 18-225 GHz band, config. and operation 88−29291
MM wave permittivity meas. at elevated temps. 86−18095
MM-wave antenna meas. with HP8510 network analyser, report 85−62897
MM-wave antenna meas. with HP 8510 network analyser 87−8720
MM-wave automated multiport network analyser, concept 86−38216
MM-wave network analyser, 16 to 250 GHz *(French)* 88−67706
mm-wave network analyser-based scatterometer for remote sensing 87−63932
MM-wave network analyzers, integrated fin-line 6-ports use 88−53583
MM-wave S-parameter measurement system using network analyser, config. and performance 85−37516
MM-wave vector meas. using HP8510A network analyzer 85−37527
MM-wave vector network analyser using Macintosh II PC 88−74310
MM-wave vector network analysis 88−42008
modular workstation for automatic testing, bi-directional vectorial network analyser appl. *(German)* 88−47403
MOS transition for HF appls., small signal model meas. and fitting 88−57666
MS620J network/spectrum analyzer with 100 kHz to 2 GHz frequency range and built-in personal computer *(Japanese)* 87−14222
multi-six-port network analyzer, calibration and meas. of multi-port networks 88−4338
multielement ccts. analyser and its calibration, using microcomputer 87−3523
multimoded microwave resonators, characterization using network analyzer 88−25388
multiport network analyser for precision vector meas., 26.5 to 40 GHz band 87−21222
multiterminal networks parameters determ. using automated bench 88−29240

network analysers continued
multiterminal reflectometer design and calibration for automatic microwave circuit analysers 88−22759
near field antenna measurement system, six port network 86−11491
nonuniform sampling of bandwidth-limited signals , formulas and appls. 88−72933
open-ended coaxial-line probe, appl. in dielectric meas. 87−70758
oscillator operating parameters test using network analyzer 85−20534
passive linear two-ports parameter identification, low-loss meas. appl. 88−15994
phase tracking measurement of MM-wave mixers 87−14504
power systems, three-phase, faults simulation using digital computer and network analyser 88−69050
PROTO II crossover network, time domain reflectometry meas. 87−22620
protocol analysers *(German)* 87−20226
protocol analysers *(German)* 87−41426
protocol analysers, user needs 85−31419
protocol analysis on personal computers for fault monitoring *(Japanese)* 88−15094
protocol analyzers, use in capacity planning 88−3357
pulse network analyser, config. and meas. appls. 86−11510
radar cross-section, measurement using HP 8510 automatic network analyser and anechoic chamber 85−64259
radial line stub decoupling struct on microstrip substrate, input impedance *(French)* 88−12572
re-normalizing the scattering parameters 86−24729
real time hybrid synchronous machine simulators for use with analog transient network analyser 88−23904
real-time impedance meas. using six-port concept and transformed Smith chart 87−14471
real-time network analyzer employing ultrasonic dispersive delay line 85−26254
real-time power system control studies using network analyser 87−4260
real-time six-port automatic network analyser 85−20483
redundant circuits as substitutes for check standards 86−24449
remote data processing systems testing, using ATE *(Slovak)* 86−23542
remote testing of data communication networks 85−25383
resistive network reflectometry at VHF 88−53575
RF and microwave attenuation meas., review 86−31619
RF and microwave network analysers, automatic error correction 86−44227
RF applicators for drying and heating, resonance characts. and Q-factors 86−66491
RF dielectric meas. of biological substances 87−49891
RF network analysis using small computer 88−60633
RF S-parameter meas. using 86−44218
RF test fixtures for network analysis, calibration 87−8576
Rohde & Schwarz Video Analyzer UVF, review 85−26026
Rohde & Schwarz ZAS/SWP network-analysis test assembly and new option for group-delay meas. 87−56583
S-parameter meas. of stripline components using automatic network analysers, errors estimation *(German)* 87−66477
S-parameters measurement with throughline, short and delay line 86−38529
scalar, permittivity meas. of microwave frequencies 87−70766
scalar analyser, Advantest TR4623 ATE, config. and characts. *(Italian)* 87−56477
scalar analyser, ATE appl. 85−14719
scalar analyser, Marconi 6500, design and appls. *(German)* 85−14701
scalar analyser test technique improves coax-to-microstrip transitions 87−8723
scalar diode detectors for increased accuracies 86−24419
scalar network analyser, Hewlett-Packard 8757A, microprocessor-controlled, 10 MHz-40 GHz range *(French)* 85−31429
scalar network analysers, equipment review and selection criteria 86−24439
scalar network analysers, techniques and accuracy considerations *(French)* 86−17894
Scalar Network Analyzer ZAS, review 85−26261
scalar network analyzers for filter tests 87−3526
scalar network meas., introduction 85−20709
scatterometer with mm-wave network analyzer 88−28938
second generation dual six-port network analyser 88−74309
self-calibration technique for dual six-port network analyzers 85−14732
serial-data analyzers, instruments for system level testing 86−23539
shield dielectric cavity resonators, unloaded Q-factor, precision meas. 85−64263
SIPRA H1, software package for LAN data traffic recording and protocol anal . up to OSI level 4 *(German)* 88−52825
six-port, true power ratios estimation 86−24432
six-port automatic network analyser, error analysis by stimulation 87−14507
six-port automatic network analyser, online accuracy assessment, statistical methods 87−14251
six-port automatic network analysers optimisation for real-time reflectometry 87−29271
six-port automatic network analyzer 87−3529
six-port correlators precision, comparative study 88−60895
six-port matrix calibration formalism using five standards 88−42262
six-port meas. technology appl. *(German)* 85−15005
six-port microwave network, magic junction 88−53838
six-port network analyser for microwave junction characterisation *(French)* 85−31434 ,
six-port network analysers using diode detectors, estimation of true power ratios 86−17899
six-port network analyzer, Stokes vector representation, calibration and meas. 86−11686
six-port reflectometer calibration using min. number of known loads 86−5494
six-port reflectometer for meas. of two-port devices 85−8754
six-port reflector, self-calibration technique using three known loads 86−11511
six-port swept frequency automatic network anal., method and equipment 85−26468
small reflection coefficients meas., precise method 88−53842
SNA-1 spectrum/network analyser for simultaneous refl./transmission meas. *(German)* 86−65147
Sniffer, LAN protocol analyser 88−21655
SSB microwave radio system meas. using network/spectrum analyser 87−28402
SSB microwave system meas., using network/spectrum analyser 85−63525
statistical calibration of vector-modulation analyser 88−47449
stripline calibration errors *(German)* 88−4325
network analysers continued
swept-frequency reflectometer, joint losses on coaxial line determ. 87−14506
telecommunication network protocol analysers, products review *(Italian)* 87−62624
Telenex Autoscope offering intelligent monitoring of data networks 85−47878
time domain anal. 85−14731
time-domain reflectometer *(German)* 85−20710
Toa Electronics on-line analyzer for communication line management 87−49622
Touchstone, RF/microwave network analyser CAE program 85−8769
transfer, impedance technique, equivalent circuit model and network analyser measurements 88−14408
transient network analyzer study of high speed transmission line protection 86−51113
two-port resonant ccts., Q-factor meas. using network analyser 86−13910
UHF acoustic resonator equivalent cct. parameters, automated meas. and CAD anal. 86−63518
UHV line relays, microprocessor based, testing using transient network analysers 86−56461
vector analyser, adaptive control of frequency and phase 87−3536
vector automatic network analysers, Line-reflect-Line calibration technique 87−70504
vector automatic network analysers, two-port verification standards in 3.5 mm and 7.5 mm 85−14718
vector impedances measured accurately with scalar techniques 87−70752
vector network analyser, Hp 8409, software modification for accuracy improvement 88−53576
vector network analyser, Wiltron 360, 0.5-40 GHz operation, design and features 87−70505
vector network analyser for 1-18.6 GHz range, hardware and software modules *(French)* 88−67719
vector network analysers checking, using redundant circuits as substitutes for check standards 85−58631
vector network analyzer, coaxial type with operation to 40 GHz, Wiltron Model 360 88−67716
vector network analyzer data control, management and manipulation, CAT software 87−41442
vector refl. coeff. test set using RF signal processing components 87−3525
vectorial network analyser, 300 kHz to 3 GHz *(Italian)* 87−3520
vectors network analyser time-domain techniques 88−74568
video op-amp IC meas. method 88−32014
W&G SNA-1 spectrum/network analyser *(German)* 86−55579
W-band Sixport network analyser for 90-100 GHz range 88−35895
wide-band de-embedding with a short, an open, and a throughline 86−38304
Wiltron 360 *(French)* 88−4608
Wiltron 360 coaxial vectorial network analyser for 40 GHz, config. and performance *(German)* 88−35877
Wiltron 5600 series of scalar network analysers *(Italian)* 87−41432
Wiltron network analyser for microwave equipment *(Swedish)* 88−15990
with chart based real-time impedance meas., using six-port concept 88−16425

multistep circuit anal. methods, stability 87−73218
multiterminal circuits equivalent conversion, with aid of ideal autotransformers *(Russian)* 85−28291
n terminal star network converted from n terminal resistance delta network *(Russian)* 86−57525
n-port networks, invariance of scatt. matrix *(Chinese)* 86−62332
n-way power divider for CATV and/or MATV systems 86−67542
near-surface volume acoustic waves filter, characts. calc., Green's function appl. 86−68146
negative feedback systems, conditional stability anal. 87−23810
network location problems on grid graphs *(Japanese)* 87−186
neutralized bipolar differential pair, variable-gain type, bandwidth and gain characts. 86−34566
new reactance theory and appls. *(Italian)* 87−44444
Newton method, improved convergence and response speed *(Russian)* 87−44446
nodal analysis, large no. of nodes, procedure *(Croatian)* 87−52255
nodal analysis of networks containing elements without a voltage-controlled description 88−56375
node-reduction algorithm for analysis of activenetworks *(Russian)* 85−61042
noise parameters of selected modified two-terminal pair network *(Czech)* 85−17175
noisy electronic system, symmetry breaking, state selection and sensitivity 87−391
nominal resistance of a complex impedance, appl. in cct. anal. to predict max. transient current 86−52600
non-sinusoidal ccts., model system for reactive power compensation *(Polish)* 86−57607
noninverting operational amplifiers, turn-on response *(German)* 86−67056
nonlinear l_1 optimisation algorithm for design, modelling, and diagnosis of networks 87−36609
nonsinusoidal circuit with finite impedance, power compensation criteria *(Polish)* 88−63440
nonstationary-cct. stability, limitations in Hill's method of anal. *(Russian)* 85−22575
nullator-norator-modelled resistive networks, DC stability 86−67303
Ohm's law, definition and explanation 87−36861
open and short-circuit technique for analyzing electronic circuits 87−36864
open bridge magnetic systems, equivalent cct. analysis *(Russian)* 85−20659
operational amplifier with finite gain, correction circuit characteris. approx. 87−23954
operational amplifiers, circuit anal. with atypical connections 87−16894
operational amplifiers, low-noise systems design *(Spanish)* 86−7882
operational amplifiers, networks order determination 85−6195
operational paths, computer modelling and simulation 87−30180
optimal load dispatching real-time, min. spanning tree approach *(Chinese)* 86−39103
orthogonal-flux type transformer, graphical circuit anal. 87−4759
oscillator, phase diffusion anal. 87−37052
oscillators noise prediction, SSB phase noise 87−37061
oscilloscope amplifiers and step generators for circuit settling time measurements 86−7912
parallel analogue banks, transfer fn. anal. and design method 87−24302
parallel band-pass filter bank, 1st-order tolerances anal. 88−12481
parallel circuits, probabilistic interpretation 88−70412
parallel processing, conf., Pennsylvania, USA (Aug. 1985) 86−26505
parallel resonant convertor, design and steady-state anal. 87−17294
parallel resonant convertor, frequency domain model 87−78793
parametric maximal flows and all optimal solns., characterization 85−39846
partitioning, heuristic algorithm using fundamental loop matrix 85−492
partitioning by hierarchical tearing method *(Japanese)* 85−39862
partitioning using tearing 88−31912
passive and active N-port networks, transfer function matrix realisation *(Polish)* 86−26964
passive discrete-time domain multiports, stable multidimensional polynomials considerations 88−24661
passive switched-capacitor networks props. and concept 86−66995
PC board testing, fault structures, graph theory approach *(Hungarian)* 86−20157
peaking current reference, cct. enhancements, anal. and optimisation theory 88−56441
performance-index ranking algorithms for power system network anal. 86−6200
network analysis continued
periodically reversed switched capacitors, finite time Laplace transform anal. 86−46519
periodically switched linear systems, stability and switching frequency 87−44522
permutation network, routing algorithm *(Japanese)* 85−17054
Petri network simulator for computer network analysis 85−8189
phase convertors, single-to-multiphase current conversion, cct. anal. using integrated diagrams *(Russian)* 87−15870
phase correctors synthesis, Bessel polynomials based 86−26961
phase detector performance in the presence of harmonic distortion, phase error study 88−613
phase inequality of S-parameters for lossy network *(Chinese)* 85−44829
phase response determ. from amplitude 88−49938
pi-network oscillatory system, design and anal. 87−59224
picosecond pulse circuits with p-n-n^+ diodes, anal. 86−46633
PID electronic control ccts. anal., appl. to op amps *(Spanish)* 85−11023
pivoting algorithm, modified nodal approach for avoiding zero pivots *(Chinese)* 86−62331
pivoting algorithm for avoiding zero pivots in modified nodal approach 86−46429
planar multiterminal network reliability problem, Monte-Carlo algorithms 86−57531
planar network, dual theorem on the summation of return differences 85−28288
planar networks, multicommodity flow determ., polynomial-time algorithm *(Japanese)* 86−13909
plex grammars for the predicate logic programming and its application to the structural analysis of electronic circuits *(Japanese)* 88−18846
PLL ccts., second-order, synthesizer analysis appl. 86−847
PLL synchronisation determ., use of quasi-stationary method *(Polish)* 88−12257
polygonal resistors, anal. and design by conformal mapping 85−11596
polynomial algorithm, for finding fundamental set of cycles of a connected graph 85−6105
positive operators, symmetric function means, series-parallel resistor networks appl. 85−331
power cables, thermal field calc. using charge simulation and network anal. *(German)* 86−39159
power electronic circuits, sampled data modeling 86−52662
power electronic systems feedback control, optimal pole assignment 86−7884
power network, active and reactive components of current and voltage under steady-state conditions *(Russian)* 87−78071
power system characts. at load busbar, Thevenin equivalent network models 86−39097
power system computer control, network modeling, algorithmic, software design and implementation considerations 87−4313
power system interconnection, generalised Ward equivalent method *(Chinese)* 86−38991
power systems, autonomous, periodic states, analysis *(Russian)* 85−4547
Poynting's theorem and the energy-flow postulate 85−17052
pre-ordered electrical circuits, transients anal. *(Russian)* 85−49679
pulse networks with cyclic variation of interrupt freq., composite switching fn. appl. *(Russian)* 86−34498
pulse shaping networks for force-commutated power convertors, synthesis and anal. *(Polish)* 86−57731
pulse stabilisers, STSI and SIRT types, modelling and meas. of freq. characts. *(Polish)* 88−12195
pulse supply circuits for electrostatic precipitators, anal. *(Russian)* 87−10653
pulse-fed power electronic ccts., anal. using Walsh fns. 87−31701
pulsed signals of the form $\exp(-x)^2$, $\sin^2 x$ and $|\sin x|$ passage through low-Q amplifiers, anal. 86−34579
pulsed system with switch and digital filter, transient response calc. 86−57604
push-pull switched DC-DC convertor transformer, network anal. *(German)* 88−24977
PV cell circuits, anal. of load switching transients 88−43380
PWM DC/DC power convertors, transfer fn. determ. *(Chinese)* 87−73305
quadripole network theory, substitution theorem generalisation and application *(German)* 86−26967
qualitative analysis of electronic circuits based on dynamic causal stream analysis *(Japanese)* 88−6596
quasi-lumped-element 3- and 4-port networks for MIC/MMIC appls., design and anal. 85−17812
quasibireciprocal and multirate digital lattice filters, anal. and design 87−17233
radio circuits, complex envelopes method appl. area 87−13565
random resistances in electrical networks 87−5573
RC active notch filters, single grounded-resistor-controlled variable frequency, design 87−856
RC choppers, transient and steady-state processes, theoretical and expt. study 87−32029
RC oscillators, freq. stability, linear theory 86−46606
RC transfer networks with gain greater than unity, analysis and appl. *(Spanish)* 86−34953
reciprocity, multimode periodical structures 87−397
rectifier-controlled DC power supplies, unified modelling 86−56832
recursive digital filter design and analysis, rapid graphical techniques 87−32022
recursive two-dimensional digital filters analysis *(Slovak)* 88−32330
reduced Gaussian method using constant Jacobian matrix for solving network type nonlinear simultaneous equations 85−4606
reference node r model, circuit diagnosis, comments and reply 86−604
relaxation-based cct. simulator, stability *(Japanese)* 86−20161
reliability of complex systems, approx. evaluation *(Russian)* 85−5823
resistive multiport with coupled distrib. elements; delay time prediction 88−31913
resistive n-port network, realisation of tridiagonal impedance matrix 87−44448
resistive p-port networks, vector space approach 87−390
resonant cct. of 2nd order, Q-factor determ. *(Slovak)* 86−57526
review of scientific activity at Budapest University *(Hungarian)* 87−26589
RF filters, design techniques, theory 87−66311
RF power device characterisation, direct and indirect techniques 85−22232
RF power transfer, matching networks anal. and design 88−19251
RF technology, conf., Anaheim, CA, USA (Feb. 1987) 87−36340
RL circuit, switching process in the transition region from shortto intermediate arcs *(German)* 87−392

network analysis continued
RLC four-pole asymmetrical latticed circuit, immittance matrix, transformerless realisation 87−45022
RLCM circuits with perfect transformers, math. model *(Russian)* 86−66896
RMS currents calc. in networks with nonsinusoidal voltage *(Russian)* 87−50749
root sensitivity computation calc. and minimisation for analogue and digital networks 85−10912
row-to-column impedance of an $N\times M$ matrix circuit 88−31959
SC ccts., using integrators, state variable model using mixed Euler approximated differential eqn. *(Japanese)* 88−38375
Sc filters, power supply rejection ratio to clock feedthrough, linearised model 88−63786
SC filters, voltage invertor switch type for interpolating/decimating sampled signal, anal./optimisation 88−63779
SC filters low-pass all-pole low sensitivity type, design and anal. *(Japanese)* 88−32322
SC integrator-pairs with low-sensitivity to nonideal op-amp effects 88−50255
SC networks, general types, explicit formulas for anal. 88−25316
search algorithm for finding basic sets of directed circuits and all directed circuits of a digraph *(Chinese)* 87−36858
self-excited oscillators with complex reactive coupling, mutual synchronisation 86−14043
self-oscillating transducer for checking low-conductivitymaterials 85−49633
sensitivity anal., derivatives of denominator and numerator obtainment 87−10544
sensitivity anal. technique 86−46425
sensitivity analysis, efficient computation algorithm 86−62334
sensitivity analysis techniques 86−46430
sensitivity function max., theoretical anal., digital filter appl. 85−61035
series resonant convertor, steady-state analysis 86−20270
series resonant convertor with capacitor voltage clamping diodes, steady-state anal. *(Japanese)* 88−18923
series transformer-coupled network for VLF/MF band loop antenna system, design and anal. 87−68884
shielding effectiveness calc., circuit approach update 88−72574
short-circuit calculation neglecting parallel admittances and tap changer position *(German)* 85−39842
signal delay in *RC* trees with charge sharing orleakage 87−5572
signal line with mag. layer, equivalent circuit modelling 87−65624
single circuit phase network incorporating active elements 85−55005
single phase bridge type series connected invertors, EM phenomena anal. using phase space method *(Russian)* 88−43283
single-phase bridge rectifier with inductive-rectifying shaping of input current *(Russian)* 87−44539
single-phase parallel resistance-inductance circuits, force commutated SCR pairs controlled, steady state anal. 85−34949
sinusoidal oscillators in feedback control system, anal. 86−20344
six-port automatic network analyser, error analysis using computer simulation 88−15995
slapper detonator fireset cct., effect of switch resistance on ringdown characts. 87−24382
smoothing circuits, single-term Walsh series anal. 86−603
solar cell, equivalent diagram 86−33680
solid-state power convertors with source and load filters, direct soln. technique 85−11003
sophomore electric network theory, state-space models 87−52269
spanning trees in iterative contact graph composed for general cells *(Japanese)* 87−65626
stability determ. with periodically varying reactive elements 88−6636
stable modes parameters of electrical systems *(Russian)* 88−12142
stable multidimensional polynomials, continuous case 88−6589
state-space active filters, synthesis and anal. using intermediate transfer fns. 86−46970
state-variables technique for network anal. *(German)* 88−12140
static medium freq. converters, control circuit anal. *(Rumanian)* 87−51341
static state anal., comparison of integration methods 87−52258
stationary modes in electrical networks *(Russian)* 85−6102
stator winding core, cct. anal. of conductor transposition *(Russian)* 87−78587
steady state analysis of oscillatory circuits withharmonic components by Volterra series 87−539
steady state conditions, extrapolation method appl. *(Russian)* 88−24859
steady state network response to periodic PWM signals, investig. using Z transformations *(Russian)* 88−18839
steady-state mode calc. *(Russian)* 85−49680
steady-state quasi-periodic modes of operation, accelerated search 87−52263
stereo image matching method using analogy to electrical network algorithm *(Japanese)* 86−64362
stray-insensitive switched-capacitor networks, direct anal. using signal flow graphs 86−46968
structural elements of circuits, equivalent circuits and matrix algebra of equations *(Russian)* 87−36862
subresonant flyback convertor for capacitor charging 87−44583
substitution theorem, generalisations and appls. 87−394
subsynchronous convertor cascade, mathematical model *(Polish)* 87−58179
switched capacitor ccts., computer-based freq. anal. using simulation program *(Spanish)* 86−20710
switched capacitor circuits, anal. and design *(Japanese)* 86−695
switched capacitor filters, frequency-domain anal. 87−73534
switched capacitor filters, noise anal. using Z-domain models 86−34977
switched capacitor filters, signal flow graph techniques for cct. anal. and synthesis 86−1263
switched capacitor filters, transient anal. of charge-transfer error 87−45033
switched capacitor filters with nonideal operational amplifiers, anal. 88−56424
switched capacitor inductors with various types of transforms *(Slovak)* 86−46520
switched capacitor model of nonideal op-amp in two-op-amp biquad 87−5951
switched capacitor network time-invariant topology anal. 86−66998
switched capacitor networks, analysis techniques *(Croatian)* 86−8370
switched capacitor networks, direct closed-form anal. method 86−66996
switched capacitor networks, effect of simplifying assumptions *(Czech)* 87−59131
switched capacitor networks, energy losses analysis 88−24951
network analysis continued
switched capacitor networks, energy transfer, limiting conditions *(Czech)* 87−59132
switched capacitor networks, general, explicit formulae for analysis 86−62419
switched capacitor networks, generalised matrix anal. *(Bulgarian)* 85−10954
switched capacitor networks, hand anal. 87−10641
switched capacitor networks, lossy and ideal, noise anal. 87−499
switched capacitor networks, nodal anal. and synthesis using flow graphs 87−872
switched capacitor networks, passive type, wave variable anal. 86−62414
switched capacitor noise generator, config., operation and anal. *(Japanese)* 88−25040
switched-capacitor integrators, noise study using equiv. cct. and Z-domain sampling method *(German)* 85−6430
switched-capacitor network anal. with nonideal op-amps 86−41211
switched-capacitor networks, current/voltage anal. 88−50000
switching DC-DC regulators, modelling, anal. and design *(Spanish)* 86−52670
switching network with RLC linear elements, anal. 86−62413
symbolic matrix inversion based on multidimensional DFT; electronic cct. appl. 88−31684
symbolic network analysis 87−396
symbolic network functions, full and partial, and network sensitivities computation 88−49934
symbolic switch network analysis, algorithmic aspects 87−73219
symbolic-numerical analysis of electronic ccts., algorithm 87−73222
symmetrical quadripole transformations of bridges into T and Π-sections *(German)* 85−22979
symmetry-compensating devices, parameter selection method *(Russian)* 85−6108
synchronous filters, passband stability evaluation 86−34938
synchronous oscillator as synchronisation/tracking network, theoretical/expt. study and appls. 86−34601
system and network sensitivity, recent advances 85−22578
system theory, conf., Knoxville, TN, USA (Apr. 1986) 87−10035
systems and circuits with periodic parameters, anal., spectrally complex method 87−47708
systolic detection of shortest routes 87−16778
t-fault diagnosable analog systems, theoretical study 85−22584
T-periodic modes in pulse-width systems *(Russian)* 88−503
teaching circuit theory from a different perspective 88−24459
teleological anal. based on intuitive qualitative reasoning 85−17050
terminal behaviour of networks 87−395
tests for multiple and single errors, connection 86−20158
Thevenin circuit, reciprocity and power dissipation 88−6590
three-circuit autoparamagnetic network, source supply freq. excited, network anal. methods *(Russian)* 88−18838
three-phase chopper ccts. controlled by asymmetrical firing of thyristors, anal. 87−73268
three-port network characterised with S-parameters, unconditional stability, amplifier design appl. 87−52256
threshold automata, attractors, scaling laws 85−54590
thyristor convertor, three-phase supply network voltages, nonsinusoidality factor determ. *(Russian)* 85−32582
thyristorised discharger with oscillatory cct., operation in presence of higher harmonics, anal. *(Russian)* 85−21723
time responses, sensitivity calc. for extremal parameters *(Russian)* 88−31910
timer-type scalers, efficiency eval. of group-theoretical modelling *(Russian)* 87−65957
timing simulator stability, under-relaxation *(Japanese)* 86−20407
transfer functions of networks with several variable elements, characteris. approx. 87−44445
transient behaviour of electric circuits, numerical anal. *(Russian)* 85−17051
transient state electric circuit anal., review of theory and methods *(Slovak)* 85−61032
transients anal. for pulse inputs *(Russian)* 87−36865
transients calc., numerical methods 87−73220
transients in linear television sweep generators 86−27122
transistor analogue devices, stability anal. using voltage chart 86−26616
transitory recovery voltage prediction equipment in circuit testing for commutation capacity *(Romanian)* 88−60846
TV stereo and tow-tone transmission, electronic circuits anal. *(German)* 85−47625
twin-T filter, general anal. 87−52700
two graph minimum modified nodal formulation for cct. matrix 87−65619
two-dimensional circuits analysis by wave simulation 88−505
two-pole cct., equivalent impedance determ. *(Russian)* 85−21172
two-port element in network theory, concatenator *(German)* 86−52601
two-ports and multi-ports, setting up matrix equations *(Slovak)* 85−11392
two-ports with parallel-series and series-parallel interconnections, Miller theorems for anal. 87−387
two-terminal networks parameters determ., using balancing ccts. 85−54589
two-tier matrix amplifiers, noise theory and characts. study 88−25483
two-variable impedance function, state-space techniques 86−62336
unified construction of adjoint systems and networks 87−10547
variable-element networks, transfer characts. approx. *(Japanese)* 86−26966
VHF amplifier using MESFET 86−8022
VHF stereophony, electronic circuits anal. *(German)* 85−31145
via, equivalent circuit 88−49943
voltage controlled oscillator, frequency locked loop with digital signal processing *(Slovak)* 88−56498
voltage regulators, stability meas. and anal. *(Italian)* 88−12196
voltage-mode resonant push-pull convertor with mag. amplifiers, static and dynamic characts. *(Japanese)* 88−18926
vRLC networks analysis and synthesis *(German)* 86−600
waveform relaxation method, local convergence 88−38321
weighting functions in DFT/FFT analysis 88−34628
wideband 90° phase-shift networks, phase-shift sensitivity w.r.t. poles location inaccuracy 86−57523
wideband matching problem solution Youla coefficient restrictions based 88−38414
wideband microwave mixers, modelling and optimisation 88−56903
wire-efficient VLSI multiprocessor communication networks, anal. 87−65993
GaAs integrated circuit testing using electrooptic sampling 88−38760
InGaAsP distributed-feedback laser, electrical feedback and network anal. for linewidth reduction 88−40303

acceptability regions for optimum design *(Czech)* 86−606
active filter, RC, 1/3 octave, 3-section, parametric charact. anal. 85−6431
active filters, complementary transformation, group theory 86−8364
active RC networks realizing immittance function and appls. *(Japanese)* 85−17640
active three-terminal network, macromodel as RLC minimal-conductivity matrix *(Russian)* 87−17218
adjoint network computation of delays for timing verification 86−67196
analog circuit fault diagnosis with tolerance, stochastic model 85−17609
analog circuits, simulation model calibration using statistical techniques 85−17063
asynchronous machines with saturated magnetic cores, equivalent cct. parameters determ. *(Russian)* 85−16033
Belgian medium-voltage network transient recovery voltage parameters *(French)* 86−39093
bipolar semiconductor structs., 2D numerical modelling programs, electrical models parameters calc. 88−50814
black-box approach 87−31623
broadband transmission line transformer, theoretical anal. *(Spanish)* 85−7681
capacitor-filtered power rectifier with line impedance, harmonic anal. *(Japanese)* 88−18927
chaotic behaviour in elec. ccts., theoretical and expt. study 88−545
circuit analysis on IBM PC, BASIC listing 87−23867
circuit breaking arcs, small inductive current interruption, digital simulation *(German)* 85−16150
circuit theory system development, history, achievements and proposed system *(Chinese)* 85−486
circuits with discretely varying parameters, algorithmic analysis methods *(Russian)* 88−56371
CMOS oscillator, start-up time study 87−44651
combline and interdigital filters with tapped-line input, design eqn. 88−38702
composite cct. parameters, expt. and theoretical determ. *(Russian)* 86−57530
composite-type EM systems, math. model for anal. of transients *(Russian)* 87−5562
conservative parametric circuit elements energy regime *(French, German)* 86−6671
controlled rectifier with diodes, parameters determ. *(Russian)* 85−21721
DC operational amplifier stages, design 86−27101
design method 87−17389
diode-transistor ccts., one-parameter proper operation region determ. *(Polish)* 87−10630
distribution networks, power compatibility for line consumers, parameters and equivalent circuits *(Russian)* 85−59672
dual input summing/differential differentiators, active RC network config., HF tunable filter appl. 88−50246
electric circuit structural synthesis, simplification of redundant structures 87−16771
electric circuits and networks, textbook 85−60689
electrical circuits element parameters, discrete values, optimal choice *(German)* 86−62333
electronic circuits, parametric optimisation, conditional problems solution 87−52262
electronic circuits stability, parametric anal., generalised Nyquist criterion, mutual-derivative method 88−38328
evanescent-mode bandpass waveguide filter for millimeter-waves 88−966
FET small signal equivalent circuit, determ. *(French)* 88−63878
field effect transistor with P-N junction, differential parameter dependence on supply mode and temperature 85−6965
fluorescent lamp ccts., nonlinear theory for anal. and synthesis 88−18906
formulation of circuit equations 87−52267
functional paths, computer modelling 87−23887
HF bipolar transmissions under nonlinear conditions, parameters calc. 86−53601
high-order admittance ccts. for lowpass and highpass transfer functions *(Japanese)* 86−34946
IC QC, parametric identification 87−23379
ICs, microwave monolithic, distributed electrical and thermal parameters 86−53041
impulse voltage generators, pulse duration parameter calculation for Arkad'ev-Marx generator 85−647
indefinite-impedance matrix for network anal. 85−54587
inductively-coupled circuits, energy relationship anal. during transients *(Russian)* 87−44504
infinite chain networks, input resistance determ. *(Russian)* 85−6100
infinite electrical networks with finite sources at infinity 88−24953
interactive circuit design technique using optimization 88−12144
interactive optimization method for the design ofintegrated circuits *(German)* 86−26972
interconnected power systems, swing equations model, Arnold diffusion theory 85−4553
interval analysis techniques 87−59056
irregular transmission lines, matrix parameters, solutions 86−62873

network parameters continued
LF preamplifiers, configs., parameters and stabilisation *(German)* 85−6178
linear analogue circuits, parameter-value determinability conditions *(Japanese)* 87−65760
linear electric networks, noise parameters anal. 85−10944
linear ICs, analytical noise estimation *(Croatian)* 85−29265
linear network anal., metrological analysis of the chosen Polynomial signals *(Polish)* 87−10620
linear system response change, computational algorithms and appls. 85−28320
linear tuned circuit with periodic parameters, geometrical interpretation of resonances 86−20347
linear two-port network parameters derivation from cofactors of node admittance matrix *(Chinese)* 87−65761
loop resistance meas. for safety equipment testing *(German)* 86−70720
low-distortion switched-capacitor filter designtechniques using class A/B op amps 86−34967
maximal flows and all optimal solns., characterization 85−39846
microstrips, segmentation method and generalised network *(Chinese)* 88−56836
multibase composite signals, optimal synchronisation circuit design *(Russian)* 87−39812
multiple-device oscillators, FM noise anal. 87−45236
multipole or n-port network, arms admittance or impedance parameters detect. 85−49677
node conductivity matrices for subcircuits derived by method of state variables 87−59057
nonlinear active n-port circuit, large signal parameters, theoretical definition *(French)* 85−49972
nonlinear networks, Lagrange and Routh formulations set 88−44027
nonlinear time-variant networks synthesis *(German)* 86−13952
nonsymmetric bandpass filters, freq. transformation considerations for selectivity parameter minimisation 88−25304
op amp parameter improvements and trade-offs 87−37026
optimal design for electronic circuit parameters by using orthogonal array method *(Chinese)* 88−38319
parametric optimization of active filters withidentical sections 86−34982
parametric synthesis of tunable circuits 85−33621
piecewise-linear resistive networks, simplified combinatorial anal. 86−27039
planar network, dual theorem on the summation of return differences 85−28288
power network, generalised network parameters matrix refinement for electrical energy shortfall estimation *(Russian)* 87−64121
power transmission lines, double circuit with split-phase conductors, parameters determ. *(Russian)* 85−15629
pulse generator correction circuits, parameters calc. 86−20375
pulse generator with switched-capacitor cct., pulse height depend. on cct. parameters theoretical study 86−34621
R-L-diode circuit, driven, bifurcation scenario 88−544
radioelectronic ccts., adaptive optimization strategy 87−44451
radioelectronic devices, design, parameter accuracy requirements 87−62820
reduction of ccts. to equiv. multiport, using double matrix inversion technique 87−59058
reference node r model, circuit diagnosis, comments and reply 86−604
resistive multiport networks, synthesis by decomposition of arbitrary cct. matrix *(Czech)* 88−12171
resistive multiport with coupled distrib. elements; delay time prediction 88−31913
RF amplifiers, CAD, parameter extraction techniques 87−36932
RF network analysis on the personal computer 87−23871
RLC circuit, parameter-value determination using several test frequencies 85−17608
SC filters, efficient design centering for large scaleintegrated circuits by parameter transformation *(Japanese)* 86−34984
screened slotted line, charact. parameters calc. and expt. investigation of irregularities 86−20786
singularly perturbed nonlinear circuits with very large and very smallparameters 86−66989
six-port equations, exact solution 85−15000
six-port networks, optimum design criteria *(Chinese)* 87−36859
small-amplitude periodic solutions of the quadratic Lienard equation 85−44923
symbolic analysis of linearized networks containing multiport convertors *(Czech)* 85−28321
symbolic or numeric-symbolic generation method of the network functions 87−52264
telecommunications, unbalance about earth parameters 86−30201
temperature compensated quartz oscillator, transistor temperature-dependent circuit, frequency time stability 86−21932
three-phase asynchronous motor fed by variable frequency voltage supply, parameters determ. 85−32497
time-invariant networks, global state equation existence criteria 87−476
transient AC switching meas. and evaluation, parameter identification 87−31636
transistor feedback amplifiers, noise characteris. 87−44634
transistor parameter conversion 85−61048
UHF acoustic resonator equivalent cct. parameters, automated meas. and CAD anal. 86−63518
undirected network with edge capacity, edge centrality meas. *(Japanese)* 86−26958
variable-element networks, transfer characts. approx. *(Japanese)* 86−26966
voltage measurement, response errors of impulse test circuits 85−20681
W-band subharmonically pumped mixer with packaged Schottky diodes, network parameters meas. technique 86−14522
X-band mixer, embedding network parameters *(Chinese)* 87−66513

network synthesis

2D FIR digital filters, recursive type with high parallelism, synthesis using state feedback 87−45064
2D FIR filters, design using iterative procedure 87−66426
2D FIR filters, elliptically symmetric, design using McClellan transform. 87−37466
2D low-sensitivity digital filter struct., design 87−17236
2D multiplierless FIR filters, design by transformation 87−59771
2D recursive digital filters with constant group delay, separable denominator transfer function and stability 86−20723
2D recursive filter, inherently stable design from 1D filters, comments 86−20726
2D separable denominator digital filters, with min. roundoff noise, synthesis method 86−62749
2D state-space digital filters, optimal synthesis technique 86−20733
2D state-space fixed-point digital filter structs. with min. roundoff noise, synthesis 87−10986
2D zero-phase IIR filters, two-step design 87−52756
3-D separable-denominator transfer functions, balanced realisation and model reduction 88−38329
3D state-space digital filters, separable denominator, direct design 87−59751
3D-recursive digital filters with symmetry, design technique *(Japanese)* 88−70922
active circuit implementation using current conveyors 86−1241
active distributed RC network optimal design for MOS technology 86−63466
active filter circuit synthesis using universal functional *(Czech)* 87−10966
active filter design using cascaded identical low-order sections 86−14356
active filters, band-pass FDNR-derived, optimal design 87−863
active filters, gain-sensitivity product concept 87−31998
active filters, variable charact. input current harmonics 88−63794
active filters with high-Q and resistive correcting circuits, synthesis 85−34054
active low-pass RC filter design, using identical functional blocks, modem appl. *(Slovak)* 85−39961
active narrow-band RC-filters based on third order component units *(Russian)* 87−24316
active networks containing current differencing amplifiers, synthesis 86−46959
active pass-band and all-pass filters with parameter tolerances, design algorithm 87−869
active R allpass networks, synthesis 87−73525
active RC and switched capacitor filters, nodal voltage simulation *(German)* 87−66355
active RC filters, switched capacitor realisation of multiple feedback network 86−46960
active RV low-pass filter with reduced number of operational amps., LC simulation 87−849
adaptive channel equaliser with freq. sampling filter, design using least-squares method 85−36879
adaptive digital filters, for use in information meas. systems 88−4274
adaptive filter design using lattice elements as adaptation modules 87−66370
adaptive recursive filters, struct. and synthesis *(Hungarian)* 85−40189
algebraic path problem, mechanically derived systolic solutions 87−66082
algorithm for filter design with transformed variables 87−17209
algorithmic state machines based designs, use of multiplexers in their synthesis 86−57528
all-pass filter, delay equalisation 86−1202
all-pass IIR phase filter subject to prescribed error bounds, design 86−67390
alternating voltage amplifier 86−27105
amplifier and oscillator ccts., feedback analysis and design techniques, program listing 86−777
amplifier design, noise, gain and S-parameters determ. through noise figure meas. 86−62457
amplifiers, design with small offset-voltage drift *(German)* 87−529
amplifiers, S-parameters design using programmable calculator *(Hungarian)* 86−769
amplifiers with transformerless symmetric output, synthesis by signal graph flow method *(Slovak)* 87−37018
analog circuit design based on neural networks 88−49945
analog ICs, design centering using spherical surface random numbers 88−57712
analogue band-pass filter, fully integrated, 10.7 MHz, design, expt. evaluation 86−62718
analogue circuit design, investigating the three power storage proportional signaltransmission with frequency function *(Hungarian)* 86−66897
analogue/digital circuitry, test oriented cct. design *(German)* 85−22217
application-specific ICs, design 87−38407
arbitrary digital transfer functions synthesis using allpass-based structures 87−10978
arc steel-melting furnace, electric circuit design method 85−44315
ARMA approx. digital filters for stationary stochastic processes, synthesis method *(Japanese)* 87−5975
artificial nonuniform transmission line with distortionless property, filter synthesis 87−45013
autonomous elec. networks, CAD 86−34453
axially-symmetrical capacitors with arbitrary capacitance variation, design 86−14570
balanced realization of orthogonally symmetric transfer function matrices 88−6591
balanced switched capacitor all-pass biquad topologies, design aspects 86−62705
band-pass Butterworth filter, 20-120 Hz, design and applic. to seismic data 85−49967
band-pass filters, generalised synthesis method 86−20677
band-pass RC filters synthesis with arithmetic symmetrical frequency charact. *(Slovak)* 88−12504
band-pass switched-capacitor filters, stray-insensitive type using fully balanced immittance convertors, synthesis method 86−41230
band-stop and band-pass filters with synthesized inductance *(Czech)* 88−70900

network synthesis continued
bicriterion design centering using fuzzy sets and differential sensitivity 87−23809
bilinearly transformed all-pole analog filters, switch capacitor synthesis *(German)* 87−66360
binary addition represented by bit vectors 85−33833
bipolar and MOS power transistors, modelling for circuit design *(Portuguese)* 86−15110
bipolar transistor paralleling, design 86−62448
biquadratic filter section, general type, design using only transconductances and grounded capacitors 88−56749
biquadratic stray insensitive switched capacitor filters, design using unit delays and finite gain amplifier 86−1251
biquadratic transfer fn., realisation using single current conveyor, filter appls. *(Japanese)* 88−38623
biquads, fully differential designs, use of bilinear integrator 87−10962
bireciprocal wave digital filters for high sampling rate appls., design 87−17235
bivariate lossless two-ports, scattering transfer matrices factorisation for cascade synthesis 85−22580
branched matching networks synthesis 87−52259
bridge-crossed networks, active synthesis modelling 87−59714
broad-band matching with maximally flat group delay characteristics 87−59053
broad-band microwave amplifier design, bilinear transformation appl. 88−50351
broadband FET circuits designs, comparison 87−37572
built in circuits for improvement of diagnostics for discrete devices *(Russian)* 86−26959
Butterworth & Thomson poles, interpolation *(Slovenian)* 88−500
C-2C ladder-based D/A convertors for PCM codecs, design methodologies 88−63757
canonic wave digital filters, design using Brune and matched four-port adaptors 87−59735
canonical digital ladder filter synthesis by continued fractions 85−23039
canonical realisations for analogue and digital ccts., n^{th}-order transfer functions 85−17062
cascade auxiliary networks for matched freq. depend. compensation of amplifier nonlinearities *(German)* 87−65894
cascade switched capacitor biquad building blocks, optimum design using linear programming 86−62708
cascaded high-precision composite op-amps, design 87−31723
CCD based nonrecursive filters, design criteria 87−66326
channel graphs, component-level redundancy vs. system-level redundancy 86−20159
circuit design with Lotus 1-2-3 86−7888
classical filter design methods 85−6412
CML for high-performance application-specific IC system 87−5807
CMOS current mirrors, near optimal trade-off between active area and bandwidth 86−62456
CMOS elliptic low-pass switched capacitor ladder filter, 1 MHz cutoff freq., design 87−24324
CMOS multistage decimation-interpolation filter, design 87−59761
coaxial AC bridges, book 85−39419
coherent-weighted processing filters with real weighting factors 87−55085
coloured noise generators 88−16224
combinational circuit synthesis cost minimisation, Boolean eqn. system soln. method. *(Spanish)* 88−63439
combinatorial cct. synthesis for short-cct. fault testing 85−17265
combinatorial ccts., easily tested, synthesis method 88−32088
commercial loudspeaker systems, peak current requirements 87−77037
compensated switched-capacitor N-path filters 88−56764
composite current followers with compensating impedanceconverters 86−20709
conference on cct. theory and electronic networks, Poznan, Poland (Oct. 1985) *(Polish)* 86−45942
connected sum of two knots, realization 86−66900
constant-resistance distributed-coupled line networks synthesis, periodic impulse train stationary responses 87−44508
continuous-time system, chaos generation using binary hysteresis 87−10543
continuous-time two integrator loop operational transconductance amplifier filter structs., generation method 88−70894
controlled structure formation, optimization andevolution 85−54592
correction formula and LTE-estimation for trapezoidal rule 87−65663
cyclic codes, hardware design from a software designer's viewpoint 85−28292
DC arcs, equivalent circuits synthesis, math. modelling based on MHD description of plasma *(Russian)* 87−32754
DC operational amplifier stages, design 86−27101
DC-DC convertor with voltage resonant switching mode, anal. and design *(Japanese)* 88−18925
DC-DC PWM converters, topological constraints 88−70529
DC-DC switching regulator design course 87−30841
decomposition of system evaluation, functional reliability utilisation 86−291
design centering, stochastic approx. theory *(Chinese)* 86−62330
design centres for semi-custom-IC design, gaining CAE experience 85−23863
design methodology 86−7909
design-for-testability technique, selection considerations 88−70414
dielectric periodic leaky-wave antennas, microwave network design 87−27021
differential charge-domain bilinear-*Z* switched-capacitor pseudo-*N*-path filters, design and anal. 88−56747
differential operational amplifiers with RC networks in negative feedback loops *(Russian)* 85−593
digital bandpass, rejector and high-pass filters design 87−45094
digital bandpass filters with linear phase characteristic 86−27479
digital bridge filters, design using Siemens Venus 1 ASIC *(German)* 88−38628
digital circuit design using calculus 88−63608
digital circuit synthesis using Petri net model *(Polish)* 87−31631
digital decimation filter for ADM-PCM signal conversion, design and cct. realisation *(Czech)* 87−10995
digital filter design, Kaiser window for spectral anal. 85−11426
digital filter realisation by passive network simulation 88−63799
digital filter synthesis approach based on generalised-immittance convertors and resistors 88−50259
digital filter synthesis based on LC filters node equation simulation 86−67362

network synthesis continued
digital filter with finite-band approx. to constant amplitude and delay, design techniques 86−67408
digital filter-demodulators, pyramidal structure synthesis 85−55034
digital filters, 3D type, design using 2D rotated filters and stabilisation procedure 88−25331
digital filters, all-pass, with arbitrary group delay charact., design 86−57974
digital filters, canonic ladder realisations using continued fraction expansion 85−17726
digital filters, design prototype 87−59724
digital filters, group delay functions 87−47803
digital filters, leapfrog type, delay free loop elimination using redundant unit elements *(Japanese)* 88−25342
digital filters, lossless synthesis of all-pass filters 85−17741
digital filters, low roundoff noise networks design 85−46844
digital filters, low sensitivity second order structs. amenable to error-spectrum shaping 85−46838
digital filters, one-dimensional, technical realisation *(Slovak)* 87−32008
digital filters, recursive Nth-band, design and props., appl. in sampling rate alteration 86−62744
digital filters, recursive type derived from analog reference transfer fns., realisation technique 87−24347
digital filters, second-order state-space structs. with low roundoff noise 85−45176
digital filters with finite length coefficients, synthesis 85−55035
digital lossless discrete integrator ladder filters, low-sensitivity, with elliptic magnitude response 86−62742
digital oscillator having low sensitivity and roundofferrors 86−40940
digital parametric filters, synthesis, review 87−24339
digital recursive rejector filters, transient conditions operation, synthesis and anal. 86−27482
digital signal processing, discrete filters design *(German)* 87−889
digital signal processing and simulation *(German)* 88−40893
digital velocity filters, for three-dimensional seismic signals 86−6087
direct frequency convertor fed asynchronous motor, phase currents forcing system synthesis *(Polish)* 87−15845
directed switching networks theory 87−52324
dissimilar n^{th} order symmetric sign patterns, similarity of graphs and enumeration 85−28116
distributed filters, exact synthesis, cascade factorisation procedure 88−32398
distributed RC structures 88−6960
doubly-terminated multivariable network synthesis using polynomial partial derivatives 85−40159
ECSRL networks composed of switches and linear RLC elements, formulation and soln. 87−59127
electric circuit structural synthesis, simplification of redundant structures 87−16771
electrical network synthesis, book 85−5695
electronic circuits optimisation in frequency domain, mathematical model 86−13908
electronic stabilising circuits, fold back behaviour calc. *(German)* 86−20160
elliptic band-pass switched capacitor filters, reduced capacitor spread synthesis algorithm 87−66327
elliptic filter approx. and synthesis, computational aspects 86−57911
elliptic filters, dynamic range enhancement for active realisation 86−57933
energy processing network synthesis, canonical approach 87−388
even-order Chebyshev filter synthesis with same load resistances, rapid method 86−46950
fast consequential Sieve method and it's application innetwork synthesis *(Chinese)* 85−49681
fast logarithmic amps., design and realisation *(German)* 86−20322
fault tree synthesis, automatic *(German)* 86−7885
feedback ccts., topological synthesis *(Russian)* 88−50920
feedback control loops design and anal. using K-factor 88−12236
filter, low-pass switched-capacitor ladder type, with digitally programmable capacitor arrays 87−17222
filter attenuation characteris. improvement 87−45103
filter bank design, analysis/synthesis, time domain aliasing cancellation based 87−12979
filter banks analysis and synthesis, sub-band coding and transmultiplexing 87−45006
filter design, all-pole transfer functions with upper-bounded-Q poles 86−1198
filter design using transformed variables, polynomial operations concept 86−57923
filter impulse response, time domain synthesis using TBT polynomials *(Japanese)* 85−903
filtering and Zener diode circuits, design *(German)* 86−34949
filters, complex-coefficient polynomial splitting technique 86−34435
filters, network theory approach, practice 88−12479
filters design, using analytical and optimisation methods 86−1200
filters efficiency synthesis and investig., for coherent weighted processing 87−19679
filters for filter banks, new aspects 87−10982
filters with a regular structure 87−52724
FIR digital filter banks with flat composite response, design methods 85−46842
FIR digital filter design, optimal window transforms 87−59758
FIR digital filter design using prefilters based on Chebyshev polynomials 86−62740
FIR digital filters, interpolated type based on cyclotomic polynomials, design procedure 88−19281
FIR digital filters with complex coeffs., simultaneous design in both magnitude and phase *(Japanese)* 88−50272
FIR filter design with minimal delay 87−10996
FIR filters, analytical method for synthesis 86−27483
FIR filters, maximally flat, design using Bernstein polynomial 88−25335
FIR filters, narrowband linear and minimum phase, design 87−59757
FIR Hilbert transformers for DM signals, design method 86−34993
FIR-filters, characteris. calc., Walsh functions appl. 87−55084
flat-group delay filters with prescribed amplitude charact., design technique 86−1205
floating negative immittance convertor, network realisation and synthesis appl. 88−871
floating network element synthesis using current conveyors *(Japanese)* 87−24320
flow networks with min. edge capacity sum, construction with min. number of edges 86−62343

network synthesis continued
four-terminal networks, quasi-regular connections 87−44447
frequency networks synthesis using multilevel pulse trains 86−14031
frequency selective surface design, appl. of Foster network synthesis 87−26927
functional immittance conversion with voltage/current followers 87−52729
functions with double orthogonality, signals, networks, and antennas synthesis 87−51915
gate turn-off thyristors, design aspects of appl. 85−45667
general tridiagonal matrices, explicit inverses, calc. and appls. 86−52328
general-purpose CAD programs, nonlinear algebraic equations 86−7894
generalized multi-loop feedback switched-capacitorstructure, filter design and sensitivity anal. 86−57957
global optimisation for electronic cct. design, comments and reply 88−6593
graph theory, research developments and engineering appls. 86−338
graphic equalisers, design procedure 87−73539
gyrator, summing analysis of cascade matrix *(Czech)* 86−41224
gyrator-type bandpass filters with parallel resonatorconnection 86−14345
gyrators, loss free realisation using switched mode ccts. 88−32315
harmonic oscillators, extended range, design with single tuning control 86−62485
harmonics based bandpass filter design 87−66315
Hermite line, design formulas for impedance matching 86−64029
HF antennas, matching network synthesis, real freq. method 87−27030
high-fidelity finite-impulse-response filter design, history 1870-1908 87−895
high-order parametric low-pass filter *(Croatian)* 87−17203
horizontal deflection circuit, design *(German)* 88−12141
Hurwitz filter-functions, higher-order type, generation procedure, CAD appls. 86−1204
HV impulse generator circuit synthesis for CAD *(Russian)* 85−17210
IBM PC products for circuit CAD 85−54595
IC statistical analysis and modelling 87−46107
ideal coils on mag. network, algebraic theory 86−14578
ideal convertors approximation, using transformer quintuple port *(Czech)* 87−59704
ideal op-amp ccts., topology based synthesis using op-amp relocation 86−57965
IIR digital filter design using output error method with adaptive compensator, charact. *(Korean)* 88−12527
IIR digital filters synthesis derived from single channel AR lattice network 85−955
IIR digital phase networks, linear programming design 87−386
IIR filter design, Hankel approximation methods 87−59764
IIR filters, zero phase design 87−59774
IIR filters with finite wordlength coefficients, design 87−12988
IIR noncausal filters, freq. domain design using multiple criterion optimisation 85−45177
IIR recursive digital filters realization using state feedback 85−34062
IIR-type discrete-time filters, general analogue-to-digital transformation 86−34496
immittance converter for switched capacitor filtersynthesis 86−62709
impedance equalizing networks, design 87−24378
impedance matching and maximum power transfer theorem in cct. theory 86−599
in-phase crossover network design 87−24303
indeterminate nonlinear systems of algebraic eqns., algorithm for extreme nonlinearity 87−44223
industrial power networks polyoptimal synthesis *(Russian)* 87−42450
infinite resistive grids synthesis, appl. to inverse problem in geophysical exploration 86−6088
infralow-frequency corrector stages with heat-dependent elements, second-order transfer functions *(Russian)* 86−41216
injected numerator ARMA lattice filter synthesis 85−17710
interactive circuit design technique using optimization 88−12144
interconnection electrical phenomena analysis *(Italian)* 86−46470
interconnection networks, optimal book embeddings of the FFT, Benes, and barrelshifter networks 86−66683
interconnection networks based on sequence graphs, routing and expansion 88−12133
interval analysis techniques 87−59056
inverse topological transformation of electric circuitsemploying operational amplifiers 86−46977
invertor dynamic characteristics correcting networks synthesis *(Russian)* 85−60288
irrational immitance and fractional-step delay operator, unified synthesis approach 86−57987
irrational immittance synthesis 86−40816
ladder-type networks, extended definition of cumulants 85−905
large electrical circuits with discrete components, cut algorithm for design centering 85−17065
large fractal-graph networks 87−65630
leapfrog digital filters, design method based on distrib. cct. simulation *(Japanese)* 85−23042
linear discrete filters design with constant parameters 87−17206
linear phase digital filters, synthesis using freq.-response masking approach 86−46998
linear phase filters, recursive design algorithm 87−59695
linear-phase digital and nonreciprocal lumped filters with stable transfer fns., analytic design 87−17248
linear-phase FIR eigenfilters, least-squares type, design method, Nyquist filters appl. 87−32010
log-periodic antennas of specific geometry, synthesis 86−42994
logic circuits, designing in silicon 86−8199
logic expressions, algebraic operations 88−31915
lossless cascade networks, inverse scattering and filter synthesis 87−65632
lossless discrete integrator digital filters, synthesis based on symmetrical lattice network simulation *(Japanese)* 88−50269
lossless discrete integrator digital ladder filters and SC filters *(Japanese)* 88−50270
lossless discrete integrator ladder digital filter, realisation *(Japanese)* 88−50271
lossless discrete integrator ladder filters, exact discrete time synthesis 86−62683
lossless feed network synthesis method for multiple beam antenna arrays *(Japanese)* 85−62932
lossless floating immittance realisation using current conveyors 87−45028
lossless LC one-port ladder network, discrete time reactance functions synthesis 86−62677
low sensitivity switched capacitor filters with maximum signal handling capability, design technique 87−66367

network synthesis continued
low-noise microwave amplifiers design, structural method appl. 85−61131
low-noise power-efficient oscillators, theory and design 86−62472
low-pass active filters, multiple real root maximally flat design 86−62690
low-pass switched-capacitor ladder filters, very low sensitivity, design techniques 87−59709
low-sensitivity digital filters based on zero extraction, synthesis procedure 88−25334
LSI mask pattern design, algorithm for resizing polygonal regions 85−12340
magnetic coils synthesis, curve fitting winding patterns 85−17900
matched feedback amplifiers, synthesis and gain-bandwidth props. anal. 87−44622
matched filter for LFM signal 87−45002
matched slope-equalizer, design 87−956
matched symmetric five-port junction synthesis from scattering matrix 87−5563
matching network design for wideband microwave amplifiers, computer-aided synthesis tools 87−5692
maximal power transfer to resistive load 85−22576
maximally flat matching of complex loads using simple circuits 87−45019
measuring ccts. with passive voltage/current dividers, anal. and synthesis *(Russian)* 87−63467
memory organisation and interconnection networks for array processing 86−26969
MIC broadband multistage amplifier synthesis 86−27634
microstrip matching networks, Q factor 87−5565
microwave amplifiers, component centering and tolerancing *(Japanese)* 87−73663
microwave cct. design, superlinearly convergent minimax algorithm 86−27573
microwave cct. design for 88−32408
microwave ccts., CAD techniques *(German)* 87−11029
microwave circuit design, superlinearly convergent minimax algorithm 86−14488
microwave FET amplifiers, low-noise cooled, design method 88−56952
microwave oscillator design techniques 87−65926
microwave π-hybrid Butler matrix, generalised design method *(Chinese)* 87−37523
microwave-amplifier performance, radiation effects 88−44369
military network media, diversity and design aspects 86−23290
minimal realisation of symmetric transfer-function matrix using expansion 85−44578
minimum quantization error digitized filter using floating-point arithmetic, state-space synthesis 85−17738
minimum statistical sensitivity structs., synthesis method *(Japanese)* 88−38332
MMIC, measurement as basis of good design *(French)* 88−63881
modelling and simulation 88−70457
monolithic distributed RC filters, SPICE modelling and design considerations *(German)* 87−66361
monolithic quartz filters, precision, design and manufacture 88−33463
MOS circuit design, switching network logic synthesis, unified theory 85−35181
MOS transistors mismatch in precision analogue cct. design, charact. and modelling 87−18320
MOSFETs, parallel connections *(German)* 87−24376
MTI filters, staggered PRF, with complex coeffs., anal. and design 85−47600
multi-output digital lattice filters, design method and appl. to branching filters *(Japanese)* 88−38638
multiamplifier networks, Fliege's complementary transform., special cases 85−922
multiband matching networks synthesis 88−38330
multicascaded simple-mode fibre optic transversal filters 87−49086
multicontact function synthesis using explicit designation 86−698
multidimensional digital filters, single-input single-output, optimal realisation 87−59775
multidimensional digital filters with closed loss behaviour, design technique 87−45084
multidimensional lossless two-ports, factorisation of scatt. transfer matrices 86−1189
multidimensional lossless two-ports, synthesizability 87−65627
multidimensional lossy impedance synthesis, generalized Richard's theorem 85−22581
multifeedback active filer synthesis, based on LC filter simulation 87−850
multilayer network complexity estimation on hybrid timer-scalers *(Russian)* 88−31909
multiple coupled microstrip ccts., SPICE model for CAD anal. program appls. 86−26997
multiple-feedback systems, space of real-coefficient solns. 87−402
multiple-loop-feedback switched-capacitor filters usingapproximating biquads, design technique 86−34965
multiport network cascade realisation via factorisation of rational matrix functions 87−405
multiport network synthesis, identification of non-common node ports 88−56374
multiports, voltage matrix fraction descriptions synthesis with cascade or parallel active RC networks 87−37445
multirate FIR digital filters with arbitrary passband, design method *(Japanese)* 88−32356
multistate lumped element RF amplifiers, design aspects 87−37038
multiterminal networks circuit synthesis procedures for coordination of operating conditions *(Russian)* 88−12143
multivibrators, circuit-design optimisation 88−19005
n-port networks, invariance of scatt. matrix *(Chinese)* 86−62332
narrow-band FIR band-pass digital filters with reduced arithmetic complexity, design 87−45087
networks and systems, multivariable, design and implementation problems 86−62341
noise optimization of switched-capacitor biquads 87−52721
noise reduction circuit, design *(German)* 86−68794
nomograph use in filters design 86−1194
noninteger order integrator in continuously variable form, synthesis method 86−67304
nonlinear adaptive filters, numerical design 87−27457
nonlinear fault diagnosis with multiple test vectors, diagnostibility criterion 86−52602
nonlinear l_1 optimisation algorithm for design, modelling, and diagnosis of networks 87−36609

network synthesis continued
nonrecursive digital filters with delta modulation, design 87−52744
nonrecursive digital rejection filters for moving-target selection systems, synthesis 86−35020
nonsteady state multiphase circuit design using differential equations *(Russian)* 87−5567
nonuniform transmission line couplers, synthesis procedure 86−27569
Nyquist cascade form digital filters with zero ISI, design method 86−67361
one-port and multiport equiv. ccts. synthesis method for power system transient anal. 86−50784
one-ports realising Hilbert transform, synthesis, appl. in reactive power meter for nonsinusoidal systems *(Polish)* 86−57927
operational amplifiers, low-noise systems design *(Spanish)* 86−7882
optimal design for electronic circuit parameters by using orthogonal array method *(Chinese)* 88−38319
optimal radial network synthesis problems 86−34434
optimal radial networks synthesis, approx. solution 86−57533
optimisation of ccts. using a combined deterministic and statistical search *(German)* 87−65628
optimisation techniques, for microwave CAD and modelling, state of the art review 88−31930
optimum synthesis of surface acoustic wave filters, using Chebyshev approximation 87−52743
orthogonal digital filter design using classical cct. theory approach *(Chinese)* 87−66398
oscillator as a reflection amplifier: anintuitive approach to oscillator design 87−990
output filter design for HF switch mode power supplies 87−31986
parallel analogue banks, transfer fn. anal. and design method 87−24302
parallel implementation of Strassen algorithm 87−31630
parallel processing, conf., Pennsylvania, USA (Aug. 1985) 86−26505
parallel-resonant convertor with LCC type commutation, design method 88−24962
parallel-type broadband diode frequency converters, matching circuits design 87−59809
parameter acceptability regions for optimum design *(Czech)* 86−606
parametric current source ccts. development using equivalent voltage source theorem *(Russian)* 85−61029
parametric synthesis of tunable circuits 85−33621
passive electronic subcircuit, nonidentical fillings of structural graph 87−45018
passive network structure and parameter reconstruction from state describing differential equations *(Russian)* 87−5944
passive networks with lumped/transmission line elements, two-variable positive real fn. algorithm 86−57541
passive two-pole synthesis, combinatorial approach 86−46955
passive two-terminal networks synthesis, combined approach *(Russian)* 85−61030
PCB design for EMC 88−20946
phase and magnitude compensated inventing amplifiers, design 86−62454
phase correctors synthesis, Bessel polynomials based 86−26961
pi-network oscillatory system, design and anal. 87−59224
planar logic schemes with external access, realisation 85−39988
polynomial algorithm, for finding fundamental set of cycles of a connected graph 85−6105
polynomial microwave filters, synthesis 88−19252
positive-impedance convertor for HF appls. synthesis using op-amps 85−40167
power amplifier, class F, with quarter-wave transmission line, synthesis 86−799
programmable frequency synthesizer, using analogue and digital boards *(Spanish)* 86−34598
programmable switched-capacitor low-pass ladder filter in CMOS technology, synthesis and characts. 87−45058
pseudopassive two-port adaptor for floating-point WDFs 87−17234
pulse shaping filters having small intersymbol interf., design method 88−6958
pulse shaping networks for force-commutated power convertors, synthesis and anal. *(Polish)* 86−57731
pulsed circuits with thermal interactions 85−22702
pulseshaping filters with small intersymbol interf., closed form formulae for design 88−63771
quadrature mirror filter banks, alias-free, synthesis 88−25333
quadrature mirror filter design for an arbitrary number of equal bandwidth channels 85−45178
quasi-Jacobi matrices, RC networks and Aizerman'sconjecture 86−608
quasibireciprocal and multirate digital lattice filters, anal. and design 87−17233
quintuple-port active filters synthesis *(Czech)* 88−6967
radio receiver, noise figure tutorial 87−41195
radioelectronic ccts., adaptive optimization strategy 87−44451
radioelectronic devices, design, parameter accuracy requirements 87−62820
rapidly convergent approx. method 87−403
rational transfer functions containing two kinds of independ. variables, methods of realisation *(Japanese)* 87−383
RC active filter using operational amplifier pole, design *(Chinese)* 86−62678
RC active notch filters, single grounded-resistor-controlled variable frequency, design 87−856
RC oscillators, extended-range parallel-path type, synthesis using state-variable techniques 86−8035
RC polyphase networks, cascade synthesis *(Chinese)* 87−66342
RC-oscillators with single control resistor, synthesis 85−61150
real coeff. digital filters, implementation using complex arithmetic 87−45085
rectifier circuit configurations, high performance 85−34095
recursive digital filter design and analysis, rapid graphical techniques 87−32022
recursive digital filter with equiripple magnitude and group delay 85−25100
recursive digital filters with special form coefficients, transfer functions synthesis 87−24345
recursive quadrature mirror filters design for sub-band coders 85−25019
reliability, synthesis problems, vulnerability criteria 87−5273
reliable network design, reduction to graph extremal problem, validity 88−24858
resistive p-port networks, vector space approach 87−390
RF filters, design and appls. 87−66312
RF filters, design techniques, theory 87−66311
RF filters for advanced digital modulation systems 87−24307
RF power transfer, matching networks anal. and design 88−19251
network synthesis continued
RLM-immitances, network transformation for active-RC realisation *(German)* 86−34964
ROM addressing circuits synthesis for sequential machines *(Polish)* 86−52843
S-transformation by signal source transfer *(Russian)* 85−39843
s-z transformations, parametric and high-order in discrete network synthesis *(Czech)* 87−52254
SAW filter design using convolution techniques, noniterative method 87−60737
SAW filters, suboptimum synthesis method 87−17210
SC bilinear band-elimination ladder filters with extended biquad, design method 88−38613
SC biquads, design technique for improved capacitor area efficiency 88−25317
SC biquads, parasitic insensitive, design optimisation technique 88−12499
SC ccts., using integrators, state variable model using mixed Euler approximated differential eqn. *(Japanese)* 88−38375
SC filters, ladder type, lossless discrete integrator config. with single op-amp, design method *(Japanese)* 88−50249
SC filters, low sensitivity type, design method *(Japanese)* 88−38624
SC filters, lower-upper decomposition design technique 88−25318
SC filters, offset compensated, strays-insensitive, synthesis with full clock period-held output voltage 88−50252
SC filters low-pass all-pole low sensitivity type, design and anal. *(Japanese)* 88−32322
SC filters synthesis using voltage and charge variables 87−73527
SC ladder filters with offset-insensitive time-continuous feedback integrators 88−12498
SCNSOP, switched-capacitor cct. simulation and optimisation program 86−34448
second-order IIR digital filters with min. coeff. sensitivities, synthesis method *(Japanese)* 87−24356
second-order state-space sections, min. sensitivity based design 85−10909
second-order state-space structs. with low roundoff noise, synthesis technique 86−35007
second-order state-space technique for circuitsdesign 87−861
selective linear phase wave digital filters, design 87−66429
self-excited oscillators with complex reactive coupling, mutual synchronisation 86−14043
semiconductor devices and struct., equivalent circuits synthesis 87−18052
semiconductor structures with p-n junctions, simulating-cct. synthesis *(Russian)* 85−29176
Semicustom-IC project, analog/digital system using CMOS standard cells and switched capacitor filter technology, partitioning analysis 85−7080
separable-denominator 2D digital filters, minimum round-off noise design 87−45067
series feedback amplifier and oscillator design using graphical techniques 85−39928
shift-varying filters, design and implementation 87−19663
short circuits in combinational networks *(Russian)* 87−52253
sine wave switching power supply , design, constant current, laser appls. 88−70509
single op-amp single resistance controlled oscillator, identification and synthesis method 85−11085
single-amplifier switched-capacitor filter synthesis 86−67307
single-pair switching networks minimisation, appl. of truth tables and zero-paths 86−697
single-phase bridge rectifier with inductive-rectifying shaping of input current *(Russian)* 87−44539
single-transistor emitter follower circuit design 86−27096
six-port networks, optimum design criteria *(Chinese)* 87−36859
small signal amplifiers, design 87−65927
Smith Chart calcs., BASIC program for Commodore 64 microcomputer 86−27001
Smith charts speed design of feedback amps 85−40231
smoothing circuit synthesis for devices measuring radial velocity of moving objects *(Russian)* 88−29654
sneak path detection in transistor networks 86−41808
space localisation method appl. 86−62344
space rotation methods for frequency-time characts. 85−17056
stable discrete systems polynomials, Z-domain continued fraction expansion 86−20156
state variable switched capacitor filters, polynomial transform synthesis 86−57964
state-space active filters, synthesis and anal. using intermediate transfer fns. 86−46970
state-space digital filters, unified design method using system balancing concept 87−27485
state-space digital filters structs., synthesis procedure 86−62770
static power frequency convertors synthesis method 87−52373
static voltage source invertors, computer aided analysis and design 86−7895
stray-insensitive high-order SC filter synthesis, total capacitance minimisation 87−885
stray-insensitive switched-capacitor circuits, transfer functions realisation, synthesis 87−73263
stray-insensitive switched-capacitor networks 86−46968
stray-insensitive switched-capacitor two-port network design 87−845
structural analysis for instantaneous waveform by natural observation method *(Japanese)* 87−32003
switched capacitor active filters, synthesis using Z-domain equiv. admittance approach 87−31992
switched capacitor circuits, anal. and design *(Japanese)* 86−695
switched capacitor fibres, design and appls. *(Spanish)* 85−55019
switched capacitor fillers, state-variable type, design using polynomial transformation 87−17225
switched capacitor filter, recursive type using op-amp integrator, design technique 87−52712
switched capacitor filter CAD, synthesis program and layout generation methodology 87−888
switched capacitor filter design 87−45062
switched capacitor filter design using digital recursive filter techniques 87−73540
switched capacitor filter synthesis with generalised convertors 87−881
switched capacitor filters, layout automation 86−62707
switched capacitor filters, linear transformation type, design method *(German)* 87−66358
switched capacitor filters, low passband sensitivity realisations using Darlington-Cauer transfer fn. synthesis 85−55013

network synthesis continued
switched capacitor filters, minimum phase stable type, design and cascaded biquad implementation 85−49986
switched capacitor filters, multirate voltage inversion switch type, design aspects 87−24323
switched capacitor filters, non-ideal op amp realisation, general synthesis procedure 87−31995
switched capacitor filters, Nth order transfer fn. realisation using single multiplexed op-amp 86−57958
switched capacitor filters, second-order, realisation using unity-gain amplifiers 86−34980
switched capacitor filters, signal flow graph techniques for cct. anal. and synthesis 86−1263
switched capacitor filters, single-amplifier config. synthesis technique *(Japanese)* 86−14361
switched capacitor filters in MOS VLSI technology, optimal automated design 86−1249
switched capacitor FIR filters, design technique *(German)* 87−66359
switched capacitor impedance convertor, general type, construction and expt./theoretical study 86−62710
switched capacitor ladder filters, cellular parasitic insensitive type, systematic design technique 87−10963
switched capacitor ladder filters, parasitic compensated, synthesis method 86−1223
switched capacitor leapfrog ladder filters, parasitic-insensitive realisation using reduced number of op amps 87−5954
switched capacitor low-pass filter, design *(Spanish)* 85−61062
switched capacitor networks, nodal anal. and synthesis using flow graphs 87−872
switched capacitor networks, stray-insensitive single op-amp configs., generation, classification and design 86−62706
switched-capacitor approach to cct. synthesis for signal processing appls. 85−39895
switched-capacitor circuits, impedance functions, systematic realisation *(Japanese)* 88−70902
switched-capacitor digital filters, design and realisation 87−5984
switched-capacitor filters 86−27462
switched-capacitor filters, design concepts in Europe from 1960 85−40173
switched-capacitor filters synthesis using nonideal immittance converters 87−52736
switched-capacitor networks, signal-flow graph representation, circuit design 87−45025
symmetrical polynomial two-port network synthesis, simplification 85−49676
synchronous rejection filters, design 86−46980
synthesis of autosynchronous combination circuits *(Russian)* 85−61192
system theoretical consideration on N-point Pade approximation *(Japanese)* 85−40160
target enhancement, constraint optimisation filter design 87−27441
temperature-compensated quartz oscillators, parametric synthesis 86−21927
test-friendly circuits, mechanical design *(German)* 85−22574
thermal network identification and modelling basedupon digital filter synthesis procedures 86−52968
threefold Campbell-Bartlett's theorem for quadripole networks *(German)* 86−598
transconductance-grounded-capacitor filters for VLSI implementation, signal-flow graph design method 87−73530
transformerless three-terminal networks 85−491
transistor and thyristor two-port ccts., synthesis method 88−24950
transistor circuits 87−5649
transversal filters, structural synthesis 86−62664
triode valve amplifier, design 87−5690
true network with capacity restrictions, design, heuristic algorithm *(Spanish)* 85−57175
tunable bandpass active R-filter 87−52725
two dimensional recursive digital filter design with constant group delay and separable denominator transfer function, stability test 85−46850
two-dimensional digital filters with complex coeffs., design methods 86−67364
two-dimensional digital sequency domain filters synthesis 85−46854
two-dimensional filters stability, state-space techniques 87−45007
two-dimensional FIR and IIR filters, design technique 85−45179
two-dimensional recursive digital filters, design without multipliers 85−46852
two-dimensional wave digital filter design using spectral transformations 85−46851
two-way circuits with inverse transmission properties 85−6421
UHF push-pull amplifiers, high-power pulsed type, design considerations 88−578
unified linear analysis of optics and electronics, transformation 85−46210
uniform DFT parallel quadrature mirror filter banks, theory and design 87−17249
unsymmetrical quadripoles and their transformation *(German)* 86−597
VAr compensation and harmonic-free power conversion systems, modeling and synthesis 87−52351
variable active RC filters with distributed elements, design 86−46979
variable-parameter cct. design, appl. of quantitative synthesis theory for uncertain feedback systems 86−26968
VCOs evaluation for system design 86−20846
violation of port conditions in the interconnectionof multiports 86−7881
VLSI, design for testability *(Japanese)* 85−61996
VLSI circuit design course using standard cells *(German)* 86−57123
VLSI design for testability, book contrib. 87−67369
VLSI design with multiple active layers 86−7880
VLSI layout wirability, unified approach 87−36880
voltage computation of diodes in series *(German)* 85−55773
vRLC networks analysis and synthesis *(German)* 86−600
waveguide matching network synthesis calcs. 88−19326
wide-range oscillator systems, variable capacitor tuning, mutual compensation synthesis method 85−11088
wideband filter with constant group delay, least-squares approximation appl. 85−22986
wideband matched-impedance amplifiers in 1 μm NMOS, low noise design and cct. config. 88−18935
wideband phase-shifters with constant phase shift, synthesis using switched channels 86−62790
wideband variable equalisers, synthesis method, approx. transfer functions 85−36878
Wien-bridge RC oscillator, parameter optimisation *(Polish)* 85−620
network synthesis continued
yield gradient estimation for truncated densityfunctions and related topics 86−62339
yield maximisation, heuristic algorithms *(German)* 87−65629
yield optimisation, maximum profit approach 86−62340
Z-domain continued fraction expansions, discrete system stability testing appl. 86−301
z-domain switched multi-input blocks and their use in the synthesis of switched-capacitor networks *(Czech)* 87−31683
zero-shifting technique and its applications 86−40813
Zolotarev polynomials appl., electric-circuit synthesis problems 87−52024
GaAs SC filter, design and optimisation 88−50253

network topology
3-tree partial graphs, characterisation 86−62055
3D ccts., topology, metrology and architecture 88−13472
3D IC layout, optimal cell assignment 87−67489
100 W resonant power supply, offline, 250 kHz, cct. description 87−31713
500 kHz two-switch forward resonant convertor topology, design 87−31718
AC circuits, topologically based single/multiple fault location method 87−10545
active filter, integrated high performance, suitability of MOS circuits 85−17671
active filters, continuous time digitally tunable, component quantisation effects 86−62715
active network topological conditions for a resistive circuit containing negative non-linear resistors to have a unique solution 87−59712
active RC circuit synthesis for simulation of grounded inductor 85−34045
adaptive bifurcation routing algorithms forcomputer-communication networks 85−57558
allpass biquadratic switched-capacitor filters 85−23000
analog cct. branch fault diagnosis problems, linear algorithm 87−10546
analog cct. self-testing fault diagnosis systems, coupling table construction via sensitivity anal. 86−66901
analog circuits, fault diagnosis and testability, topological considerations 85−17605
analogue circuit fault diagnosis, self-testing based, test point selection methods 86−1188
analogue circuit testability, multifreq, meas. 87−65763
analogue fault diagnosis, testability design 86−57538
analogue linear ccts., multiple fault diagnosis with failure bound, combinatorial covering approach 86−66971
analogue-digital ccts., multiple fault diagnosis method 87−31627
area-maximum edge length trade-off for VSLIlayout 86−20153
AS13ES program for topological analysis of ccts. 85−17080
assignment algorithm with applications tointegrated circuit layout 86−34433
automated custom cct. layout design, global wiring 86−57566
automatic chip assignment based on the subgraphisomorphism *(Japanese)* 86−34454
automatic topology design for irregular structures 87−427
automatic topology update scheme for IBM's SNA networks 86−37311
automation projects planning, cooperation between elec. and control engineers *(German)* 86−19383
balanced switched capacitor all-pass biquad topologies, design aspects 86−62705
BEAR building block layout system's dynamic representation method 87−65711
biconnected planar graph, planar embedding, linear-time algorithms for vertex placement/edge orderings 88−38067
bilinear forms computations in VLSI, area-time trade-offs 87−1589
binary multiplication, recursive algorithm and VLSI layout 86−52769
Boolean sets in algorithms for trees enumeration and for structural graph transformations *(Russian)* 86−26957
building block layout, global spacing 88−31946
butterfly networks, complexity evaluation for different layouts 88−71657
by-inspection analysis of SC networks usingdirect topological rules 86−13960
canonical realisations for analogue and digital ccts., n^{th}-order transfer functions 85−17062
capacitated concentrator location problem for computer network topology 87−40342
cascade signal flow graph, graph determinant representation 85−19566
cascode switch macro wirability improvement method 85−39981
causal and teleological anal. based on intuitive qualitative reasoning 85−17050
centrality functions defined by minimum cuts in anetwork *(Japanese)* 86−52597
centrality functions defined by minimum vertex cuts separating two vertices in a network *(Japanese)* 87−59050
Centrenet network, distributed network services 85−63143
channel graphs, component-level redundancy vs. system-level redundancy 86−20159
channel routeing, optimised two- and three-layer techniques for automatic IC layout design *(German)* 88−38334
channel routeing algorithm for bit-slice VLSI architectures 88−12296
channel routeing by via minimisation and shifting 88−70406
channel routeing compaction techniques 88−70405
channel routing algorithm 88−6585
channel routing of multiterminal nets 88−12139
channel routing with superterminals 88−31950
channelless multilayer router for Magic IC layout system 88−70455
circuit anal. by tree enumeration from incidence matrix 87−44449
circuit details of the Dr. Osborne AT home construction computer *(German)* 86−46420
circuit-switched networks, optimisation using iterative dimensioning algorithm *(Japanese)* 87−48281
cluster structures performance 87−55775
CMOS AND OR INVERT circuit extendible in AND direction, layout topology 85−729
CMOS AND OR INVERT circuit extendible in OR direction, layout topology 85−727
CMOS dynamic logic gate cells, linear algorithms for optimising layout 88−38459
CMOS gate arrays, single layer type, automatic customisation, routeing and layout process 87−52529
CMOS voltage-to-current convertors, topology considerations for design, active filter appls. 86−20702

network topology continued

large-scale network perturbation anal. 86−46433
large-scale network problems, multi-step diakoptics and parallel computation method *(Japanese)* 87−44480
large-scale network shortest path calc. by parallel processor system *(Korean)* 86−13933
layer assignment, optimal, fast algorithm 88−70404
layout CAD, interactive electrical graph extractor 85−522
layout design, random variables and arrangement problems 88−63434
layout generation/charactn., planar linear arrangements of outerplanar graphs, VLSI appl. 88−38066
layouts of graphs of arbitrary degree 88−31906
linear, symbolic network function, topological generation, signal flow graphs 85−22606
linear active network anal., primary subgraph method *(Chinese)* 87−44499
linear analog cct. diagnosis, single faults separability, topological considerations 86−66970
linear Bianchi equation, flow-graph solns. of characts. problems *(Chinese)* 85−22571
linear circuits, operational modes and sensitivity characts., diakoptic calc. 87−52308
linear dependencies projects of electrical network 86−52595
linear graphs and elec. networks, theory 85−489
linear network flow problem *(Bulgarian)* 85−49705
linear one-port networks with ideal transformers, network topology using matrix algebra *(German)* 85−17106
linear time algorithm for circular permutation layout 88−31948
linear time-invariant and time-varying networks, solvability 88−6628
linear time-invariant dynamic systems, eigenvalue spectra and bounds 87−16770
local area computer networks, network topology influence on throughput limitations 85−13935
local area networks, industrial implementation, survey *(Bulgarian)* 86−37493
local checking of design rules for IClayouts described hierarchically 86−2244
local computer networks, multi-connected loop topologies, survey 86−49246
local computers networks *(German)* 85−8191
logic CAD simulation engine, normal simulation methodology and results 85−33739
logic synthesis system, placement method *(Japanese)* 87−37193
logic test generation, simulation-based directed-search method 88−25159
loop equation formulation for switchedcapacitor networks 86−7921
lossless transmission line networks, stability anal., algebraic system *(Japanese)* 85−535
low-noise oscillator design, cct. topology, coupling, active device and resonator selection 85−11075
LSI layout, one-dimensional compaction, network flow theory 87−16805
LSI mask artwork, Boolean operation and topological anal. algorithm *(Chinese)* 85−6990
LSI tree-ring router for switch-box routing problem *(Japanese)* 88−50968
(M+N)-port network, synthesis theorem for topology *(Chinese)* 85−44826
machine equivalent models from electric and magnetic field analysis *(Italian)* 86−7879
Manhattan path algorithm, generalised type, bipolar LSI layout design appl. 88−63432
Manhattan wiring, max. subset of pin connection 86−62328
matroids and topological foundations of orthogonal network theory 85−22573
maximal dynamic flows 86−325
maximum planar subset of a set of nets in a channel, determination 87−23805
microelectronic unit topology, decomposition synthesis *(Russian)* 87−16797
microstrip commensurate-line band-pass filters, topology, synthesis and sensitivity 88−70980
microwave mixers, topological and operating parameter considerations for type selection 86−27612
microwave ring four-terminal networks, anal. 87−17335
min-cut placement, global effect problem soln. using min-cut shuffle algorithm 88−70407
minimum admissible spacing algorithm for laying out connections in a channel 87−384
minimum isolated line failure immune networks 85−17048
Minty's painting theorem, interrelationships with Tellegen's theorem 86−7878
MM-wave low-loss digital phase shifters, topologies and monolithic implementation 85−23144
module placement for intermodule communication distance minimisation, problem simplification 88−63433
modulo-2 adder, M-sequence shifted copy generation, connection topology determination 85−22822
MOS circuits testing and editing by data compression, software tools 86−14108
MOS technology, automatic channel routing and physical design with two-directional unequal grid *(Chinese)* 88−44882
MOSFET-C analogue filters, higher freq. limitations 88−12511
MOSFET-C filters, based on active RC prototypes, implementation 88−25312
MOSFET-capacitor active filters, fully integrated, cct. anal. 86−62716
multi-ring local area network system, interconnection technique and performance eval. *(Japanese)* 88−9162
multi-step diakoptics for parallel computation ofnetwork problems 86−57562
multichannel computer network with local andglobal transceiving media 86−17035
multicommodity flows in planar networks, algorithm 85−44610
multicontact function synthesis using explicit designation 86−698
multielement antennas, modified diakoptic theory 87−12791
multihoming in computer networks: a topology-design approach 88−52944
multimicrocomputer networks, model for performance anal. 87−55431
multipath interconnection networks, reliability analysis 86−62322
multiple-loop feedback struct., comrade form, rel. to existing topologies 86−1240
multipole network, balanced flow 85−28283
multipole subcircuit method, computing efficiency increase method 87−44469
multiport matrix signal flow graphs, heuristic topological method, gain formula 85−22582
MV distribution networks, supply state determ. using rapid topology algorithm *(German)* 85−32145
negative resistance device synthesis, analytical and topological guidelines 85−6426
network, topological reliability reinforcement method 86−54764
new modification of topological formulas 86−52591
nodal image DIMO analysis and implementation in power system control 86−6264
node impedance matrix correction for equivalent circuit variations *(Russian)* 86−6311
nonlinear 86−62396
nonlinear ccts., computer-aided qualitative anal. 87−479
nonlinear circuit analysis using system projectors 87−494
nonlinear DC networks, computer-aided sensitivity anal., fast recursive method 88−38371
nonlinear DC networks with linear and nonlinear resistors, network topology *(Polish)* 87−73259
nonlinear electrical circuits, diakoptics *(Russian)* 86−13953
nonlinear networks, state determination analysis of transistor networks by modified nodal equation *(Japanese)* 87−65773
nonlinear resistive circuits, solution existence and uniqueness *(Chinese)* 85−6098
nonlinear resistive circuits with controlled sources, topological struct. and graph inspection, uniqueness criterion 85−488
nonlinear resistive networks, appl. of no-gain prop. 88−70488
nullator-norator circuit anal. using equivalent multidimensional EMF generator circuits *(Russian)* 85−6424
number of trees in graph, approx. formula 85−16867
Nutcracker, channel spacing algorithm 87−67446
on-chip simultaneous switching transients, control, cct. topology 85−61972
one-layer hybrid IC topology design algorithm *(Czech)* 87−32189
one-port networks, constant resistance, direct synthesis methods 86−66968
operational amplifiers for wideband, fast settling appls., topology and CLC 220 hybrid implementation 87−73353
operational voltage controlled element, topology and design constraints 85−17179
optical fibre LAN at 140 Mb/s, physical layer design 86−16923
optical fibre LANs, topology and equipment considerations 86−37870
optimal linear arrangement of circuit components 87−59049
optimal radial network synthesis problems 86−34434
optimal rectangle routing, LP approach 88−31907
optimal routing round a rectangular component *(Korean)* 85−39840
optimal terminal reliability by network topology selection method 86−52594
oversampled interpolative coders for high-resolution ADC, topology and design aspects 87−66282
packet radio networks, anal. of routing strategies 86−17217
packet switched network planning system architecture and optimisation algorithms 88−41145
packet switched networks, capacity and flow assignment, anal. *(Japanese)* 87−48284
packet switched networks, min. cost topological design with constraints on cct. discreteness *(Japanese)* 88−14868
packet switching techniques in integrated transmission networks, review *(German)* 88−9359
packet-switched networks under end-to-end packet transit delay constraints, optimisation method *(Japanese)* 87−48282
paid assignment for power nets in VLSI circuits 87−74359
parallel-resonant convertor with LCC type commutation, design method 88−24962
partitioning, generation of all essential complementary partitions, algorithm *(Chinese)* 87−59044
passive electronic subcircuit, nonidentical fillings of structural graph 87−45018
passive networks, K-tree topological method for producing symbolicsensitivity functions 86−62327
passive networks, nodal admittance matrix, topological eval. of arbitrary cofactors 86−62326
passive three-way all-pass crossover networks 85−909
path and cct. matrices, realisability and testing procedure 86−62325
path finding algorithm, CAD, heuristic search *(Korean)* 85−22596
path selection global router 87−65723
pC layout techniques for minimizing noise in microcontroller systems 85−11731
PCB topology CAD using manual design principles 88−7143
permeation router 87−59046
permutation architectures with shared bus interconnections 88−12138
pivoting algorithm, modified nodal approach for avoiding zero pivots *(Chinese)* 86−62331
PLA, topological optimisation strategy *(Spanish)* 85−17297
PLA column folding, heuristic algorithm for optimal solns. 88−19045
PLA folding strategies, area eval. and selection criteria 88−19044
placement and global routing of functional blocks *(Korean)* 88−6608
planar assignment problem, heuristic algorithms *(Japanese)* 86−40810
planar cct. complexity anal. 85−28284
planar directed networks, feasibility testing of multi-commodity flow problem *(Japanese)* 88−49935
planar directed networks, multicommodity flow problem *(Japanese)* 87−44441
planar graphs, embedding algorithm in linear time 87−65361
planar logic schemes with external access, realisation and synthesis 85−39988
plane figures, sum, common part and difference generation 86−594
power electronic circuit topology 88−56456
power electronics systems, transient simulation algorithm 87−73279
power network, description and evaluation using a grid data language *(German)* 87−64016
power system anal., application of diakoptics *(Croatian)* 85−32065
power system contingency analysis, stability and optimal dispatch, REI-DIMO equivalent 86−6261
power system diakoptical active-reactive dispatch of generation 85−21131

network topology continued
power system diakoptics: multi-level tearing method and estimation of the computation time 85−26995
power system midterm transient simulation with REI-DIMO models 86−6265
power system network, elementary topology changes, load flow problem soln. *(Croatian)* 88−61799
power system network topology optimisation with security constraints 87−30003
power system network topology updating system *(Czech)* 87−57516
power system networks anal., diakoptics method for ccts. using Gaussian algorithm *(Russian)* 86−61116
power system nodal analysis, REI and flow graph methods compared 86−6260
power system security assessment, real-time, distributed associative memory approach 86−50803
power system state appraisal using topological cct. anal. algorithms *(Russian)* 88−23250
power system transient stability anal. using topological energy function 87−9058
power systems, analysis using diakoptics *(Croatian)* 87−42291
power systems, unbalanced, network modelling using linear graph theory 86−12374
power/grounds nets in VLSI chips minimal area design; routing aspects 88−26383
primary trunk network reliability, topological design approach *(German)* 86−37283
principal partition and optimal harmoniousdecomposition of electrical networks *(Chinese)* 85−54584
process computer equipped power system control centre, data model *(German)* 85−9422
programmable design-rule check and circuit extraction system 87−23864
pseudo-star LAN, with geographically centralised logically distrib. topology 86−30430
radial distribution network, topology develop. technique for system anal. 88−23474
radio circuits with feedback, reversible topological transformation 85−6099
radio networks, dynamic ground, hierarchical routing 85−63586
RC admittance functions, three-pole, network struct. 85−530
RC topological active network synthesis, op amp relocation 86−52943
RCG networks, matroid parity problem and unique solvability 85−22608
real-time power systems, anal. *(Chinese)* 85−9412
realisation of transfer functions in canonical form 86−62324
rectangular dual of planar triangulated graphs, linear time algorithm 87−5599
rectifier systems dynamic operating regimes anal. using diakoptics approach 87−44440
rectilinear graphs and their embeddings 85−44611
rectilinear simple polygon, efficient algorithm for finding the region reachablewithin *k* bends 86−27004
REI-DIMO network equivalents for international power system interconnections 86−6262
relative placement problem, graphtheoretic approach, gate array appl. 88−38317
reliability, 2-neighbour node reductions 85−33239
reliability in time polynomial 85−33240
reliability of network topologies 88−52942
replicated topology databases, automatic update 85−8143
replicated topology databases, automatic update 86−10766
reprogrammable ROM LSIC base, 2-D simulation 87−53449
resistance calculation algorithm and its application to circuit extraction 87−59083
resonance convertors for commutation losses reduction, principle, topology and family configs. *(Italian)* 87−44546
resonant converter topologies for high-voltage DC appls. 88−63499
resonant DC/DC convertors, zero-voltage switching and zero-current switching design 87−73325
ring-star architecture for a fiber-optic broadband network 87−20557
RMCNET, LAN with multiple connectivity for survivability 87−28146
routability of a convex grid 86−52598
route optimisation, network guidance, and system minimisation *(German)* 87−27686
routeing algorithm, edge-disjoint paths determ. in region bounded by nested rectangles *(Japanese)* 87−44163
routing through a rectangle 86−52593
s-t connectedness probability estimation using Monte Carlo methods, comparison 86−62321
S-transformation by signal source transfer *(Russian)* 85−39843
SC biquads, parasitic insensitive, design optimisation technique 88−12499
SC filter time-invariant topology anal. in time domain *(Chinese)* 87−37439
SC ladder filters with offset-insensitive time-continuous feedback integrators 88−12498
SC-filters, time variant topology, equivalent RC-circuits, image frequency responses calc. *(German)* 87−16845
scheduling problems, *f*-coloring of multigraphs 88−38068
SCR model for continuous topology CAD and computer aided anal. 85−10920
search algorithm for finding basic sets of directed circuits and all directed circuits of a digraph *(Chinese)* 87−36858
second-order programmable switched-capacitor filters, op-amp topologies 86−62719
self-controlled single-ended HF resonant invertors, circuit topology 88−75827
self-routeing packet-switched network with mutual control, design and topology *(Japanese)* 87−69421
self-testing analogue fault diagnosis algorithm, computer generation of topological eqns. and pseudocircuits 87−10578
semicustom chip cct. layout, maximising pin alignment 88−50948
separator, planar graphs, parallel algorithm 88−12135
separators in planar graphs, optimal approximation 88−12134
serial routing devices, automatic layout procedures 88−70454
servomechanisms and rotating transformers, structural and topological analysis *(Russian)* 88−37258
silicon compilation for IC design 88−70475
single op-amp single resistance controlled oscillator, identification and synthesis method 85−11085
single row routeing with fixed street capacity, minimisation of the number of layers 88−38344
single-pair switching networks minimisation, appl. of truth tables and zero-paths 86−697
network topology continued
single-row transformation technique 88−31929
space division switching network using self-routing switch, topology and switching algorithm *(Japanese)* 87−76433
space modification, centrality and mediality of point in network *(Japanese)* 86−40811
sparse coeff. matrices for higher-order eqn. systems, efficient soln. *(Russian)* 87−65271
splitting circuits into parts, algorithm 86−13924
standard cell placement, algorithm for quadrisection, VLSI layout appl. 88−38341
star-bus LAN, protocol 85−63370
state variable switched capacitor filters, polynomial transform synthesis 86−57964
state-space approach *(German)* 85−61028
static convertor topology simulation, CAD 88−69606
static flows in networks 88−49646
steady-state power system linear model soln. *(Croatian)* 86−12262
stray-insensitive switched-capacitor networks, direct anal. using signal flow graphs 86−46968
structural controllability of linear networksystems 86−62323
successive approx. A/D and D/A converters, silicon compiler with topology selection algorithm 87−811
summation of return differences, general theorem *(Chinese)* 87−65618
supply network reliability and operational influences *(German)* 86−32721
switchbox routing problem 85−39841
switched capacitor circuits, analogue silicon compiler 88−24952
switched capacitor filters with a row dominant nodaladmittance matrix 87−878
switched capacitor network time-invariant topology anal. 86−66998
switched capacitor networks, nodal charge eqns., direct formulation 87−876
switched capacitor networks, optimisation using equiv. transformations, SCNAPT program implementation *(German)* 87−66356
switched-capacitor filter, biquadratic, passive sensitivity, output voltage, and total capacitance 85−6429
switched-capacitor filters, power consumption rel. to filter topology 86−34974
switched-capacitor filters with negative and partial positive feedback, design procedure 85−913
switching DC-DC converters, modelling, unified topological approach 86−12932
symbolic network functions, full and partial, and network sensitivities computation 88−49934
symbolic networks, topological approach to fault diagnosis inanalogue circuits 86−40867
symbolic sensitivity functions; topological method *(Chinese)* 87−59051
system reliability calc., recent developments 86−34071
systolic array interconnection method 86−1171
telecommunication networks, network topologies, information systems applications 86−30183
Tellegen's theorem, interrelationship with Minty's painting theorem 86−7878
terminal behavior and markings, definition and props. *(German)* 87−31622
terminal reliability computation using tree expansion 85−17049
test pattern generation using topological search algorithm 87−65987
test point insertion problem dynamic programming approach 87−65374
three layer channel routing 88−24905
three-side channel, two-adjacent-side channel and theirrouters 86−66893
topological decomposition of a network 87−65616
toroidal network topology features 88−59637
transconductance-grounded-capacitor filters for VLSI implementation, signal-flow graph design method 87−73530
transformation of sources and graph theory 86−57522
transistor circuits, topological proof of Nielsen-Willson theorem 86−46515
transmission network calc. using topological tables *(Russian)* 86−18775
transmission network security analysis incorporatingnetwork islanding, diakoptic method 86−70651
transmission networks, incremental loss rate calc. from complex nodal admittance eqns. *(Russian)* 86−56407
TRANSNET, special LAN 87−28188
tree generation by decomposition, lattice theory appl. 86−596
tree/link partitioning for the implicit solution of circuit equations, TALISMAN simulator appls. 87−65754
two graph minimum modified nodal formulation for cct. matrix 87−65619
two-graph, finest classification of all common trees using matroid with parity struct. 87−65360
two-graph, generalised Feussner's principle 87−65363
two-layer routeing of PCBs and VLSI ccts. 88−70450
two-terminal optimal α-β wire routeing 88−49932
two-transistor no-resistor cct. cannot exhibit negative differential resist. 87−65780
unbalanced passive networks, characterization filter design appl. 86−34488
undirected network with edge capacity, edge centrality meas. *(Japanese)* 86−26958
undistinguished computer networks, computations 88−73635

DC SQUID magnetometer, low noise, seven channel, for brain research 88−16706
digital stereotactic meas. system for cerebral metabolism evaluation using autoradiography 87−50283
digital tape recorder for neurophysiological signals 86−25175
discharge measurement, instantaneous freq. meter 85−59286
discriminator, surfing window for action potential discrimination *(German)* 85−38144
EEG processing, parameter extraction during riskful neurosurgical operations 85−64603
electric and magnetic fields in medicine and biology, conf., London, England (Dec. 1985) 86−19749
electric stimulator, microprocessor-controlled, for generating voltage clamp command sequences 87−41900
electro-surgical generator nerve and muscle stimulation, spectral anal. interpretation 88−74854
electrode, multiplexed implantable, for monitoring evoked responses in cerebral cortex, design 87−29784
electrode spacing considerations for neural signal transducers 88−48166
electroneuro prosthesis in a developing country 88−54633
electroneurography, optimal choice of recording electrode 85−31840
electroneurography, quantitative, facial nerve palsy assessment 85−38142
electroneurophysiologic monitoring, intraoperative 87−41982
electronic neuromuscular block monitor 85−4342
electronic tester development for diagnosis of functional continuity of injured peripheral nerve *(Japanese)* 88−4956
electrophysiological measures of neural interaction 85−48304
electrophysiological signal recording from single fish in group, electrode fixation and low torque swivel 87−50342
electrostimulation, bioregulated, of neuromuscular structures, methods and instruments 88−68453
electrosurgical current, tissue stimulation cause 87−50388
elgiloy microelectrode, fabrication techniques and characts., neural recordings appl. 86−18335
elgiloy microelectrode, further improvement 86−18336
EM mechanical stimulator for electrophysiological recording in man 85−43395
EMG, clinical, basic problems of automatic analysis 87−3992
EMG, computerised, conf., New York, USA (April 1981) 87−2
EMG, quantitative, diagnostic yield of automated method 87−3997
EMG automatic analysis with ANOPS computer, monopolar electrode use 87−3993
EMG chamber, in vitro, to monitor neuromuscular function 88−68422
EMG signal on-line analysis, microcomputer based neurophysiological measurementsystem 87−3994
engineering in medicine and biology, conf., Niagara Falls, NY, USA (Sept. 1987) 88−18336
epidural spinal cord evaluation system based on evoked pots. recording 87−57188
epimysial electrical stimulation: short-term therapeutic applications 88−61413
epimysial electrodes, monopolar and bipolar, recruitment props. 86−60815
event-related-desynchronisation mapping, functional diagnosis of brain *(German)* 85−38143
evoked potentials, automated data acquisition and anal. 85−53049
evoked signal processing, weighted averaging method 86−25227
excitable membranes, compensation for resistance in series, electronic bridge circuit 85−9182
extracellular neural recording with multichannelmicroelectrodes 87−4004
extracellular recording and stimulation through the same wire hook or suction electrode, simple electronic unit 85−15332
eye and head movement meas. of small animals using mag. field search coil system 87−50204
F wave meas., recording techniques comparison, health and peripheral nerve disease 88−4946
foetal ECG enhancement from maternal abdominal lead through digital filtering and averaging 87−57192
forearm alternate pronation and supination, diadochokinesia test, microcomputer based analysis 86−5880
functional electrical stimulation, sensors for use with 86−44631
functional neuromuscular stimulation, computer-controlled multichannel stimulation system 85−53094
functional neuromuscular stimulation, portable system for paralysed upper extremities 87−57199
functional neuromuscular stimulation exercise, electrical stimulator 88−61409
functional neuromuscular stimulation hand grasp, combined open and closed loop system 88−68479
functional neuromuscular stimulation system, implantable and externally powered, development and eval. 88−48237
functional neuromuscular stimulation system, modular approach: portable control hardware 88−68478

neurophysiology continued
functional/therapeutic elec. stimulation of neuromuscular system, developments 86−18359
glass-coated metal microelectrode for depth recording in awakeanimals 86−50567
hearing aid, cochlear prosthesis implant, electrical model, analogue simulation *(German)* 85−38236
heart rate and arterial blood press. variability signals, auto-spectral and cross-spectral anal. 87−29764
heart rate control, computerised anal. for expt. validation of neurophysiological models 85−9204
high-current and HV stimulators for electrophysiology expts. 85−48197
IC realisation of a neuronal model 87−3927
image data compression, brain mechanism of vision 88−59276
imaging method for neuropsychological data presentation and analysis 88−48084
implant for applying a DC elec. field to peripheral nerve 87−63707
implantable multielectrode array with on-chip signal processing, microprobe for biopotentials recording 87−21575
implantable neuromuscular stimulator, 4-channel, for functional elec. stimulation 88−48236
implantable neurophysiological telemetry system, monolithic signal processor IC design 86−38788
implantable telemetry system, monolithic signal processor for neurophysiological data 86−18358
implants for nerve stimulation in paraplegic patients, gate array appls. 87−21663
integrated clinical neurophysiology system−Neuronet 88−42471
interference pattern analysis, clinical uses, effect of load, dynamic studies 87−3995
intracellular recording, calibration pulse appl. device 85−4339
intramuscular electrodes for neuromuscular stimulation 88−61460

microelectronic implants for neural bidirectional interfacing 88−48165
motor performance quantification equipment, microprocessor-controlled 87−57061
motor unit action potential generation rel. to neuromuscular disorders, electrodiagnostic model 86−50563
motor unit potentials with varying loads, automatic analysis 87−3996
multichannel counter/timer interface for the acquisition of neuronalspike trains 85−53054
multichannel microprobe for intracortical single-unit recording 85−38173
multichannel nerve impulses, real-time waveform anal. with a multimicroprocessor system, mechanoreceptor appl. 85−26776
multichannel recording array, neural activity probe 85−59352
multifunction electronic medical apparatus, optimal wave form output, nervous system physiotherapy appl. *(Chinese)* 88−30024
multimicroelectrode fabrication by Si dry etching *(Japanese)* 87−14904
multimicroelectrode for neural impulse meas., fabricated by Si dry etching 87−63775
multiple floating microelectrode for chronic implantation and long-term single unit recording in the cat 85−4332
multiple unit anal., microcomputer-based system 87−50360
multiunit recordings, peripheral device for online unit detect. and parametering 86−25242
muscles, selective activation using peripheral nerve electrodes 85−48321
nerve activity measurement and analysis, conf., London, England (Nov. 86) 87−23012
nerve and muscle action potentials, raster display and vertical array ccts. 86−56127
nerve cell parameter determ. with automatic micro-object analyser 88−61227
nerve excitation, bifurcation process, cation ions effects *(Japanese)* 86−32324
nerve regenerator clamp for severed peripheral nerve 86−5966
nerve stimulation using magnetic fields 85−43430
neural biotelemetry implant for powered prostheses 87−63847
neural excitation, electrical models 88−74782
neural prostheses, sensors 85−38237
neural signal analysis using time domain cross-correl. assembly language routine for IBM PC 88−74847
neural signal detection techniques: performance for real-time appls. 86−60799
neural stimulator, externally programmable microcontroller based 85−43441
neural transmission process, electronic representation 88−36408
neurochemical voltammetry system, computer programs for calibrating control electrode voltages and for conditioning working electrodes 85−4258
neuroelectric data acquisition, history and perspectives 85−38165
neuroelectric therapy: appl. to intractable pain, multiple sclerosis and hearing disorders 85−9220

neurophysiology continued
neurological intensive care, acquisition and signal processing of evoked potentials 88−48200
neuromagnetic imaging, noninvasive modality for functional brain imaging, reconstruction results 87−77610
neuromuscular block induction during surgery, microcomputer-based controller 85−64608
neuromuscular stimulation, functional, role of sensors 85−38186
neuromuscular stimulation system, portable, for spinal cord injured persons 86−56167
neuromuscular system, all-poles representation for EMG signal compression 85−9177
neuronal activity extraction from noise, signal processing technique 87−50343
neuronal electrical activity imaging in the human brain, use of ESR or impedance meas. 86−32341
neuronal morphology, computer anal. of two-dimens. optical microscope images *(Japanese)* 85−31809
neuronal morphology, Golgi-impregnated, interactive microcomputer system for quantitative analysis 86−65404
neuronal spike trains, simultaneously recorded, conditional cross-correl. techniques 88−42549
neurons electrical activities meas., miniaturised electrochemical sensors developments 86−56130
neurophysiological signal data acquisition system based on Commodore 64 computer 87−41973
neurosurgery, excimer lasers in medicine 87−35433
neurosurgery applications of free electron lasers 86−5982
neurosurgical intensive care unit, computerised monitoring system 87−21578
neutral spike train sampling device with built-in memory 87−50344
nystagmus and smooth pursuit eye movements analysis, syntactic method 88−36475
online spike form discriminator for extracellularrecordings based on an analog correlation technique 87−4006
operating room neurophysiological data acquisition and evoked pots. monitoring 87−57209
optical microscope sections, thick, device for computer quantification of depth meas. 87−77636
osteoporosis due to disuse, effect of functional neuromuscular stimulation 88−61410
paraplegia, functional neuromuscular elec. stimulation of the lower extremities 88−48203
paraplegic electrical stimulation control via EMG-based posture-mapping 85−38180
paraplegic EMG-controlled elec. stimulation, critical review 88−42562
paraplegic implantable nerve stimulation systems, custom IC appl. 86−32350
paraplegic males, electrically-induced leg and voluntary arm crank exercise, haemodynamic response 88−61407
paraplegic patients, compact of feedback in neural stimulation 85−48324
paraplegic standing aid using functional neuromuscular stimulation 88−61473
paraplegic walking system, functional neuromuscular stimulation, trunk control implementation 88−61474
paraplegics, micturation induction by nerve trunk selective stimulation, dog and toad expts. 88−54602
paretic muscle, voluntary strength gains after hybrid exercise training 88−61408
patch-clamp single-channel current, computer method for acquisition and anal. 87−71141
peripheral nerve and muscle, long-term recordings from normal and dystrophic mice, method 87−50341
peripheral nerve information selective read-out, elec. field tomography 86−25251
pharmaceutical industry, neurophysiological monitoring 85−43411
photoneural device structures 88−3198
piezoelectric neural prosthesis to enhance nerve regeneration 88−54632
planar microelectrode array for recording from the Aplysia abdominal ganglion 86−44658
planar pattern recognition by invariant features and human visual system 87−48205
polyelectrode stimulation with an implantable device, nerve elec. field anal. 86−32382
printed implantable electrode for recording neural signals in awake animals 88−48164
prosthesis, neurological, rel. to actively balanced biphasic stimulating pulses, historical background etc. 86−25306
prosthesis, upper limb neural, command channels 88−61464
prosthesis construction at MRC 88−54624
prosthesis-making, review 88−5012
prosthetic hand, functional neuromuscular stimulation system, control using man/machine interface 88−61466
prosthetic implants, neural, mm- and sub-mm-sized, RF powering 88−54625
prosthetics, neurological, rel. to actively biphasic stimulating pulses, pH changes etc. 86−25307
quadriceps muscle response to functional neuromuscular stimulation during isokinetic exercise and walking 88−61240
radiologic automated diagnosis (RAD) of neuroimages interpretation 87−35410
radiotelemetry system development for long-term monitoring of lab. animals 86−50470
real-time covariance computer for cell assemblies based on neuronal principles 87−41901
regional neural interactive coupling, electrophysiological measures, dependence relations among multiple channel recordings 86−44663
research challenges and opportunities in electronic neural systems 88−57782
retinal horizontal cells, AC and DC spectral sensitivities meas. by voltage clamp. by light 88−74842
RF radiation biological effects and health implications, book 88−6098
signal detection, real-time digital-filter-based data-acquisition system 85−48296
signal recording and anal. from many neurons simultaneously, using multichannel silicon-based microelectrodes 88−36487
sleep investig., reaction time meter *(Dutch)* 87−14825
Smart Trigger for real-time spike classification of nerve and muscle signals 87−50362
neurophysiology continued
software that detects and analyses bioelec. events 85−48293
somatosensory cerebral cortical activity, patterns reconstruction interactive graphics package 86−50575
somatosensory evoked responses, early, struct. analysis using computer implemented digital filtering, scaling and addition 86−50577
somatosensory evoked responses, early, superimposed components, computer generation of templates for parameters eval. 86−50576
spasticity control in spinal core injury through spinal core stimulation 88−54601
spectral information coding by IR photoreceptors, colour vision and neural network analogues 87−21080
spike discrimination using hardware-based adaptive system 88−68425
spike separation in multiunit recordings, intelligent software 87−63788
spinal cord injury, pulsed subcutaneous elec. stimulation treatment 87−50378
spinal cord stimulation in multiple sclerosis 85−31862
spinal spasticity treatment by elec. stimulation 88−68446
stepper motor-driven microelectrode positioner, neuroscience appl. 87−63719
stimulation circuits, isolated const. current, for neuroscience applics. 88−74856
stimulation electrode, Pt, in vivo ϕQ diagram 86−50611
stimulation electrodes for applied neuronal control *(Japanese)* 85−15341
stomatology and neuromotor recuperation, multifunctional electronic instrument 85−9222
telemetric micro-transmitting system for single neuron recording, wireless brain stimulation and marking 88−4953
thick specimens, computer-assisted video technique for preparing high resolution pictures and stereograms 87−14855
thin film neural recording array data, signal processing to separate channels of point process information 88−54560
timing pulse and sampling programs implemented on a laboratory microcomputer 85−43390
torque motor design and characteristics for hypotonic muscle reflex contraction meas. 87−22438
transsubstrate microelectrode array, laser-induced fabrication and neurophysiological performance 85−64527
unidirectionally propagated action pots. generation, asymmetric 2 electrode cuff 86−65397
uniform current density electrodes for transcutaneous electrical nerve stimulation 85−38185
upper limb orthotics, control requirements 86−12031
vector stimulator for neurophysiological studies of periodontal mechanosensitive units 88−42486
visual cortex, autoradiographic studies, applic. of picture processing techniques 86−50525
visual discomfort due to CRT displays 85−52657
voltage clamp using a single microelectrode, theory and operation 85−4340
Ag-AgCl electrode rel. to offset voltage and current generation, neurophysiology appl. 87−63787
CO_2 laser scalpel, neurosurgery applications 86−44696
Si microelectrode impedance, geometry, and neural cell recording ability 86−50600

neutrino detection and measurement
angular correlations in free neutron decay 88−23004
bubble chamber, holographic recording techniques 87−14787
calorimeter drift chambers, computerised signal recording apparatus 86−18249
CHARM II neutrino detector, test results of streamer-tube system 87−21468
conference, St. Vincent, Italy, April 1985 86−65376
cosmic neutrinos, possible detect. via superconductors 85−20807
Homestake Large Area Scintillation Detector, status, monopole sensitivity 86−65377
Homestake Mine surface air show array, performance 86−65377
JACK, 32 Kton water Cherenkov detector, nucleon decay, ν, quark and monopole detection 85−15241
KARMEN expt., photomultiplier with good time and energy resolution for neutrino counting 88−68208
Large Volume Detector, combined neutrino detection system, design 86−65387
liquid scintillation detector for neutrino astrophysics 85−31741
liquid scintillation detector in Mont Blanc laboratory 85−48177
liquid scintillators characts. for antineutrinos recording 85−20824
low temperature detectors for neutrino expts. and dark matter searches 88−4834
low temperature neutrino detectors, workshop, Ringberg Castle Tegernsee, West Germany (May 1987) 88−37853
MACRO, large area detector for monopole, gamma and neutrino detection 86−65379
mineral oil scintillator, KARMEN, neutron and neutrino detection efficiency 88−68204
radiochemical detectors for solar neutrino expts. 88−4832
rest mass meas. double-focusing magnetic β spectrometer 88−68305
Serpukhov neutrino detector, drift chamber, design, performance 86−38711
SNO detector, α-ray background into central D_2O detector 88−4824
superconducting filament method for detection of astronomical neutrinos 86−63600
superconducting grain based radiation detector 87−71025
superheated supercond. detectors for X-ray imaging, solar neutrino detection 88−61082
telescope consisting of water Cherenkov detectors 85−15239
thermoacoustic signal from beam of direct neutrinos 86−11846
underwater muon and neutrino detection, DUMAND project, semiconductor photodetectors 86−11606
Ar, liq., detector for solar neutrinos and proton decay 85−9059
^{51}Cr 746 keV neutrino source for solar neutrino detector calibration 88−29784
^{115}In detector for solar neutrino detection 86−5789
Pb-scintillator calorimeter response in electron neutrino detection 85−26697
Si bolometer for neutrino detection, specific heat meas. 86−65381
Si crystal acoustic detector for neutrino experiments and dark matter searches 87−77531

neutron absorption

neutron detection and measurement
see also neutron spectrometers
absolute thermal neutron fluence rate meas. by muscovite track detector *(Chinese)* 86−11891
absorption profile measurement for high order reflections 85−15236
accidental-coincidence corrections, discrepancies determ. 87−29519
Aladdin Synchroton Light Source, neutron field meas. near inflector, dose equivalent rate 86−32389
albedo thermoluminescent neutron dosimetry using Panasonic UD-809AQ 88−54676
Anger camera, fast parallel encoding scheme 85−15209
Anger-type neutron position detectors, resolution and linearity simulation 85−43202
antineutron detector, low energy time-of-flight meas. 85−43256
BDPN-1K diamond-based detector assembly, n meas. sensitivity 88−54389
BGO Compton, suppressed Ge detectors, neutron background meas. 87−77556
Bonner sphere neutron spectrometer, expt. tests 85−52987
Bristol University neutron dosimetry system 88−23135
bubble damage polymer detectors for personal neutron dosimetry 87−42030
calibration field from moderated ^{252}Cf source, design and calcs. 87−29508
calibration field from moderated ^{252}Cf source, expt. characterization 87−29509
calibration of cylindrical rem meters, highly scatt. environments 88−10256
calibration of neutron monitors for radiation protection 86−18400
cellulose nitrate track detectors, fast neutron sensitivities, dosimeter appl. 85−37965
charge integrating ADC, particle identification via pulse shape discrimination 88−29907
charged particle streams, time course meas. in PF-150 plasma focus 88−16602
4-circle neutron diffractometer with fly's eye position sensitive detector, data reduction 85−15229
4-circle neutron diffractometer with two-dimens. position sensitive detectors 85−15228
collimated fission product detection system for fast reactor safety expts. 88−36375
Compton emission neutron detectors with Hf emitters for RBMK-1000 appls. 88−29795
computer modelling of position-sensitive scintillator detectors 85−15212
correlation counter calibration by calorimetry and γ-ray meas. 87−21451
CR39 plastic track detector, calibration for 2.45 MeV neutrons 87−29507
CR39-BN detector for thermal neutron dosimetry 87−50444
CR-39, detection efficiency for very high energy neutrons 88−22975
CR-39, electrochemical etching improvements for large-scale personnel neutron dosimetry 88−68284
CR-39, electrochemically etched, proton response 87−29629
CR-39, etched, fast neutron spectrometer, computer program 88−23010
CR-39 cubical fast neutron dosimeter, electrochemically etched, polymeric front radiators 88−23131
CR-39 detector, fast neutron fluence meas. technique 87−21497

neutron detection and measurement continued
CR-39 electrochemically etched n dosimeters, pre-etching time effects on response characts. 87−21482
CR-39 fast neutron dosimeter, nearly flat dose equivalent response 87−29631
CR-39 for fast n detection, annealing effects on track density 86−60609
CR-39 manufacture for neutron dosimetry appl. 87−29625
CR-39 neutron dosimeters, electrochemically etched 87−29635
CR-39 neutron dosimetry system, operational trials, progress to Jan. 1985 86−44723
CR-39 neutron recoil track detectors, etching optimization up to 1 MHz 87−21485
CR-39 neutron recoil track etch dosimetry 87−29632
CR-39 plastic, B doped, neutron dosimetry and personal monitoring 85−26721
CR-39 plastic, neutron response, background, ageing and fading props. 87−29630
CR-39 plastic track detector response to Am-Be and 14.1 MeV neutrons 88−4839
CR-39 plastic track detectors, track recording characts. in mixed radiation fields 85−37958
CR-39 polymer as nuclear track detector 88−48028
CR-39 polymer dosimeters, electrochemical development of particle tracks 87−21484
CR-39 solid state nuclear track detector, fast neutron personal dosimeter appl. 88−23132
CR-39 spark counting, electrochem. etching for ^{6}Li(n,α) 87−29634
CR-39/radiator dosimeter, neutron response 87−21694
curved one-dimensional neutron position sensitive detectors, 12 years expts. 85−15222
cylindrical tissue equivalent proportional counters, calibration method 86−50363
damage track neutron dosemeter, contrib. of heavy recoils to response 87−77697
deadtime reduction in thermal neutron coincidence counter 85−43282
ΔE-E telescope system using plastic scintillation detector for n beam flux monitor 87−3887
depth-dose dosimetry using track detectors and multigroup transport calcs. 86−50407
detector for reactor nucleus instrumentation *(Japanese)* 86−39413
differential cross sections determ., using automated universal expt. complex 86−18245
digital albedo neutron dosimeter using dynamic RAM and LiF crystal convertor 86−6006
discriminator system for neutron-gamma mixed beams *(Chinese)* 86−56042
distributed sensing system, SiO_2:Nd^{3+} fibres appl. 88−36371
Donald C. Cook nucl. power plant, incore movable detector spares requirement evaluation 88−11006
dose conversion factors and W_n values for tissue-equiv. ion chambers in monoenergetic neutron fields 85−26821
dose equivalent rate meters, relative responses rel. to neutron energy 86−12051
dosimeter, multielement neutron track design 87−21693
dosimeter, neutron and γ, small size, with a single Si surface barrier detector 86−70440
dosimeter, performance testing using moderated ^{252}Cf source 85−26814
dosimeter, proton build-up calc. 87−35451
dosimeter calibration, single sphere albedo system 85−26805
dosimeter development using electret ionization chambers 88−68231
dosimetric quantities comparison 88−54674
dosimetry, correction factor determ. using spectrometric techniques 88−68258
dosimetry and microdosimetry, digital approach 86−18251
dosimetry and microdosimetry, time-projection-chamber-based, digital approach 88−68256
dosimetry in high intensity fields, SSNTD limitations, review 87−29670
dosimetry using superheated droplet detector 88−54434
dosimetry with nuclear track emulsions 85−26806
dual thin scintillator, coincidence config. development for neutron spectrometer 86−56047
electret ionisation chamber, optimisation for dosimetry in mixed neutron-gamma radiation fields 85−20972
electrochemically etched damage trade detectors for personal neutron dosimetry 87−42030
emission rates of neutron source meas., by Mn bath technique 86−25119
energy spectra reconstruction, from calorimetric meas. on Serpukhov accelerator 88−61037
environmental monitoring (book) 85−22150
epithermal and thermal neutron beamline monitor using ^{6}Li glass scintillator 87−77480
etched track neutron dosimetry, conf., Harwell, UK (May 1987) 88−18310
ETL electron linac and storage ring, radiation shielding *(Japanese)* 88−30055
fading of tracks from high-energy hadrons in NTA emulsion 88−54441
fast neutron dosimetry using CR-39 with scintillator filled etched pit method 87−29623
fast neutron high multiplicity scintillation detector for reverse kinematic heavy ion reactions 88−61131
fast neutron personnel dosimeters, comparison of NTA, CR-39 and albedo around electron accelerator 88−54677
fast neutron personnel dosimeters using proton recoil proportional counters 88−68257
fast neutron spectrometer based on an electrochemically etched CR-39 detector with degrader and front radiator 88−23012
fast neutron spectrometer using an epitaxial integrated dE-E Si detector 85−43309
fast neutron time-of-flight spectrometer, calibration procedure 85−37974
fast-neutron spectrometry using the triple-α reaction in the CR-39 detector 87−29621
fast-neutron-induced track formation in LR-115 and CR-39 87−29671
FBR radiation leakage through long narrow annulus in control rod drive mech. *(Japanese)* 87−50957
fibre optic coded detector systems on the SNS 86−56070
flat-cone diffractometer with a banana-like one-dimensional multi-cell detector 85−15232
fluence rate using 3-detectors for PET agent yield prediction 87−50130
flux intensity variation meas., integral counting technique 88−4818
fluxmeter for pulsed thermonuclear reactors 85−9077
fly's eye neutron position sensitive detector, data quality tests 85−15231

neutron detection and measurement continued
fusion reactor blanket models, selection criteria for activation detectors for integral expts. *(German)* 88−4794
G-M counter, neutron response obs. 86−38703
gaseous, scintillation, semiconductors and fission detectors *(Rumanian)* 87−8861
gaseous position sensitive detectors, recent advances 85−15215
gel walled high pressure ionisation chambers for high energy neutron dosimetry 87−63859
GNEIS, neutron time-of-flight spectrometer, design details 86−25155
hardware aspects of neutron position-sensitive detectors 85−15200
high efficiency scintillator for thermal and high energy neutrons and γ-rays 88−61091
high energy particle accelerators, radiation protection and neutron dosimetry 85−26811
high pressure ^{3}He multielectrode detectors for neutron localisation 85−15201
high resolution hadron calorimetry 88−29869
high-pressure ^{3}He gas scintillation neutronspectrometer 86−50439
high-pressure ionisation chamber, appl. to meas. mean neutron energy or γ-ray dose fraction in a mixed neutron-γ field 87−21696
high-pressure ionisation chamber to meas. mean neutron energy and γ-ray dose fraction 87−21697
highly sensitive neutron rem counter development 85−64454
hydrogenous semiconductor neutron detectors 85−26812
in-plant neutron coincidence counting in nucl. materials processing plants, status 87−21450
Individual Counter Array, an old form of position sensitive detector 85−15224
individual neutron monitors, calibration and performance 86−18397
integral neutron detectors, spectral sensitivity estimation 87−29437
intelligent environmental neutron and gamma monitoring system *(Chinese)* 88−47974
international fluence-rate intercomparison for 144 and 565 keV neutrons 87−63626
intrinsic fission-couple behaviour in long duration neutron pulse 85−4212
ionisation chamber, neutron sensitivity, dosimetry *(Russian)* 85−38254
ionisation chamber IRM 81T-TE1, kerma determination in neutron field *(Chinese)* 86−70336
ionisation chambers, transient response to bias voltage perturbations, simulation 87−41866
KNVK2 vacuum fission chambers for neutron flux density meas. 88−16625
linear PSD using fibre optic encoded scintillators for neutrons 85−15207
liquid He scintillator as fast neutron polarimeter 88−22922
LNL fast neutron facility, associated particle method vacuum scattering 86−44538
local order determination in disordered systems using a one-dimensional PSD 85−15220
location and integration of single reflections using area PSDs 85−15230
logic cell arrays for neutron time of flight multidetector 88−61186
low energy neutron detection, recent progress 87−29529
low jitter, low cost, time-of-flight circuit for neutron spectrometer 88−61194
low resolution cold neutron diffractometer 85−15227
LR-115 track detector dosimeter with (n,α) converter 85−37961
LR-115 type II plastic track detector response to Am-Be and 14.1 MeV neutrons 88−4839
MA-ND type nuclear track detectors, neutron radiographic characts. 87−29663
magnetic shielding of a large volume for quasi-free neutron oscillation expt. 87−29467
Makrofol E, particle registration studies and etching techniques 87−21486
Makrofol SSNTD appl. 85−37962
Makrofol-E neutron recoil track detectors, etching optimization up to 1 MHz 87−21485
Makrofol-polycarbonate detector, neutron induced tracks 87−29633
medical applications of position sensitive detectors 85−15216
microdosimetric proportional counters exposed to neutrons, numerical estimates of response functions 85−26818
microdosimetric radiation protection instruments, intercomparison, n and γ detection 87−42034
microprocessor-based water content meter for powders 86−44480
microstrip anode position-sensitive detector, design, neutron counting rate 88−22969
mineral oil scintillator, KARMEN, neutron and neutrino detection efficiency 88−68204
Missouri Research Reactor Facility, position sensitive detectors, data collected system 85−15202
mixed field dose equivalent measuring instruments 85−26813
mixed field dosimetry device for average quality factor and dose equivalent meas. 85−26810
moderated activation neutron detector, photon sensitivity 87−21685
Moire effects in neutron interferometry, appl. in neutron elec. charge search 85−31689
moisture content meas. of bulk materials, pulsed neutron method 86−26954
moisture meter, data retrieval using portable microcomputer 88−16550
MOS neutron sensors, detection props. depend. on radiation field 87−14725
MOS sensors for neutron area monitoring appl., design, breakdown props. 88−29799
Muhlheim-Karlich NPP, neutron dosimetry during commissioning *(German)* 88−69114
multiple neutron event detector 87−14741
multiplicity measurements with shift registers, dead-time error reduction method 87−14789
multiwire chamber system for neutron spectra meas. 85−26703
multiwire tissue equivalent proportional counters, performance for neutron dosimetry 85−37919
NBS Black Neutron Detector, time correlated associated particle calibration method 85−59192
NBS small angle neutron scatt. facility, two dimens. PSD 85−15204
NE104 and NE110 aged large vol. scintillators, response to fast n, p and e 87−3819
NE213 cylindrical counters, timing characts. 85−37928
NE213 miniature spherical spectrometer for fast-neutron spectrometry, characts. meas. 85−15256
NE213 scintillation counter with teflon cuvette, light attenuation effect 86−56038
NE213 scintillation detector for in-assembly fast neutron spectrum meas. 87−57025
NE213 scintillator, neutron response function 86−60586
NE912 ^{6}Li glass spectrometer for low energy fission neutrons 87−50195

neutron detection and measurement continued
NE-110 majority logic photon-recoil scintillation counter for keV neutrons 85−43201
NE-213 detector, neutron meas. and anal. techniques 85−20831
NE-213 organic scintillator based high efficiency neutron spectrometer 86−44611
NE-213 organic scintillator for 0.5-800 MeV neutrons, absolute efficiency determ. 85−26693
neutron backscatter effects from photomultiplier assembly in TOF spectrometry at 144 keV 87−29687
Neutron Ball spin spectrometer, computer simulation 86−44609
neutron beams, polarized, meas. using small angle elastic np scatt. apparatus 88−68244
neutron coincidence counting system, computer controlled, high performance, circuit design 88−74768
neutron diffraction position sensitive detector data, online evaluation 85−64492
neutron doses in nuclear power plants, need for personnel dosimeters 87−14948
neutron dosimetry, track detector characteristics 87−21688
neutron dosimetry from recoil particle tracks, digital meas. and analysis 88−5023
neutron dosimetry system based on the chemical etch of CR-39 87−29624
neutron dosimetry with ionisation chambers, pulsed radiation beam measurements *(Czech)* 85−64645
neutron emission spectra obtained by a double neutron-gamma discrimination technique 88−29832
neutron fluence rate around reactor, SSNTD meas. *(Chinese)* 86−11888
neutron fluence rate determ. by fission track glass standard *(Chinese)* 86−11890
neutron gatsometers for vel. meas. 85−43300
neutron induced fission rate meas. at high fluence and temp. by SSNTD 87−29669
neutron multiplicity filter, design, performance details 86−18239
neutron polarimeter for (p,n) measurements atintermediate energies 86−25153
neutron powder diffractometry with the linear position-sensitive scintillation detector 85−15213
neutron scintillation detector for pulsed neutron source meas., calibration 86−70345
neutron tests of position-sensitive detectors at ILL 85−15214
neutron therapy dosimetry by automatic readout of a solid-state nuclear track detector 86−50649
neutron time correlation counter, high performance, design, operation 86−32187
neutron water meter in deep well with SSNTD *(Chinese)* 86−11909
neutron-activation detectors, activity meas. by gamma spectrometry, systematic errors 87−29439
neutron-activation detectors with fissionable nuclides 87−35329
neutron-gamma discrimination, charge integrating ADCs and pulse shape discriminators 85−59212
neutron-gamma discrimination based on leading edge shape measurement 88−68249
NRPB PADC neutron personal dosimetry service 88−23136
nuclear targets, preparation and anal., conference Antwerp, Belgium (Sept. 1984) 85−54022
one- and two-dimensional position sensitive scintillation detectors for thermal neutrons 85−43215
optically stimulated luminescence detectors, influence of detector parameters on neutron sensitivity 88−4810
paired ionisation chambers for neutron-gamma fields, response meas. *(Czech)* 86−38697
Paks nucl. power plant, neutron physical meas. during phys. start-up *(Hungarian)* 86−12571
Paks Unit 2, noise meas. using in-core self-powered neutron detector strings 87−35764
parameter assessment for multiple n event detector 86−70322
passive detectors for neutron fluence measurement 85−26809
passive personal monitor for working level accumulationexposure *(Chinese)* 86−11892
personal alarm neutron dosemeters 85−26807
personal neutron dosimetry, future developments in etched track detectors 88−23139
personal neutron dosimetry system using chemically etched polymer CR-39 88−23134
personal neutron dosimetry with Kodak CN-85 solid state nuclear track detector 88−23133
personnel neutron dosimeters in use at DOE facilities, response characts. 86−25332
personnel neutron dosimetry, TLD/etched track combination system, US DOE research 88−23138
personnel neutron dosimetry using hot, low-frequency electrochemical etching 87−29627
personnel neutron dosimetry using solid state nuclear track detectors, review 85−26808
personnel neutron monitoring around high energy accelerators 88−23137
phantom depth dose meas. in neutron beam by nuclear track detectors 85−38265
phostron, phoswich counter for neutron and charged particle detection 85−15189
photographic detection for neutron diffraction topography 85−15235
photographic methods in neutron scattering 85−15233
photographic position-sensitive detection with polychromatic neutron beam and its applications 85−15234
photonic single-transient radiation sensors 88−61158
planetary neutron albedo fluxes meas. by remote γ-ray sensing 85−20873
plastic scintillator neutron detectors 86−60587
plastic track detectors using electrochemical etching, review 85−20844
pocket gamma-neutron dose-rate chirper, design, construction and performance *(Chinese)* 88−42582
polycarbonate recoil track detector, energy-dependent neutron sensitivity 88−36385
polyethylene-walled electret ionisation chamber, neutron sensitivity 85−37911
polymer foils, spark counting of particle tracks, neutron flux, spectrometry meas. 87−41874
portable device for registration of slow neutrons *(Czech)* 86−60552
portable neutron dosimeter using a dynamic random access memoryas a sensor 86−50357
position sensitive detection, conf., Grenoble, France (Oct. 1982) 85−10327

neutron detection and measurement continued
position sensitive detectors, small angle neutron scatt. appl. 85−15217
position sensitive detectors for monolayer structural neutron diffraction studies 85−15223
position sensitive detectors for neutron diffraction experiments on powders and liquids 85−15219
position sensitive detectors for neutron diffraction expts. 1966-1982 at Grenoble 85−15221
position sensitive neutron counting with gas filled detectors 85−15205
position sensitive neutron detectors based on scintillator and charge-coupled device 88−4817
position sensitive scintillation detector for fragment correlations 87−35342
position sensitive thermal neutron detector using sandwich-type semiconductor counter 86−44544
prompt fission neutrons, energy, angular distrib. meas. 88−29927
proportional counter for neutron spectrometry, effect of charged particles 85−31706
protein neutron crystallography, data processing from position sensitive detectors 85−15225
proton recoil telescope, scatter effects, Monte Carlo calcs. 86−11837
proton sensitive track detector neutron dosimetry 86−60615
proton-recoil proportional-counter array for neutron-image construction, reactor fuel motion meas. 85−43203
pulse shape discrimination for neutron-γ detection 87−41884
PWR containment, neutron dosimetry system 86−60844
PWRs neutron meas. instrumentation, French products *(French)* 85−9034
pyroelectric pulse ionizing-radiation detector 85−64451
Radial Oscillating Collimators to reduce parasitic scattering 85−15237
radiation protection quantities for external exposure, conf., Braunschweig, Germany (Mar. 1985) 86−13267
reactor external detector systems for power and energy distrib. meas. 85−43708
reactor pressure vessel neutron dosimetry using solid-state track recorder 87−22090
reactor radiation fields, intense, neutron-activation measurements, standardisation 87−29438
recoil-proton detectors, electric field distortion corrections for neutron spectrum meas. 88−48003
rem counter, high sensitivity, response, sensitivity det. 86−25330
rem counter, moderating type higher sensitive counter using ^{6}Li glass scintillator 85−59171
REM measuring instrument, tissue equivalent proportional counter 86−50354
scalar neutron spectrum meas. in assembly using simple facility 85−37909
scintillating inorganic crystals, appl. *(Chinese)* 88−29895
scintillation detector composites for neutron detection, light collection 88−61115
scintillation glasses for fast neutron detection 88−10259
scintillation position sensitive TOF counter, for neutron and charged particle detection 85−64470
scintillation spectrometer with gamma compensation 86−70371
scintillation thermal neutron detection, gain stabilisation, processing method 85−15211
scintillators for thermal neutron detection 85−15210
selective fast-neutron spectrometry, based on coincidences of gamma quanta 86−50450
self powered Rh detectors, depletion laws for reactor use 85−4227
self-powered detectors for X-ray monitoring *(Korean)* 86−5777
self-powered neutron detectors, appl. in WWER-440 in-core control system *(Czech)* 88−30514
self-powered neutron detectors, calibration, n- and γ-sensitivity meas. 88−61151
self-powered Rh neutron detector, depletion characts. 87−57041
semiconductor detector, ion-doped, Li ions and α-particles effects determ. 85−20825
simulated basalt geological radwaste repository, SSNTD neutron dosimetry 87−29668
single element neutron personal dosemeter using poly allyl diglycol carbonate 87−29628
sintered commercial TLDs, fast neutron sensitivity 86−11840
small angle neutron scattering using a radiographic detection system 85−15218
SNQ neutron source, remote handling system for flux distrib. meas. *(German)* 86−50299
solar neutrinos detection, appl. of water Cerenkov counter 88−47973
solid state nuclear track detectors, conference, Rome, Italy (Sept. 1985) 87−29556
spatial resolution of neutron-position scintillation detectors 85−15208
spectrum reconstruction from integral meas., a priori spectrum formation 85−20868
spherical proportional counters, microdosimetric neutron kerma factor measurements at 14-18 MeV 85−59189
spherical Pulse Ionisation Chambers for DD-fusion plasma neutron spectroscopy *(German)* 87−41872
spherical tissue equivalent proportional counter, n-γ dose separation *(Czech)* 86−32154
SSNTD, appl. in neutron dosimetry, environment and life sciences *(Chinese)* 86−11886
SSNTD personnel neutron dosimeters, research and development advances 85−38264
SSNTDs for neutron detection, automatic spark counter for high track density meas. 86−70351
stationary radiation-monitoring apparatus, checking without dismantling 85−48175
stilbene organic scintillator, absolute neutron detector efficiency calibration 88−61135
straggling effects in proton recoil neutron spectrometer 85−31763
streak camera, 14 MeV, with UO_2 photocathode, expt. characts. 87−57039
Studsvik in time-of-flight spectrometer for 20 MeV region 86−50446
subcriticality measurement system, portable, Cf-source-driven neutron noise anal. method based 88−60547
Superheated Drop Detector, appl. to neutron spectrometry and dosimetry 87−41877
superpositional many-detector systems and neutron diffraction of microsamples 88−29831
thermal neutron beamline monitor 86−55955
thermal neutron dosimetry using CR-39 with scintillator etch pit method 87−29622
thermal neutron flux, device for calorimetric meas. 87−8845
thermal neutron imaging using position sensitive photomultiplier 87−29510
neutron detection and measurement continued
thermal neutron monitoring using cellulose nitrate track detectors and spark counter 87−21465
thermal neutrons filtering, cooled sapphire and Be assembly performance 88−36397
thermal-neutron detector with six He counters 87−71023
thermal-neutron registration channel 87−29515
thermoluminescent dosimeters, neutron response 88−30057
thermonuclear neutron detection by GaAs bulk detectors 88−68210
three particle expts., data anal., Monte Carlo simulation 88−22935
three-dimensional He-recoil MWPC for fast polarizedneutrons 87−3894
time-of-flight facility at Hamburg isochronous cyclotron 85−43302
time-of-flight neutron hodoscope, performance 86−50394
time-of-flight spectrometer, in computerised meas. station 85−20867
tissue equivalent radiochromic waveguide dosimeters for X, γ and fast neutron meas. 87−21690
tissue-equivalent proportional counters, dose equiv. response to low energy neutrons 85−26820
ultracold neutron storage in fluid walled bottles, lifetime meas. 86−70323
ultracold neutrons, methods of slowing-down neutrons for collection, achievements *(French)* 85−15196
ultrahigh-sensitivity threshold neutron detector for plasma diagnostics using fission counter 85−43204
wide range neutron monitor for BWR post-accident power meas. 85−4225
wire chambers, use in structural biology 87−29442
workshop on the neutron lifetime, Tsukuba, Japan (Nov. 1987) 88−37855
zero-power LWR, neutron flux distrib. meas. *(Chinese)* 86−12620
(n,2n), secondary neutron energy spectra meas. 86−44612
n-γ radiation field dosimetry using miniature Si photodiodes 87−14947
^{252}Cf, spontaneous fission, neutron yield determ. 85−52965
Al_2O_3 single crystal filter for thermal neutron scatt. 88−22878
Am-Be source, flux meas. using NaI(Tl) scintillator 86−60545
^{10}B neutron capture therapy, monitoring system for thermal neutron fluence and γ dose rates 88−54612
^{10}B-lined proportional counters for FBR applications 85−48174
BF_3 detector with polyethylene moderator, response function determ. by time-of-flight method 85−43165
BF_3 long life counter development for nuclear reactors 85−4226
BF_3 long-life counters, development, use of activated charcoal layer 85−48173
$^{10}BF_3$ gas position sensitive detector for low resolution single crystal diffraction expts. 85−15226
BGO scintillator for eV region neutron scatt. 88−29800
BaF_2 powder-plastic mixture scintillator, particle identification 88−68253
BeCu dynode photomultiplier tubes for fast neutron detection in high rad. fields 88−68206
^{252}Cf neutron source, bare and moderated with D_2O, dosimetry using low press. proportional counters 88−10235
^{252}Cf neutrons, detection on phantoms using dosimeter, response 88−74903
^{252}Cf neutron source, n-γ discrimination, in-beam γ-ray spectroscopy using multiplicity filter 88−22973
^{252}Cf source noise method, detector signal correls. in presence of stochastic neutron field 88−68255
Gd-loaded large liquid scintillation counters for neutron multiplicity distribs. 87−50175
Ge, high purity detector for eV region neutron scatt. 88−29800
Ge poly- and monocrystals, neutron cross sections at various temps. 87−57022
^{3}He ionisation chamber, anal. of delayed neutron energy spectra 87−41863
^{3}He multiwire area detector for the small-angle neutron scatteringfacility at Riso 86−5813
^{3}He neutron detectors for well-logging environments 88−61622
^{3}He neutron spectrometer, response function, Monte Carlo calc. 88−68309
^{3}He neutron spectrometers, response function determ. 86−50376
^{3}He neutron spectrometry, materials influence and count-rate effects 85−43307
^{3}He proportional counter for neutrons, benchmark test by HP85 computer *(French)* 85−15198
^{3}He two dimens. thermal neutron PSDs, resolution and accuracy 85−15203
^{3}He-Xe gas scintillation counter development for thermal to 2 MeV n meas. 88−61162
^{3}He-filled FNS-1 ionisation chamber, response function determ. 86−50376
HgI_2 detectors for thermal n studies 87−57030
^{115}In(n,γ), 144 and 570 keV, fast neutron fluence meas. 86−5734
Li glass scintillator, neutron detection efficiency 85−37920
^{6}LiI position sensitive scintillator, thermal neutron detection 88−61083
LiF (TLD-700) sensitized, fast neutron response 88−22974
LiF dosimeters, TL residuals, accumulation effects and minimisation 88−54678
$Li_2SO_4:Ce^{3+}$ glass, neutron detector design 85−15206
NaI detector, measurement of d+T neutron pulses 87−63640
NaI(Tl) modular detector for intermediate energy photons, neutron response 88−74749
NaI(Tl) scintillation detector, n response meas. *(Japanese)* 88−36353
Pu, impure, assay using fast neutron counter 88−29894
Rh travelling in-core neutron flux detector for Taiwan Research Reactor 88−54424
Si detector system for personnel neutron dosimeter 88−61482
Si devices based on nuclear irradiation induced defects *(Czech)* 86−27835
Si diode for fast neutrons detection *(Czech)* 86−32149
Si dosimetric diode, energy and kerma depend. 86−60553
Si dosimetric diodes, static V-A characteristics *(Czech)* 86−60551
Si surface barrier detector for fusion neutron spectroscopy 87−8856
Si thermal neutron detector, sandwich-type 86−60597
U calorimeters, proportional counter readout 88−47991
^{233}U(n_{th},f), prompt neutron meas. by double-energy double-velocity method 88−47978
V self powered neutron detector, thermal neutron flux density meas. 86−32155
V self-powered neutron detectors, sensitivity 87−29468

neutron diffraction

Bonner sphere neutron spectrometer, expt. tests 85−52987
deuterated anthracene neutron spectrometer for 5-30 MeV, pulse shape discriminator 88−61200
dosimeter calibration, single sphere albedo system 85−26805
dosimetry, correction factor determ. using proton recoil spectrometry and liq. scintillators 88−68258
energy spectra reconstruction, from calorimetric meas. on Serpukhov accelerator 88−61037
flux energy spectra calc. from activation and multisphere detector data 85−26800
fusion blanket, fast neutron spectrum in graphite pile 85−48691
LOTUS programme, mathematical modelling and fast neutron spectrometry *(French)* 88−16661
moisture content meas. of bulk materials, pulsed neutron method 86−26954
multiwire chamber system for neutron spectra meas. 85−26703
nuclear power plant dosimetry, unfolding code for multisphere neutron spectrometer 86−25337
Penning ion source, striking characteristics, neutron time spectrum study 85−20804
scalar neutron spectrum meas. in assembly using simple facility 85−37909
SCORPION, the Stuttgart facility for fast polarizedneutrons 86−44603
(n,2n), secondary neutron energy spectra meas. 86−44612
$^{19}F(n,X)$ in LiF, $(CF_2)_n$ piles, neutron spectra meas. 86−18992
$^{56}Fe(n,n'\gamma)$, selective fast-neutron spectrometry appl. 86−50450
$^{233}U(n_{th},f)$, prompt neutron meas. by double-energy double-velocity method 88−47978

neutron spectrometers
advanced neutron source conference Oxford, England (July 1985) 86−52150
Bonner sphere detectors, neutron field dosimetry appl. 85−26799
Bonner sphere neutron spectrometer, expt. tests 85−52987
bunching spectrometer, resolution comparisons with TOF spectrometers 86−5859
chopper spectrometer for pulsed neutron sources 86−5863
collimator design, using Monte Carlo code MOTSY, 14 MeV neutron distrib. 87−71038
collinear fragment-neutron coincidence technique 87−71039
constant Q spectrometer for pulsed neutron sources 86−25152
constant-energy crystal spectrometer with aone-dimensional multicounter 86−5865
copper monochromator reflectivity, inelastic spectrometer with pulsed source 85−4243
CR-39, etched, fast neutron spectrometer, computer program 88−23010
CR-39 detectors, electrochemically etched, passive fast-neutron spectrometer 87−77561

neutron spectrometers continued
crystal analyser mirror spectrometers using cold and thermal neutron sources 86−56060
crystal analyser quasielastic neutron spectrometer, design and performance 85−64504
crystal spectrometer for pulsed neutron sources 86−5863
ΔT-window spectrometer 86−5864
deuterated anthracene neutron spectrometer for 5-30 MeV, pulse shape discriminator 88−61200
differential cross-section and analysing power meas. techniques 85−59227
diffuse scattering TOF spectrometer, pulsed neutron source 86−5861
dosemeter/spectrometer, portable computerised 85−26802
double-difference method to improve the resolution ofan eV neutron spectrometer 86−5844
double-differential neutron emission cross-section meas. 87−63691
Drabkin resonator as time variable analyzer, development 86−56072
dual thin scintillator, coincidence config. development for neutron spectrometer 86−56047
facility at Studsvik, energy resolution signal to noise ratio 85−31760
fall-focussing gravity spectrometer with ellipsoidalmirror elements 86−44605
fast chopper neutron time-of-flight spectrometer, Monte Carlo model and expt. test 86−70363
fast Fermi neutron beam chopper for SNS 86−55954
fast n spectrometer based on CR-39 p sensitive track detector 86−44599
fast neutron cross-section meas. at JAERI tandem accelerator 88−4861
fast neutron spectrometer based on an electrochemically etched CR-39 detector with degrader and front radiator 88−23012
fast neutron spectrometer using an epitaxial integrated dE-E Si detector 85−43309
fast neutron spectrometer using single wafer Si dE-E detector 87−41894
fast neutron spectrometry based on proton detection in CR-39 detector 87−29620
fast neutron time-of-flight spectrometer, calibration procedure 85−37974
fast-neutron spectrometry using the triple-α reaction in the CR-39 detector 87−29621
FASTBUS data acquisition system for neutron time-of-flight meas. 85−43308
fibre optic coded detector systems on the SNS 86−56070
flux energy spectra calc. from activation and multisphere detector data 85−26800
focusing monochromators, pulsed neutron sources 85−26556
full-absorption scintillation spectrometer for neutrons 88−61136
fusion plasma diagnostics systems 87−50194
high angular resolution and double monochromatisation of neutron beam 86−5850
high-pressure ^3He gas scintillation neutronspectrometer 86−50439
highly stable fast-neutron time-of-flight spectrometer 87−50189
inverted geometry spectrometer for pulsed neutron sources 86−5860
IRIS, pulsed source quasielastic and inelastic spectrometer 86−56062
JAERI linac TOF facility 87−21506
LAM-40, cold neutron scattering spectrometers, spallation neutron facility, KENS 86−5855
LAM-80, cold neutron scattering spectrometers, spallation neutron facility, KENS 86−5855
LAMPF nucleon charge exchange facilities 88−29922
Larmor precession as energy analyser, transmission spectrometer 87−77589
liquid diffractometer with position sensitive detector 86−5866
Los Alamos neutron Anger camera 86−56069
LOTUS programme, mathematical modelling and fast neutron spectrometry *(French)* 88−16661
low jitter, low cost, time-of-flight circuit for neutron spectrometer 88−61194
MARS, multi-angle rotor spectrometer for SNS 86−56064
MIBEMOL, six chopper neutron time of flight spectrometer at Orphee reactor 85−64515
MITR-II beam port time-of-flight neutron spectrometer for undergrad. education 85−59233
Moire effects in neutron interferometry, appl. in neutron elec. charge search 85−31689
multi-moderator neutron spectrometers, γ-ray insensitive and highly efficient 86−5840
multiplicity spectrometers for neutron cross sect. measurements 86−5848
NE213 cylindrical counters, timing characts. 85−37928
NE213 miniature spherical spectrometer for fast-neutron spectrometry, characts. meas. 85−15256
NE912 ^6Li glass spectrometer for low energy fission neutrons 87−50195
NE-213 organic scintillator based high efficiency neutron spectrometer 86−44611
Neutron Ball spin spectrometer, computer simulation 86−44609
neutron gatsometers for vel. meas. 85−43300
neutron spin echo spectrometer using superconducting magnets 88−48034
neutron TOF spectrometer at KURRI electron linac 87−21508
nuclear power plant dosimetry, unfolding code for multisphere neutron spectrometer 86−25337
optimal neutron Larmor precession magnets 88−68307
polarisation modulated cross-correlation spectroscopy on pulsed neutron source 85−31762
polarised neutron spectrometer, automatic control in radiation areas *(German)* 85−4242
Polarized Epithermal Neutron Spectrometer, PEN, development 86−56068
polarized neutron pulsed sources, novel appl. 85−64439
PRISMA, high symmetry neutron spectrometer, performance 86−56067
PRISMA, pulsed spallation neutron source spectrometer 87−35369
prompt fission neutrons, energy, angular distrib. meas. 88−29927
pulse-shape gamma-quantum discrimination 86−70370
QENS, medium resolution-inverted geometry, TOF quasielastic and inelastic neutron spectrometer, preliminary measurements 88−61198
quasi-periodic pulsed neutron source, neutron chopper phasing, control system 85−43155
radiation monitoring, development 85−26803
radiation protection, development 85−26804
resonance detection methods 86−5854
resonance detector spectrometer, BGO scintillator and Ge detector for eV region, tests 88−29800
resonance detector spectrometer, development on Harwell Linac 86−56066
SAN, cold neutron scattering spectrometers, spallation neutron facility, KENS 86−5855
sandwich type ^6LiF based spectrometer *(Russian)* 86−32211
scintillation spectrometer with gamma compensation 86−70371
SCORPION, the Stuttgart facility for fast polarizedneutrons 86−44603

neutron spectrometers continued
selective fast-neutron spectrometry, based on coincidences of gamma quanta 86−50450
small angle neutron scatt. time of flight spectrometer, config., performance, design principles 87−3911
small-angle neutron scattering facility at Riso 86−5868
small-angle neutron scattering spectrometer, TOF-design, performance 86−56061
spectrum reconstruction from integral meas., a priori spectrum formation 85−20868
spherical Pulse Ionisation Chambers for DD-fusion plasma neutron spectroscopy *(German)* 87−41872
spin analysis with time-of-flight multidetector scattering instrument 85−64514
straggling effects in proton recoil neutron spectrometer 85−31763
streamer spectrometer for rare neutron capture reactions *(Russian)* 85−52990
Studsvik in time-of-flight spectrometer for 20 MeV region 86−50446
tandem fast neutron TOF facility 87−21507
thermal-neutron registration channel 87−29515
Time Focusing Crystal Analyser spectrometer at SNS, design 86−56063
time of flight, spin echo spectrometer, pulsed neutron source 86−5856
time of flight diffractometers, calibration 86−5846
time of flight resonance spectrometer GALINA, high resolution studies 85−31759
time of flight spectrometer for gamma correlated neutron spectra meas. 87−29690
time of flight spectrometer for quasielastic neutron scattering studies, design 86−38723
time of flight spectrometer with optical polariser 86−5845
time-of-flight facility at Hamburg isochronous cyclotron 85−43302
time-of-flight neutron spectrometer for DT-plasma diagnostics 85−59226
time-of-flight spectrometer, in computerised meas. station 85−20867
TOP, cold neutron scattering spectrometers, spallation neutron facility, KENS 86−5855
triple axis spectrometer, pulsed neutron source, constant q-scan 86−5862
triple-axis, thermal neutrons filtering, cooled sapphire and Be assembly performance 88−36397
U-150 cyclotron neutron time of flight spectrometer 87−21503
UCN time-of-flight spectrometry, using thin film ferromag. chopper 88−29928
variable wavelength spectrometer, texture determination by neutron diffraction 86−5857
velocity drive for high resolution neutron backscatt. spectrometer 86−5867
(n,2n), secondary neutron energy spectra meas. 86−44612
DT-plasma diagnostics 86−11917
^{3}He ionisation chamber, anal. of delayed neutron energy spectra 87−41863
^{3}He ionization chamber for neutron spectrometry, performance 86−70372
^{3}He neutron spectrometer, response function, Monte Carlo calc. 88−68309
^{3}He neutron spectrometers, response function determ. 86−50376
^{3}He neutron spectrometers, response function 87−71064
^{3}He neutron spectrometry, materials influence and count-rate effects 85−43307
^{3}He response to fast neutrons, Monte Carlo anal. 86−60641
^{3}He spectrometer, influence of neutron scatt. in walls. 87−71042

neutron transport theory
see also neutron moderation
automatic reactor control, reactivity constraint approach appl. 88−48734
baffle/reflector, effective reflector constants, determ. for few-group diffusion calcs. 86−6520
beam tube streaming, coupling anal. 86−56021
Bonner spheres, neutron responses for thermal to 17.3 MeV neutron energies 85−64479
design codes, ANISN-JR, TWOTRAN-II, transport calculations for very high temperature reactor 85−53450
dynamics transport codes, analytical benchmarks 87−42623
FBR core model, appl. to hardness assurance simulation for electronic components 88−63030
LOTUS programme, mathematical modelling and fast neutron spectrometry *(French)* 88−16661
LWR, high conversion cells, neutronic parameters, sensitivity anal. 88−5463
nuclear power plant dosimetry, unfolding code for multisphere neutron spectrometer 86−25337
PWR safety anal. using B1K 1D neutron kinetics program 87−4517
reactor neutronics, numerical methods conf., Montreal, Canada, Sept. 1983 87−5150
spallation breeding facilities, neutronics calcs. using Monte Carlo methods 87−9324
WWER reactors, neutron physics calcs. for start-up and operation *(Slovak)* 88−17305
^{252}Cf neutron calibration flux distrib., Monte Carlo simulation 87−21370
NaI spaceborne γ spectrometer shielding effects 88−29931

semianalytic BER evaluation by simulation, noisy nonlinear bandpass channels 88−34527
semiconductor laser, constant current driven, obs. of amplitude squeezing 87−39123
semiconductor lasers, low-freq. intensity noise observed in output 88−65690
semiconductor lasers, single-longitudinal-mode, intensity noise anal. 86−42551
semiconductors, nondegenerate, diffusion noise and hot electron noise at arbitrary drift vels. 86−41505
semiconductors hot electrons, conf., Innsbruck, Austria (July 1985) 86−19714
separable-denominator 2-D digital filters, roundoff noise anal. 86−67367
sequential detection, robust approach 88−72914
shift-invariant imaging of photon-limited data using bispectral analysis 85−30352
Shinkansen noise generation, expt. study *(Japanese)* 87−75476
signal acquisition probability for correlation algorithm 87−7753
signal classification with noise, neural network classifier based on coding theory 88−34718
signal detect. with data fusion, distributed cell-averaging const. false-alarm rate method 88−46116
signal detection, covariance difference method 88−21236
signal detection, X^2 test appl. 87−61993
signal detectors, invariance property 88−14655
signal enhancement, composite property mapping algorithm 88−27892
signal interception, unifying theoretical framework for feature detection 88−20913
signal prediction with adaption to noise situation 88−21178
signal processing, basic ideas and developments *(French)* 86−10394
signal processing with FFT, noise-reducing effects 88−46048
signal recovery in electronic instrumentation, book 85−60646
simultaneous broadband and narrowband detection, noise background normalisation 88−73123
single injection solid state cylindrical diode with deep traps, thermal noise calc. 87−60396
single mode fibre systems, cutoff wavelength and modal noise 85−29611
single mode optical fibre, quantum noise, broad-band parametric deamplification 86−68630
single photon emission tomography, spatial algorithm for transmission attenuation and detector response 88−68395
single-mode fibre systems, effective cutoff and modal noise 86−9547
single-mode lightguide systems, modal noise probability 86−48165
sinusoidal signals, nonstationary, in coloured noise, freq. estimation *(French)* 88−21251
sinusoids, high spectral estimation, in coloured noise using modified Pisarenko decomposition 87−19735
sinusoids in coloured noise, estimation of frequencies 87−19734
sinusoids in signals with unknown coloured spectrum, adaptive recursive scheme 86−10402
SIR-B ocean wave imagery, speckle noise reduction 87−71390
sources and neutralisation methods *(Danish)* 86−29422
spatial filters, modified, matched, optimality considerations 86−15545
speaker-independent high-speed recognition for isolated words spoken at low signal-to-noise ratio *(Japanese)* 88−59106
speckle grain noise, holographic interferometry, speckle photogrammetry, heterodyne techniques 88−14285
speckle photography fringes, 2-D digital processing, diffraction halo influence for noisy case 85−46883
speckled images, bayesian filtering for noise reduction 85−36367
SPECT cone beam collimators, noise characts., comparison with parallel hole collimator 88−61306
spectral analysis of sinusoids embedded in noise with unknown coloured spectrum *(Japanese)* 86−23079
spectral function component determ. 87−55145
speech, noise removal using local correlation filter *(French)* 88−21150
speech contaminated by additive noise, unbiased estimation of LPC parameters 85−41887
speech processing using group delay functions 86−16199
noise continued
speech recognition, Itakura spectral distortion measure 88−27835
speech recognition, learning sets of filters using back-propagation 88−21116
speech recognition improvement in noisy environment *(Japanese)* 88−34613
speech recognition with a noise-adapting codebook 87−61717
spoken digital recognition and S/N ratios of reference pattern under the noisy environment *(Japanese)* 87−55028
squeezed light in alternating attenuators and amplifiers, low-noise props. 88−60169
SQUID, DC, noise effect on instabilities and chaotic solns. 87−25894
SQUID, DC, noise effect on instabilities and chaotic solns. 87−25895
SQUID's, applications in geophysics, elementary particle physics and cryogenics *(Russian)* 85−24233
SQUID based wideband device for meas. of mag. props. of materials 85−56205
SQUID magnetometers, thermal coefficients and excess noise 85−46066
SQUIDs, extremely underdamped, thermal activation 85−46097
stack filter determ., mean absolute error criterion 88−72915
static compensator control systems, noise resistance of high speed pickups *(Russian)* 87−77948
static protective relays, testing device for noise immunity 87−9217
stationary normal noise with time correlation between samples, complex correlation matrix evaluation 86−36892
statistical inference of data pattern and noise by encoding using assertion of systematic pattern 88−40847
steel flatpack soil stress gauge, shock loading, elec. noise anal. 87−21070
stochastic nonlinear systems, state and parameter estimation 88−72942
stochastic signal detection, asymptotically robust, in contaminated noise 86−64302
stochastic signal processing of incomplete observation data with amplitude limitation and state estimation under the existence of additional noise 88−34713
streak camera output image intensification, amplification stage performance evaluation 85−61651
strong motion accelerographs, noise amplitudes 87−75834
structural identification for signal extraction from noise background 88−40885
sub-Poissonian light, generation by high-efficiency LEDs 87−74932
subband coding, waveform and bit-allocation coders 88−41446
subcritical nuclear reactor, stochastic processes in presence of fission source 86−6517
subharmonic sine-wave and pulse injection locking of oscillators 87−5698
substation noise at distribution-line communication frequencies 88−42840
superconducting magnet normal-phase indicator noise immunity *(Russian)* 86−53921
superimposed exponential signals in noise, exact maximum likelihood estimation 86−16476
superluminescent diodes, quantum noise 86−42451
superresolving image restoration, feasibility for differential-interference contrast microscopy 88−59281
surface mobility fluctuations in MOSFETs, 1/f noise 87−45978
switched capacitor integrator, minimum clock-feedthrough error voltage 87−5953
switched capacitor networks, lossy and ideal, noise anal. 87−499
switched-capacitor integrators, noise study using equiv. cct. and Z-domain sampling method *(German)* 85−6430
switched-capacitors biquads optimisation 87−52721
symbol synchronizers, cycle slipping, phase-dependent loop noise influence 86−29671
synthesized speech signals intelligibility, distortion study, anal. of basilar membrane in cochlea 87−69065
system identification algorithm based on iterative algebraic filtering 88−73040
target detection, clutter effect, quantitative expt. 85−46752
telecommunication fundamentals, signals, noise, perturbations, jamming and interference, remarks *(French)* 88−21434
telephone channel simulator for high speed data transfer evaluation 88−34970
telephony, impulse noise estimation method for digital signal transmission system 85−13996
TEXTOR neutral injector 55 kV transmission line, tests, frequency noise reduction 88−68937
textured images, noisy, segmentation using simulated annealing 87−62247
textured optical storage media, dynamic S/N meas. 85−12529
theoretical overview *(German)* 88−8490
thin film longitudinal mag. recording media, noise 86−28650
thin film rigid discs, texturising effect on mag. and recording props. 88−51313
thin metallic longitudinal recording media, density depend. of noise 88−71920
thin-film media, transition noise 87−25819
three-antenna interferometric direction finders, algorithms 88−58963
time-domain EM systems, noise processing techniques 85−7860
transform coding of speech using a weighted vector quantizer 88−40863
transient optical bistability, noise effects 87−54420
transistor noise figure determ., microwave signal processing *(Slovak)* 86−41213
transistor oscillators with impedance noise matching 86−67087
transistor VVVF invertor, appl. technique, harmonic and noise problems 86−61597
transmission line impedance mismatches, simulating and controlling effects 87−7562
transmission surface barrier detectors, noise and breakdown phenomena *(Chinese)* 87−50157
TV chain basic noise, picture quality, nonlinear distortions *(Russian)* 88−22259
TV images, structural noise reduction in adaptive group coding *(Russian)* 88−22299
two-dimensional noise model 85−57374
two-port linear network, noise figure calc., algorithm for microwave CAD appls. 86−13936
two-sensor fused-track covariance, effect of common process noise 87−33690
two-terminal pair amplifier analysis *(Czech)* 85−17175
underwater passive trajectory plotting, nonrecursive methods comparison *(French)* 88−21264
unknown frequency sinusoids detection in noise, spectral vs. correlation domain 87−61842
unknown nonstationary chirp signal tracking using unsupervised clustering in Wigner distribution space 88−73030

noise continued
unshielded magnetoresistive heads in very high-density recording 85−24121
US NDT, flaw detection in coherent noise *(French)* 88−23212
variable latency signals, estimation of time domain responses, bioelectric potentials appl. *(Japanese)* 86−70425
vector quantizers for noisy channels 85−13474
VHF crystal oscillators, phase noise performance study *(German)* 88−50054
VHF man-made noise in New Delhi 87−26827
VHF/UHF band field strength meter calibration system *(Japanese)* 88−36171
VHF/UHF EM noise from corona on power-line conductors 88−40589
video signals, different types *(Spanish)* 86−42866
Viterbi decoding using importance sampling 88−34562
voltage-mode resonant push-pull convertor with mag. amplifiers, static and dynamic characts. *(Japanese)* 88−18926
voltage-sensitive differential input preamplifier with outstanding noise performances 88−25002
Volterra systems with continuous spectrum signal and noise, freq. domain anal. 85−17118
wavefront reconstruction from noisy slope ordifference data using the discrete Fouriertransform 86−49014
wavefront sensor error estimation using Cramer-Rao lower bound 86−50237
weak modulated random signal interception, performance advantages of cycle detectors 88−21244
weak signal receivers, two-port coupling network model, noise figure study 85−2809
weak-signal detection in generalised observation model 87−47866
wideband FM subsystem for a low-noise synthesizer module 88−29474
wideband MF atmospheric radio noise, meas. and statistical anal., noise power temporal structure and distrib. 86−29380
wideband optical transmission systems using semicond. laser, noise in monomode and multimode fibres *(German)* 85−52352
wind generator simulation using Markov chain noise model 87−30464
Winograd result on computation in noise presence, improvements 85−30180
wiring formats, elec. parameters and coupled noise comparison, computer technique 86−52627
word recognition in noise, spectral slope distance measures with linear prediction anal. 87−69058
X-ray screen-film combinations, power spectra *(German)* 85−53034
yoke-type magnetoresistive heads, Barkhausen noise, inverse effect of magnetostriction 88−26669
yoke-type magnetoresistive heads, Barkhausen noise 88−26668
Ag contact breaking arc and composite noise generator, statistical meas. of 1 MHz induced noise *(Japanese)* 86−33561
Ag contact switching, noise current spectra *(Japanese)* 87−59939
Al thin film interconnections, electromigration and LF resist. fluctuations 88−26092
AlGaAs DH based injection lasers with narrow strip contact, spectral and noise characts. 86−36501
AlGaAs external-cavity semiconductor lasers, electrical mode-hopping noise and elimination by nonoptical control loop 88−20646
AlGaAs lasers, linewidth enhancement factor estimation by correlation meas. between FM and AM noises 85−62587
$Al_xGa_{1-x}As$, variband cryst., hot electron noise, mag. field effect 87−53186
AlGaAs-GaAs selectively doped, HEMT, MOCVD growth, depend. of 2D electron gas mobility 87−60493
Ar^+ mode-locked, CW laser, noise charactn. *(Chinese)* 88−72371
C sliding-contact, radio noise generation mechanism *(Japanese)* 85−34240
CO_2 laser heterodyne systems, precise comparison of expt. and theoretical S/N ratios 85−47606
$Cd_xHg_{1-x}Te$ diodes, characteristics near liquid He temps. 86−53386
$Cd_xHg_{1-x}Te$ photoelec. props., local surface deform. effects study *(Russian)* 87−54176
Co films, perpendicular mag. recording, modulation noise due to mag. domains 86−9406
Co-Cr single-layer perp. recording media, noise 88−44980
Co-Cr thin film media noise for longit. and perp. recording 87−25817
Co-Cr/Co-Zr-Mo double-layer media and ring head, perpendicular recording characts. meas. 85−45993
Co-Cr/Ni-Fe double-layer flexible disc, underlayer induced noise and carrier to noise ratio 86−42122
Co-Cr/Permalloy double layer mag. recording media, noise anal. 86−36017
Co-Mo-Zr underlayer of perpendicular mag. recording medium, noise meas. 85−45981
Co-Ni-P thin film plated disks, mag. props., read/write characts., media noise 88−71936
$Co_{85}Cr_{15}$, low noise medium for high density longitudinal recording 88−71921
CsI X-ray image intensifiers, imaging and noise limitations 85−9139
γ-Fe_2O_3 thin film discs, wear resist. and S/N ratio 86−35998
GaAlAs lasers, polarisation-resolved low-frequency noise 87−12484
GaAlAs lasers, single longitudinal mode, noise reduction by high-reflectivity compounds 85−62593
GaAs MESFET in fibre optic receivers, anal. of sensitivity degradation caused by flicker noise 88−50889
GaAs MESFETs, ion beam lithography fabrication, characterisation 86−53680
GaAs digital ICs, noise immunity improvement using normally-on MESFETs *(Japanese)* 87−60656
GaAs digital cct. coupling diode FET logic, noise margin improvement 86−40990
GaAs lasers, long wavelength, phase noise enhancement 86−3183
GaInAsP laser amplifier, travelling wave, 1.5 μm, characts. 87−68494
He-Cd laser, noise reduction by discharge current modulation 87−19013
He-Ne/I_2 laser, two-mode, frequency resonances, high S/N ratio, laser spectroscopy appl. 85−35702
$Hg_{1-x}Cd_xTe$ photocond., carrier generation-recomb. noise, deep level trap effects calcs. 85−56408
$InAs_{1-x-y}Sb_xP_y$ epitaxial diode structs., electrophysical and photoelectric props. 87−54186
InGaAs, high-field autovariance coeff., diffusion coeff., and noise at 300 K 87−37900
$In_{0.53}Ga_{0.47}As/InP$ heterostructures, microwave noise characteristics, electrical instability 85−23532
InGaAs-InAlAs, superlattice APD, impact ionisation coeff. ratio, determ. from noise meas. 88−14025
InGaAs-InP, junction FET, deep levels, low freq. noise meas. 88−26328
InGaAsP lasers, index-guided, reflection noise 86−42552

noise continued

digital radio noise and interference test set, HP 3708A, noise generator and reference source 88−35800
digital simulator of a noisy signal 87−76049
EA Noise simulator cct. 85−17754
EMC tests, burst generator design *(German)* 87−47238
filter noise generator having adjustable spectrum and constant variance *(German)* 88−18955
Gaussian white noise generation for digital signalsynthesis 86−60265
Gunn diode noise generators in mm range 87−29144
HF noise generator development using improved vacuum diodes 88−67914
high-power narrowband-noise generator 87−37050
IF clutter signal generator 88−15552
initializing a flicker-noise generator 86−65211
instruments, capabilities and appls. 86−24560
jamming signal generation 86−4702
LC oscillator, conversion circuits 88−38415
LF noise generator with white output, config. using logistic map system 87−73356
low-cost noise sources useful as receiver built-in test equipment 87−536
low-temperature millimeter-band noise generator 86−8427
low-temperature mm-wave, loss changes in waveguide in 295 to 77K range 87−29268
M-sequence generator for noise with arbitrary distribution 85−61141
micro-gap discharge circuit as simulated gap-type noise source 88−70579
microwave, noise-power spectral density reference in the 37.5-78.3-GHz frequency band 87−63504
microwave coaxial noise source, calibration using waveguide standard 88−29608
microwave noise generators, calibration by IF comparison method 88−981
microwave noise generators certification, w.r.t. coupling of thermoelectric parameters 88−42178
microwave range appls. 85−14819
microwave thermal noise sources, noise temp. eval. method using auxiliary transmission line 88−29610
mismatched noise sources, noise temp. meas. system 85−20538
MM5837N digital IC noise source, clocked shift register 85−22972
MM-wave FT spectroscopy, noise tube sources 88−25787
MM-wave solid-state noise sources, 26-100 GHz, development and performance 87−11068
monolithic analogue random noise generator, design 85−6199
noise tube sources for the far IR and millimeter region 88−60775
noise-factor meter checking apparatus 87−35109
periodic precision pulser with a Gaussian noisegenerator 86−46620
pseudo random noise generator−voltage or current 85−61351
pseudo-random, frequency-weighted audio noise generation and analysis 85−43010
R-X antenna noise bridge, design 85−2702
radar noise source calibration considerations *(German)* 86−43885
random binary errors testing, Tausworthe generator appl. 86−44326
random noise generator, design using all-pass digital filter *(Japanese)* 87−16921
random number generator, physical random phenomena based *(German)* 85−61138
random oscillation generator with external periodic input, behaviour 87−37055
receiver test facility with NC501 noise source *(German)* 88−147
RF noise meas. in radioastronomy *(Spanish)* 87−3260
RF test equipment, design and construction 87−21105
RF-noise source, calibrated, use in antenna system parameters meas. 87−35107
Rohde & Schwarz SUF 2 noise generator, review *(German)* 87−49777
SHF noise generator, low-temp. 86−70151
simple noise generator for test purposes *(German)* 85−26351
solid-state noise sources, specifications conversion and verification 87−56718
sources for noise-figure meas., eval. 88−16223
standard 1/f noise generation 88−16225
stochastic generator behaviour in presence of external noise 85−6201
switched capacitor noise generator, config., operation and anal. *(Japanese)* 88−25040
telecommunication systems, stability anal. of linear route equivalent *(Polish)* 86−4144
using noise to advantage in military systems 86−44331
waveguide, temp. distrib. meas. 86−38595

noise levels, acoustic *see acoustic noise*

noise measurement

magnetic storage materials testing by TEM 86−583
magnetic structurescope based on the Barkhausen effect 87−16726
magnetic testing of steel ropes 88−18821
magnetic testing of tubes, sample-identification methods use for automation 87−31599
marine technology, corrosion inspection and NDT *(German)* 88−63422
marine transportation facilities, underwater inspection 85−475
material property sensors, principles and technologies *(German)* 88−31901
material stress inspection by digital thermographic image processing 87−16756
materials inspection, review of test methods *(German)* 85−6040
materials monitoring, capture gamma-rays from neutron irrad. 86−52568
materials processing control, nondestructive evaluation techniques appl. 85−54551
materials selection and use, conf., London, England (July 1985) 86−52129
measurement system used in nondestructive testing, characterisation 85−43833
measurements in nondestructive evaluation 88−18790
meat and forestry industries, nondestructive high-resolution imaging techniques 86−38283
mechanical and electromagnetic methods [of NDT], review *(Italian)* 87−44415
medical device industry, holographic testing appls. 87−21666
metal film-substrate adhesion testing, nondestructive indicator using optically-induced thermorefl. meas. 86−26939
metal quality measurement system uses low-cost micro 87−3710
metallic materials, microstructure and stress, NDT, US and magnetic methods 85−33542
metallisation stability on semiconductor surface, microscopic control 87−74222
metallurgical components, nondestructive determ. of properties and passing of information 88−219
metals and semiconductor objects, contactless quasioptical resonator inspection 87−23771
metals NDT using EM instrumentation, book contrib. 86−584
microcircuits, failure anal., digital image processing methods 85−33252
microelectronics materials NDT 87−60565
microprocessor-aided process meas. and control technology *(German)* 87−34925
microwave beam-lead diodes, bond-free nondestructive test fixture 88−63934
microwave projection imaging for internal struct. determ. 87−41598
microwave refl. charact. meas. using compact meas. technique 86−70210
microwave resonator-type transducers for film thickness meas. *(Russian)* 87−70781
microwave wafer probing, techniques for MMIC testing and one-/two-port calibrations 85−48077
Minac, small linear accelerator for radiographic inspection 85−49663
MLB drill position optimisation process control using real-time X-ray imaging 88−44468

nondestructive testing continued
MLC devices, mag. selection for soldering according to pin local plating thickness 86−35239
model of automated nondestructive active thermal inspection 85−471
modern methods, merging into manufacturing lines 85−464
moisture content meas. of bulk materials, pulsed neutron method 86−26954
Monel 400, mildly ferromag, tubing, eddy current inspection 85−473
monitoring system, rule-based, for materials evaluation 86−46419
MOSFET oxides 86−35684
multifrequency method of parameters determ. of dielectrics, data processing effectiveness 87−77401
multilayer circuits, automatic NDT system for layer offset meas. *(German)* 88−50491
multilayer dielectric structures, wideband microwave introscopy, secondary spectral analysis 85−8937
multilayer dielectric structures testing by multifrequency methods 85−44817
multilayer structs., nondestructive characterisation, resonant attenuated total reflection spectroscopy 88−2279
multilayer structures, material identification, gamma-ray backscatt. methods 86−52569
multiparameter EM inspection, multidimensional signal analysis, spectral methods 86−13859
multiparameter EM nondestructive inspection, statistical model, principal components method 85−49653
multiparameter EM nondestructive inspection, statistical solns. of metric problems 85−49652
national centre for India, feasibility report 86−13434
NDE techniques appl. 86−46406
NDT, radiographic inspection of Al bicycle frames *(French)* 87−57048
neutron radiography, conf., Paris, France (June 1986) 88−30
neutronography *(French)* 88−24842
non-contacting AC field meas. 88−43986
non-destructive measurement of the lubricant distributionon magnetic disks 86−9402
noncontact inspection using laser triangulation probe 87−12643
noncontact testing of integrated circuits using an electron beam probe 88−39625
nondestructive control and thermal charact. meas., using HgCdTe IR detector 88−47574
nondestructive inspection using Barkhausen effect 85−10863
nondestructive laser prober for IC internal logic analysis *(Japanese)* 87−10750
nonintrusive condition monitoring of electric drives and rotating machines 88−69775
nuclear inspection by holography 86−61273
nuclear materials testing and safety, conf., Stuttgart, Germany (Oct. 1986) 87−65038
nuclear plants, probabilistic and decision anal. methods appl. to struct. mech. and materials science 85−15785
nuclear power plant, in-service inspection 85−43831
nuclear power plant components, automated non-destructive testing using γ-rays 85−37458
nuclear power plant components, reliability and inspection, recent developments in NDT techniques 85−27177
nuclear power plant in-service inspection and reliability programme 87−9285

optical techniques, conf., London, England (Jan. 1986) 86−26520
optical time domain reflectometry for optical fibre testing, instrumentation principles 86−53966
optics in engineering meas., conf., Cannes, France (Dec. 1985) 87−16248
optimum single-sample inspection plans for products sold under free and rebate warranty 88−31516
overhaul and NDT of cableways in public service *(Italian)* 87−9917
overhead wire SCC detection without stripping of insulation *(Japanese)* 86−56439
parts inspection by laser beam heat injection 88−37998
pattern recognition and acoustic imaging, conf., Newport Beach, USA (Feb. 1987) 88−24321
PC for military use, nondestructive test probing and solvent removal 86−20900
PCB, multilayer, direct X-ray targets for dimens. stability anal. of signal planes 86−35203
PCB inspection using real-time holographic interferometry 87−52971
nondestructive testing continued
PCB IR imaging, automatic mass screening 88−64058
PCB plating ductility process monitor 85−34327
permittivity meas. using nondestructive microwave reflectometry 86−55813
phase objects, NDT by holographic interferometry using degenerate four wave mixing 85−51296
photo-and Joule-displacement microscopy 87−49525
photoacoustic spectroscopy of semiconductors, low-temp. 86−20147
photoelectron scanning electron microscope (PSEM) for high speed noncontact testing 88−39626
photopyroelectric thin film instrumentation and impulse-response detection, performance and signal recovery techniques 88−22606
photothermal radiometry appl. using IR scanners 87−16763
photovoltaic module string hot-spot detection with mirrors, ammeter and voltmeter 86−45691
photovoltaic module testing by nondestructive holographic interferometry 86−45690
photovoltaic panels evaluation, using computerised IR thermography system 85−53823
piezoelectric waveguide in form of plate with end electrodes, normal modes dispersion relations 85−49617
pipe flow, obstructions and blockages detection methods *(German)* 88−42697
pipeline automated inspection service, British Gas experience 87−51891
pipeline inspection, data acquisition and reduction 86−60187
pipeline materials, creep damage, comparison of NDT techniques *(German)* 86−34413
pipes, holographic NDT, predicted fringe patterns and exptl. results 87−59037
planar semiconductor structures, Hg probe with stabilised contact area 87−56640
plasma panel substrates, automatic nondestructive quality testing 86−18033
plasma sprayed coatings, thickness, adhesion defect, thermal wave interferometry 85−39832
plastic encapsulated component failure analysis, IR microscopy advantages 88−33306
plastics, coherent X-ray scatter potential for imaging purposes evaluation 88−29978
plastics insulated HV cables, nondestructive location of small discharges 85−32167
polarisation-maintaining fibres, alignment using nondestructive temp. modulation technique 87−53983
polyethylene cable insulation, nondestructive anal. using microspectrophotometry 85−29393
polymer coating on metallic components, contactless inspection of thickness in prod. line 87−36832
polymer fillers concentration and orientation determ., by far-IR technique 87−44430
polymer thin film props. during semicond. device fabrication, laser interferometric monitor 87−17861
polymeric products NDT using computerised tomography 86−20120
polymers, Fourier transform IR microspectroscopy appl. 87−49974
porous object, density meas. under prod. conditions by γ radiography 86−7867
portable CAT scanner for utility pole inspection 86−60130
portable digital NDT instrumentation 88−38309
portable pyroelectric TV camera for nondestructive thermal analysis 87−14187
power and recovery boilers, cracks in deaerator vessels, magnetic particle testing 85−32356
power cable insulation, relevance of discharge measurements 85−32251
power line support wind induced vibration damage detection using radiography 87−50831
power MOSFET, NDT technique and data for single event burnout cross-sections 88−26291
power MOSFET unclamped inductive switching limit determ. using nondestructive tester 88−26314
power MOSFETs, turn-off failure study 86−9175
power MOSFETs, unclamped inductive switching limits determ. using nondestructive tester 88−26315
power plant components, rotor steels, embrittlement detection, using NDT techniques 85−38830
power plant components manufacturing quality control, NDT techniques *(French)* 88−17350
power plant equipment, nondestructive inspection 86−34422
power plants, nuclear and coal fired, holographic NDT appls. 87−22032
power station components and machines, NDT methods *(German)* 88−69144
power transistors, nondestructive second breakdown temperature testing 85−29200
pressure components, reliability and safety, conference, Stuttgart, Germany (Oct. 1984) 86−577
printed circuits, image processing boosts the power of non-destructivetesting 85−61522
product liability and NDT 88−49911
projection CRT glass, radiation damage 86−14817
protective coating NDT methods and building-site problems *(German)* 88−63425
pulse eddy current NDT phenomena, finite element modelling 86−42758
pulsed electro-acoustic measurement of volume charge accumulation and decay in polyethylene 88−49922
pulsed holographic interferometry, NDT appls. 87−16760
pulsed reflection holography, appl. to material testing 86−22551
PWB X-ray inspection meets increased PWB throughput, density challenge. I 88−32608
PWBs, through-hole-plating testing, resistance meas. technique for quality control *(Hungarian)* 85−33147
PWR power plant bolting, nondestructive eval. methods for corrosion and SCC 85−65111
PWR pressure vessels, nondestructive examination using Mech Scan equipment 86−61284
PWRs, use of NDT during manuf. and in-service inspection, French developments 85−27239
pyroelectric non destructive testing of BAWtransducers 86−2575
quality and reliability testing techniques and cost/benefit aspects 85−60781
quality indications from infrared absorption measurements on cultured quartz 88−490
quantitative nondestructive evaluation, conf., Santa Cruz, USA (August 1983) 85−5649
radiation inspection, using electrophotolum. of X-ray screens 86−557

nondestructive testing continued
radiation inspection of surfaces of metals and comp. of layered structs., differential characts. of albedo of γ-rad. 86−558
radio and microwave freq. techniques for online anal. of biological materials 88−4703
radiographic, automated system developments 88−18823
radioisotope relay device, apparatus spectrum shape, data processing algorithm 88−6542
radiometric ellipsometry method of surface layer thickness and dielec. props. meas., error calc. 87−73168
radioscopy, radiometry and computerised tomography developments 88−18822
reactor fuel elements, computer-aided tomography appl. to quality inspection 88−17295
REACTORTEST-TRC device for reactor pressure vessel NDT, operational experience *(Czech)* 88−38285

reinforced concrete structure corrosion mechanisms and NDT methods *(German)* 88−63424
reliability, cause effect diagram *(Spanish)* 88−38291
reliability assessment, human factors consideration 85−6066
reliability estimate for multiparameter NDT 87−358
reliability of inspection, quantification and improvement using field-flaw interaction theories 85−6064
REMAG 2 instrument for NDT of ferromagnetic coatings *(Czech)* 86−50059
remote visual testing for power station inspection appls. 88−75241
repair and reclamation, conf., London, England (Sept. 1984) 87−58550
resistance spot welds meas. and monitoring, using IR thermography 87−16201
resistivity based inspection of case hardened parts 87−23801
resistivity meas. of III-V semiconductors, using four-point probe meter 87−70756
RF magneto-caloric discriminator for metalliccoating thickness monitor 86−53120
ring inspection helps avoid costly repairs in generators, NDT methods 88−17491
robotic nondestructive testing using image processiong and ultrasonic techniques 85−21042
rock testing, holographic interferometry 87−68641
rocket motor propellant adhesion to envelope, inspection using heat-scan IR NDT *(Chinese)* 86−567
rotating machine insulation diagnostics 88−5635
rotating machine insulation diagnostics 87−35880
rotating machine test methods 87−35881
rotating machinery NDT using Hewlett-Packard dynamic signal analyser 85−31412
rotating mechanical components/system, NDT using speckle measurement and holographic interferometry with image derotator *(German)* 85−35905
RTG, cascaded, high temp. stage multicouple, design, fabrication, and testing 86−33721
safety assessment and NDT of in-service pressure vessel, Chinese code 88−18428
SAM, NDT of hybrid ICs 88−1245
sandwich holography appl. to stress anal. of paintings on canvas 87−19081
scanning acoustic microscope appls. in failure anal. 85−9389
scanning acoustic microscope with high depth resolution *(Japanese)* 86−20138
scanning acoustic microscopy appl., NPL developments 87−10536
scanning optical microscopy , imaging props. and electronic appls. 88−70106
scanning optical techniques for semiconductor analysis 87−45753
scintillation analysis of MOS VLSI cct. faults *(French)* 88−64793
self-oscillating transducer for checking low-conductivitymaterials 85−49633
semiconductor, ICs, manufacturing and service defects, elec. states, EBIC, SEM obs., *(German, English)* 85−55911
semiconductor analysis with Auger electron spectroscopy 88−70116
semiconductor defects, nondestructive obs. with photoacoustic and photothermal radiation microscopy 86−587
semiconductor defects NDT by X-ray topography, rapid Hirst camera 85−48193
semiconductor device manufacturing, scanning laser image generation as diagnostic tool 87−16364
semiconductor device NDT by spectroscopic ellipsometry, ultra-short laser pulses and SAW 85−61025
semiconductor device testing *(Italian)* 87−25182
semiconductor device testing, using LV SEM 87−112
semiconductor materials, electrophysical parameters, local monitoring nondestructive contactless UHF cavity methods 87−23770
semiconductor materials and devices, characterisation by noise methods, review 87−32218
semiconductor microstructure, far IR charactn. 88−24847
semiconductor photoconductivity spectra meas., by contactless recording method 86−44387
semiconductor process problems analysis with beam probes 87−38055
semiconductor structures, diffusion layers parameters inspection, radio wave and eddy current instruments 88−6551
semiconductor surfaces, nondestructive charactn. using transient behaviour of transverse acoustoelec. voltage 86−8724
semiconductor thin layered structs., NDT using SHF instrument *(Russian)* 88−972
semiconductor wafers, defect structure mapping by stress birefringence 88−39179
semiconductor wafers, integrated circuit metrology with confocal optical microscopy 87−25447
semiconductor wafers quality mapping, by photovoltaic technique 86−41649
sequential X-ray images generation code, principle and appls. 88−52460
service integrated materials testing, safety *(German)* 88−31898
sewer voids IR thermal sensing 88−67697
SHF-6 microwave device to test heterogeneous layered semicond.-metal structs. *(Russian)* 88−970
SIAM, microcomputer aided crack detection system *(French)* 87−5551
single sheet tester, mag. field strength accuracy improvement using two H coils 88−60887
SIRACUS expert system for nondestructive testing of weld defects *(French)* 87−44428
Sizewell B PWR, steam generator design for nondestructive exam. requirements 87−35756

nondestructive testing continued
SMT real-time X-ray imaging for process verification 88−12838
solid-state 1024 pixel linear X-ray detector for radiological imaging 88−42161
solid-state devices, review of techniques 85−12389

Soviet Economic Community, role of Spektr in development *(Russian)* 88−31576
spacecraft sandwich components, automated NDT by holographic interferometry 87−35461
spacial solar panels, LF noise as nondestructive inspection test 87−22749
stationary neutron radiography system, component positioning systems 88−18809
stationary neutron radiography system using parts-positioning manipulator 88−18808
statistical parametric synthesis of equipment 86−62296
steam turbine blades, inspection methods, ultrasonic and eddy current techniques 85−27302
steam turbine component embrittlement, grain boundary segregation evaluation 87−65608
steam turbines, life extension techniques, NDT, deformation meas., material fatigue calc. *(German)* 88−30585
steel, alloy, NDE using acoustic and mag. Barkhausen signals, effect of intergranular impurity segregation 87−59026
steel, bending stress monitoring, magnetic NDT 86−34417
steel, C, NDE using acoustic and mag. Barkhausen signals, effect of carbide precip. and hardness 87−59025
steel, Cr-Ni, hardening quality control, mag. inspection method 86−530
steel, Cr-Ni-Mo type, complex mag. permeability after various heat treatments, EM inspection procedure 87−348
steel, Cr-Si type parts, mag. characts. after isothermal hardening, heat treatment quality inspection method 87−31600
steel, eutectoid, heat treated, hardness meas. by Barkhausen effect 85−10866
steel, ferritic and stainless, residual life estimation by periodic NDT under creep conditions 86−52585
steel, killed Barkhausen noise technique for nondestructive detection of coarse surface grains *(French)* 88−31889
steel, low C, texture and stamping capacity, magnetometric inspection method 85−49650
steel, magnetometer for surface flux density meas. in mag. particle inspection 88−481
steel, martensitic, surface plastic deformation effect on Barkhausen effect parameters, nondestructive inspection method 87−73172
steel, mechanical props. inspection by pulsed magnetic analyser 88−6544
steel, medium C, hardening, tempering, NDT by mag. characts. 86−547
steel, medium C, tempered components, quality inspection by attached electromagnets 88−18779
steel, NDT, approximate equations for electromagnetic transducerswith ferromagnetic cores 86−13858
steel, online NDT, microstruct. and mech. props. 86−46404
steel, piping and structural materials for power plants, flaw detection and assessment 87−71955
steel, quality control of parts by differential magnetic structurescope 85−10864
steel, rolled stock, combined methods of mag. inspection and stat. prediction of mech. props. 86−57498
steel, stainless, duplex, mildly ferromag, tubing, eddy current inspection 85−473
steel, strips and plates, testing with electromagnetically-excited Lamb waves *(German)* 86−7866
steel, structural, heat treated, coercivity in various remanent magnetization states, NDT method development 87−31597
steel, structural, in various remanent magnetization conditions, inspection of component heat treatment quality 87−349
steel, surface decarburization, EM NDE *(French)* 88−56346
steel, tempering, NDT, upper harmonics mag. method. 85−54568
steel, wrought, cold rolled, NDT testing *(Spanish)* 85−17031
steel articles, magnetic NDT, residual magnetisation stability for pulsed AC supply 85−17027
steel ball bearings, magnetic inspection, head cradle shape effect 85−10865
steel bending stress meas. by contactless magnetic anisotropy sensor 88−60928
steel boiler tubes, nondestructive quality control, coercive force method, multivariate regression analysis 85−49635
steel components, EM NDT inspection of strength by spectrometric method 85−17028
steel components, heat treatment quality inspection using remagnetisation losses 87−36836
steel components, surface hardening quality inspection, resist. of mag. states of two-layer ferromag. to mag. fields 87−36837
steel cylinder welding seam, NDT by holography 85−54542
steel mill rolls inspection, computerised eddy current testers development 88−22477
steel parts, heat treatment quality, mag. inspection, RK-2 relax. coercimeter 87−351
steel pipe, magnetisation by transverse field, distorted field 85−469
steel pipes stress-induced magnetisation changes, laboratory tests 85−10844
steel plates, PWR nozzle intercontinental round robin testing, NDT and destructive exam. 88−482
steel reinforcement, hot-rolled, strength characts. eval. using mag. method 87−16742
steel ropes, mag. testing, Hall effect sensors design 88−12114
steel ropes, mag. testing using inductive sensors 88−18803
steel stampability, nondestructive test instrument *(Russian)* 85−26514
steel wire cables, test equipment for NDJ and inspection using const. mag. field method *(Polish)* 86−34410
strain, stress and cracks measurement in rigid structures *(Polish)* 85−58902
strain in epoxy composite panels by optical time domain reflectometry in embedded optical fibres. 85−64304
stress anal. of surface layers 88−12101
structural materials, residual life estimation by periodic NDT under creep conditions 86−52585
sub-band absorption spectrum of defects in silicon wafersusing thermo-reflectance spectroscopy 86−8918
subsea electrical technology developments 87−62813
subsea structures crack detection, cost effective approach 88−38312
surface contamination meas. and control, by optically stimulated electron emission technique 86−35210

nondestructive testing continued
surface damage evaluation using exoelectron emission phenomena *(Japanese)* 85−461
surface defect detection and evaluation, using magnetic particle or liquid penetrant testing 88−56349
surface defect detection and meas. by automatic fringe anal. 87−56501
surface hardened layers, depth and hardness, EM nondestructive inspection 85−49632
Surry steam generator, examination and eval., nondestructive testing 87−30334
TAB reliability, NDT 88−1305
techniques of nondestructive testing of materials *(French)* 88−56351
temporal/spatial holographic interferometry, for contactless eval. of material surface displacement *(German)* 85−35903
test data interpretation using signal processing and shape recognition techniques *(French)* 88−12106
thermal IR sensing for diagnostics and control, conf., Orlando, FL, USA (Apr. 1988) 88−62860
thermal neutron imaging device with low-pressure multistep avalanche chamber 87−23788
thermal power plant life extension using systematic maintenance programme 88−48762
thermal protective coatings, ATE for NDT of thermal conductivity *(Russian)* 86−5563
thermal sensing for industrial quality control 87−10540
thermal testing methods as new tool in NDT 88−4472
thermoelastic stress analysis technique, SPATE equipment and NDT applics. 88−12117
thermoelectric NDT instruments *(Polish)* 87−73208
thermoelectric Seebeck effect in NDT *(Polish)* 87−73207
thermographic inspection appl. to predictive maintenance of fossil and nuclear plants 87−15458
thermographic methods applied to industrial materials 87−23766
thermography as diagnostic tool for plasma forming 88−494
thermography as diagnostic tool in building engineering 85−52900
thermography for NDT of fibre-reinforced plastic components *(German)* 88−9916
thermography for thermoelastic stress anal. *(German)* 88−12110
thermophysical props. of materials meas., using multichannel automatic system 85−3857
thermoplastic holographic camera for industrial NDT, data acquisition and image analysis 88−34163
thickness testing on continuous strip steel 86−18118
thin films, depth profiles determ. 85−61021
thin films, using ionising radiation *(German)* 87−45460
thin materials, nondestructive testing based on photoacoustic spectroscopy *(French)* 86−52583
time-domain dielectric spectrometer, water in polymer coatings determ. 85−58846
tomographic image of material properties, influence of plastic deform. 85−49655
tomography as industrial tool, overview of AECL program 85−49671
tomography developments in NDT and medical appls. colloquium, London, England (March 1986) 86−33961
training undergraduate engineering and industrial courses 85−49278
transformer insulation polarization spectrum investigation using DC voltage measuring method *(Hungarian)* 86−39876
transient field infrared video thermography for non-destructive testing, feasibility study, inspection appls. 85−37471
trends for quality assurance tests *(Japanese)* 85−22567
trough-coil transformer, eddy current nondestructive crack detection using transducer *(Polish)* 87−63397
turbine blade NDT by PHOCUS boresonic system 86−6545
turbogenerator foundation vibration anal. and testing at Panipat thermal power project 88−43138
turbogenerators, stator windings, mechanical non-destructive technique for structural integrity determ. 87−72095
TV camera for gas pipeline inspection 88−22344
tyre testing by holographic interferometry, digital analysis 86−524
ultrasonic and radiographic NDT, optimisation using computer *(Spanish)* 88−38292
ultrasonic bonders, development of non-destructive bond monitoring techniques 87−10150
ultrasound as a quality control tool 88−43726
ultrasound rail flaw testing equipment *(Hungarian)* 86−25463
uniaxial mech. stress meas. using coercive force meter 88−70391
US, energy industries appl. 87−57466
US, role of computers 87−57468
US NDT, flaw detection in coherent noise *(French)* 88−23212
US PNL, overview of NDE research for NRC 86−582
utility nondestructive tests 87−36838
vibrothermographic nondestructive evaluation of composites, dynamic effects 85−483
video images, digital enhancement techniques 87−31610
video tapes, recording stability meas. *(Russian)* 88−71941
VLSI IC reliability., rapid electrical nondestructive testing 88−56085
VLSI MOS, real time plasma etch process control, contact resist., thermal wave modulated refl. 88−44889
VLSI Zener diode nondestructive failure analysis 88−51020
weld, NDT, elec. current methods modelling 87−341
weld inspection by IR thermography *(Spanish)* 87−49506
weld inspection using X-ray radiography, develop. trends 88−43977
welded bimetallic joints, under-bead crack initiation determ. by acoustic emission 85−54545
welded constructions, fitness-for-purpose assessment by NDT, conf., London, England (Nov. 1984) 87−51741
welded pipework NDT in NZ thermal power stations 88−11086
welding seams, photothermal nondestructive radiometric eval. 87−23767
welds, NDE calibration, prod. and sizing of uniform 2D flows 87−5546
wideband microwave diffraction tomography under Born approximation 88−4921
wood pole management, use of nondestructive eval. 88−42884
wood poles for overhead conductor support, nondestructive testing technique 87−50846
work pieces nondestructive testing using coherent optics *(German)* 87−77180
X-band horn applicator for composite shielding material effectiveness test 88−2629
X-ray analysis of internal stresses in welded joints 85−4249
X-ray backscatter inspection system, high-sensitivity 88−18824

nondestructive testing continued
X-ray CT scanners, TOSCANER-4200 and -4300 systems, configs., operation and inspection appls. 87−77114
X-ray diffraction studies with total external reflection, using semiautomatic X-ray spectrometer 86−44616
X-ray image quality anal. *(German)* 85−44822
X-ray imaging and machine vision technologies combination, industrial appls. 88−49918
X-ray nondestructive inspection using digital imageprocessing 87−148
x-ray radiographic inspection of rotary workpiece by continuous exposure method 88−18833
X-ray solid-state detector, 1024 pixels 88−10294
X-ray testing, automated, supervised learning approach to image segmentation 87−44439
X-raying articles with complex configurations determ. of optimum regimes by method of simplex planning 86−559
XLPE, high-field polarisation behaviour 88−30384
zooming lens, acoustic microscopy appls., nondestructive evaluations 86−50761
Ag/glass die attach bonds, nondestructive inspection, LSI/VLSI 87−67371
Al, heat treated plate, quality control, elec. cond. testing 85−10851
Al laminates, IR thermography method 88−18827
Al laminates, thermographic NDT 88−56338
Al, nondestructive detection of damage by EM discharge imaging 86−26952
Au-Al interconnections in ball bonding; intermetallic form. in PEDs, IR microscopy 87−1125
C fibre reinforced epoxy composite, delamination, NDT by pulsed photothermal method 87−52243
C fibre reinforced epoxy laminates, notched, compression fatigue, delamination, radiography 85−480
CdS, nondestructive preprocessing technique, Faraday rotation meas. 85−34700
CdS wafers testing, Faraday rotation meas. using CO_2 laser 87−46604
Cu, corrosion inhibition complex study using Raman microscopy 87−23792
Cu electrodeposits, brightener acceptability tests by thin layer chromatography 85−44819
Cu/Ni coating for EMI shield, qualification using resistance-testing method 86−26938
Cu-Be strip, unbonded layers, non-destructive interferometric detection 85−10836
Fe, cast, NDT, upper harmonics mag. method. 85−54568
Fe, cast, mech. props., nondestructive inspection by magnetoelastic method 88−6545
$Ga_{1-x}Al_xAs$ electrolyte electroreflectance meas. system, microcomputer-controlled, technique 86−55528
GaAs FET, Shubnikov-de Haas oscillations meas., doping levels calculation 85−45689
GaAs, alloying determ., photoluminescence method based on conc. depend. of half-width line of edge radiation *(Russian)* 86−13894
GaAs coplanar waveguide, electro-optic meas. of standing waves 87−46442
GaAs crystal nondestructive testing, using enhanced-contrast IR topograph apparatus 86−26951
GaAs nonradiative microdefects obs. using new photo thermal radiation microscope 88−19789
GaAs semi-insulating substrates, microwave photoconductance technique for non-destructive characts. 85−55472
n-GaAs wafers, microdefect obs., photo-thermal-radiation microscopy 86−20141
GaAs:Te^+ crysts., nonequilib. carrier relax. time determ., picosec. holographic grating technique 88−50715
Gd-Fe thin films, mag. material config. detect. using image processing *(Japanese)* 85−50826
Li primary cells, Li anodes, electrolyte conduction mechanisms, and NDT 88−17845
$LiBnO_3$, charactn. by γ-ray diffr. 87−23779
$Mg_{1-x}Cr_xFe_2O_4$, Barkhausen noise parameters correl. with strength 87−10538
$Mn_{1-x}Zn_xFe_2O_4$ surface-damaged ferrite layer, characterisation *(Japanese)* 88−51271
MoS_2 films, thickness meas. using electron beams and X-rays, obs. *(German)* 85−20727
Ni electroplated on Al, nondestructive adhesion test, vibration technique appl. 85−33549
Ni-Cr-Mo-Ti, damage accumulation under alternating low cycle loading, 650°C, acoustic emission obs. 85−466
Pb sheathed 5 kV underground cable, NDT of status level 87−35643
poly-Si emitter transistor fabrication, early detection of leakages using EBIC NDT technique 86−41929
Si epitaxial structs., parameter determ. by IR ellipsometry 85−12406
Si, nonequilibrium carrier recomb., thermal oxidation time depend. study 86−58404
a-Si, photovoltaic modules, nondestructive photoabsorpt. voltage-decay meas. 88−69700
Si, polycrystalline, solar cells, photoelectrochemical characts. study 86−40113
Si, reactive ion etching, radiation damage, nondestructive characterisation using SAW technique 86−28228
Si, semiconductor evaluation technique using heat pulses 87−53169
Si, single crystal damaged surface layer, nondestructive meas. using reflection acoustic microscope 87−73167
Si single crystal, reactive ion etching-induced damage, nondestructive thermal wave monitoring 87−11691
Si solar cells, p-n junction dead layer thickness meas. by nondestructive method 85−32714
Si thin wafers, photoacoustic pulses, optical detect. 87−23768
Si wafer defects and interface trap distrib. obs., using scanning photon microscope 88−22434
Si wafer, nondestructive noncontact testing of devices by SEM inductive charge EMF 88−56348
p-1Si-electrolyte struct., semicond. for photovoltaics, non-destructive assessment 86−35474
Sn-Pb coating nondestructive testing by ionising radiation, quartz oscillator manufacture *(German)* 87−67652
T removal facility, using 316L austenitic stainless steel, NDT and inspection 88−18819
Ti diffusion bonded panels for fighter aircraft, superplastically formed, thermographic inspection 88−63419
U assay in infinitely thick material using XRF 86−26947
W Kα X-radiation, elastic and Compton scattering, nondestructive testing appl. 85−37981

nondestructive testing continued
WC-TiC-Co cermet plates, mag. inspection of wear resist. 88−70378

nondeterministic systems
life-cycle costing incorporating risk analysis 86−57286

nonelectric final control devices

2-phase annular channel flow meas. by 4-beam gamma-ray attenuation., with industrial appls. 88−29709
A244DIC, ultrasonic movement detector design *(German)* 85−53230
air pressure-based sensors *(Italian)* 85−47928
air-pressure sensors, detect. of presence of objects 85−14772
aircraft-mounted wind shear sensor using coherent LIDAR 88−28976
amorphous alloys, appl. to mag. sensors 87−49738
applied optical meas., structure and system *(Japanese)* 88−4378
Argus eye, optical correction in SMD fixing systems *(German)* 88−50513
atmospheric flight of spacecraft, perform. of vehicular optical sensors 88−42615
atmospheric pollution monitoring using computer controlled chemical sensors *(German)* 88−74992
automobile sensors technology developments 86−5232
automobiles, US obstacle detection and alarm system *(Japanese)* 85−5474
B253 and FALOMA ultrasound pneumatic sensors, operation under reflection *(Bulgarian)* 86−44281
biosensors, design and appl. *(Japanese)* 87−77611
biosensors, fluorescence-based using laser light, principle 88−60704
biospecific surface selective sensors, Langmuir-Blodgett films and black lipid membranes 88−4884
boundary layer transition detector, using differential interferometer 87−14621
cavity mounted pressure sensing systems, frequency characteristics and input impedance *(Japanese)* 86−55637
cavity-mounted pressure sensing systems, transient response *(Japanese)* 86−65188
centrifugal switch using mag. fluid, switching characts. 87−41474
ceramic sensors microprocessors for automation 85−47945
character and optimum detectors, comparative noise immunity 87−63391
chemical and biological sensors developments and appls. 86−5227
combustion control requiring selecting right sensors 86−60217
combustion sensing using optical fibres 88−4411
conference on sensors and their industrial appls., Detroit, MI, USA (Nov. 1986) 87−51733
curved surface feature extraction with range sensors 86−60344
DC magnetic field sensor employing multifield eddy-current effects 88−53623
detecting system with line-type detectors *(Polish)* 87−21045
dew point sensor for gas mixtures and pure gases *(German)* 87−35052
differential optical position detector for magnetic suspension systems 85−64133
displacement measurement by acoustic pressure measurement method *(Japanese)* 86−31656
displacement sensing by acoustic pressure measurements, axi-symmetric case *(Japanese)* 86−50223
distributed aeroacoustic tracking algorithm for very low flying subsonic aircraft 85−8454
electric drive control, sensors in automatic systems *(Russian)* 87−22815
electro-optic frequency shifters appl. in heterodyne interferometric systems 87−12245
electromechanical systems, sensor circuits for machine diagnostics 86−11533
electronic sensing devices, review *(Italian)* 88−16073
endoscopic fluorescence detector for clinical recognition of tumors 88−61232
engine knock adaptive control, wideband knock sensor 88−67778
Fabry-Perot sensor, optical pulse 85−1980
fiber optic composite impact monitor 87−56681
fibre optic chemical measurements in industry *(French)* 87−25987
fibre optic sensors, technological development and appls. 87−26048
float-area type air flowmeter, correction for line press. change effects *(Japanese)* 88−22576
floor plate thickness measuring equipment, automatic 86−5536
flow sensors, new technologies 86−44274
fluctuation sensor using spatial filter for tortional vibration meas. *(Japanese)* 85−42984
flue gas analysis using portable chemical sensors *(German)* 88−74991
force sensors using optical interferometry *(German)* 86−31408
frequency-locked diode laser for interferometric sensing systems 88−65681
fuel flow and level sensors for automotive environments 88−4697
gas chromatograph fabrication on silicon wafer 86−1938
gas monitoring systems using semiconductor sensors, appl. in gas-air mixture explosion protection *(German)* 88−124
generator particle anal. for overheated insulation using fluorescent tags and fluorescence detector 87−15687
glass-membrane pressure sensor, for vapour pressure meas. and control 86−24829
hammer mechanism for velocity meas. 85−15041
highway surface defects identification and location, sensing technique appl. 85−46959
HP 81521B and 81520A, precision optical heads for 850 to 1700 and 450 to 1020 nanometers 88−9940
hydraulic transducer weighing component of conveyor belt *(Polish)* 88−53897
immuno-sensors development, based on evanescent wave methods using optical waveguides 88−36457
in-situ sensor for flue gas analysis/control 86−6583
industrial appls., conf., Harrogate, England (Nov. 1984) 86−36
industrial off the shelf sensors market 86−70134
industrial process recorders using microprocessors and optical sensors 86−5134
industrial sensors and sensor engineering *(Korean)* 87−29061
industrial sensors for non-contact detection 87−3590
integrated optic temperature and humidity sensors 86−48162
integrated optical chemical vapour microsensors 88−74378
integrated optical Fabry-Perot resonators, low finesse, sensor appls. 86−9609
integrated optical sensors for robotics and machine tool tracking *(German)* 88−4400

nonelectric sensing devices continued
integrated optics, fluid sensor, using heat transfer phenomenon 88−26865
integrated optics displacement sensor on Si substrate 88−2046
intelligent interface system for the analysisand design of sensing devices 86−5285
intelligent robot, ultrasonic scanner system 86−5292
intelligent sensor, development trends *(Hungarian)* 87−8606
interferometric resonant cavity sensor for integrated optics 85−50984
interferometric sensors based on integrated optics, using $LiNbO_3$ 88−60699
IR heating plant heat flux sensors for power density meas. *(German)* 88−24265
langmuir-Blodgett films as chemical sensors , review 88−74802
laser probe resolution improvement, 3/2-order PLL design 86−31364
laser vibration sensor inspection test system for gear boxes 88−35847
laser-based gyroscopes for inertial navigation, configs. and characts. *(Spanish)* 86−54237
LaserMike optical micrometer, noncontact gauging of profile dimensions 87−49709
leaky SAW, new sensor in liquid 88−57888
light beam detectors for industry *(German)* 87−3558
light point detector for noncontact displacement measurement *(Japanese)* 86−31337
load cell for vehicle monitoring, using bulk optic Plexiglass 88−60713
Mach-Zehnder interferometer for nonintrusive elec. field meas. 88−53685
magnetic field probes with negative feedback loop inductive coupled search coils *(German)* 87−56637
magnetoelastic force feedback sensors, appls. 86−17959
Microshell-tipped optical fibres, high-press. shock detectors 87−21069
microwave ovens, cooking operation control using absolute humidity sensor *(Japanese)* 86−71141
military applications of fibre optics in communications and sensor systems 85−24267
mode coupling in multilayered structures, appl. to chemical sensor and directional coupler 88−2048
moisture meas. in gases, capacitance and optical cooled mirror sensors comparison 86−5607
NDT material property sensors, principles and technologies *(German)* 88−31901
NEC ferrite sensor for automated guided vehicle *(Japanese)* 88−42050
non-contract high precision optical surface measuring instrument 87−29281
noncontact gauge for lateral surface motion meas., using He-Ne laser 88−29359
noncontact inspection using laser triangulation probe 87−12643
noninvasive US techniques in process instrumentation and meas. 87−5542
nonperturbing boundary-layer transition detector for hypersonic wind tunnel, based on laser interferometry 87−14973
nuclear reactor sensors, book contrib. 86−5255
optical, fibre optic and integrated optical sensors of physical effects, review 86−9496
optical chemical sensor using surface plasmon meas. 88−47464
optical convertor based on controlled coupling, between coaxial waveguides 85−2031
optical couplers, backward wave for sensing, anal. 87−68054
optical detection of electrical discharges in insulation 85−3978
optical distance meas. for factory automation 87−63520
optical dust deposition meter in coal mines 87−63324
optical encoder for shaft torque meas. 85−15044
optical heterodyne systems *(German)* 87−76775
optical interference force sensors and weighing systems, coupled by beam waveguide *(German)* 87−70617
optical noncontact sensor, high resolution, for surface roughness detection *(Japanese)* 87−70576
optical noncontacting probe for detection of displacement, position, and angle *(Japanese)* 86−38343
optical noncontacting probe for displacement, position and inclination detection *(Japanese)* 85−14807
optical position sensing in aerodynamic research 87−71206
optical position sensors for magnetically suspended wind tunnel models 86−31420
optical proximity sensor, multi-functional, phase information appl. 86−38374
optical proximity sensor based on RORS 87−49694
optical proximity sensors, techniques; characts. and appls. *(Italian)* 87−70642
optical range finding system by projecting ring beampattern 86−38560
optical rotation encoders as sensors in control circuits *(German)* 85−64130
optical sensing off height, speed and attitude from airborne vehicle, correlation-based method 87−71245
optical sensing technique with high range-to-resolution ratio, surface geometry meas. appl. 87−49945
optical sensor components directory 86−36111
optical sensor for blood haemoglobin content and O_2 saturation: design, in vitro and in vivo eval. 88−54534
optical sensor for displacement meas. in magnetic suspension 85−37755
optical sensor for surface roughness meas. 86−38548
optical sensors, effect of particle contamination on direct scatter, analysis 88−8023
optical sensors, high-resolution, microprocessor-based phase determ. 85−20739
optical sensors, optically activated vibrations in a micromachined silica structure 85−37573
optical sensors for biomed. applics., review 86−56116
optical sensors for position/displacement meas., industrial appls. 85−47987
optical signal detectors, noise parameters estimation 85−7939
optical surface sensor, high precision, based on laser beam critical reflection 88−29308
optical tactile sensor using the CT reconstruction method, design and performance 88−16104
optical tension transducer 86−31359
optical transducers, relevance to process industries 85−3940
optical water level gauge with range shift servomechanism 86−70246
optical waveguide chemical sensors 86−55649
optical waveguide pressure sensor, metal-clad 87−54100
optical waveguide sensors, review 87−26047
optical waveguide sensors for chemical concentration meas., surface plasmon and luminescence quenching based 88−35946
optical waveguides, multimode graded index, sensor functional potentiality and sensitivity 87−68114
optically activated resonator sensors for environmental appls. 87−14298
optically excited reson. press. sensor 88−53606

nonelectric sensing devices continued
optically excited resonant diaphragm pressure sensor 87−35033
optimal decision fusion in multiple sensor systems 87−41501
optochemical gas sensor for polar solvents 86−55633
overview of sensors and transducers 88−60694
parametric transducer bridges for nonelectric variables meas. *(Russian)* 88−29337
passive integrated optic devices for sensors 88−65364
personalised user interface concept, semiconductor device modelling concept appl. *(Spanish)* 87−67198
petrol engines for vehicles, microcomputer-based control system with sensors *(Japanese)* 88−18189
phase noise reduction for sensor appl. 86−48518
photoacoustic resonators based on self-resonating optically driven oscillators 88−4421
photonic sensors for high-speed analog data recording 86−5132
photonics high bandwidth analog appls., conf., Honey-in-the-Hills, FL, USA (Apr. 1986) 88−55787
pneumatic acoustics for measuring equipment anal. *(Russian)* 85−47960
pneumatic liquid level sensing system 86−11534
pneumatic pressure transducers/transmitters, survey *(German)* 85−42967
pneumatic primary sensor for measuring linear dimensions 88−4368
polarising filters for conveyor belt reflective optical monitors with high interference rejection *(German)* 86−55730
polyimide lightguides, humidity monitoring 88−42026
polymeric integrated optical waveguide chemical vapor microsensor, fabrication by photopolymerisation 86−55601
pressure sensor in elastic and plastic media 86−11560
process industry sensor designs and applications 88−42044
proximity sensors, flow meas. with beam-scanning LDV 87−21282
quartz bulk resonator sensor technology review 88−57851
quartz crystal flexure resonators, force sensing 85−64143
refractive index measurement, materials for optical sensors 87−68007
ring laser gyros for inertial navigation 88−8375
robot manipulator, tactile sensor, freedom descriptions for approximating shape from collected points 85−13622
robot sonic and ultrasonic control 88−61707
robot task teaching, sensory system with feedback loop 86−70102
RORS and RORST miniaturised optical range-sensing methods 87−49922
SAW temperature sensor and remote reading system 88−60940
SAWD, plate modes mass sensitivity, chemical sensors potential 88−57887
selective detection of chemicals using energy modulatedsignals 86−55882
semiconductor laser interferometer for industrial displacement measurement *(German)* 86−31409
semiconductors research progress 86−55618
sensor development, Japan update 88−60706
sensor development for chemical analysis *(German)* 85−64136
sensor fundamentals 88−42036
sensor technology development trends in Japan 88−22573
sensors and actuators 88−35918
sensors and transducers for process control 88−42068
sensors in Spain, technological perspectives and economic impact *(Spanish)* 88−42029
sensory attributes and sensory evaluation *(Japanese)* 85−8807
sensory evaluation trends *(Japanese)* 85−8806
sensory measurement of manufacturing processes *(Japanese)* 85−8805
signature modeling for acoustic trainer synthesis 87−69115
$SIRO_2$ oxygen sensor, design, appls. and response rate measurement 86−70135
solid electrolyte analyzer for SO_2 stack emission monitoring 86−44466
sonic motion detector, design 85−3973
speckle interferometer based remote electro-optic displacement sensor 87−29297
spectral range sensing using dynamic chromatic aberration 85−47939
spectrum analyser based on pre-detector optical signal processing 87−14243
stepping motor position sensors for control system appls. *(German)* 88−69427
strapdown sensors, advances 85−3982
stress sensor for solar cell quality inspection 87−21051
stress-compensated quartz resonators having ultra-linearfrequency-temperature responses 85−62165
surface feature and distance detection using ultrasonics 86−60353
tactile sensing system utilizing noncontact measuringtechniques 86−5291
technological trends in 1985 86−5226
technology and applications of temperature sensors *(German)* 86−65289
technology and trends for industry and home appls. *(Japanese)* 85−47935
technology developments and appls., conf., Southampton, England (Sept. 1985) 86−6
temperature profiling methods in fixed bed reactors 85−4147
temperature-sensing actuator with ferrite and rare earth cobalt magnet *(Japanese)* 85−42964
temporal coherence based optical sensor 88−35933
thin film, thick film and glass fibre techniques for sensors *(German)* 85−8783
turbidity meas. instrument, microprocessor controlled 85−7258
ultrasonic flow velocity meas. system, microcomputer based 86−5593
ultrasonic H detector, thermocompensated 85−4510
ultrasonic object detector, design *(Spanish)* 85−64776
ultrasonic proximity sensor for profile-following work by robot manipulators *(Japanese)* 86−31416
ultrasonic system measures distance, position and thickness 87−35525
ultrasonic-oscillator position sensor 88−61688
underwater optical probe for laser Doppler anemometry 87−14557
unpositioned workpieces handling robot with visual andforce sensors 86−47205
US distance detector for industrial appls. *(Spanish)* 87−8740
US distance sensors, charact. and industrial appls. *(German)* 86−31353
US gauging in air 88−30198
US height sensor, design and electronic compensation, automatic appls. 86−50769
US level sensor for liquids under high pressure 87−8610
US sensor development for robots 86−55386
US sensors appl. in chemical and process industries, book contrib. 86−5254
US submerged rotary probe, boiler tube wall thickness meas. 88−23744
vibration meas. using graded optical filters 86−11704
vibration sensor absolute calibration, by ESPI method *(Hungarian)* 86−24502
vibratory-frequency sensor with asymmetrical excitation of the resonator 87−63364

nonelectric sensing devices continued
waveguide chemical vapour microsensor fabrication by photo-polymerisation method 88−20428
FeB amorphous sputtered film temp. sensor 87−49739
GaAs LED for optical beam light barriers, construction and appls. *(German)* 87−63301
NH_3 SAW gas detector 88−57890
Pt-100-measuring resistor, thermostat sensor, characteris. curve linearisation *(German)* 87−56643
Si optical sensor fabricated by masked ion implantation 86−5245
$(TbY)_3Fe_5O_{12}$ LPE films for optical mag. field sensors 87−49682
ZnO toolbit mounted sensors for process control in lathe and milling machine appls. 88−56359
ZrO_2 pH sensors, high temp. stabilised, performance improvement 86−11544
ZrO_2 sensor, heated, for air-fuel mixture meas. *(German)* 85−31619
ZrO_2-MgO gas chemisorption type ceramic body, humidity and air vel. meas. *(Japanese)* 88−42067

nonlinear acoustics
acousto-optic signal processing system intermodulation products 87−2001
acoustooptic RF-signal spectrum analyzer for acoustic heterodyning 88−33799
amplitude-dependent losses in ultrasound exposure measurement 88−54775
audio signalling system using parametric interaction of ultrasonic beams 88−23200
defect detection in pipes using nonlinear effects of ultrasonics *(Japanese)* 86−70552
electro-acoustical equip., nonlinear models *(German)* 85−48502
electroacoustic interaction on a photoinduced grating 85−24029
focusing features of SAW excited by a curved IDT onmetallized surface of *YZ*-$LiNbO_3$ substrate *(Chinese)* 86−68142
gas discharges, loudspeakers appl. 88−22349
gas flow distribution meas. system using nonlinear US sounding 87−21281
gas flow velocity distrib. meas. system using nonlinear effects of ultrasonics *(Japanese)* 87−77466
gas temp. distrib. meas. using nonlinearity in ultrasonics *(Japanese)* 87−70841
heating meas. using fast-response temp. sensor 85−48128
interaction of acoustic waves in piezoelectric insulatorcrystals with a spatially inhomogeneous structure 86−28554
levitator, electrostatic-acoustic, for large charged drop levitation against gravity 87−47110
microscopes, nonlinear harmonic generation at focus 88−61674
planar bulk acoustic wave devices, theoretical anal. 88−33484
quartz bars, nonlinear electroelastic eqns. of wave propag. and vibr. 87−32801
Rayleigh wave nonlinear convolver components 87−1874
SAW, stress-compensated cuts 87−60766
SAW devices with narrow aperture slanted chirp transducers, acoustic nonlinearities obs. 87−1848
signal processing using fibre-optics neurograms 88−8765
synthesis algorithm using phase modulation 85−7846
tissue US nonlinear parameter, reflection mode imaging method 87−3972
US nonlinear parameter CT using nonlinear interaction of sound waves 88−23066
water/air boundary deformed by US radiation pressure, EM waves refraction and scattering 86−29341
$LiNbO_3$ plates, Lamb wave propag., nonlinear electroacoustic effect 86−2482

nonlinear control systems
see also control nonlinearities
active power flow limitation, automatic nonlinear system input extrapolation criteria *(Russian)* 86−56341
aero gas turbine engine, integrated inlet control model using nonlinear multivariable closed-loop approach 87−42191
analog charge-pump phase locked loop, modeling and simulation 88−50065
automatic reactor control, reactivity constraint approach appl. 88−48734
bank-to-turn missile, digital controller for CLOS guidance 88−36701
bank-to-turn missile, digital controllers for CLOS guidance 88−42719
cage induction motor indirect rotor flux vector control with dual observer and field weakening 88−17607
centrifugal accelerator for pilot training, modelling and control 88−36599
communication, control and computing conf., Illinois, USA (Oct. 1987) 88−31304
control design with transfer functions associated to higher order Volterra kernels 87−58214
coupled multivariable nonlinear composite control of switched reluctance motors 87−30531
DC motor, optimal control of state feedback variables *(Korean)* 86−6785
DC motor deadbeat control systems and their limitations *(Polish)* 86−56776
DC motor drives, adaptive friction compensation in DC motor drives 86−66401
DC motor microcomputer based thyristor control using PIDD controller 88−23957
DC motor optimal PI speed controller 87−22405
DC motors, piecewise constant control, bounded number of discontinuity points 86−19286
electric furnace nonlinear PID temperature controller 87−43652
electric machines, doubly salient, time-varying control design 86−6673
electromechanical actuators, nonlinear digital position control algorithm 88−43356
fuel-gas saturator control system, tuning, coal gasification based power plant 85−53552
generator automatic excitation control, stability estimation using nonlinear functions *(Russian)* 88−5645
HVAC system fault detection and diagnosis 86−7306
HVAC-DYNAMIC computer program for HVAC plant dynamic behaviour simulation 88−18229
induction motor, nonlinear decoupling control using subsystem model 87−42940
induction motor digital speed regulation without speed sensor *(French)* 86−6751
induction motor drive, inverter-fed, nonlinear current control system 87−72146
induction motor drives robust control by nonlinear state feedback *(Japanese)* 88−75617
integral load frequency controller with time-varying weighting coefficients 85−43516

nonlinear control systems continued
local and global stabilisability 87−4693
motor drives, electric, nonlinear torque control 87−22821
multi-motor control systems analysis and design *(Czech)* 88−24180
multi-scalar models of an induction motor for control system synthesis 88−5699
naval electrical power generation systems, control using multivariable frequency domain techniques 88−37697
nuclear power plants, nonlinear multivariable control system design 88−36933
power systems, large-scale, planning and operation fns. research 88−61792
power-electronic AC motor control theory 87−58027
reciprocating linear motors, 400 W tri-state switching controller 88−30743
robot direct-drive motor nonlinear adaptive control 86−70933
series-resonant power converter, pulse integral central system, design and stability 85−5167
space hoop-column antenna, large, nonlinear feedback control design, modelling 86−54343
speed-controlled elastic system with cascade control, backlash and load-observer corrections 87−22836
Sukhanov's initial value method nonlinear two-point boundary value problems 85−33365
superheater steam temp. control, in 200 MW power plant *(Czech)* 86−45184
switched reluctance motors feedback linearising control 87−51169
switching power convertors, sliding-mode nonlinear control 87−58213
synchronous generator, robust nonlinear state observer 88−5663
synchronous machine, transient stability study using improved Lyapunov fn. 87−42823
synchronous machine connected to infinite bus, variable structure control design 87−22256
synchronous motors, robust position servo system design using sliding mode control 88−69339
three-phase asynchronous motors, nonlin, digital control *(Spanish)* 87−78653
turbogenerator self-tuning voltage regulator 88−48899
uniqueness of circuits and systems containing nonenonlinearity 85−49706
water power plant turbine control, deadbeat design *(German)* 88−75495

nonlinear differential equations
2D nonlinear systems, switched and non-switched, uniqueness of asymptotic behaviour 87−65783
2nd order singular nonlin. BVPs, numerical soln. by difference method 86−34250
6 kVA salient pole synchronous generator, core saturation during sudden short circuits 85−48944
adaptive condensation process for solving large nonlinear systems of eqns. 87−52069
AFC system, phase-locked, harmonic frequency divider, vertical cycles anal. 85−22728
algebraically-constrained nonlin. diff. eqns., num. soln. 86−62183
alternating sequential parallel processing system for power system stability calcs. 88−75062
analogue switching cct. with MOSFET, distortions effects analysis using model *(Czech)* 86−50026
antennas, integrated phased arrays, interinjection-locked oscillators anal. 87−75620
approximate soln. of differential and integral eqns., survey of methods 85−342
asymptotic boundary conditions and numerical methods for nonlinear elliptic problems on unbounded domains 87−52063
asymptotic error of algorithms for solving nonlinear problems 87−58873
asymptotic rates of decay for some nonlinear ordinary differential equations and variational problems of arbitrary order *(French)* 85−39680
asynchronous algorithms for Poisson's equation with nonlinear boundary conditions 85−39682
asynchronous machine transient mathematical model, reduction to Hill-type eqn. 87−42977
beamforming lenticular antennae, numerical minimisation of nonlinear PDEs 85−54405
bidimensional Tau-elements method for numerical soln. of nonlinear partial DEs 87−31457
bifurcation in nonlinear networks *(German)* 87−59126
bipolar transistor simulation using nonlinear elliptic PDEs and ELLPACK software tool 87−11748
bounds on nonlinear operators in finite-dimensional Banach spaces 87−16545
circle contractive linear multistep methods 86−46279
circuit simulation, relaxation and numerical methods 88−70469
classification of invariant sets and globalbehavior of third order nonlinear systems 86−66782
claw-pole alternator 3D nonlinear magnetic field distrib. 87−42855
closed-form efficient solution of the variational equation for piecewise-linear differential equations 87−10334
CMOS invertors dimensioning based on nonlinear DE model *(German)* 87−60659
communication cable shields, multilayer, calc. of electromagnetic fields 85−41668
compensated power system harmonic stability study using nonlinear DE *(Russian)* 88−75052
constrained nonlinear differential eqns., normal forms, theory 88−70276
consumable electrode welding arc dynamic modelling 86−7326
controlled Scherbius drive, starting and reclosing transient torque computation 87−43548
convergence of approx. soln. of random differential and integral equations 87−23550
convergence of the SSOR-method for nonlinear systems of simultaneous equations *(German)* 87−16550
convergence rate for approx. of nonlinear problems 86−7706
convertor-fed synchronous motor drive, cross coupling saturation effect, math. model and simulation 85−27689
current transformer investigation and design using simulation methods 88−49027
D/A conversion applications to ATE design and electrical engineering problems *(Russian)* 86−6680
DC machine electrodynamic braking, transient state computation *(Croatian)* 86−70930
DC wire-to-plane corona, current density, ionised flux lines 86−42004
decomposition method, analytic solutions for nonlinear equations 88−43833
decomposition solns., convergence region 85−22413

nonlinear differential equations continued
defect correction for nonlinear elliptic difference equations 87−65435
diagonally implicit Runge-Kutta formulae for the numerical integration of nonlinear two-point boundary value problems 85−335
diaphragm pressure sensors, resonant, freq. characts. *(Chinese)* 87−41463
differential/algebraic equation systems, numerical soln. 88−43843
diode lasers at microwave freq., dynamics anal. 86−54144
dispersive equation soln. using power series 87−10327
double scroll, chaos existence proof *(French)* 88−6631
dynamic networks, global anal., evolution diagram determ. *(German)* 87−59125
electric arc behaviour under stable burning conditions 88−39750
electromagnetism, nonlinear hyperbolic eqns. associated with classical theory 85−46514
electroplating, electric field potential distrib. *(Russian)* 87−19119
elliptic boundary-value problems, monotone iterative methods 85−22437
elliptic partial DEs, asymptotic expansion and extrapolation *(Chinese)* 87−65434
EM transient field, calc. method in nonlinear medium 85−35959
encounter-evasion games with delay 88−38060
error analysis, nonlinear difference and differential equations 85−22425
error analysis, transfer function and characteristic root errors forfixed-step integration algorithms 86−62190
error bounds for Newton's iterates derived from theKantorovich theorem 86−34262
explicit Runge-Kutta-Nystrom methods, absolute stability regions 85−5959
filtering problem with a small nonlinear term 87−7740
finite element solution of nonlinear elliptic problems 87−36664
four-leg transformer transient behaviour calc. 87−35997
Fredholm integral eqns., Krein-Sobolov eqn. and fast numerical algorithms 86−372
free boundary problem numerical soln. by continuation 86−34245
free electron laser, amplifiers, nonlinear anal. in 3D 86−9887
free electron laser, beam quality effect 86−68569
Galerkin approximations soln. to nonlinear two-point BVP 88−360
Galerkin method for a nonlinearhyperbolic-parabolic coupled system *(Chinese)* 86−34255
Galerkin method for nonlinear Sobolev eqns. in 1D space, error estimates 85−60920
general approach to solution of partial differential equation systems 87−65422
generalised difference method for nonlinear parabolic eqns., error estimation *(Chinese)* 87−65432
generalised FEM, COMPELL package for problem solution by input data 86−40683
generalised Galerkin method for nonlin. hyperbolic eqns. *(Chinese)* 86−62172
generalized variation-of-constants formula for nonlinear functional differential equations 88−18649
geometrical optics and beamforming lenticular antennas, nonlinear partial differential equations minimisation 88−27630
Gunn oscillator anal., low-amplitude external oscillation 86−20346
harmonic gyrotron travelling wave amplifier, single nonlinear differential eqn. 86−58210
HF signal amplitude conversion by ring discrete sampling convertors, conversion linearity investig. 87−17289
hierarchical breakdown of concepts relating to nonlinear partial differential eqns. 85−44651
Hodgkin-Huxley model for ordinary DEs solns. 87−44258
HV electrical discharges, nonlin. cct. eqn. approx. 86−58631
hyperbolic partial differential eqns., periodic solns. 85−44655
hyperbolic system, simplified anal. using method of generating eqn. 85−44656
ICs, nonlinear DE solution, numerical-analytical method 87−53608
imaging using Good's roughness measure, implementation on parallel processor 88−66705
implicit Runge-Kutta methods, monotonicity and boundedness 87−16549
incomplete factorization methods for nonsymmetric block-banded systems of partial differential equations 85−5953
induction heating devices, nonlinear skin effect, numerical simulation 85−29992
induction motor, three-phase, connected to single-phase supplies, digital simulation 86−66079
induction motor airgap magnetic field harmonic composition, hyperbolic differential eqn. 87−42971
induction motor EM field generalised prediction model 85−48960
induction pumps planar, transverse edge effects, MHD problems *(Russian)* 85−10123
initial value problems, numerical solution, stability analysis 88−6414
injection lasers, bistable, instability studies *(Chinese)* 87−7327
integrable nonlinear evolution eqns. in (2+1) D, combined ∂ and Riemann-Hilbert inverse methods 87−55098
integro-differential eqns. quadrature formulae based method, appl. to dynamic problems of viscoelasticity *(Russian)* 88−70274
interval arithmetic method for soln. of nonlinear systems of eqns. on vector computer 87−73023
interval arithmetic methods for systems of nonlinear equations arising from discretizations of quasilinear elliptic and parabolic partial differential equations 87−58871
inverse scattering transform numerical schemes for nonlinear evolution eqns. 87−44259
iterative convergence of solns. of nonlinear diff. eqns. *(German)* 86−62157
LC self-excited oscillators based on ideal convertors, nonlinear anal. 87−44657
linear approximation, asymptotic expansion and mixed problem for some semi-linear wave equation in one dimension 87−44256
linear programming, with multi-point boundary conditions *(Japanese)* 85−301
linearization method for a nonlinear integro-differential system of transfer equations 85−10652
LMFBR fuel rods accident analysis by FENHT code 85−27221
M-type beam tubes, nonstationary nonlinear equations, anal. 85−34435
magnetic field calc. in nonlinear medium using coordinate structure method 87−2282
magnetic levitation theory, electrodynamic forces acting on current carrying circuit with conducting strip *(Russian)* 86−42743
magnetic nine-times frequency multiplier, model using nonlinear diff. eqns. *(Polish)* 87−59815
Maxwell's equations, homogeneous system, local struct. of solutions 88−40466

nonlinear differential equations continued
method-of-lines approx. to partial differential eqns. convergence 85−22408
miniature fuse heat loss and arc modelling 87−66665
mixed monotony method for nonlinear eqns. with singular linear part 87−73012
model-using magnetic field analysis 87−47115
monotone sensitivity of resistor-transfergate-capacitor ladder network driven by logic gate 88−31960
Morison eqn. modification for nonlinear steady potential wave drift 85−4480
MOS universal cct., nonlinear state-space eqns. 87−65781
moving mesh FEMs for nonlin. degenerate parabolic diff. eqns. *(Chinese)* 86−62171
multiderivative methods for non-linear second-order boundary value problems 87−44240
multigrid continuation method for elliptic problems with folds 87−10344
Neumann's type problem, nonlinear variational 88−43838
Newman's numerical technique, extension to coupled pentadiagonal equations 85−28197
Newton algorithm for adjustment of microdata with min. information loss *(German)* 86−7700
Nicoletti BVP investigation using successive approximation 87−73006
nonlinear differential eqns., boundedness of solns., Lyapunov's functions 86−46282
nonlinear optical amplifier, resolution method for moment eqns. 87−26509
nonlinear ordinary and partial diff. eqns., analytical decoupling 86−62192
nonlinear partial DEs, method of lines 88−63248
nonlinear power system stability anal. using direct Lyapunov method *(Russian)* 88−75053
nonlinear product formulae, sharp convergence rates 85−5964
nonlinear second-order hyperbolic eqns., error estimates for single step fully discrete approximations 88−63246
nonlinear systems, stability verification of periodic oscills. 88−24942
nonlinear transmission line, cusp solitons, shock waves and envelope solitons, evol. eqn. 87−54624
nonlinear two-pt. BVPs, num. integration using iterated deferred corrections 87−10332
nonspherical geometrical optics, numerical minimisation of nonlinear PDEs 85−54405
nuclear power plant piping systems, seismic restraint reduction approach 87−71908
numerical method based on Kelvin's graphical method *(German)* 87−59060
numerical method for branch points of a system of nonlinear algebraic equations 88−70270
numerical simulation applied to the control ofstepping-motors 86−39854
numerical solution 86−52406
one-dimensional stationary diode and transistor model *(Czech)* 88−13302
operator compact implicit method for fourth order ordinary differential equations 87−10345
optical bistability, steady state numerical solns. and their stability 88−65832
optical hybrid bistable system, obs. of chaotic behaviour 85−2401
oscillations, power series solutions, software 87−52054
overdamped double-scroll family, piecewise-linear geometry and normal form 88−63255
p-n junctions, quantitative investig. of equations *(Russian)* 88−19694
parabolic equations, numerical approximation *(French)* 85−49523
parabolic systems, error bounds for finite-difference approxs. 86−7705
parameterised eqns., solution manifolds and submanifolds and discretisation errors 85−22438
parametric excitation circuit with two saturating cores, output waveform distortion *(Japanese)* 86−34494
PDEs, numerical soln. by Tau method 85−54402
period four solns. 85−44662
period-doubling and chaos in an nth order nonlinear differential equation 88−72405
periodic reaction-diffusion systems, stability of num. soln. 85−54385
periodic solns. of nonlinear differential-difference eqns with impulses 87−65414
periodic solutions of nonlinear ODEs, Gauss-Newton algorithm 85−22362
PLL, asymptotic analysis methods 88−45848
PLL pull-in range with interfering signal, numerical anal. *(Japanese)* 88−38425
PLL with CW interfering signal, lock frequency range determ., numerical anal. *(Japanese)* 85−17221
PLL with interfering signal, numerical anal. of lock range 86−67104
PLLs, high-order and nonlinear, simulation packages 88−12261
PLTMGC: a multi-grid continuation program forparameterized nonlinear elliptic systems 86−46290
power distribution systems, time scaled models *(German)* 88−30358
power system simulation, parallel processor algorithm 88−61839
power system transient dynamic process analysis *(Croatian)* 85−64814
power system transient stability anal., short-term dynamic processes 87−21820
power systems, transient stability, numerical soln. 85−32072
primal hybrid finite element method for quasilinearsecond order elliptic problems 85−60919
projection-iterative method for finding periodic solutions of nonlinear systems of difference-differential equations with impulses 87−58872
quantum tunnelling, dissipative, at finite temperatures 86−15430
quasisinusoidal oscillators, general eqn. 86−805
reaction-diffusion eqns., monotone iterative methods for finite difference system 85−60915
refrigeration, HVAC system, modelling and simulation 87−72619
relay protection, mathematical models, Wegstein method for solving nonlinear eqns. by computer *(Russian)* 86−61184
restricted range approximate solutions of nonlineardifferential systems with boundary conditions 86−62165
Rosenbrock-type schemes for 2nd-order nonlinear systems of ordinary DEs 87−65417
Runge-Kutta methods, A-stability and G-stability 85−22418
Runge-Kutta methods with arbitrary knots, generalized singly-implicit 85−54390
Schrodinger equation, nonlinear, critical phenomena appl. 88−58903
Schroedinger eqn., numerical soln. 85−5962
screen printing process, 1 D model and wet film thickness calc. method 88−57161
second-order nonlin. BVPs, inform approx. soln. 86−13698
second-order nonlinear hyperbolic eqns., stability and convergence *(Chinese)* 87−65433
nonlinear differential equations continued
self-driven synchronous machine modelling with magnetic saturation *(French)* 86−6711
semiconductor devices, boundary value problems on infinite intervals 86−53577
semiconductor devices, FEM for fundamental eqns. 86−35632
semiconductor devices anal. using finite elements anal. 88−7546
simulation of nonlinear circuits in the frequency domain 87−23834
single-phase transformer inductance calc. by finite element method *(Korean)* 86−19355
singular perturbation problem, exponential difference scheme 85−60914
six-dimensional mapping phenomenology 85−44661
SLDGL-program package for self adaptive soln. of nonlinear PDEs 85−49525
slip energy recovery drive dynamic performance with chopper control 87−43546
slowly varying oscillators, analysis by perturbation technique 86−57717
spontaneous bifurcation, numerical study 87−65429
stable periodic solutions in nonlinear difference equations 88−56195
stationary-phase synthesis of complex FM signals 88−27960
steam generating plant, 200 MW, digital simulation 85−32358
stepping motor CAD, using phase plane 87−9605
stiff nonlinear differential eqns., stability of Runge-Kutta methods, book 85−54414
stiff systems, local error estimation by modified Richardson extrapolation *(German)* 85−10619
stochastic ordinary diff. eqns., mathematical theory 86−62158
stochastic two-target pursuit-evasion differential game with three players moving in a plane 87−65312
sufficient conditions for occurring bifurcation 87−16541
superconducting turbogenerator, steady-state stability anal. using diff. eqns. *(Russian)* 87−30487
symbolic power series solution of nonlinear differential equation by iteration method *(Japanese)* 88−362
synchronous machines, flux-decay effect transient stability, analogue computer simulation, phase-space study 86−19234
synchronous machines, steady state stability anal. 88−69321
synchronous machines, transient stability study using extension of delta method 88−30674
TE_{n1} mode interaction with fast axis-rotating electron beams, nonlinear anal., efficiency optimisation 88−27443
third-order boundary-value problems, existence-uniqueness and iterative methods 87−44198
transformer thermal test simulation for finite-element nonlinear transient heat transfer analysis program *(Japanese)* 86−61560
transformers and iron core reactors, Fe core modelling of electrical transients 86−19348
transient magnetic field analysis by finite element method 85−62729
transients anal. in nonlinear ccts., numerical method *(Russian)* 85−17112
travelling-wave solns. of nonlin. parabolic eqns., num. calc. 86−62187
trunk groups with mixed two-way and one-way trunks, optimal design considerations *(Japanese)* 88−21551
tubular-type linear stepping motor, nonlinear finite element algorithm *(Korean)* 87−51265
turbogenerator synchronous and dynamic parameters, finite element calc. 87−30539
two-point boundary value problems, efficient classes of Runge-Kutta methods 87−23570
two-point boundary value problems, simplified homotopy method 87−224
two-pt. BVPs on successively refined grids 86−13689
two-sided interval secant methods for separable mappings *(Chinese)* 88−49772
TWT mode electron velocity calc. *(Russian)* 87−37835
Van der Pol eqn. with moderate values of damping coeff., periodic solns. 87−73017
variational soln. of piecewise-linear differential eqns., efficient soln. 88−63256
VLSI semiconductor devices, finite element analysis of diffusion 87−5312
VLSI systolic arrays for nonlinear partial differential equation solving 86−27257
VVVF invertor-driven induction motor linearised eqn. applicability range 87−22370
waveform relaxation: theory and practice 86−13706
weakly singular Volterra integro-differential eqn. 87−58875

nonlinear equations

active AC power filter harmonic compensation current injection method *(Korean)* 86−34985
algebraic, algorithms for solution 86−7692
algebraic equation soln., parallelism 86−57389
algebraic equations 86−46275
algorithm to solve linear and slightly non-linear equations, financial modelling application 85−16889
approximate Newton methods, behaviour 87−10324
asynchronous parallel mixed algorithm for linear and nonlinear equations 88−345
attractive cycles in the iteration of meromorphicfunctions 85−54359
automatic computation of partial derivatives and rounding error estimates *(Japanese)* 86−57388
automatic solution of nonlinear integral equations 87−31463
bifurcation problems, finite dimensional approx. in presence of symmetries 86−34232
bifurcation problems in nonlinear parametric programming 88−11891
bond graphs, R-fields, automatic identification 88−342
boundary-value problems, automatical computation of error bounds 85−39671
box-bisection for solving second-degree systems and the problem of clustering 87−65413
broadband matching circuit synthesis, Youla coefficient constraints 88−24947
BVPs, soln. by Broyden-based secant methods 87−5369
cables with screening effects, nonlinear integrodifferential equation, numerical resolution *(French)* 85−17910
complex power systems, steady state calc. using nodal voltage eqns. *(Russian)* 85−59620
conjugate gradient methods, convergence *(Italian)* 85−10640
continuous dependence of solutions of a nonlinearintegral equation on the control 85−49527

nonlinear equations continued
convergence analysis of discretization methods fornonlinear first kind Volterra integral equations 86−62199
convergent series solution of nonlinear equations 85−5949
convexity, definition and properties of particular notion 86−34231
cubic equations with three rational roots, solutions 88−24619
decomposition method appl. to solution of algebraic equations 86−46153
defect correction from a Galerkin viewpoint 88−56179
derivative free multipoint iterative methods for simple andmultiple roots 86−46271
derivative-free method for solving nonlinear equations 87−214
difference methods for problems with different time scales 85−39674
differential-equations algorithm for nonlinear equations, method 85−28187
differential-equations algorithm for solving nonlinear equations, DAFNE 85−28188
direct method for computing higher order folds 86−46274
direct method for numerical calculation of swallowtail 86−62197
dynamic systems parameters meas., Kalman filter algorithm 87−61855
eigenvalue and associated eigenvector, Symm-Wilkinson method for improved approx. 85−10638
electric load flow calc., block diagonal dominance concept 85−32127
electric machines, air gap magnetic field anal. 86−51554
electrical networks stationary modes *(Russian)* 85−6102
elliptic boundary value problems, isomorphic iterative soln. 87−36652
elliptic Dirichlet problems on rectangles by almost globally convergent interval methods 85−60923
elliptic eqns. with infinite boundary conds. and stochastic control with state constraints *(French)* 85−22397
energy conservation and stability of nonlinear time-stepping algorithms 87−215
expansion theorems for nonlinear functional equations by algorithm 87−73009
finite element analysis, nonlinear, consistent linearisation for path following methods 87−16537
fixed point algorithm, decomposition method and acceleration techniques 85−39672
fixed points algorithms for nonlinear circuits solution 85−10946
fixed-point simplicial approximation method, SAM, for solving nonlinear eqn. systems, PASCAL version *(Japanese)* 85−60902
formal linearization via partial differential equation solved by the Hermite expansion *(Japanese)* 87−16536
Fredholm integral eqn., calc. of bifurcation pts. 85−49528
Fredholme integral equations soln. 87−73031
functional, soln. *(Chinese)* 86−62152
generalised bisection tests, nonlinear equation solution 88−11921
global convergence of path following methods 88−11922
Hammerstein nonlinear integral equation, superconvergence of collocation-type method 87−73029
high-order three point schemes for boundary value problems 86−62166
hysteresis point computing of nonlinear eqns. depending on two parameters 87−73002
indeterminate nonlinear systems of algebraic eqns., algorithm for extreme nonlinearity 87−44223
induction machine locked-rotor nonlinear magnetic field analysis 87−42972
inequalities, soln. in finite no. of iterations 85−49485
inexact Newton methods for the nonlinear complementarity problem 87−10326
interval functions, maximal fixed point theorem applied to linear and nonlinear equations, and nonlinear integral equations 85−10621
interval methods for fixed-point problems 87−23536
isolated solution structure and global computability for operator equations 87−36632
iteration procedure for soln. of nonlinear operator eqns. 88−18644
iterative decomposition algorithm, acceleration techniques for nonlinear eqns. soln. *(Japanese)* 85−10641
iterative methods for solving bordered systems with applications to continuation methods 85−33324
iterative soln. of nonlin. systems using quadratic approxs. 86−40672
Kaczmarz method for nonlin. eqns., accel. procedure 87−5368
Kantorovich-type convergence analysis for theGauss-Newton-method 86−34218
Krawczyk-like interval algorithms for nonlinear systems of eqns. 86−26772
Krylov subspace methods for discrete Newton algorithms 85−5948
large gas transmission networks, completely parallel scheme for simulation of transients 87−44224
Larkin's method of rational interpolation, finding a bracketed zero 86−13668
lightning current waveform analysis, EMTP and Newton-Raphson soln. *(Japanese)* 86−39214
load flow algorithm, matrix of factors updating for iterative solution 87−50660
local convergence of ABS methods for nonlinear algebraic equations 88−344
machine 2D nonlinear magnetic fields, finite element and finite difference solns. compared 87−35911
magnetostatics problem treatment by TRIFOU computer code *(French)* 86−68675
measurement accuracy increase, use of primary meas. transducers, Newton method efficiency determ. 88−35758
Menger-decomposition of graph, appl. to structural anal. of large-scale system of eqns. 87−44126
minimally extended system of nonlinear eqns., bifurcation points calc. 86−26771
modified secant method, convergence of generalised procedure 85−28182
modulational instability in a nonlinear transmissionline 86−59110
monotone Brown vs. Newton method, comparison 88−56187
monotone convergence of Newton's method 86−34229
Monte Carlo simulation for nonlinear equations solution 88−63234
MOS device modelling, robust numerical techniques 87−25349
MOS ICs anal. algorithm, Walsh-function basis 87−46198
multistage Monte Carlo optimisation for solving nonlinear system of eqns., capacitance example 85−22611
networks, numerical anal. *(Japanese)* 88−6634
Newton's method at nearly singular roots, expanded convergence domains 86−7693
Newton and quasi-Newton methods, extensions to PC^1 equations 86−62123
Newton-like iterative methods, convergence 85−22376
Newton-Raphson method modification for nonlinear eqn. 87−31659
Newton-type decomposition methods, consistent approximations 86−13687
noniterative quadrature method of num. soln. 87−10325
noniterative scheme for semiconductor device simulation 88−19905
nonlinear static Poisson eqn. in semiconds., soln. using fast iterative algorithm 87−58833
nonminimum phase signals modelling 87−47797
nonsimple turning pts. and cusps, numerical computation 85−49501
numerical calc. from geometrical points of view *(Japanese)* 86−40673
numerical calc. from geometrical viewpoints 87−73003
numerical solution by Newton method, mechanical characts. computing appl. *(Slovak)* 88−30396
odd homotopy method of constructing solutions fornonlinear equations *(Japanese)* 86−40674
oil circuit breaker gas buffer model *(Russian)* 87−78815
operator eqns., commutativity of differentiation and discretisation 86−34199
optimal projection method for nonlin. systems of eqns. 86−57387
orotron, higher order oscillations excitations, nonlinear multifrequency theory 86−21045
orthogonal polynomials, sensitivity to moment perturbations 86−46244
oscillator, three-phase triangular wave models 88−6683
parabolic equations inverse problems, regularization and discretization control 86−46278
parallel and sequential Kaczmarz methods for solvingunderdetermined nonlinear equations 86−62105
partitioned updating quasi Newton methods for algebraic nonlin. eqns. 86−34230
periodic state anal. of nonlinear circuits using nonlinear algebraic equations *(Russian)* 86−62393
polynomial equations, finding all solns using homotopy 85−39662
power overhead line mechanical characts., finite element calc. *(German)* 86−12457
power system load flow anal., improved methods using nonlinear equations 87−9075
power system load flow solutions using homotopy method 86−18672
power system nonlinear eqn. solns. using iteration process 88−23271
power transmission line system design microcomputer-based nonlinear structural anal. 86−18819
projection method for solving nonlinear systems of eqns. 86−20003
PWM harmonic elimination calc. using symmetrical polynomials *(Polish)* 86−64175
PWM invertors, harmonic elimination by solving nonlinear eqns. 87−78757
PWM waves simulation for harmonic anal. and synthesis 86−59201
quasi-neutron method for sparse systems of nonlinearequations *(Japanese)* 86−52399
quasi-Newton methods with factorization scaling for solving sparse nonlinear systems of equations 87−44222
quasilinear analysis of nonlinear dynamic simulations 87−5370
quasiNewton updates, restricted pseudoinverses for unified derivation 85−44644
radiological image decomposition methods, dual energy, comparison 88−54513
rapid generalized method of bisection for solvingsystems of non-linear equations 86−62153
rectified approximations for the solution of nonlinear equations 85−5950
reduced basis method for nonlinear eqns. error estimation 86−26773
reduced Gaussian method using constant Jacobian matrix for solving network type nonlinear simultaneous equations 85−4606
reducible equations solving *(Chinese)* 85−54373
relaxed Newton-like methods for stiff differential systems 87−216
resistive circuits, separability of nonlinear equation *(Russian)* 86−34492
resistive network anal., sufficient conditions for existence and diffeomorphism of a nonlinear vector function 87−65769
resolvent iteration processes for constructing a solution of a nonlinear equation in Banach space *(Chinese)* 85−16891
root finding, practical stopping rule 85−54374
root-finding for nonlinear eqns., practical problems 86−354
rootfinder algorithm 85−39664
second-order nonlinear difference eqns., periodic solns., multi-discrete time method 88−343
semiconductor device modelling nonlinear Poisson eqn., methods of soln. 88−26187
semiconductor device simulation with FEM *(Russian)* 87−53442
semiconductor devices, numerical modelling, nonlinear eqns. soln. by Cauchy-Newton methods 87−6645
semilocal convergence of linear iterative methodsfor systems of nonlinear equations 85−60903
sharp error bounds for Newton's method under Kantorovich assumptions 86−62154
simple quadratic folds, tracing soln.-branches 86−46273
simultaneous nonlinear algebraic eqns., numerical anal. *(Japanese)* 87−16538
simultaneous nonlinear algebraic equations, numerical analysis 88−49990
singular points computation of nonlinear equations 85−332
solution methods 88−24675
solution of nonlinear algebraic equations, new update 85−60834
solving systems of linear and nonlinear functional equations 85−16892
sparse Jacobian matrices, FORTRAN subroutines for estimating 85−28174
sparse Jacobian matrices, subroutines for estimating, discussion 85−28173
squirrel-cage motor nonlinear state eqns. and discrete PI speed controller design *(Korean)* 86−56765
steam power plant units, load variation effects *(German)* 86−70821
successive orthogonal projections for solving nonlinear simultaneous eqns. 87−36625
suitability of Runge-Kutta methods 88−18654
superlinearly convergent algorithm for nonlinear l_1 optimisation 86−57600
symmetric iterative interval method for systems of nonlinear equations 85−10639
tangent hyperbolas method in Banach spaces 88−18643
test polynomials, analytic approach to soln. of nonlinear eqns. 88−18642
three-dimensional EM fields calc., involving laminar eddy currents 87−68717
three-phase reluctance motor modelling and small-perturbation analysis 87−42900
time series analysis, numerical solution of nonlinear system 85−33357
transient dynamic analysis, nonlinear equation solution 86−62155
triangular factor updating under rank one change 86−26769
two-point boundary-value problems, simplified homotopy method *(Japanese)* 85−28183
Volterra-Hummerstein integral eqns., soln. on high speed computer *(Russian)* 88−70287

nonlinear equations continued
Volterra-type eqns., convergence anal. of discretisation methods 85−28192
wave equations, numerical anal. *(Japanese)* 87−36653
zero finding, rapidly convergent algorithms 85−33318

nonlinear network analysis
2D nonlinear systems, switched and non-switched, uniqueness of asymptotic behaviour 87−65783
3-phase LC circuits with rectifiers, quasi-stationary phenomena modelling *(Russian)* 88−63482
3D autonomous cct. family including one diode, chaotic phenomena study *(Japanese)* 88−70496
'Latch-up' property in second order RC-activeoscillators 86−62479
'Lorentz attractor' from an electrical circuit with uncoupled piecewise-linear resistor 87−65777
abrupt nonlinearity system identification using Volterra-Fourier method 88−56418
AC forced Josephson junction cct., chaotic behaviour meas. 85−18618
active filters 86−67344
active filters, harmonic-balance eval. of large signal behaviour 88−19271
active filters, solution by computer, op amp nonlinear circuit model *(Czech)* 87−5956
active n-port circuit, large signal parameters, theoretical definition *(French)* 85−49972
active network topological conditions for a resistive circuit containing negative non-linear resistors to have a unique solution 87−59712
active peak detector, nonlinear analysis 87−10640
adjoint-network method for incremental analysis *(Chinese)* 86−62392
AF active emphasis and de-emphasis network analysis and design 88−70892
AGC circuit, large control signal, anal. and design 85−17121
algebraic solns., difference bands 87−5643
algorithms using simplified component models 87−52314
almost sinusoidal oscillators with shifting bias, free-running and driven behaviour study 87−73359
almost-periodic ccts., appl. of harmonic balance; Fourier transform algorithm development 88−31971
AM RF resonant circuits tuned by high ratio variable capacitance diodes, distortion 88−44026
amplifier, noise, quantum limit in squeezed operating state 86−62464
amplifier, strongly nonlinear, Fourier-Hermite functional series use in statistical analysis 87−65770
amplifiers, multistage feedforward, nonlinear performance 85−17180
amplifiers, nonlinear scattering parameters anal. 88−50048
amplifiers, structural method of analysis for circuits and non-linear systems *(Spanish)* 88−63553
amplifiers with small nonlinearity, structural anal. 86−34574
amplitude-controlled oscillator with branching phenomena, injection synchronisation 85−17200
analog circuit fault diagnosis scheme, tableau formulation 85−17606
analog electronic networks, computer aided anal. 87−483
analog fault diagnosis scheme, pseudo nominal tableau approach 85−537
analog fault diagnosis with tolerance 86−66993
analogue automatic test program generation, SPICE package 85−17116
analogue circuit fault diagnosis, self-testing based, test point selection methods 86−1188
analogue electronic circuits, nonlinear distortion anal. using Volterra-Wiener series 85−541
anharmonic oscillator, demonstration 85−616
approximate noise analysis of a feedback oscillator using a non-linear differential amplifier 87−52424
approximation of the amplifier transfercharacteristic in an oscillator 86−34578
asymptotic pause steady current response of a nonlinear oscillatory circuit to rectangular voltage waves 88−63564
asymptotic theory of rectification and.detection 86−720
autonomous and nonautonomous ccts., chaotic phenomena study 88−38366
autonomous elec. cct., chaotic attractor, double scroll 85−54625
avalanche transit-time diodes with wide multiplication layer 86−58443
average power spectra of chaotic motions in a systemdescribed by nonlinear differential-difference equation 86−57595
averaging method for nonlinear analysis 86−62406
balanced diode mixers, saturation props. of intermodulation *(German)* 88−38420
BASIC, network analysis *(German)* 86−46474
BASIC for nonlinear network anal. *(German)* 87−44518
BASIC programming and statistical anal. *(German)* 87−31677
basilar membrane models, almost-periodic response determination 86−20233
bifurcation in nonlinear networks *(German)* 87−59126
bifurcations of the double-scroll 86−57594
bipolar circuits, DC nonlinear anal. using personal computer 86−57578
bistable electronic analogue circuit, correlation times, white noise effects 86−62405
bistable flow circuit, coloured noise driven, two dimensional density meas. 86−11777
boost-buck DC-DC convertor in optimal topology, computer-aided anal. 88−37297
branch-line hybrid coupled semicond. phase shifters, integral anal. 87−37543
Brayton-Moser eqns., variational approach 87−492
broadband, based on nonlinear current method 87−73253
buck convertor with feedforward compensation, digital simulation 85−5263
CAD, microwave ccts. Volterra-series anal. , general purpose computer program 88−70439
CAD programs, Volterra-series use 87−16800
CAD tool for nonlinear microwave circuits driven by nonharmonically related generators *(French)* 88−66461
canonic coupling of oscillators in a chain, anal. 88−18974
canonical form of equations for the analysis ofnonlinear electrical networks 87−486
canonical nonlinear programming cct. unification with Tank-Hopfield linear programming cct. 87−36944
canonical nonlinear programming ccts. for problem solving by analogue simulation 87−32028
canonical piecewise-linear anal., driving-point and transfer characts. 85−44859
canonical piecewise-linear analysis: generalizedbreakpoint hopping algorithm 86−27037
canonical piecewise-linear hybrid analysis 85−44863
canonical piecewise-linear modeling 86−52638

diode-transistor circuits, periodic solutions determ. by differential transforms method *(Polish)* 85−49708
diode-transistor circuits working point evaluation *(Russian)* 85−54620
directed network, fault diagnosis technique 87−52316
discrete orthogonal lattice structs. for modelling 86−66984
discrete-time simulation in state-space, general algorithm *(German)* 85−22610
distorted meander-line oscillators, regeneration, statistical anal. *(German)* 85−44862
distortion magnitude calc., computer program listings 88−31974
distributed networks, stability theory 88−49988
distributed-parameter-model structure determ. *(Russian)* 86−13954
double balanced diode mixers, saturation props., of intermodulation *(German)* 88−56518
double Fourier series, rapid method of coefficients calculation 86−13956

nonlinear network analysis continued
double scroll, chaos existence proof *(French)* 88−6631
double scroll, unfolding, proof of chaos 86−66979
double scroll bifurcations in nonlinear elec. cct. 86−46516
double scroll cct., chaos, computer-assisted proof 88−70487
double scroll circuit, stability sectors and chaotic regions 87−36942
double-scroll chaotic attractor in nonlinear elec. cct. 86−57593
driven diode resonator systems, f(α) spectra of attractors at transitions to chaos 88−6691
driven relaxation oscillator with negative resistance device, transition to chaos, expt. study 87−10714
Duffing-Van der Pol oscillator, homoclinic bifurcations and chaos study 88−44080
dynamic cct., voltage noise 88−63484
dynamic max. power theorem 88−56415
dynamic networks, global anal., evolution diagram determ. *(German)* 87−59125
dynamic networks, sensitivities and error gradients calc. 88−49995
dynamic nonlinear programming circuit, props. anal. 87−65785
dynamical sensitivity analysis in extended state space *(German)* 86−40871
dynamical systems, effects of small noise 85−539
echo cancellers based on transpose distrib. arithmetic, state-variable-anal. 88−34349
elastance modulation in oscillatory circuits, resonant frequency modulation 87−65898
electric circuit anal. using iterative method *(Romanian)* 87−59117
electrical networks generalised computer-aided analysis method 85−33591
electronic neural networks, basins of attraction and trajectories, study using phase space 88−31975
Elmore's delay, extension and appl. to MOS pass transistor networks timing anal. 87−16837
EM systems with multiple lumped nonlinear loads, transient analysis 85−44857
emitter-coupled multivibrators, loop transfer fn. calc. and design considerations 88−56528
equivalent property between relaxation method based on state formulation and steepest descent method for solution of linear equation *(Japanese)* 87−73258
ESACAP: a minicomputer based network analysis program 85−6120
external characts. calc. of nonlinear devices 87−10636
externally driven excitable systems, phase locking, period doubling, chaotic phenomena 88−56504
fault diagnosis, graphical approach to detectability and distinguishability, diagnosis algorithm 86−62395
fault diagnosis using Volterra series 86−66992
fault identification of device and chip faults in analogcircuits 86−62398
fault locus and fault isolation 86−693
feedback circuits, synchronisation and periodic steady-state oscills. anal. 85−61060
feedback oscillators, freq. and amplitude stability, deterministic theories 87−44650
feedback oscillators under large-signal injection, anal. 87−541
ferroresonant circuit, filtering characts. *(Japanese)* 85−54621
ferroresonant circuit, single phase series, multimodal behaviour, critical conditions 85−28328
ferroresonant power supply circuits, transient response anal. 85−27507
FET amplifier anal. using power depend. S-parameters 88−63892
filters, low-pass logarithmic weakly resonant type, anal. 87−66319
finite-lag amplifying receivers, anal. and identification 86−37728
first-order splines with arbitrary interpolation points, charact. approx., harmonic anal. 87−16840
fixed points algorithms for nonlinear circuits solution 85−10946
fluorescent lamp ccts., nonlinear theory for anal. and synthesis 88−18906
FM signal distortion in nonlinear oscillatory cct. 87−65949
forced oscillations in a self-oscillatory system with nonlinear restoring force *(Japanese)* 87−31744
forced RL-varactor cct., chaotic behaviour *(Chinese)* 86−66974
four-element autonomous cct. with two-terminal nonlinear resistor, chaotic behaviour study 87−44513
Fourier series input to nonlinear cct., response 88−550
frequency conversion with an image channel suppression 88−50390
frequency dividing networks−modeling, analysis and network-synthesis 85−23083
frequency synthesizers, wideband second-order PLL type, anal. and design consideration 88−56496
frequency tripler, transistor-based cct. design and anal. *(German)* 87−66456
frequency-dependent nonlinear networks, spectra prediction 87−491
frequency-domain anal. technique using generalised power series 87−65782
full wave rectifier method of generation of chaos in a nonlinear circuit with the use of time-delay device *(Japanese)* 87−31710
full-wave semiconductor diode microwave power sensing system, RMS response anal. 88−22556
functional analysis, generating power series approach 87−10634
functional analysis of linear and nonlinear ccts., using TI-58 calculator, Runge-Kutta method appl. *(Czech)* 85−28306
functional fault diagnosis using Petri nets 86−66905
generalised modelling technique 85−22618
generalised nonlinear theory for one-port microwave active circuits 88−986
generalised superposition method, remarks 86−46517
generalized form for the nonlinear transmission lineequations 86−59115
geometric properties, capacitor-only cutsets and inductor-only loops, conservation laws 87−10631
global implicit function theorems, note 86−62401
global method of constructing solutions fornonlinear resistive circuits 86−62400
global stability analysis of microwave circuits by a frequency-domain approach *(Japanese)* 87−73261
globally convergent algorithm based on fixed-point homotopy for the solution of nonlinear resistive circuits *(Japanese)* 88−18892
hardware neuron model, Λ-shaped transistor utilisation 87−477
harmonic balance simulation and sensitivity anal. 88−70499
harmonic input, output signal spectrum determ. 86−37059
harmonic response, nonlinear ccts., mixing calc. 85−17216
HEMT mixers, large-signal device model and time-domain nonlinear cct. anal. program 88−38725
HF bipolar transmissions under nonlinear conditions, parameters calc. 86−53601
HF half-wave rectifier cct. with saturable core, operation 88−12201

nonlinear network analysis continued
HF oscillator and cavity resonator interaction, nonlinear couplings with delay anal. 88−44338
homoclinic and heteroclinic orbits in the double scroll attractor 88−6632
hyperchaos: laboratory experiment and numerical confirmation 87−16836
hysteresis chaos generator 87−475
hysteresis chaos generator, non-idealised, config. and anal. *(Japanese)* 88−25041
hysteresis elements of electric networks, anal. *(Czech)* 87−16835
hysteretic characteristic digital simulation, method and appl. 86−62402
ICs, nonlinear DE solution, numerical-analytical method 87−53608
identification of nonlinear elements, single harmonic response based 88−70492
Improvement of algorithm using interval analysisfor solution of nonlinear circuit equations *(Japanese)* 86−66978
inertialess systems, fluctuation-dissipation models of nonequilibrium electrical noise 87−65766
infinite, problems and current research state of theory 86−52639
injection-locked oscillator output power, phase-plane analysis 88−56946
integral manifolds for nonlinear circuits 85−6127
integral manifolds technique, steady-state behaviour 85−17120
integral matrix transformations for periodic states anal. *(Russian)* 87−16839
integral methods for identification of nonlinear elements *(Russian)* 88−541
interactive design and fault location tool 86−40874
interconnection method for nonlinear network analysis 87−44520
intermodulation, third-order, for large signal, calc. *(German)* 86−52637
intermodulation distortion analysis using a frequency-domain harmonic balance technique 88−63483
internally resonant oscillator, global and local dynamics anal. 88−32042
interval anal. use for algorithm improvement 88−12172
iron resonant circuit anal. considering hysteretic characts. *(Japanese)* 87−73256
Josephson circuits, stationary oscills. anal. *(Japanese)* 85−18615
Josephson-junction cct. anal. via integral manifolds 85−24234
jumping phenomena in nonlinear circuits 86−692
K fault diagnosis of piecewise-linear systems 87−65775
Kuramitsu-Takase averaged equations *(Japanese)* 88−38373
Kuramitsu-Yokota equations for multimode oscillators *(Japanese)* 88−18979
L-band solid-state pulse amplifiers for radar transmitters, transient response anal. 88−56982
L-R-diode circuit, nonlinear capacitance, period-doubling and chaos obs. 88−49991
ladder filters, least-squares AR prediction of higher-order random sequences 85−17731
ladder oscillators having active elements with sharp saturation 86−57715
Lagrange and Routh formulations set 88−44027
Lagrangian fns. derivation for nonlinear dissipative networks 86−57591
Laplace method for analysis under slow signal excitation *(German)* 87−52320
large-scale digital circuits, adaptive waveform relaxation algorithm 85−675
large-scale transistor cct. simulation, relaxation method using network tearing 86−66928
large-signal narrow-band quasi-black-box modelling of microwave transistors 87−6122
large-signal S-parameter computation by harmonic-balance techniques 88−31965
LC ladder type transmission line, quasi-continuous description 87−26890
LC self-excited oscillators based on ideal convertors, nonlinear anal. 87−44657
lightning return stroke, nonlinear transmission line model 88−72590
logarithmic amplifier with feedback path transistor, config., anal. and appl. *(German)* 86−768
LRC circuit, period-2 windows and band splitting 86−13958
lumped circuit, effect of variable capacitance diode nonlinearity on KdV eqn. 88−56423
Lyapunov functions for piecewise-linear systems, construction methods *(Japanese)* 88−49993
machine equivalent models from electric and magnetic field analysis *(Italian)* 86−7879
macromodel of nonlinear continuous radioelectronic systems 87−59121
macromodel studies for multivariant analysis 85−17114
macromodels for complex ccts. 85−17115
magnetic freq. tripler for ozone generating system 88−55453
magnetic saturation and hysteresis compute model using SPICE2 85−1096
MESFET amplifier, X-band, intermodulation product and output power optimisation, Volterra series anal. 86−27588
MESFET amplifiers, analysis and multiharmonic optimization *(Spanish)* 88−56906
MESFET amplifiers, with multifreq. excitation, intermodulation distortion simulation 87−6140
n-MESFET distributed amplifier, loss-free, nonlinear behaviour 85−22667
MESFET distributed amplifiers, wideband power performance prediction using Volterra series representation 87−17355
MESFET gate mixers, anal. and design 87−59255
MESFET self-bias mode oscillator, large-signal anal. and MIC implementation 86−41329
MESFET VCO, relationship between noise perform. and tuning elements 88−25052
metal-semiconductor junctions, modelling concept for CAD appls. 87−6465
metastable oscillation modes observed by numerical analyses in forced van der Pol oscillator 87−16936
micropower freq. doubler using Schottky barrier diodes 88−56829
microwave analogue ccts., frequency-domain nonlinear circuit analysis using generalized power series 88−31972
microwave balanced mixers, anal. and design for CAD procedure appls. 86−41328
microwave CAD/anal. techniques, state-of-the-art and trends survey 88−32407
microwave cct. simulation, almost-periodic Fourier transform algorithm for harmonic balance 87−73262
microwave ccts., CAD techniques *(German)* 87−11029
microwave ccts. anal. using state-space approach 85−17125
microwave circuit analysis using diff. eqns. and harmonic balance method 88−71020
microwave circuits, CAD package with time-domain simulation and device modelling 86−14538
microwave circuits, Fourier transform analysis 88−25552

nonlinear network analysis continued
microwave circuits, stability anal. of periodic steady-state regimes, CAD appl. 85−23106
microwave circuits, supercomputer-based stability anal. 85−11544
microwave circuits, user-oriented software package for anal. and optimisation 87−10581
microwave circuits anal. and stability, freq. domain continuation method 87−10633
microwave communication techniques and microwave devices conf., Budapest, Hungary (Aug. 1986) 88−55816
microwave devices and ccts., colloquium, London, UK (March 1988) 88−43608
microwave FET equivalent circuit, nonlinear elements characts. calc. 87−11794
microwave FET oscillator, LF noise upconversion, theoretical anal. 85−34181
Microwave Harmonica software for simulating and designing nonlinear microwave 88−44341
microwave ICs, frequency domain analysis 86−8498
microwave mixers, numerical anal. of intermodulation distortion 88−71130
microwave mixers, numerical method for computer-aided anal. 86−41327
microwave nonlinear device ccts., anal. and harmonic optimisation using computer aided approach 88−1003
microwave phase detectors for PSK demodulation, nonlinear anal. model 85−11104
Microwave SPICE, EEsof nonlinear time-domain simulation program 86−20239
microwave systems, method for third-order intermodulation distortion-reduction 86−41332
microwave transistor oscillators, large signal transient optimization 88−56905
microwave two-port active mixers, anal. method 86−20823
microwave two-ports, magnitude and phase meas. method 88−70498
microwave type, nonlinear cct. anal./design using modified harmonic balance algorithm 87−16838
minimax optimisation algorithm with step-by-step active function selection 86−7918
minimum sideband noise in oscillators 86−34613
mixed mode mixed level analysis with PWL systems 85−22623
mixed step-size integration algorithm for relaxation-based circuit simulation 88−18881
mixed-mode PISCES-SPICE coupled circuit and device solver 88−70489
mixers, short millimeter wavelength, nonlinear analysis *(Chinese)* 88−611
MM-wave monolithic balanced diode mixer, design and anal. using computer-aided technique 88−44381
MM-wave SIS mixers for low-noise heterodyne receivers, design and equiv. cct. anal. 88−44380
MMIC dual-gate FET distrib. power amplifier, 1-20 GHz design, modelling, fabrication and performance 88−19412
MMIC power amplifiers, stability and cct. modelling 88−63971
modelling operational amplifiers for higher-frequency filter design 87−5693
modified multilevel Newton algorithm for the analysis of large scale circuits in the time domain *(Chinese)* 88−38363
modulational instability in a nonlinear transmissionline 86−59110
MOS switched capacitor integrators, amplifier slew rate and freq. depend. gain effects 87−45048
MOS switched-capacitor integrators, transient behaviour 87−875
MOS transformer-coupled oscillators, anal. method 88−18965
MOS VLSI, nonlinear nonuniform RC transmission lines monotone sensitivity 85−23959
MOSFET as quadratic element for constructing HF rectifiers *(German)* 88−71568
MOSFET in analogue switching cct., distortions effects analysis *(Czech)* 86−50026
multi-tone signal driven circuits, freq.-domain anal. 85−536
multidimensional piecewise-linear functions with piecewise-linear partitions 85−17123
multifrequency anal. using freq.-domain method 85−61059
multifrequency freed and composite oscillations calc., analytical method *(Russian)* 88−38369
multifrequency oscillations in a distributed LCR oscillator 85−17203
multilinear maps and uniform boundedness 85−44858
multilinear operator method 86−13957
multimode oscillations anal. using probability density *(Japanese)* 85−17197
multimode oscillator anal. via integral manifolds, non-resonant case 88−24944
multimode oscillator analysis via integral manifolds, resonant case 88−24945
multimode oscillator analysis via integral manifolds 87−65923
multimode oscillator with active element represented by seventh-degree charact., anal. *(Japanese)* 85−6210
multimode oscillators, weakly nonlinear, numerical soln. convergence *(Japanese)* 85−61151
multiphase resistance networks with periodically variable parameters, anal. 87−52325
multiple oscillator system, oscillation mode stability 85−61146
multiple solns. of nonlinear cct. eqns. by simplicial subdivision *(Japanese)* 87−52319
multipole active networks, sensitivity theorem *(Russian)* 85−39891
multiport with time-dependent sources, steady state and transients anal. 85−538
multiports, freq. conversion and stability study 87−5645
multiresonant oscillators, natural power fluctuations 87−52435
multistage Monte Carlo optimisation for solving nonlinear system of eqns., capacitance example 85−22611
multitone input signals, steady state response using numerical technique 87−73251
mutual coupling of oscillators with chaos andperiod doubling bifurcation 86−67082
n-port network synthesis/anal., sectionwise piecewise polynomial functions 85−6129
narrowband nonlinear ccts., computer-aided analysis 87−73254
negative conductance free-running oscillators, dynamical stability 85−54715
negative conductance oscillators, perturbed, theory 86−46607
negative differential resistance occurrence 86−66983
negative resistance curve tracer 85−54624
negative resistance devices, nonlinear model 85−10949
network topology, state-space approach *(German)* 85−61028

nonlinear network analysis continued
network with static thyristor compensators, digital model for transient process anal. *(Russian)* 87−36995
neural ccts., complex dynamics 87−23878
neutron yield of plasma focus device, nonlin. damping resistors influence 87−41892
Newton algorithm, two-level, for numerical analysis 87−36941
nodal impedance matrix for networks with mutually coupled inductors, algorithm 88−36830
noise in an IMPATT diode oscillator with second harmonic signals 87−73666
non-reciprocal resistive networks, topological criterion for structurally unique soln. 86−62396
nonautonomous systems, periodic modes stability, approximate anal. 87−36946
nondeterministic fluctuation problems of nonlinear systems, fixed point theorems and their appls. 86−57599
nonisochronous mutually synchronised oscillators, characts. 85−635
nonlinear adiabatic oscillating systems 86−62403
nonlinear echo cancellation and multi-input discrete Volterra series 87−55843
nonlinear macromodels *(Chinese)* 87−59182
nonlinear microwave ccts. driven by nonharmonically related generators, anal. using spectral balance 87−73718
nonlinear modelling applied to one-port microwave active circuits 88−987
nonlinear networks containing capacitor-only cutset and/or inductor-only loops, geometric props; 87−23880
nonlinear networks with time depend. sources, alternate conditions for uniqueness of steady state, comments 86−691
nonlinear nonautonomous networks and systems, computer-aided determ. and analysis of periodic sons. *(German)* 87−16841
nonlinear noninertial electronic ccts., voltage mixed derivatives computation *(Polish)* 86−13950
nonlinear polyphase circuit, extraordinary oscill. 86−62394
numerical, equivalent property between network analysis using virtual capacitors and steepest descent method *(Japanese)* 88−56421
numerical, fixed-point homotopy convergent algorithm, hybrid anal. by topological formulation *(Japanese)* 88−56422
numerical analysis *(Japanese)* 88−6634
numerical method based on Kelvin's graphical method *(German)* 87−59060
one-port networks containing one nonlinear element, uniqueness 85−49706
one-port resistor networks, global sensitivity study 85−11397
operational amplifier, nonlinear anal., two-pole time-domain model 86−67048
operational amplifier macromodelling using digitally-controlled elements 86−62462
operational voltage controlled element, topology and design constraints 85−17179
operators with fading memory, approx. with Volterra series 86−20236
optimal filtering in nonlinear systems, Wiener-Hopf eqn. generalisation 87−73260
optimal linearization method applied to the resolution of non-linear state equations 87−44511
optimum nonlinear turn-off snubbers, design and appl. 87−37005
oscillating circuit, stochastic oscills. excitation 88−18980
oscillation, Lie series averaging 87−65924
oscillations, computer-aided anal. 86−66985
oscillations continuous excitation analysis, due to external periodic force 86−824
oscillations spectrum, nonlinear and parametric circuits, load effect 87−65772
oscillator, ring-type, self-running, second order, nonlinear model *(Russian)* 88−70494
oscillator, stochastic signals during repeated transition through resonance *(Russian)* 88−70493
oscillator at onset of static and dynamic bifurcations 86−57603
oscillator from Wien-type two-port with distributed parameter 85−44921
oscillator noise analysis, phase and frequency, fractal dimension approach 86−34588
oscillator with inertial nonlinearity, locking threshold as stochasticity criterion 87−59236
oscillators, cascaded, phase-synchronised 86−52717
oscillators, chaotic oscillation studies *(Spanish)* 88−70591
oscillators, nonlinear, sinusoidally driven, parameter depend. of interior crisis meas. 85−17195
oscillators, periodical regimes, numerical determ. 87−10711
oscillators, subharmonic bifurcation, stability and chaos 87−65779
oscillators analytic signal representation, frequency stability analysis appl. 86−34612
oscillatory circuits, steady state anal. by iterative decomposition method 87−5701
oscillatory circuits, steady-state anal. using Newton algorithm *(Japanese)* 87−37054
oscillatory network with nonlinear capacitor, transient process amplitude characts. anal. 85−33616
oscillatory series-connected-RLC-circuit, Feigenbaum theory appl. *(Russian)* 87−73252
oscillatory systems analysis 86−67085
oscillatory systems using distorted time scale 85−17201
parallel ferroresonant circuit, subharmonic response and stability eqns. 88−31963
parallel LC circuit design for specific harmonicattenuation 86−1214
parameter estimation of nonlinear damped oscillating circuits *(Slovak)* 86−27036
parameter matrix decomposition algorithm for DC anal. 86−66987
parameter matrix decomposition multiparameter modification formalism 87−59118
parametric conversion with multivalued nonlinear elements theoretical and expt. study 87−73580
parametric down converters *(Chinese)* 85−45207
parametric excitation cct. having external force, almost periodic oscill. and chaos generation *(Japanese)* 87−59124
parametric excitation circuit with two saturating cores, output waveform distortion *(Japanese)* 86−34494
parametric excitation system, chaotic solutions in the Duffing-Mathieu's equation *(Japanese)* 88−70497
parametric generator oscillatory circuit resonance curve *(German)* 86−57701
partial derivatives calc. when driven by periodic input signals 87−52313
partial operation mode method, described by Volterra series 87−52315

nonlinear network analysis continued
period doubling systems near a bifurcation, noise and noise rise, phase sensitive amplification 88−44061
period-adding route to chaos in a two-transistornonlinear circuit 86−67083
period-doubling bifurcation and chaos in constrained cct. 87−65776
period-doubling bifurcation in electronic circuit with fast-recovery diode and square wave input 88−70491
periodic electrical network, pattern formation 87−16842
periodic phenomena calc. *(Russian)* 88−70485
periodic responses, state variables vector initial value determination *(Russian)* 85−61058
periodic state anal. using nonlinear algebraic equations *(Russian)* 86−62393
phase sensitive detectors, transfer characts. study 86−840
piecewise linear anal. programs, DC soln. speed improvement 86−27035
piecewise linear models for nonlinear dynamic systems 88−31968
piecewise linear resist. networks, nonlocal sensitivity study 85−17119
piecewise linear resistive networks with uniquesolutions 86−20235
piecewise-linear chaotic cct., third-order, one parameter bifurcation diagram 87−36943
piecewise-linear elec. circuits with invertors, modelling transient processes *(Russian)* 87−59166
piecewise-linear resistive network solns., MECA74 program 85−22621
piecewise-linear resistive networks, simplified combinatorial anal. 86−27039
piecewise-linear three-region dynamical systems, transfer and return maps 87−31672
piezoelectric ceramic-resonator oscillators, designed and anal. 88−18985
PIN-FET optical receivers, anal. and noise study *(German)* 88−28859
PLL, hybrid analogue/switched-capacitor type, anal., design 86−67112
PLL, second-order type operating as FM demodulator, chaotic dynamics study 88−70597
polyharmonic activity in nonlinear cct., calc. of stationary modes *(Russian)* 85−10948
polynomial representation in presence of narrowband actions 88−18891
polyphase symmetrical nonlinear circuits, harmonic anal. *(Russian)* 85−28326
power characts. evaluation, statistical approach *(Russian)* 85−4607
power circuits, nonlinear switching element anal. 88−63485
power conditions of measurements using transformer bridges for parameters of nonlinear inductances *(Russian)* 88−60868
power flow technique appl. for circuit anal. *(Russian)* 86−34493
power law nonlinear amplifier, effect of use of harmonic output components on SNR *(Japanese)* 87−59208
power matching of nonlinear resistive sources 87−489
power series method for nonlinear network calcs. 87−59122
power system circuits, digital simulation of B/H excursions 88−48436
problem-adaptive numerical anal., bidirectional algorithms 88−24876
projection operators in network analysis 85−33617
pulsed diodes with nonlinear, time-varying and hybrid impedance behaviour, load characts. 87−16843
qualitative analysis of discontinuous changes in simple pulse circuits *(Japanese)* 88−70612
quartz multivibrator with complementary switch, nonlinear anal., design with improved freq. stability 85−33708
quasi-fault incremental circuit approach for nonlinear circuit fault diagnosis *(Chinese)* 88−31962
quasi-Newton algorithm for following solution curves 87−44515
quasi-periodic oscillation via Volterra series 86−67081
quasisinusoidal oscillators, general eqn. 86−805
R-L-diode circuit, driven, bifurcation scenario 88−544
radio receivers, nonlinear inertialess component characts. 88−548
ramp-type limiter based Robinson oscillator anal. extension 87−52431
random diode-insulator network, current distribution, series expansion anal. 86−57592
random resistor fractal networks, infinite set of exponents 87−480
ranges of transfer and return maps in three-region piecewise-linear dynamical systems 88−24943
rational Volterra models, parameter estimation, appl. to inverting amplifier *(Chinese)* 87−65774
RC multivibrators, phase noise modelling 86−825
RC op-amp oscillators, nonlinear, anal. using phase-space techniques 87−10727
RC self-excited oscillators, nonlinear anal. 87−10719
RC self-running generators with rejection phase-shifting ccts., anal. *(Russian)* 85−49772
RC-ladder network with nonlinear feedback, chaotic motion 88−56734
RCL nonlinear network dynamics in the presence of thermal noise 85−17124
reactive nonlinearities in transmission-line models 85−28329
receiver-amplifier channels, analysis using high order Volterra-Wiener operators 86−16097
rectifier convertors, stability anal. using machine-oriented method 87−59120
recursive algorithms to solve systems of nonlinearequations 87−496
recursive cct. having nonuniform quantiser, dynamic behaviour 86−66986
relaxation quartz oscillators with crystal in feedback loop, anal. and design 87−73358
relaxation-based algorithm by variable virtual capacitors of large stiff nonlinear networks 87−65747
relaxation-based algorithm for anal. of large networks *(Japanese)* 87−36948
resistive ccts., containing current-controlled current or voltage-controlled voltage sources, anal. 86−46514
resistive ccts., fixed point algorithm theory 86−66977
resistive ccts. anal. using homotopy method, glueing technique *(Japanese)* 87−52318
resistive circuit anal. based on fixed point algorithm theory *(Japanese)* 85−543
resistive circuit with current-controlled current sources, anal. resistive circuit with current-controlled current sources, anal. *(Japanese)* 85−22614
resistive circuits, canonical piecewise-linear analysis and modelling 86−62407
resistive circuits, piecewise-linear anal., canonical form and soln. algorithms 85−22624
resistive circuits, separability of nonlinear equation *(Russian)* 86−34492
resistive circuits containing CCCSs or VCVSs, uniqueness of soln. 86−57598
resistive circuits with controlled sources, topological struct. and graph inspection, uniqueness criterion 85−488
resistive distributed networks, characteristic admittance 87−23879

nonlinear network analysis continued
resistive element command magnitudes, limited range of variation *(Rumanian)* 86−689
resistive maximum power theorem 88−49994
resistive maximum power theorem extension 86−66981
resistive network anal., relaxation method with network tearing *(Japanese)* 87−59123
resistive network anal., sufficient conditions for existence and diffeomorphism of a nonlinear vector function 87−65769
resistive network containing linear op. amps., unique soln. *(Japanese)* 85−17641
resistive networks, algorithm for fault diagnosis 87−488
resistive networks, appl. of no-gain prop. 88−70488
resistive networks, piecewise-linear type, homeomorphism of matrix eqns. 88−31970
resistive networks, single-fault diagnosis 87−23882
resistive piecewise linear networks, DC anal. using Gauss-Seidel method 87−44512
resistive two ports, infinite cascades, driving-point immittances 85−6416
resistor network, disorder-induced nonlinear conductivity 88−12173
resistor networks, resistance noise 87−31676
resistor networks, self-similar, anomalies in multifractal anal. 88−543
resistor-diode network input resistance calc. 85−6128
resistors *(Spanish)* 86−62852
resonant and PWM switches, equivalent cct. models 87−65784
resonant circuits at subharmonic freqs., chaotic behaviour 88−32045
resonant DC/DC power convertors, zero-voltage switching, energy conversion boundary calc. 87−73326
resonant medium, echo signals generation 88−38372
resonant radioelectronics circuits, modelling, formal representation of anal. 87−31673
resonant zero-voltage-switching DC/DC power convertor, state-plane analysis 87−73324
response to forced excitations, waveform modulation model 87−31680
RLC, second degree nonautonomous, steady-state uniqueness 86−66988
RLC networks, dynamic nondegeneracy 87−495
RLC networks, elec. resistor noise, thermodynamics 85−54623
RLC nonlinear networks with time depend. sources, alternate conditions for uniqueness of steady state 86−690
S-parameters and device measurements and characterisation 87−65786
S/N ratio of power-law amplifiers by using harmonic output components 88−25035
saturable core resonant cct. nonlinear oscillations *(Japanese)* 85−33618
SCRs and diodes with air core reactors, parallel connection, coupling theory *(Spanish)* 85−28330
second-order oscillators with single op-amp, Loeb's criterion and latch-up effect 88−18969
self oscillations in networks containing nonlinear elements with relay-type hysteresis charact. *(Russian)* 88−38370
self-excited oscillators, Volterra integral analysis 87−44665
self-excited oscillators with low-Q oscillator systems 86−27129
self-excited ring oscillator, chaotic transition, additive period increase 87−59237
self-excited systems, role of asymmetry in strange attractor formation 87−31675
self-oscillators under random perturbations, limit cycle transitions 87−59227
self-sustained oscills. in circuit containing thyristor *(Russian)* 87−5647
self-testing analogue fault diagnosis algorithm, computer generation of topological eqns. and pseudocircuits 87−10578
semi-state systems, partial exponential stability 87−5644
semiconductor diode mixers, model linearization, parametric approach 86−8063
semiconductor lasers, multimode analysis using large signal nonlinear equivalent cct. model 88−65705
semiconductor microwave electronics, nonlinear problems modelling 87−66534
semistate systems, generic stability and boundedness 88−56416
sensitivity of energy parameters eval. to period variation of input signal source 87−31674
sensitivity of multipole ARC circuits with nonlinear delayless components 87−52317
series−resonance circuit, random oscillations 86−8042
series resonant circuit with iron core of highly saturable characts., nonlinear oscillations 86−67069
series resonant convertor, anal. and design by state-plane diagram 87−31697
series-resonant invertor anal. of transient and steady-state processes 88−37296
simulation type CR oscillator using D-R mutator *(Japanese)* 88−70586
simultaneous nonlinear algebraic equations, numerical analysis 88−49990
sine wave oscillator, nonlinear analysis 87−52446
sine wave oscillator cct. with stiff element, transient and steady state anal. *(Japanese)* 86−67079
single iteration approach to backward differentiationformulas 86−13955
single loop feedback systems, chaotic motion 87−52322
single-loop nonlinear resonant circuits with internal feedback, self-modulation *(Russian)* 87−36947
singular perturbation applied to the relaxation oscillations of the Van der Pol oscillator 88−6688
singularities, two conjectures concerning nonlinear circuit problems *(Japanese)* 88−56420
singularly perturbed nonlinear circuits with very large and very smallparameters 86−66989
sinusoidal oscillators, analysis and synthesis 87−59235
sinusoidally-driven nonlinear circuit, chaotic behaviour model 88−24946
slowly varying oscillators, analysis by perturbation technique 86−57717
small geometry MOS analogue ICs, harmonic distortion prediction 87−38534
small-amplitude periodic solutions of the quadratic Lienard equation 85−44923
solid-state diode rectifier cct., semistate eqns., continuation method 85−49710
soliton equations finding by singularity anal. for nonlinear communication systems design 86−64482
solitons in nonlinear electric networks *(Slovak)* 85−39890
SOS MESFET, large-signal model for nonlinear cct. anal. 87−6747
spectral method, nonlinear circuits with multiple frequency input signals, anal. 87−65771
stability verification of periodic oscills. in nonlinear systems 88−24942

nonlinear network analysis continued
stable quasi-sinusoidal oscill. in electronic oscillators 86−8038
state determination analysis of transistor networks by modified nodal equation *(Japanese)* 87−65773
state eqns., optimal linearisation 87−52312
state equations of nonlinear networks andthe uniqueness of their solutions 86−40872
static ferromagnetic frequency tripler, three-phase nonlinear circuit analysis 87−43279
static power convertors, output waveform distortion of parametric excitation circuit *(Japanese)* 85−60307
stationary mode anal. method 86−46518
steady-state anal. using modified Newton method 86−20237
steady-state analysis of nonlinear oscillatory circuitsby iterative decomposition method *(Japanese)* 86−7919
steady-state phenomena using piecewise linear approx. *(Russian)* 88−38368
steady-state response computing of analogue and microwave ccts. 88−70483
steady-state response of nonlinear circuits/systems, time-varying freq. inputs *(Japanese)* 85−542
structural controllability for the electrical-mechanical network *(Japanese)* 85−6132
subharmonic oscillations in three-phase circuitsf 86−8041
subharmonic phase-lock criteria for a class of weaklynon-linear high-order oscillators 86−8037
substitution algorithm for solving nonlinear circuits with multi-frequency components 88−6633
superdiode, composite op-amps appl. 86−793
superlinearly convergent algorithm for nonlinear l_1 optimisation 86−57600
switched capacitor filters, nonlinear effects anal. using multidimensional z transforms 87−886
switched capacitor integrator, nonlinear switch resist. effect on nonlinear distortions 87−500
switching mechanism of multivalued nonlinear devices 87−60408
switching-regulator DC-DC power converter with wideband feedback control, subharmonics and chaos, anal. 88−70507
symbolic anal., dynamic parameter optimisation *(Russian)* 88−56417
synchronised oscillators, N-nodal network, phase and frequency transfer analysis 85−22696
synchronized oscillator as a twopole with controlled parameters 85−6207
synchronous oscillator props. 86−40873
system projectors appl. 87−494
TALISMAN: a piecewise linear simulator based on tree/link repartitioning 88−24898
thermally stabilised and bolometric systems, nonlinear resonance 87−65909
third-order reciprocal cct., with three-segment piecewise-linear resistor, chaotic attractor 85−10951
three-dimensional nonlinear stabilized oscillator, solns. 87−10717
three-electrode devices, nonlinear negatron model 88−18973
three-phase nonlinear asymmetrical cct. with nonsinusoidal voltage source, current orthogonal decomposition 88−61892
three-phase oscillator, symmetrically stabilised, anal. and appls. 87−59226
time behavior simulation, JANAP program *(German)* 85−28314
time varying frequency inputs, steady-state response computation 86−66976
time-domain simulation of nonlinear networks with distributed lossy transmission lines 86−48627
time-invariant cct., stability study 87−23881
time-invariant networks, global state equation existence criteria 87−476
time-invariant networks, Volterra series convergence 85−540
time-invariant nonlinear networks, global state equation existence criteria *(Japanese)* 85−39893
time-varying nonlinear circuit theory 88−38364
topological analysis in Poincare plane *(German)* 86−7920
topological determination of the number of solutions of piecewise linear resistive circuits *(French)* 88−12174
transconductance-capacitance integrator, independ. tuning of Q-factor and unity-gain freq. 87−5952
transfer fn. determ. for intermodulation characts. prediction 87−5646
transfer-type automated manufacturing system, single-stage two-machine model, Markov chain *(Japanese)* 85−39954
transformer three-phase circuits, back-connected, anal. using tableau form 87−4760
transient amplitude-phase conversion in electronic systems 86−27521
transient analysis of nonlinear networks *(German)* 88−31967
transient behaviour analysis, appl. of small parameter asymptote *(Russian)* 85−4608
transient comparison of two models for an oscillator with an amplitude control system 88−6686
transient processes analysis using 'diakoptics' approach, difference equations appl. *(Slovak)* 85−61031
transient state, numerical analysis using computer program *(Slovak)* 86−26984
transients anal., numerical method *(Russian)* 85−17112
transients calc. by power series method, programmable microcalculator appl. 86−20173
transients in electrical circuits with nonlinear eddy-current skin effect, numerical calc. 88−14349
transistor circuits, topological proof of Nielsen-Willson theorem 86−46515
transistor oscillator with delayed feedback, synchronous and stochastic oscillations 87−65920
transmission-line modelling of nonlinear reactive components and mutual inductances 88−70490
turn-off snubber for power electronic switches, anal. and appls. 86−67012
two-diode Gunn oscillator, anal. using quasi-linear approximators 86−27633
two-level Newton methods for anal. of large-scale nonlinear networks 87−485
two-phase coupled free-running oscillator, stationary signal anal. *(Russian)* 85−636
two-port microwave active devices, closed-form harmonic formulation 88−44354
two-port networks, two-tone third-order intermodulation distortion, anal. 88−38367
two-ports, accuracy considerations in approximate representation 87−487
two-transistor no-resistor cct. cannot exhibit negative differential resist. 87−65780
TWT, space charge in nonstationary nonlinear theory 88−1327
type II intermittency in coupled nonlinear oscillator 87−65912
unending cascades of nonlinear resistive two-ports 85−22616
unijunction transistor second order cct., chaos and bifurcation *(Chinese)* 86−66975
uniqueness of steady state for small source amplitudes 85−22613

nonlinear network analysis continued
unsolved engineering problems 85−22615
upper-sideband varactor up-convertor, transfer props., large signal anal. 85−17842
van der Pol and chaos, driven relaxation oscillator cct. 86−67084
Van der Pol eqn. with moderate values of damping coeff., periodic solns. 87−73017
Van der Pol equation interconnected with tuned circuit, jump behaviour analysis 86−20238
van der Pol oscillators in square array, anal. using averaged potential 86−8040
varactor up-convertors, study of output power as fn. of load/source impedance 87−45220
varactors tuning ccts., nonlinear distortion performance, approx. calc. method 87−478
very-low-frequency block-digital oscillator 85−54718
VLSI circuits, hierarchical simulation, relax. methods, stability and convergence props. 85−17244
voltage regulators, transient analysis of nonlinear networks. 2 *(German)* 88−50010
voltage-controlled nonlinear resistor and parametric coil circuit self-excitation 88−31964
Volterra functional series, modified method 88−44029
Volterra series for harmonic inputs, convergence condition 85−17117
Volterra series representation 86−57596
Volterra systems with continuous spectrum signal and noise, freq. domain anal. 85−17118
Volterra-like circuit equations, N-soliton solutions, decoupling 88−49992
Volterra-Picard series for nonlinear cct. anal., synthesis and identification *(Russian)* 85−10947
Volterra-type ladder circuit, 2-soliton signal, analytical separation 88−542
wave evolution and modulation in distributed systems 87−490
waveform bounds of nonlinear R C trees 85−22619
weakly damped systems, steady-state process calculation 88−31973
weakly non-linear oscillator circuits and averaging: a general approach 87−59230
Wien bridge oscillator using composite amplifiers, anal. and HF design 87−44653
Wien bridge oscillator using operational amplifiers, theoretical cct. anal. 88−38410
X-band injection-locked Gunn amplifier, performance in presence of CW interfering tone 88−7045
GaAs FET nonlinear models based broadband frequency doubler design 88−12548
GaAs MESFET, AC large-signal model for nonlinear network anal./design 88−25485
GaAs MESFET amplifiers and mixers, nonlinear anal. using harmonic balance technique 87−45235
GaAs MESFET equiv. cct. modelling techniques for nonlinear CAD and anal. appls. 88−32432
GaAs MESFET large-signal circuit model for nonlinear analysis 88−71123
GaAs MESFET load-pull characts. calc. using physics-based large-signal device model 88−71124
GaAs MESFET microwave amplifiers, nonlinear operation, anal. methods for harmonic output 88−56984
GaAs MESFET power amplifier output cct. anal./design using NFET computer program 86−28338
GaAs MMIC varactor tuned FET oscillators, X- and Ku-band, modelling and optimised design 88−71070
GaAs MMICs, nonlinear modelling for cct. simulation and CAD, review 87−59892
GaAs nonlinear power FET amplifiers, optimum design 87−73716
GaAs single-gate MESFET, freq. doubler for X-band operation, anal. and design 86−62835

nonlinear network synthesis
4-port resistive reflectors, for synthesis of nonlinear circuit elements *(Czech)* 85−39889
active-R nonlinear negative resist. oscillators 86−46608
active-R oscillators, synthesis and freq. sensitivity minimisation 88−18962
AF active emphasis and de-emphasis network analysis and design 88−70892
broadband matching circuits, Youla coefficient constraints 88−24947
CAD design procedures for nonlinear radio circuits 87−10588
CAD of nonlinear analog devices, structural methods, review 87−10590
capacitive impedance coupling ccts., anal. and CAD synthesis procedure 86−648
capacitor and controlled switch nonlinear reactive elements 87−64683
circuit reflector synthesis *(Japanese)* 88−38620
CMOS gate oscillators using fundamental/overtone crysts., 1-50 MHz, design techniques 88−18990
conference on cct. theory and electronic networks, Poznan, Poland (Oct. 1985) *(Polish)* 86−45942
convertor-type gyrator realisation 86−41212
current-conveyor sine-wave oscillators 88−25044
DC chopper, switch-parallel current commutation scheme with min. energy loss 88−19004
design algorithm incorporating component parameter tolerances 86−62397
design method 87−17389
digital filters, theory and realisation 85−17707
distributed magnetic networks, computer synthesis *(Russian)* 88−38346
dynamic cct., voltage noise 88−63484
equivalent cct. derivation method *(Russian)* 85−22612
FET frequency doubler design using harmonic balance algorithm 87−6142
FET nonlinear power amplifiers, optimum design technique 88−25469
FIR optimal low-pass nonlinear phase digital filter, design algorithm 85−40192
fluorescent lamp ccts., nonlinear theory for anal. and synthesis 88−18906
frequency dividing networks−modeling, analysis and network-synthesis 85−23083
frequency multipliers, design concepts 87−59812
frequency multipliers, design method using synthesised nonlinear reactive components *(Russian)* 88−56822
frequency synthesizers, wideband second-order PLL type, anal. and design consideration 88−56496
frequency tripler, transistor-based cct. design and anal. *(German)* 87−66456
frequency-dividing networks, props. 86−58024
function generator low-order polynomial curve fitting using switched-capacitor circuits 85−17126

nonlinear network synthesis continued
functional Volterra-Picard polynomials, nonlinear distortion compensation *(Russian)* 88−38365
gyrator synthesis using second-generation current conveyor with variable current transfer ratio 86−62692
HF hybrid IC, design problems *(Hungarian)* 88−64135
identification and synthesis, space controlled functional generators appl. 85−10952
IMPATT diodes in millimeter-band devices, nonlinear props. appl., survey 85−23136
integral equations appl. *(Russian)* 88−38359
interactive design and fault location tool 86−40874
iterative solution of a set of nonlinear algebraic equations for general purpose CAD programs 87−52321
low phase noise oscillator design 86−62486
magnetic amplifier controlled power supply design optimisation *(Chinese)* 86−40870
median filter systems, synthesis and VLSI implementation 87−45088
MESFET nonlinear oscillator synthesis for optimum output power operation 88−44379
microcomputer modeling of linear and nonlinear circuits 85−526
microstrip computer-aided design in Europe, review 87−17304
microwave CAD/anal. techniques, state-of-the-art and trends survey 88−32407
microwave cct. CAD, vectorised program architectures for supercomputer-aided design 86−40828
microwave ccts., CAD using harmonic balance method 88−12581
microwave ccts., mathematical formulation for harmonic optimisation in two-port nonlinear active devices 88−56979
microwave ccts., optimisation by harmonic balance technique, CAD package 86−14541
microwave circuits, user-oriented software package for anal. and optimisation 87−10581
microwave Colpitts oscillator design, IBM PC program 88−999
microwave devices and ccts., colloquium, London, UK (March 1988) 88−43608
microwave FET nonlinear ccts., CAD analytical method *(Chinese)* 86−14491
microwave freq. doublers, large-signal anal. and optimisation, novel approach 88−71134
microwave MESFET nonlinear cct. design using optimising harmonic balance method 88−44376
microwave oscillator design, generalised two-port method 88−25468
microwave Schottky-diode mixers, nonlinear modelling and design 88−71132
microwave type, nonlinear cct. anal./design using modified harmonic balance algorithm 87−16838
MM-wave monolithic balanced diode mixer, design and anal. using computer-aided technique 88−44381
modelling of nonlinearities by graphical-analytical method, using operational amplifiers *(Czech)* 86−20234
MOS universal cct., nonlinear state-space eqns. 87−65781
multilinear operator method 86−13957
multiport regionalisers, design technique 85−54627
N-port network, admittance matrix simulation and sensitivity anal. 85−22625
n-port network synthesis/anal., sectionwise piecewise polynomial functions 85−6129
noise generator, circuits for converting an LC oscillator 88−38415
non-saturated multivibrator, design and config. for operation with LV power supply 88−18971
noninertial electronic ccts. DC characts. optimisation *(Polish)* 86−13949
nonlinear oscillators representing rhythmic processes 85−22705
nonlinear switched-capacitor networks: basic principles and piecewise-linear design 85−45154
one-port resistors, piecewise polynomial, synthesis, basic cct. structs. 85−54622
oscillator circuit, synthesis employing only one unity-gain amplifier 86−20342
oscillators, sinusoidal, amplitude impulse stabilisation synthesis 85−49707
PAKTOR-IA analogue electronic circuit CAD program 87−44466
piecewise linear anharmonic LRC circuit, soft and hard spring nonlinear reson. 85−44423
piecewise linear digital filter, optimisation of ε-filter *(Japanese)* 88−38636
piecewise linear resistive multi-port networks synthesis *(Czech)* 88−70495
piecewise linear resistive one-port synthesis *(Czech)* 88−24941
piecewise-linear n-port network synthesis 85−22622
piezoelectric ceramic-resonator oscillators, designed and anal. 88−18985
PLL, hybrid analogue/switched-capacitor type, anal., design 86−67112
PLL design aspects *(German)* 88−616
PLLs, dimensional design techniques *(German)* 87−59259
polyharmonic- and impulse-signal-splitting in nonlin. system synthesis *(Russian)* 88−31966
quadratic N-port systems, synthesis method 87−482
quasisinusoidal oscillators with cubic-type nonlinearity, synthesis 87−23973
R-2R resistive network synthesis, errors due to nonlinearities minimisation *(Czech)* 86−20713
RC oscillators with single nonlinear active element, design procedure 87−547
reactive elements, synthesis and appls. 88−549
reactive multiterminal networks with nonsimultaneous switching of inputs, synthesis 87−44516
relaxation quartz oscillators with crystal in feedback loop, anal. and design 87−73358
relaxational self-oscillators and nonlinear one-ports, synthesis 87−23883
resistive networks, existence and uniqueness of DC solutions 86−66982
SC resistors, nonlinear driving point and transfer charact. plot synthesis 86−7917
second-order oscillators with single op-amp, Loeb's criterion and latch-up effect 88−18969
sine wave oscillator with good sensitivity, RC op-amp design 87−10726
single op-amp ccts., design, cook-book approach 85−54626
single-gate MESFET, freq. doubler for X-band operation, anal. and design 86−62835
sixty years of nonlinear techniques *(Dutch)* 86−33907
statistical design of functional blocks withhysteresis 87−484
stochastic controllable circuits with feedback, synthesis *(Russian)* 87−36945
subnanosecond pulse shaper using theory of solitons *(Slovak)* 87−52468
nonlinear network synthesis continued
switched capacitor generalised integrator, design for MOSIC implementation 85−28631
switched capacitor generalized integrators, design and nonlinear network synthesis appls. 86−1227
switched-mode uncertain regulators, quantitative feedback synthesis 85−557
thermistor networks for temperature compensation of crystal oscillators, CAD using nonlinear programming *(Polish)* 86−57590
thyristor invertor bridge cct. design for high-power appls. *(Spanish)* 87−52353
time-variant networks synthesis *(German)* 86−13952
torus knot oscillator design 86−819
torus knot oscillators, Van der Pol realisation 88−32041
transformation multiports and M, N matrix description use 88−49996
triangle-to-sine converter design using Gauss-Newton optimisation 87−52780
tunable solid state microwave oscillators 88−71034
unsolved engineering problems 85−22615
Volterra digital filtering *(Slovak)* 87−69101
Volterra filters, design method based on unconstrained nonlinear optimisation 87−47813
Volterra nonlinear time-invariant digital filters of second order, semisystolic realisation *(Slovak)* 88−19263
Volterra-Picard series for nonlinear cct. anal., synthesis and identification *(Russian)* 85−10947
wideband PLL systems 86−40978
Wien bridge oscillator using composite amplifiers, anal. and HF design 87−44653
Wien-bridge type op-amp oscillator cct. synthesis, equiv. cct. transformations *(Japanese)* 85−49776
Wiener digital filters, nonlinear, synthesis for one class of signals and noise 87−24342
GaAs FET nonlinear models based broadband frequency doubler design 88−12548
GaAs MESFET, AC large-signal model for nonlinear network anal./design 88−25485
GaAs MESFET equiv. cct. modelling techniques for nonlinear CAD and anal. appls. 88−32432
GaAs MESFET oscillators, nonlinear design and optimisation procedure 87−73788
GaAs MESFET power amplifiers, single-freq. and broadband types, nonlinear design procedures 88−32438
GaAs MMIC nonlinear modelling and CAD 87−73710

nonlinear optical phase conjugation *see optical phase conjugation*

nonlinear optical susceptibility
azo dye Langmuir-Blodgett, multilayers, linear electro-optic props., nonlinear susceptibility, ATR obs. of plasmons 88−72428
biaxial crystals with quadratic susceptibility, phase matching directions in optical mixing 85−41501
bistable systems, holding-field noise effects on optical switching 87−33326
conducting polymer, 1D semiconductor, nonlinear optical susceptibilities 88−72422
continuously tunable sum-frequency generation involving Rydberg states in EUV region 85−7515
2-cyclooctylamino-5-nitropyridine nonlinear optical crystal 88−58683
fibre, birefr. single-mode, sequence-freq. three-wave mixing emissions 86−22515
fibre lightguide, parametric interaction of optical modes, sum freq. generation 88−20750
fibres frequency-doubling processes, anal. using Raman spectroscopy 87−74733
frequency doubling of 1.319 μm radiation in optical fibre by optically written grating 88−33610
fuchsin, meas. using third order harmonic generation of mode-locked Nd-glass laser 85−19019
GaAs laser, production of short pulses by external laser excitation 85−7459
gases, short wavelength limitations of four wave mixing 88−14267
giant dipole molecules, two-photon reson. nonlinear susceptibility 88−2189
glass, femtosecond nonlinearities using opt. Kerr effect 87−26546
glass, semiconductor-doped, high-speed intensity-dependent refractive index 87−18573
guided wave theory 87−46991
integrated optics, nonlinear optics depending on third order susceptibility 86−9972
intensity-dependent guided wave phenomena 87−12582
liquids, third order electronic susceptibilities, meas. by optical Kerr effect femtosecond kinetics 85−41459
merocyanine dye Langmuir-Blodgett films, optical third-harmonic generation 87−12557
meta-nitroaniline for molecular optoelectronics, prediction of second order susceptibility 87−61231
methylene blue, meas. using third order harmonic generation of mode-locked Nd-glass laser 85−19019
molecular crystals, opto-electronic props., macroscopic and microscopic response 86−48485
molecular crystals, opto-electronic props., mol. response, environmental effects 86−48486
molecular crystals, optoelectronic response theory 88−58659
molecular optoelectronics theory, effect of molecular elongation 87−26516

single-phase induction motor design, optimisation techniques 88−69361
single-phase induction motor efficiency optimisation model 87−72149
solar cell parameter initialisation and extraction by nonlinear least-squares minimisation 86−56943
spare units availability estimation using nonlinear integer programming and multiple gradient algorithm 87−72768
spread-spectrum systems with output quantisation worst-case anal. of interference 88−35368
squirrel cage motor, design optimisation for irrigation pump 87−43719
steam turbine power stations, optimal distribution of electric and thermal charges 86−56624
stochastic fractional programming under chance constraints with random technology matrix 88−38091
strict converse duality theorems 86−40635
structural optimization, efficient method *(Chinese)* 87−65368
superbasic sets on nonlinear replicated networks, performance evaluation 86−26723
superconducting coil, homogeneous, volume minimisation for optimal design using nonlinear programming *(Korean)* 85−50886
surface charge simulation for electrode and insulator contour design by nonlinear programming 88−52055
surrogate constraints algorithm *(Japanese)* 85−16877
surrogate constraints algorithm appl. to optimal reliability designs 86−40579
surrogate constraints algorithm for reliability optimization problems with multiple constraints 85−39585
target poles extraction 85−47558
test problem generation for nonlin. programming algorithms 86−62125
test problem generator for large-scaleunconstrained optimization 86−13655
thermistor networks for temperature compensation of crystal oscillators, CAD using nonlinear programming *(Polish)* 86−57590
thermoelectric power station, model and algorithm for optimised management *(Bulgarian)* 85−15835
three-phase induction motors, CAD and computer-aided anal. *(Chinese)* 85−60188
transmission network optimal extension planning, two-step algorithm *(Chinese)* 87−78047
transmission system expansion, network flow and DC load flow models, comparison 88−36809
tunneling algorithm for the global minimization of functions 85−33303
two-stage feasible directions algorithm for nonlinear constrained optimization 87−10280
updating conjugate directions by the BFGS formula 87−72999
vector optimisation problems *(German)* 85−54316
vector quantiser design, global convergence and empirical consistency of thegeneralized Lloyd algorithm 86−59179
voltage regulator inspection system using nonlinear programming techniques 88−50014
weak minimization and duality 87−23528
Wilson-type optimisation methods, globalisation, extension of method to general problems 86−66740
Wilson-type optimisation methods, globalisation using generalised reduced gradient methods 86−66739
wind tunnel, high performance, optimal control, math. model 87−21714
wind-electric conversion system, without storage, optimal design using nonlinear programming approach 85−32410
Al conductor-containing transformer design optimisation 87−36004

dynamic system identification, structure detection 88−27878
dynamic system with multidegree of freedom, initial conditions identification *(French)* 86−52604
dynamic systems parameters meas., Kalman filter algorithm 87−61855
dynamic systems with periodic excitation, steady-state anal. based on linearisation in harmonic space 86−66659
electric drives, nonlinear, optimum speed control *(Russian)* 87−31009
electric machine estimation and control theory development trends 87−58028
electromechanical, fault diagnosis by continuous time parameter estimation 86−24302
EM susceptibility prediction, time domain method 88−8505
estimation, rate distortion lower bound for nonlinear problems 86−54518
fast smoothing algorithm for linear and nonlinear systems *(French)* 88−21231
fault diagnosis, graphical approach to detectability and distinguishability, diagnosis algorithm 86−62395
fault diagnosis using Volterra series 86−66992
filtering, lower limit of covariance of estimation errors, calc. algorithm 87−13009
finite dimensional nonlinear filter for exact nonlinear estimation 86−54517
Hopf bifurcations postponement by multiplicative colored noise 87−65768
hysteretic characts., self-exciting oscill. anal. *(Japanese)* 87−73255
identification by recognition methods 86−3962
importance sampling in analysis of detection systems 88−34723
induction motor, voltage controlled, black-box modelling in control system design 88−17601
induction motor state linearisation via nonlinear state feedback 88−43198
inertialess systems, fluctuation-dissipation models of nonequilibrium electrical noise 87−65766
initial conditions calc. using diff. eqns., linear and nonlinear systems 88−31914
input/output maps, functional expansions, global existence criteria 86−13951
integral manifold as a tool for reduced-order modelingof nonlinear systems: A case study 86−66990
invariant tori bifurcation points determination 87−44244
local second-order observers for component failure detection 88−31571
lossless and discrete-time bounded-real lemmas; proof 87−73267
lumped parameter systems, resonant excitations 87−10637
Lurie systems with multiple nonlinearities, robustness anal. 87−64331
Lyapunov functions for piecewise-linear systems, construction methods *(Japanese)* 88−49993
macroscopic EM field in nonlinear or time-variant media, energy and momentum theorems 87−12664
measurement theory, maximum likelihood estimator for linear and nonlinear systems 88−60518
microwave SSB-AM system, predistortion nonlinear compensator 85−20030
nonautonomous networks and systems, periodic solns., computer-aided anal. *(German)* 87−16841
nonautonomous piecewise linear systems with unsymmetrical restoring force, 4/6 harmonics *(Japanese)* 87−73257
nondeterministic fluctuation problems of nonlinear systems, fixed point theorems and their appls. 86−57599
nonlinear discrete time systems stability 85−51666
nonlinear observability and mixed-coordinate bearing-onlysignal processing 85−51669
nonlinear time series models, computer investigation 86−18766
nonlocal input-output expansions 85−36150
nonstationary signals on block processing, unbiased parameter estimation 88−73037
Numerov's method for nonlinear two-point boundary valueproblems 86−360
operators with fading memory, approx. with Volterra series 86−20236
optical fiber preform collapse process, identification 87−53998
optimal linearization of non-linear state equations 87−52312
optimal measuring sites for fault detection 86−18900
optimal nonlinear filtering with constraints 85−19466
oscillations, decomposition method 87−73008
oscillators, iterated maps, symbolic dynamics and knotted orbits 88−287
oscillatory nonlinear systems, envelope and instantaneous phase methods for transients propag. 87−19823
output spectra of non-linear systems 87−62056
parameter estimation of nonlinear continuous systems, fractional horsepower motor diagnosis 85−39046
parameterized linear systems and linearization families for nonlinear systems 87−59119
periodic excitations, anal. by use of fast convergent method 85−22620
periodic oscills. in nonlinear systems, stability verification 88−24942
periodically forced 2-D dissipative nonlinear systems, Melnikov technique 86−66991
phase lock simulation by means of a digital computer *(Czech)* 85−11111
piecewise linear models for nonlinear dynamic systems 88−31968
power plant structural analysis, nonlinear finite-element computer code manual 85−53375
power system phase portrait 88−30244
power system transient stability anal., potential energy boundary surface method 88−61793
power systems, single- and multimachine problems, scalar Lyapunov function method 87−57493
programmable function generator for studying nonlineartwo-terminal networks 86−44329
PWM control design, geometric approach, DC-DC power convertor appl. 88−43317
quadratic approximation of nonlinear dynamicprocesses *(German)* 85−54619
quasi-periodicity and dynamical systems: An experimentalist's view 88−70486
rational Volterra models, parameter estimation, appl. to inverting amplifier *(Chinese)* 87−65774
receiver or amplifier noise factor meas. error reduction 85−20720
recursive filtering algorithms for systems with piecewise-linear nonlinearities 87−19630
reduced order modelling using integral manifold 88−48918
resonant systems with wideband random actions, statistical anal. 87−54788
reversible discrete mathematic models for dynamic systems *(Russian)* 86−46272
Runge-Kutta methods, A-stability and G-stability 85−22418
rusty bolt EMC specification based on nonlinear systemidentification 86−29475

nonlinear systems continued
self-excited oscillatory systems, comparative analysis of natural fluctuations 88−38413
semi-state systems, partial exponential stability 87−5644
semistate systems, generic stability and boundedness 88−56416
signal source location by nonlinear eigenstructure-based harmonic processing 87−56302
sliding regimes in analog signal encoding and delta modulation circuits 88−34554
sonar passive detection, nonlinear models for optimal estimation in direction-finding *(French)* 88−21265
spectrum conversion system, combination oscillations anal. 86−16346
stability anal. using machine-oriented method 87−59120
stand-alone alternator optimal state feedback controller design 88−55302
steady-state response of nonlinear circuits/systems, time-varying freq. inputs *(Japanese)* 85−542
stiff systems of ordinary differential equations, quasi-Newton methods 85−33363
stochastic dynamical systems, probability density and entropy approximation 87−73007
stochastic nonlinear systems, state and parameter estimation 88−72942
strongly nonlinear systems, equivalent small parameter method 86−57602
synchronous machine, transient state estimation by optimal observer 85−38975
target motion anal., fundamental limitations 87−7853
telephone trunk network, dynamic flow assignment problem 85−25327
thermal turbomachinery and fluidised catalytic cracking energy recovery simulation *(Chinese)* 86−61324
three-dimensional tracking via angle meas., observability requirements 85−52385
thyristor device control systems, stability analysis 87−22679
thyristor-convertor-fed DC drive, digital current controller 88−31088
time frequency filtering , linear time-variant transformation 88−73038
time series analysis, numerical solution of nonlinear system 85−33357
time varying frequency inputs, steady-state response computation 86−66976
time varying systems synthesis *(German)* 86−13952
time-frequency anal. , instantaneous mean qualities 88−73032
time-invariant system, singularly perturbed, asymptotic stability study 87−23881
time-varying discrete-time system, dynamic realizations of sufficient sequences 86−16075
transform-domain and time-domain characterization with Volterra series 85−6130
transient EM effects in systems with nonlinear components, computation 88−8504
two-time scale system nonlinear decoupling, synchronous machine modelling 85−53688
unstable equilibrium points 88−43796
Volterra filtering, second order, nonlinear system identification appl. 86−29849
Volterra series expansion of functionalsdefined on the finite dimensional vector space and itsapplication of saving of computational effort for theVolterra kernels *(Japanese)* 85−49709
Volterra systems with continuous spectrum signal and noise, freq. domain anal. 85−17118
Volterra theory for describing saturating systems 87−31735
weakly nonlinear and noise systems, performance meas., objective method 87−69495
weakly nonlinear communication system identification, pseudo-noise-loading anal. 86−29951
Wigner distribution, multi-equilibria nonlinear systems and chaotic behaviour 88−73039
Wigner-Ville spectrum use for system nonlinearities characterisation/identification 87−62026
wind generator simulation using Markov chain noise model 87−30464

nonlinearities of control systems *see control nonlinearities*

nonparametric statistics
k-nearest neighbors rule based on neighbors sequences analysis 87−55349
adaptive noise cancelling in the spectrum domain 87−27518
branch-and-bound nearest neighbour classifier 88−34766
classifier performance evaluation, bootstrap and other resampling techniques appl. 85−51727
clustering, suboptimal estimation of density functions and derivatives 85−30453
clustering using nonparametric approach 87−55343
composite pattern analysis for automatic speech recognition, book contrib. 86−29780
continuous and aging distributions, nonparametric confidence estimation of quantiles of duration of failure-free estimation 85−39578
detection scheme for strong mixing noise, anal. 86−3861
feature extraction, nonparametric algorithm 85−30452
fluctuating signal detection, nonparametric algorithm 86−16307
image processing, universal procedure, robotics appl. *(Polish)* 86−30014
information theoretical delay estimator 88−58999
linear systems, impulse response identification using nonparametric methods 87−68911
midrange estimator 88−56109
multiclass nonparametric partitioning algorithm 86−43337
MULTIEDIT algorithm sampling rate 86−43333
navigation-system estimation, suboptimal recursive algorithms 88−21173
nonlinear autoregression processes nonparametric eval., statistical props. of eval. *(Russian)* 88−11839
preventive maintenance planning, life distribution plotting positions 86−130
signal detection problems 88−14666
speaker-independent speech recognition, algorithm for combining vector quantization and stochastic modelling 87−19536
speckle images, boundary detection 86−16552
two-state system availability estimation, nonparametric sequential method 87−5303
weak radio signals processing, nonlinear methods, background of stationary nonGaussian interference 87−19715

nonradiative transitions
garnets, Cr to Nd energy transfer, thermal depend. mechanism 88−65624
laser crystals, nonradiative relaxation 87−68432
ruby laser material, nonradiative relaxation, picosecond time resolved studies 87−7305
semiconductor quantum well heterostructures, time resolved spectroscopy 85−23521

nonradiative transitions continued
solid lasers, quantum efficiency and nonradiative decay, compensation calorimetry study 85−35725
(AlGa)As-GaAs multiple quantum well heterostructs., photoluminesc. decay times 85−56426
$BaEr_2F_8$:Tm,Ho cryst., lasing props., cross relax. mechanism 85−46374
$BeAl_2O_4$: Cr^{3+}, alexandrite, laser material, nonradiative relaxation, picosecond time resolved studies 87−7305
CO_2 waveguide laser, Cohen model 87−12411
Cr^{3+}:Al_2O_3, laser crystals, nonradiative relaxation 87−68432
n-$Ga_{1-x}Al_xAs$ electron-beam-pumped lasers, threshold characts., deep impurity level influence 85−12882
GaAs quantum wells, hot carrier relax. and recomb. meas. by picosec. photolum. 85−18157
GaAs, semi-insulating, photoluminesc., correl. with defect density 86−21129
GaAs:Be, heavily doped MBE layers, nonradiative centres, cathodoluminesc. and electron acoustic studies 87−65483
GaAs:In semi-insulating dislocation-free LEC crystals, photoluminesc. 86−57424
GaAs:Si light diode struct., quantum efficiency, dislocation effects *(Russian)* 85−12740
GaAs/$Al_xGa_{1-x}As$ MBE multiple quantum well structure, room temp. photoluminesc. timers 85−24390
GaAs/AlGaAs junction lasers, GaAs/AlAs waveguides, effect on lasing current threshold 88−58548
GaAs/Si wafers, warpage reduction by selective MBE growth through Si shadow mask 88−63291
GaAs-(AlGa)As quantum well heterostruct., nonradiative interface recombination 86−1791
GaAs-$Al_{0.3}Ga_{0.7}As$ DH lasers, recombination props., lasing delay meas. *(Chinese)* 88−45407
GaAs-AlGaAs single quantum wells with different confinement structs., hot carrier trapping 88−32891
GaAs-$Ga_{1-x}Al_xAs$ quantum well exciton photoluminescence lifetime elec. field induced decrease 85−23504
GaAs-GaAlAs multiple quantum well lasers, spontaneous recombination rate 87−54294
GaAs-GaAlAs, nonradiative recombination, time resolved study 88−45425
GaAs-GaAs:Cr(Te), VPE grown, photoluminescence study, effect of substrate doping 87−12309
GaAsP, electron-hole plasma kinetics under picosecond laser pulse excitation 85−29703
GaP, LPE and VPE layers, radiative recombination of free excitons, influence of vapour press. 86−36318
GaSb/Al-Sb multiple quantum well lasers, Auger recombination effects 86−54163
HgZnTe, material properties for IR detection 88−32782
InGaAsP BH lasers, radiative, Auger and nonradiative currents 87−33146
InGaAsP etched mesa BH lasers, 1.3 μm, threshold current, active layer placement effects 85−2286
InGaAsP layer, photoluminesc. efficiency, InP buffer layer effect 85−35610
InGaAsP-InP DH emitting at λ=1-1.5 μ, radiative and nonradiative recomb. processes 85−12878
InGaAsP-InP DH structs., radiative efficiency charactn. by photoluminesc. intensity anal. 86−28976
InP, Ar ion beam etching characts. and damage prod. 85−18248
InP, hydride VPE grown, stacking faults and hillocks, recombination activity, EBIC and cathodoluminesc. studies 86−67669
LiF cryst. with F_2 centers, bleaching effect, absorpt. and luminesc. study 85−56808
$MgAl_2O_4$:Ni^{2+} for IR tunable laser appls., non-radiative decay 88−45384
Nd^{3+}:$Gd_3Ga_5O_{12}$ lasers, fluorescence lifetime, conc. dependence 85−18897
a-Si:H, carrier recomb., slow radiative processes, time-resolved photolum. studies 88−1404
a-Si:H, charge transport and relax., luminesc. long-time tail distribs. anal. 87−17734
a-Si:H, nonradiative carrier recomb., ESR and photocond. studies 88−1405
a-Si:H, photolum. and photoconductivity studies 87−18825
ZnS:SmF_3(TbF_3)(TmF_3), electroluminescent thin films, multicolouring 85−41252

NOR circuits
bipolar impulse cct. using standard device process, NOR and NAND fns. implementation 87−5757
cascadable picosecond all-optical NOR gates through IF doubling *(French)* 88−58284
clock adjustment cct. for Z80A using 74LS74 and 74LS257 ICs 86−52922
CMOS NOR decoder, low power design for automatically powering down unselected decoders 85−33782
CMOS two-input NOR cct. and fabrication process 85−22813
DCFL NOR gate LSI fabrication using GaAs JFET technology 86−34739
DECMOS−a low power family of three-valued logic circuits for VLSI implementation 85−17330
entered map factoring design method 88−677
Josephson NOR decoder circuit for Josephson memory arrays 85−696
low power FET DTL NOR 87−5770
low-voltage inverter logic tri-state operation, cct. config. 85−54810
MOS ternary logic family with low-power dissipation 85−17332
multilevel feed-forward NOR networks, synthesis *(Japanese)* 87−44783
self-loaded ring oscillator 85−28466
GaAs NOR gate IC, model 10G000 from PicoLogic family 85−11121
GaAs NOR gate array, 4-input, ECL compatible using depletion-mode MESFET technology 87−692
GaAs gate array designs using capacitor diode FET logic approach 87−693

NOR gates *see logic gates*

norators *see active networks*

notch filters
121.25 MHz pay cable traps for TV signals, desired specifications 87−13947
absorptive notch filter 88−63777
active filters, CAD, BASIC program listings 86−52621
adaptive line enhancement using adaptive observer and notch filter *(Korean)* 88−34715
adaptive line enhancer using lattice notch filters *(Korean)* 88−44295
adaptive notch filter, minimal parameter, with constrained poles and zeros, performance anal. 87−27523
adaptive notch filter state-space anal. 86−34940

notch filters continued
adaptive notch filter with constrained poles and zeros 86−14403
adaptive notch filtering for the retrieval of sinusoids in noise 85−957
adaptive notch filtering in the presence of colored noise 88−66570
adaptive notch filters, evolutionary spectrum anal. for narrowband signals 87−62130
adaptive notch with constrained poles and zeros, performance anal. 88−59143
adjustable bandwidth type, anal. and op-amp cct. design *(German)* 87−10965
adjustable notch filter for acoustic feedback reduction *(German)* 87−66303
algorithm for adaptive multifrequency receiver 87−39765
amplifier and power supply for Auto-Notch filter 86−67051
attitude control systems performance, structural modes effects reduction 85−55032
audio filter, design 85−22992
audio notch filter, cct. 86−8356
audio sampling frequency conversion using digital signal processors 87−20773
cascaded adaptive notch filtering, Cramer-Rao lower bound 87−52741
Datong radiofrequency audio filters 88−56729
dielectric waveguide components 88−38684
digital biquadratic peaking or notch filter design for digital audio equalisation 86−57970
digital filter for eye-movement signals 88−61362
digital notch filters, structs. and sensitivity anal. 85−951
digitally-controlled all-pass and notch filters, design 85−28651
double-notch filter simplifies distortion analysis 87−31990
double-notch filters for distortion anal. appls. 87−24311
ECG notch filter, real time microprocessor-based 88−68417
fast least squares adaptive notch filtering 88−72993
FIR linear phase digital filters with variable characts., design 88−50268
FIR variable linear phase digital filters 88−66541
high speed varactor tuned notch filter for ECM interference suppression 86−8445
high-Q narrowband/notch digital filter 86−62729
holographic notch filters and filter stacks development for specific spectral transmission 87−68661
linear narrow-band filter of 2nd order *(Czech)* 86−41199
linear prediction digital filters, zeros and poles 87−47808
low dispersion notch filter for multi-GHz frequenciesusing fiber optics delays 86−27433
low- and high-pass types, active compensation using op-amp integrator loop 86−1256
low-pass filter using biquadratic active RC struct. 86−27463
narrowband notch filter, switched-capacitor N-path filter based, unwanted stopbands elimination 85−17666
noise optimization of switched-capacitor biquads 87−52721
PB signals using extreme values and adaptive notch filters *(Japanese)* 86−10396
power system filter design to reduce harmonic distortion in industrial plants 87−64069
RC active notch filters, null depth prediction 86−57967
RC active notch filters, single grounded-resistor-controlled variable frequency, design 87−856
RC active third-order notch filter sections, design and sensitivity anal. 85−17657
RML algorithm for retrieval of sinusoids with cascaded notch filters 88−73090
SAW broad-passband notch filters, design and appls. 88−26640
SAW notch filter employing IDT's as generalised circuit elements 87−53873
SAW notch filters 88−51126
second-/third-order high- and low-pass notch filters using RC active cct. 85−40174
second-order constrained IIR adaptive notch filter, tracking characts. 88−46120
sinusoidal signals retrieval by adaptive notch filtering 86−64308
state-variable digital biquad filter 85−17703
superconducting notch filters for the Fermilab antiproton source 85−26659
switched capacitor adaptive notch filter for interference suppression 86−67333
switched capacitor biquads, noise optimisation procedure for second order filters, CAD appl. 87−24325
switched-capacitor filters, high-Q type, tracking technique for noise elimination 85−938
thin film RC notch network, dielectric loss effects *(Spanish)* 87−73524
tunable audio notch filter circuit 85−17632
tunable digital notch filters effectiveness in moving target indication system 86−47006
TV reception, sporadic-E interference rejection using notch filters 85−63822
uniformly distributed RC (URC) notch network 86−1209
voltage tuned filter system for a 900 MHz band radiotelephone receiver 87−40777
wave digital biquad, universal, limit-cycle-free under zero-const.-input conditions 85−17723

notch sensitivity *see notch strength*

notch strength
see also fracture toughness
metal bolts in reactor coolant systems, ultrasonic detection of stress-corrosion cracks 88−24837

notch testing
see also fracture toughness testing
autoclave for cyclic crack resistance tests of compact samples 85−17022
fatigue evaluation, advantages of strain-controlled tests 86−20139
C fibre reinforced epoxy laminates, notched, compression fatigue, delamination, radiography 85−480

nozzles
500 mm locking shutter body stress under thermomech. loading *(Russian)* 88−5542
ablation controlled arcs, stagnation press. elec. field strength 87−22655
adiabatic spray humidification systems in telecommunications facilities 87−20074
aerial spray nozzle characts. in wind tunnels using laser particle spectral analyser 86−60869
aerodynamic research at Vikram Sarabhai Space Centre, appl. to satellite launch vehicles 88−74909
air atomised electrostatic spray painting, electric field distribution, theoretical model 86−42771

nozzles continued
air blast interrupter with insulating nozzle, dielectric recovery 86−66215
alkali metal-mol. gas mixture, cooling in supersonic nozzle, population inversion of electronic states 87−18898
Applied-B pulsed ion diode, beam neutralisation, supersonic gas injection valve 86−11823
asymmetric dual-flow interrupter nozzles, flow field study 87−22653
ceramic substrate cleaning by steam and deionised water spray 85−1179
coal fired flow facility for heat transfer behaviour anal. of MHD flow train 85−16257
condenser targeted chlorination system feasibility evaluation 86−25925
control expts. with high-performance arc heater 85−61611
critical mass flowmeters, meas. error due to flow restriction 88−53941
cross flow turbine, adjustable nozzle modelling 88−43084
diesel engine injection nozzle testing *(German)* 87−34917
dye jet laser, continuous, liquid-circulation systems 87−18932
dye ring laser, 580 nm, CW, single-mode, dye circulation system 87−2218
dynamic behaviour of electron density toward currentzero behind a PTFE nozzle throat in an air blastedarc 86−26218
electrostatic streaming current meas. of high-conductivity liquids ejected from nozzles 88−27415
flow rate meas., ISO 5167 international standard 85−9000
fluidic flowmeter, oscillator type, without control ports or feedback loops *(Japanese)* 87−77468
gas blast circuit breakers, gas flow with arc in a nozzle, dynamic characts. 86−26235
gas blast circuit breakers, transient nozzle arcs, study 86−26234
gas blast circuit breaking arcs, Monte Carlo simulation 86−26217
gas flow measurement, appl. of critical nozzles *(Polish)* 85−58949
gas turbine combustor multinozzle high-water-injection system field tests 85−65150
gas turbine Shell/Spar first-stage vane and blade design 87−15568
gas-blast circuit breaker, nozzle arc dynamic behaviour 87−22649
gasdynamic laser nozzle grid, flow and heat transfer characts. 88−33927
impulse steam turbine nozzles, angles and speed coeffs. relationships, blade efficiency 87−15557
ink jet recording for generating a plurality of ink jet streams 85−43030
laser cutting, aerodynamic interactions 88−2435
laser Doppler velocimetry, multi-pt. system using phase diffraction grating 87−21283
laser propulsion devices using plasma expansion in magnetic nozzles 88−61590
liquid droplets, uniformly sized, formation using electrostatic field and rotating multinozzle system 88−27413
MHD channel nozzle, 3-D current distribution 85−39214
MHD generators, current distribution in nozzle, three dimensional analysis 85−16261
micronozzles for flow rate meas., calibration system 87−29357
pneumatic primary sensor for measuring linear dimensions 88−4368
power plant combustion chamber, combustion stability 87−22113
pressure setting mechanisms with noncylindrical piston, errors determ. 87−3795
propulsive scarfed nozzles performance analysis 86−56238
proximity sensors, flow meas. with beam-scanning LDV 87−21282
radius meas. of toroidal surfaces, in nozzle based apparatus using optical instruments 85−64282
radome aerodynamic heating, propane gas-burning EM test feasibility 87−33568
silicone oil, streaming electrification by high elec. field 85−50813
steam generators, turbulent jet behaviour, measurement by hot-wire anemometer *(German)* 85−27298
steam power station, circulating water in sprinkler basin, cooling using sprayers with grid nozzles *(Russian)* 88−17382
steam power stations, pulverised fuel flowrate meas. using flowmeters with orifice plates and nozzles 85−15086
steam turbines, velocity-compounded impulse stage, blade efficiency 87−51040
submersible remotely-controlled exploratory vehicles, thrust vector control jet nozzle characts. *(Japanese)* 88−68645
thick-film circuit scribing with interchangeable nozzles *(German)* 87−11265
tone reproduction, electrostatic ink jet using dielectric-ink *(Japanese)* 85−2890
two-phase flowing nuclear MHD generator, computer model 88−62632
US nozzles, spray geometry and process interactions rel. to linewidth uniformity in photolithography 88−13276
waveguide, gasdynamic, with high optical quality 85−56273
wet-steam turbines, wet steam expansion 85−4784
CO_2, 16 μm downstream-mixing gasdynamic laser, 2D anal. in CO_2-N_2-H_2 87−54215
CO_2 electric discharge laser, supersonic mixing, expt. study with screen coaxial nozzles 86−3076
CO_2 gasdynamic laser, combustion-driven 16 μm, numerical analysis 85−2209
CO_2 gasdynamic laser with nozzle unit of honeycomb construction, supersonic mixing 86−3027
CO_2 gasdynamic laser with nozzles, specific power output 86−36381
CO_2 high-temp. combustion-product gasdynamic laser, nozzle flow calc. model 86−54087
CO_2-N_2-H_2 gasdynamic laser with 2D nozzles, gain optimisation 87−26258
DF chemical lasers, mixing enhancement using supersonic nozzle design 87−2054
DF-CO_2 ring laser, chemical, reagent mixing effects, 2D numerical anal. 86−63851
N_2-Co_2-H_2O gasdynamic laser, efficiency enhancement 86−68452
SF_6 circuit breakers, nozzle materials investig. 87−22651
SF_6 gas insulated circuit breakers, development and application to gas insulated switchgear 85−16159
SF_6, high current arcs, circuit interrupters radiatively induced nozzle ablation 87−22654
SF_6 insulated HV circuit breaker dielectric tests and nozzle improvements *(Croatian)* 88−11326
SF_6 puffer-type circuit breakers, effects of aerodynamic shocks on performance 87−30853

NTC thermistors *see thermistors*

nuclear acoustic resonance *see acoustic nuclear magnetic resonance*

nuclear alignment *see nuclear polarisation*

nuclear bombardment targets
3-NS flash X-radiography, target dynamic response obs. appl. 86−60509
2000 Ci tritium gas target for high energy photonuclear reactions 85−52955

nuclear bombardment targets continued
actinide compound nuclear target single crystal growth 85−59119
actinide target preparation by ion beam sputtering 85−59125
actinide target preparation past and present in the UnitedKingdom 85−59112
advanced neutron source conference Oxford, England (July 1985) 86−52150
analog system for orientation of single-crystal target in electron accelerator 88−36389
automatic orientation system for single-crystal targets inan electron accelerator 86−50297
CERN ACOL, conducting targets for $\bar{p}$ prod. 86−32134
charge changing processes, eV/u-MeV/u energies 85−59165
compact target design for high-heat-flux fusion appl. 85−64427
conference, Antwerp, Belgium (Sept. 1984) 85−54022
conference on polarised antiprotons, Bodega Bay, CA, USA (Apr. 1985) 86−70277
CRNL target preparation state of art 85−59115
deuterons, atomic. polarised target for electron storage ring 85−59140
dynamic polarization in a $^3He/^4He$ evaporationcryostat 86−60524
EHF internal ribbon targets, secondary beams by ray-tracing 88−42408
electrostatically focused electron gun for targetmaking 85−59127
enriched isotopic materials for accelerator targets, availability for radioisotope prod. 85−59161
enriched rare earth plate targets, preparation technique 85−59132
epoxy type adhesive testing for suitability for mylar liquid deuterium targets 88−61055
ethylene-1,2-$^{13}C_2$ glycol, ^{13}C dynamic polarization for nucl. target appl. 87−3879
external cyclotron targetry system for precious gas loading, radiopharmaceuticals prod. 85−64579
fabrication, assaying, use 85−59111
fabrication of target elements for ^{99}Mo prod. in Rossendorf Research Reactor *(German)* 88−68192
Fermilab experimental areas, semi-remote handling target stations 86−32135
frozen spin polarized proton target at TRIUMF 88−29777
frozen spin proton target at TRIUMF 87−3868
frozen spin target for SATURNE II 86−70306
gas jet targets, use as storage ring internal target for $\bar{p}p$ collisions 85−37895
gas jet transport system for suppression of heavy-mass fission product homologues 87−41807
gas-filled, stopping events of charged particles separation, using semiconductor detectors 86−5729
high intensity polarised ion sources and polarizedtargets, review 86−70301
high vapour pressure elements, target preparation methods 85−59130
high-speed target rot. system 86−50293
high-temperature metal targets and ion sources for ISOLDE on-line mass separator 87−57001
integrated target-ion source for fission yield meas. of rare-earth isotopes 87−57007
internal gas target for nuclear and particle physics experiments 88−47972
internal polarized targets, developments 88−16613
internal supersonic gas jet targets for circular accelerators 87−8813
IPNS enriched uranium booster target 86−56010
isotopically pure target production at Orsay 85−59118
IUCF liquid hydrogen target system 85−64436
Japanese target systems, Monte Carlo calcs. 86−5761
KFA, target design calculations 86−5759
KRYPTA polarised target facility at Karlsruhe, performance and improvement 87−3872
LAMPF, major facility overhauls, target cell, beam lines, accelerator 86−32057
LANSCE, liq. H_2 moderator system hardware, characteristics, operation 86−56014
LANSCE high power (200 μA)target-moderator-reflector-shield 86−56013
liquid H target system, design 86−65323
liquid tritium target with sensitive volume of 35 cm^3, gas supply system 86−5725
Los Alamos Nat. Lab., nuclear target technology 85−59114
material absorption, exptl. optimum design 86−5722
medical isotope production, bombardment target telemetry 85−59261
MEDICYC, 6 MeV proton cyclotron and target system for neutron therapy 85−64631
molecular and polarised atomic beam targets in storage rings, ISR, SPS, LEAR 85−52954
monitor and control system for scintillating fibre active target gating and triggering 88−61097
multitarget solid state device studying relativistic heavy ion fragments 85−43171
MV neutron beams production using electrostatic accelerator and gas target 88−4714
ND_3, single cryst. tensor polarisation studies 86−60523
operational polarized targets, review 86−60521
Orleans neutron therapy facility, Be target for CGR 680 cyclotron 85−64632
PEP, internal targets in storage rings 88−54387
planetary target neutron generator, principle and mechanism *(Chinese)* 88−29786
polarised gas targets, storage cells 86−55970
polarised H beam target, atomic H source and hexapolar magnet focusing system 86−44537
polarised target progress for Fermilab polarized beam 86−60526
polarised targets and ion beam sources, status and developments 85−59102
polarised targets in electron rings 85−26673
polarized ^3He target device at the U-240 cyclotron 87−3871
polarized noble gas target development 86−70297
polarized target exchange in high mag. field at mK temps. 86−60528
polarized target facility for neutron physicsexperiments 87−3870
polarized target-polarized beam facility at theTriangle Universities Nuclear Laboratory 85−59104
powder material targets, preparation on thin backings by centrifugal precipitation 85−59133
preparation at Chinese Institute of Atomic Energy 85−59113
proton beam multiple passage through cyclotron target, recording technique 86−60596
proton synchrotron, internal magnetic target 88−61059
radionuclides production in cyclotron using remote controlled device 88−4786
refractory oxide, carbide and boride targets for ISOLDE on-line mass separator 87−57002
refrigerated gas target system for use in 180°electron scattering experiments 86−44549
scintillating fiber-optic active target (SFT) for studies of high energy photoproduction 88−68221
segmented target chamber for (n,p) studies at TRIUMF 87−63618
SIN facility upgrading, new injector and cyclotron RF-system upgrading 85−58987
SINQ liquid Pb-Bi eutectic target development 86−56009
SNQ, target design for stepwise developments 86−5764
SNQ, target material 86−5760
SNQ target and moderator system, Grenoble high-flux reactor 86−5735
SNQ target pins, fabrication, thermal cycling growth 86−56007
SNQ target station, operation, handling and safety 86−5774
SNQ target station, remote handling design 86−56008
SNQ target-moderator-reflector system design nuclear aspects 86−56003
SNQ-target design 86−56006
SNS, multiplying booster targets 86−5762
SNS spallation target enhancement by ^{235}U enrichment 86−5763
SNS Target Station, services monitors and controls 86−56012
SNS target station progress report 86−5772
solid ^3He polarised target, brute force polarisation 87−3869
spallation and fission product production rates 86−5757
spallation neutron source at SIN, Pb-Bi eutectic target thermofluid behaviour 85−59139
spin refrigerator polarised target for K^-p reactions 88−29781
storage ring, study of a microparticle internal target for a cooler ring 87−63616
supersonic gas jet target at ORNL-HHIRF, expts. 85−59148
supersonic jet gas targets, ion beam effects 86−25111
target thickness measurement by heavy ion elastic scattering 88−29783
targetry for the cyclotron production of short-livedradionuclides for medical use 85−59134
thin ribbons as internal targets in storage rings 88−74695
tilted multifoil assembly for nuclear polarisation 87−29429
TRISTAN accumulation ring, γ-ray source using internal targets 86−32140
TRIUMF polarised deuteron target NMR system 86−60527
Variable Energy Cyclotron at Calcutta, target systems 85−4197
windowless water target, characteristics, performance 85−37867
$\bar{p}$ production and collection at CERN PS, yield and target props. 85−37894
$AlMg_3$, SNQ-target, materials irradiation expts. 86−56005
AlMgSi, SNQ-target, materials irradiation expts. 86−56005
Al_2O_3, proton beam current, energy scatter meas. method, multiple target passage 86−18224
Au target purity evaluation using vacuum systems 85−59136
Bi target for ^{211}At prod., preparation methods *(Chinese)* 88−74698
C evaporated target foil, optical consts. 85−59137
Ce targets for nuclear-physical research fabrication 88−42402
Ge targets for lifetime meas. 85−9061
Ge-Si active nuclear target detector 85−15169
H_2 doubly spin polarised for source or target appls. 86−55971
^3He targets, conf., Princeton, NJ, USA, Oct. 1984 86−7360
He jet type ISOL target and ion source at Kyoto University 86−25110
^3He dense polarised target, compression attempts 86−11821
^3He, nuclear polarization by laser optical pumping 86−11820
^3He polarisation by optical pumping, low temp. techniques 86−11822
^3He polarised gas target, spin relaxation study 87−63619
^3He polarised target and source prod. by optical pumping 85−59103
^4He subcooled polarised proton target 86−60525
$^6Li(\alpha,\gamma)$, nuclear alignment meas. for optically pumped pol. vapour target 87−3873
La targets for nuclear-physical research fabrication 88−42402
^6LiD, electron irrad., polarisation studies 86−60522
^7LiH, electron irrad., polarisation studies 86−60522
$^7Li(p,n)^7Be$, CANUTRON thermal neutron source 85−59157
Mg, s-d shell nuclide target preparation for (p,n) and (d,n) reactions *(Japanese)* 87−50105
MgO, online mass separator targets, beam heating calcs. 87−57003
^{22}Na target, fabrication, stability, homogeneity, impurities 88−47915
Na target, polarized, optically pumped, relaxation rate study, H^- ion source appl. 87−77506
Na thick optically pumped target, radiation trapping 88−54371
Nd targets for nuclear-physical research fabrication 88−42402
Ne, liq., cryogenic targets 88−29782
Os thick targets prod. for electron scatt. expts., electroplating 87−14701
^{31}P, s-d shell nuclide target preparation for (p,n) and (d,n) reactions *(Japanese)* 87−50105
Pb-Bi eutectic liq. target, thermofluid dynamics 86−5773
Pr targets for nuclear-physical research fabrication 88−42402
Pu, preparation for targets, by oxide and carbide reduction 85−59122
PuF_4, hydrofluorination prior to metal deposition for nuclear targets 85−59121
^{226}Ra targets for nuclear spectroscopy 85−59123
^AS, A=32,34, s-d shell nuclide target preparation for (p,n) and (d,n) reactions *(Japanese)* 87−50105
^{33}S layers for $^{33}S(n,\alpha)$ cross section meas., vacuum deposition 85−59126
Se coating, deposition on Be for nuclear targets 85−59128
^{30}Si, s-d shell nuclide target preparation for (p,n) and (d,n) reactions *(Japanese)* 87−50105
T gas target, ^3He prod. problem 86−50292
Ta, online mass separator targets, beam heating calcs. 87−57003
Ta target, preparation of known thickness 85−59131
Te targets in heavy ion beams 85−59135
$^{232}Th(p,X)$, fertile to fissile conversion 86−5758
Ti online mass separator targets, beam heating calcs. 87−57003
^{44}Ti, radioactive target preparation by high yield electrodeposition 87−3878
$^{238}U_3O_8$, purification by cation exchange for cross-section meas. 85−59120
UC_2 online mass separator targets, beam heating calcs. 87−57003
UF_4, hydrofluorination prior to metal deposition for nuclear targets 85−59121
Zr, online mass separator targets, beam heating calcs. 87−57003

nuclear collective states and giant resonances
conference on pion-nucleus physics, Los Alamos, USA (Aug. 1987) 88−37798
gamma-ray lasers, interlevel transfer mechanisms 87−7292

conference on nuclear power plant availability, maintenance and operation, Munich, Germany (May 85) 86−18962
conference on nuclear power plant operation, Chicago, USA, Aug. 1987 87−72673

nuclear engineering computing continued
conference on nuclear power plant operational safety, Marseilles, France (May 1983) 85−21312
construction computer-aided engineering [nuclear plants] 88−23645
containment behavior during accidents, process dimensional anal. within code description, scaling effects 87−57808
CONTAMINATION for LMFBR power plants, defective fuel and fission products behaviour in coolant 86−65893
control systems, conf., Tsukuba, Ibaraki, Japan 88−37869
coupled-core reactor simulation and identification usingone-shot Walsh operational matrices 86−39505
CR-39 plastic, automated counting and anal. 87−50184
CRAC2 demonstration uncertainty/sensitivity anal., health and economic consequence model 85−43850
CREACEC computer tool for nuclear power unit core reloading 88−36924
DAPHINE parallel multiprocessor data acquisition system for nucl. physics 85−43143
data acquisition system, CAMAC based for nuclear facility 86−4651
data collection system for reliability, computer based, in nuclear power station *(Russian)* 86−51196
database development for nucl. power appls. *(French)* 88−11028
DATATRAN data bank catalogue, nuclear plant tests and transient event data 86−39495
decision aids, computer based, analytical evaluation 88−48671
decision aids integrating the SPDS and functionalrecovery guidelines 86−45122
defect admissibility classification expert system for nuclear power stations *(Czech)* 85−65087
DELIGHT-6, analysis of SHE critical experiments for experimental very high temperature reactor 85−53450
DEPHI, functions analyser for Superphenix, plant operations monitoring *(French)* 88−11030
design criteria evaluation for computerized safety systems 88−48674
design tools for computer-generated display ofinformation to operators 86−25761
Diablo Canyon power plant, digital computer appl. 88−48746
Diablo Canyon PWR plant, integrated control and communications system 87−30316
diagnostic aid−success path monitor for complex transients 87−64321
diagnostics based on random signals evaluation *(Czech)* 87−15428
DIAREX expert system for BWR power plants, failure diagnosis and operational guide 88−30453
digital control and protection retrofits 87−71845
digital upgrades for nuclear plant control and instrumentation 87−22025
distributed and hierarchical control techniques for large-scale power plant systems 88−48695
distributed real-time nuclear reactor safety system, design 86−39405
disturbance analysis using artificial intelligence, SAAP-2 system 87−15478
diversity, use in experimental reactor safety systems 88−56084
Dodewaard BWR, reactor physics meas. for calc. validation 88−17309
Dodewaard nuclear power station on-the-job training simulator *(Dutch)* 87−42581
DSNP simulation language for nuclear power station transient anal. 88−75321
early fault detection and diagnosis for nuclear power plants 87−57814
ELXSIR cross-section library for LWR pressure vessel irradiation studies, part of LEPRICON computer code system 85−9680
emergency and plant information computer system design, probabilistic safety methods appl. 85−53443
emergency operating procedures tracking system 87−78390
Emergency Response Data System for emergency handling in nuclear power plants 88−69109
emergency response information system for FERMI 2 nuclear power plant 86−65835
ENDF-B/IV, analysis of SHE critical experiments for experimental very high temperature reactor 85−53450
energy and exergy analyses of a nuclear steam power plant 87−50972
engineering simulation facilities for advanced concepts testing 88−75305
Entity-Relationship model for nuclear power plants 88−48694
EPRI DATATRAN database for nuclear power plant transient anal. 85−9675
equipment reliability and maintainability enhancement through software applications 87−9274
ERFIS information system at Vermont Yankee nuclear plant, emergency response 87−71816
evacuation modelling for nuclear power station accidents 88−75323
event driven control method for automatic operation and control 88−48751
event timer system for limiting conditions of operation 88−48682
Experimental Breeder Reactor II, installation of automatic control 85−65099
expert system for control rod programming of boilingwater reactors 86−61291
expert system for nuclear reactor alarm processing *(French)* 86−70800
expert system for USNRC emergency response 87−42625
expert systems, use for nuclear plants safety program 88−23666
expert systems for nuclear power plant, fault tree analysis 87−50956
EXTRA, on-line expert system at French PWR power plants 88−36938
fail-safer microprocessor based system for power plant protection 86−18939
failed fuel rod detection system and computerised manipulator for use during outages 85−27211
fast neutron nuclear reactor, operator assistance expert system *(French)* 86−39503
fast reactor core monitoring by temp. noise anal. using pattern recognition 85−15791
fault location in nuclear steam generator's heat exchanger, automated aid 87−9255
FEMAX-III, pellet-cladding mechanical interactions, Halden BWR 86−19021
Ferranti VARS-H displays installation at Hunterston B AGR 87−71820
fission reactor safety systems uncertainty anal., with statistically correlated failure data using CORRELATE computer program 85−38712
fission reactor three-dimensional core model for personal computers 87−71910
Flavia device for vibration, leakage and loose parts detection in nuclear plants 87−71882
Forsmark-3 BWR power plant, advanced on-site conceptual simulator for safety training 85−21323
FOSTER software package for nuclear power station transient anal. 88−75320

nuclear engineering computing continued
FRANTIC-II code for time-depend. unavailability anal., safety system appl. 85−53430
FRAPCON2 V1MOD5 fuel performance code, benchmarking and modification 88−23681
French approach to monitoring and computerized control 88−48743
French N4 PWRs, entirely computerised control room 87−57747
FREY computer code, steady-state self-initialization capabilities 88−23682
FRG computer appl. for power station control and operation 88−48741
FTPHASE, phased mission probability code for residual heat removal reliability anal. 85−48811
fuel cycle optimisation using multi-objective stochastic linear programming 87−78257
fusion reactor ignitor TF coils and support struct., nonlinear elastic-plastic anal. 85−2497
fusion reactor noncircular toroidal field coils, shape modelling by computer 85−1890
GAMMA-R tandem mirror fusion reactor, superconducting choke coil design, struct. anal. 86−58719
gas-cooled reactor cogeneration plant engineering simulation, development and appl. 85−53509
Gentilly 2 nuclear power station, computerized maintenance management system 88−75373
GO-FLOW reliability analysis methodology applicable to nuclear plant piping systems 85−48763
GRAFTER system for automated fault tree anal. of nuclear plants, PRA appl. 85−53440
Grand Gulf NPP, Instrumentation and Setpoint Control Program 88−62087
GUARDIAN scram avoidance software for an IBM PC 88−42984
Hatch-2, dual recirculation pump trip startup test, RETRAN-02 anal. 85−65093
H.B. Robinson PWR, sensitivity-reduced design, optimal control problem 88−30446
H.B. Robinson Unit 2 PWR, pressurised thermal shock transients, RELAP5 anal. 86−25755
heat imbalances in nuclear power plant, expert system design with fuzzy logic for diagnosis 88−30505
HECTR code for nuclear containment responses to H_2 combustion 85−9626
Heysham 2 AGR, computer scheme 88−48742
Heysham/Torness AGR-II design, Babcock Power's interstitial remote inspection manipulator 86−45106
HTGR, dynamic anal. computer program PAPS/DJ *(Japanese)* 87−57811
IAEA outage information system 86−12611
IAEA Power Reactor Information Systems, nuclear power plant outage information 85−27205
induction linac driven heavy-ion fusion systems model 88−47734
information management system for maintenance in nuclear power plants 88−62083
information prioritization for tactical support of nuclear plant operations in off-normal situations 88−48667
information retrieval algorithms for transient and emergency states in nuclear power plants *(Polish)* 86−18931
inherently safe reactors, total quality control using the Deming management philosophy 88−23684
integrated CAD system with interdiscipline database and three-dimensional solid modelling 85−9664
integrated CAE applications for nuclear power plants 87−78326
integrated hardware/software design approach 88−48668
Integrated Nuclear Plant Piping System development *(Japanese)* 85−59885
intelligent decision support systems for nuclear power plants in Japan 88−62046
interactive videodisc in maintenance operations on nuclear reactors *(French)* 87−78361
interlock and alarm system for nuclear fuel processing 86−6510
Japan, computer appl. in reactor operation 88−48745
Jaslovske Bohunice NPP, ageing surveillance with computerised control system 88−48704
JET remote maintenance during active operation 87−41229
Kansai expert systems development for nuclear plant operators 87−71815
Kewaunee nuclear power plant training simulator, safety assessment system computer simulation 88−75304
KNU 1, loss of feedwater transient anal. using REALP5/MOD1/NSC 86−56562
KNU-1 PWR, feedwater line break anal. using RELAP4/Mod6, parameter uncertainty and sensitivity 87−71877
KNU-1 reactor cavity, radiation streaming, neutron fluxes and dose rates 86−56563
Korean nuclear reliability database network using two-stage Bayesian concept 88−23629
Kori Nuclear Unit 2, nuclear safety parameter display system 87−71806
Kori-1 PWR, LOCA anal. using KTRAN, SCAN, COBRA-IV and LTRAN 86−45103
KRB II/C, low leakage fuel, 3 cycles and cycle length after long-term operation *(German)* 88−75406
Kuosheng BWR, earthquake and typhoon risk dominant sequences in MAAP3.0 88−23688
Kuosheng BWR, SBLOCA anal. using MAAP2.0 and MAAP3.0 88−23687
KWU PWRs, provision of optimum operating information in control rooms 87−57748
KWU Series 86 monitoring and detection systems for nuclear plants 88−36939
La Salle County nuclear station, risk-based eval. of technical specification problems 87−78327
large scale LMFBRs, advanced monitoring and control system 86−65894
LEGO, modular, PWR power plant modelling appl. 87−42585
LIACEP cost optimisation code for ICF induction linacs 88−47735
limiting conditions of operation monitor (LIMCOM) for Duke Power Company's McGuire Station 88−48683
linear accelerator design calculations, use of IBM-PC 87−41766
liquid metal fast breeder reactor refuelling system, programmable electronic system, failsafe operation 86−61312
LMFBR, filtered RMS, pattern recognition and array processing techniques for acoustic surveillance 88−72967
LMFBR, SAS4A accident anal. code for unprotected accidents simulation 88−75393
LMFBRs, remote equipment and techniques for inspection 87−78355
LMR, SASSYS-1 anal. code for simulating operational transients 88−75394

nuclear engineering computing continued
loading pattern optimization program, engng. appl. to reload design 88−62122
local area network communications in advanced nuclear reactor control and safety 85−15790
logic flowgraph models for computer aided process anal. and management system 88−48676
Loviisa NPS process computer systems, replacement and development 88−48666
LTREE, LISP based algorithm for cutset generation, nuclear power plant fault tree appl. 85−48764
LWR, 1D and 3D load following anal. methods comparison, HLOFO and CMSNAC codes 87−71805
LWR, disturbance identification, projective operator technique appl. 88−48678
LWR containment Shield Building Annulus transients, parametric analysis program *(Italian)* 86−6528
LWR core surveillance using MONAS on-line analysis system *(German)* 86−51420
LWR in-core fuel management using CASMO-3 and SIMULATE-3 87−4524
LWR power monitoring, advanced hardware and software systems 85−21335
LWR power plant performance, data acquisition guidelines 86−25732
LWR power stations, signal validation, EPRI sponsored demonstration 85−43689
LWR pressure vessels, deformation during LOCAs, interaction between fluid and structure, computer code 85−15794
LWR System Analysis and Risk Assessment system 87−9318
LWRs, computer aided transients simulation for emergency response optimisation 85−59972
MAGFOR magnetics code for field and forces in twisted helical coils, ATF appl. 85−1919
magnetic fusion data acquisition at Los Alamos 87−3515
maintenance, computerised modeling 86−45138
Marviken Power Station, critical flow data, results summary and code assessment appls. 85−43805
MB-2 steam generator, loss-of-feedwater tests, RELAP5/MOD2 code 88−62134
MICADO computerised system for French PWR configuration management process control 88−55123
microcomputer based fault tolerant control system 86−12576
microprocessor based nuclear reactor safety systems, reliability and safety 85−9681
microprocessor-based instrumentation for nuclear power plants 87−71821
microsimulation appl. to operator training, for computerised nuclear reactor control system 87−15466
Millstone Unit 2, containment heat removal success criteria for LOCAs and LOOSP 88−62125
MIT Research Reactor, closed loop digital control of reactor power 86−51269
Mitsubishi knowledge-based AI system, use in nuclear plants 87−71814
modelling of nuclear power plant behaviour, pressurised water reactors 85−32309
modular process protection upgrade system, microprocessor-based architecture, Eagle 21 85−43694
monitoring system for nuclear reactors, reliability improvements *(Russian)* 87−15472
Monticello nuclear power plant feedwater control, fault-tolerant digital system *(Japanese)* 87−78334
MSHIM control system for nuclear power plant load-follow operation 88−42985
Muelheim-Kaerlich PWR plant, boric acid control, state modelling, plant experience 87−78382
Muhleburg BWR power plant, remotely operated decontamination during pipe replacement *(German)* 86−51423
multidimensional thermal hydraulic anal. of reactor components, computer codes 87−9321
MVPACK, CAD package for nuclear plant control system design 86−56548
N4 reactor, control system CAD *(French)* 87−64267
N4 reactor, data management control system *(French)* 87−64266
N4 reactor system, control room architecture and research simulator *(French)* 87−64262
NDT, automated, data handling developments for use in nuclear plants 87−56514
NEA data bank, software and data for nuclear engineering calcs. 86−39452
neutron radiography, conf., Paris, France (June 1986) 88−30
neutron spectrometers, fusion plasma diagnostics systems 87−50194
NLOOP code for transient anal. and simul. of PWR plants 88−75348
noise and vibration analysis system 85−65058
nondestructive testing, digital models, nuclear materials appls. *(French)* 88−6572
nondestructive testing data from nucl. powered stations, interpretation and filing *(French)* 88−6573
NOPS, nuclear power plant simulator for demonstration purposes, PWR appl. 88−55155
North American nuclear unit information and analysis systems 85−27206
Northeast Utilities signal validation applications for Safety Parameter Display Systems 88−48750
northeast utilities simulator technical support program for nuclear plants 88−75307
NPRDS, nuclear plant reliability data system, natural language interface 87−57783
NRC expert system, Reactor Safety Assessment System 88−48693
NRC nuclear power station simulation eval. procedure 88−75309
NRC nuclear power station simulator evaluation program 88−75308
NRC simulator evaluation procedure for nuclear power stations 88−75310
nuclear fuel assembly identification using computervision 86−25807
nuclear plant accident sequence modelling, safety and reliability, conf., Munich, West Germany (Aug. 1987) 88−55801
nuclear plant accident sequences event trees and their treatment on PC computers 87−57758
Nuclear Plant Analyzer, review 88−10991
nuclear plant simulator qualification plan 87−42594
nuclear plant transients in real-time simulators 88−75299
nuclear power plant, training simulators of EDF *(French)* 86−18945
nuclear power plant control and monitoring using FIELDBUS concept, NERVIA network presentation *(French)* 88−30458
nuclear power plant disturbance anal., digital simulation 85−59917
nuclear power plant information network 86−45135
nuclear engineering computing continued
nuclear power plant liquid effluents, radionuclide distribution in river, computer calc. *(Croatian)* 85−59870
nuclear power plant operator/manager advisory expert system with probabilistic risk assessment 88−69111
nuclear power plant Risk Management Query System 87−9283
nuclear power plant training simulators validation 88−75301
nuclear power plants, core on-line monitoring and computerized procedures systems 87−71897
nuclear power state feedback computer control 86−18938
nuclear power station, supervision system and man-machine interface design *(Italian)* 88−30506
nuclear power station computerised monitoring and control 86−18937
nuclear power stations, data processing systems for model validation and start-up testing *(French)* 88−11029
nuclear power stations, information systems, plant management 86−25726
nuclear power stations training simulator discrepancies, operational impact eval. using EPRI methodology 88−75300
Nuclear Power Training Center, computer replacement project 86−70798
numerical methods in nuclear engineering, conf., Montreal, Canada, Sept. 1983 87−5150
Oconee 1 PWR, LOFW initiated ATWS anal. using TRAC-PF1/MOD1 85−15779
Oconee 3 probabilistic risk assessment, results computerisation for sensitivity anal. performance 85−48747
Oconee Nuclear Power Station, plant computer system replacement phasing 85−43700
Oconee-1 power plant, control system safety implications, failure anals. 86−25754
on-line balance-of-plant performance monitoring system using a personal computer 88−62088
on-line diagnostic system for pump failure warnings 87−71822
on-line monitoring data analysis, logic generator, validator, code reliability 86−6472
once-through steam generator, THEDA-2 code verification from model tests 85−4794
once-through steam generator performance using RELAP5/MOD2 code 87−35818
online nuclear plant machinery diagnostics, expert system for monitoring 85−15787
online surveillance techniques for power reactor instrumentation, neutron sensors 86−51271
Ontario Hydro integrated programs for plant design and construction 88−23644
Ontario Hydro nucl. units, PC-based systems and equipment performance trend anal. 88−11004
Ontario Hydro Nuclear Generation Division information systems at Darlington NGS 88−75298
Ontario Hydro nuclear plants control, computer usage 88−48744
operator aids advanced software concept 88−48677
operator training by microcomputer simulation for tritium removal facility 88−17293
Oyster Creek BWR, MSIV closure and bypass tests, RETRAN simulation 87−64318
Oyster Creek BWR, thermal-hydraulic anal. development using RETRAN02 and SAFER-CORECOOL 88−23702
Oyster Creek cycled 10 nodal model parameter optimization study using PSMS 87−64317
Oyster Creek loss of feedwater transient, RETRAN−RELAP5 comparison 85−65095
Oyster Creek NGS, statistical treatment of safety valves during increasing-pressure transient events 88−62123
Paks VVER-440 reactor, thermal-hydraulics determs. using VERONA system *(Hungarian)* 87−57844
Palo Verde nuclear power station, RETRAN feedwater system model 88−75352
Paluel 1 and 2 PWR power plants, commissioning of CONTROBLOC and SPIN automatic systems *(French)* 86−61229
Paluel nuclear power station, probabilistic safety study, EXPRESS system appls. *(French)* 88−11031
PANDA nuclear power station anal. package 88−75346
parallel-signal-processing approach to signal validation for reactor safety 88−23685
Particle Beam Fusion Accelerator II (PBFA II), computer model of vacuum system design 87−21335
Particle Beam Fusion Accelerator II (PBFA II), energy transport meas. and computer simulation 87−21326
Particle Beam Fusion Accelerator-I, automated performance history database 85−4180
pattern recognition software for plant surveillance 87−71848
PBX-M waveform generator for highly indented plasma control in fusion reactor 88−67915
PCTRAN, Rancho Seco overcooling event analysis 88−48736
Philippsburg 2 nuclear power plant, computer based process information system *(German)* 87−57818
PHOENICS program for SNR-300 coolant circuit design *(German)* 87−64327
PICEP pipe crack eval. program 88−36999
Pickering A, operator-machine interface upgrade, annunciation system 88−48684
pipe whip tests for power plants, nonlinear dynamic anal. 86−61236
plant piping support system development *(Japanese)* 87−50931
plant preventive maintenance support expert system *(Japanese)* 86−32980
PLEXSYS software for nuclear plant design, engng. and maintenance appls. 88−55138
Point Lepreau CANDU Generating Station, fuel management and performance 87−57846
poloidal field coil design from plasma equilibrium parameters, Green's fn. computer code anal. 87−7061
Popit, Programming of Plant Intervention Tasks, operational support/management tool 88−48747
power plant, availability impact of limiting conditions for operation 87−9271
power plant, computer based surveillance and anomaly detection system, models, algorithms and graphics 85−59951
power plant, large scale, simulator model development procedure 86−18916
power plant, probabilistic risk assessment microcomputer software 87−9269
power plant, simulator qualification using engineering computer codes 86−18961
power plant, software verification and validation programme 85−27260

nuclear engineering computing continued
power plant, UNIRAM modelling for availability improvement 87−9268
power plant availability, increases by using Eagle 21 process protection equipment 86−51214
power plant availability improvement by reactor trip prediction software 87−9317
power plant computer control system, operating experience 86−70762
power plant control using knowledge based expert system *(German)* 88−55136
power plant feedwater system component faults, classification and anal. 86−51224
power plant field test systems, architecture of computerised monitoring, testing and maintenance *(French)* 88−30457
power plant human performance data collection, error rates from control room simulators 86−45088
power plant operations expert system 85−38657
power plant operator training simulator, Grafenrheinfeld PWR plant 87−50930
power plant reliability and availability enhancement, generic software package 87−9278
power plant risk assessment, programmable controller fault tree models 86−61245
power plant rotating equipment, computer based vibration condition monitoring system 85−48716
power plant safety BETA test facility using induction heating, computer routine verification *(German)* 86−25700
power plant severe accidents, aerosol behaviour simulation codes, distrib. fn. 88−62036
power plant simulation, conf. Cuernavaca, Morelos, Mexico (Nov. 1984) 85−54041
power plant simulation and reactor safety 87−71892
power plant simulation using advanced simulation codes and workstation 86−18960
power plant simulator, design, development and operation 88−10993
power plant simulator certification procedure for US utilities 88−75312
power plant simulator qualification using the EPRI methodology 87−78393
power plant simulators, continuous real-time survey 87−71912
power plant training simulator fidelity 87−78394
power plant training simulators, module maintenance 88−75303
power plants, analogue instrument and control systems, improved reliability 86−56550
power plants, artificial intelligence research at Electric Power Research Institute 86−70764
power plants, availability improvement through in-house electronic equipment reliability 88−62074
power plants, computer aging effects on plant availability 85−4763
power plants, computer assisted accident diagnostics, Pontryagin's optimal control principle appl. 85−32290
power plants, enhanced inspection using expert systems 87−22038
power plants, expert system verification and validation 88−10989
power plants, Fuel Performance Database, updated users manual 85−65112
power plants, gas cloud explosions, effects on plant structures, computer codes 85−9628
power plants, human operators, basic error tendencies modelling 88−62039
power plants, Indian, programmable electronic systems appls. 86−61244
power plants, process information system, operator support 86−70763
power plants, process protection software structure and designphilosophy 86−51210
power plants, reactor containment, long-term creep calc. using modified TEMPSTRESS code 85−4770
power plants, safety training via emulators 87−50948
power plants, smart instrumentation 86−61305
power plants advanced information systems to enhance operational safety 88−62038
power station accident management information system 88−75325
power station construction and operating experience collation and retrieval system *(German)* 86−12591
power station error prevention and reliability improvement by operating personnel, man-machine system *(Russian)* 87−57738
power station field cycle scoping anal. using microcomputers 86−56539
power station personnel training program *(Russian)* 86−32936
power station simulation, parallel-processing modular system 87−9266
power station simulator certification procedure 88−75313
power station simulator management and standards 88−75311
power station steam generator simulation 88−75317
power station system model for failure anal. by 408 computer *(Hungarian)* 88−10968
power station transient simulator qualification plan 88−75326
power stations, computer applications to nuclear utility industry 86−32962
power stations task anal., method and uses 86−45084
power systems and nucl. science symp., Orlando, FL, USA (Nov. 1984) 85−39411
PR-ISM, nuclear power plant maintenance management information system 85−27207
PRAAGE, nuclear plant unreliability/aging anal. code 88−23693
PREDICTOR knowledge based aid for real-time event sequence anal. in nuclear power plants 88−62044
prevention and control of nuclear power plant accidents 88−48696
probabilistic risk assessments modelled on microcomputers, safety appls. 85−53438
project management, computerized, as technology transfer tool 86−39359
Promaster computerised process control for nuclear power plants 87−71819
PROTROL, digital protection and control system from AECL 88−55120
PSADAT database system for CANDU power plant probabilistic safety assessment studies and AECL licensing 85−53437
PWR, 900 MW French design, modification admin. control and follow-up, safety anals. *(French)* 85−27214
PWR, B&W design, RELAP5 comparative anal. against RETRAN and CRAFT for overcooling transients 85−9667
PWR, Babcock and Wilcox 177-FA plants, natural circulation flow rates, RETRAN-02 calc. 85−65096
PWR, Chooz B stage N4, improvements over earlier reactors *(French)* 88−48659
PWR, complementary cumulative distrib. function risk curves, uncertainty bands, decision making 85−43744
PWR, computerised advanced control board 86−70795
PWR, model F steam generator secondary side, nodalization study, RETRAN02/MOD3 code 88−62135
PWR, multi-loop, power plant accident anal., digital simulator for transients and accidents 87−9332

nuclear engineering computing continued
PWR, on-line surveillance by process anal. 88−48679
PWR, small break LOCA without ECCS, S_2D sequence anal. with THALES code 85−43843
PWR, thermal hydraulic calcs. for H.B. Robinson and Calvert Cliffs PTS study, review 86−25756
PWR, thermal hydraulic simulation, advanced computer architectures appls. 88−75392
PWR, training simulator, comparison with experiences *(German)* 87−78398
PWR, Westinghouse, cold shutdown capability, safety-grade and fire hazards, simulation 87−71911
PWR 900 MW power plants, safety panels, VDUs and computers *(French)* 85−21331
PWR automated failure diagnosis, semantic network approach 88−48688
PWR balance-of-plant, transient anal. using Modular Modelling System 86−51270
PWR boron conc. control by real-time expert system PMS-2 87−50966
PWR computerised outage management and scheduling for faster refuelling 85−53503
PWR coolant velocity field, potential flow model using FORTRAN program 85−48784
PWR core degradation analysis, CORMLT comp. code incorporating the effects of complex recirculation flow fields 85−32329
PWR design of 1400 MW, computerised control and monitoring system 86−70794
PWR LOCA, pipe whip tests, expt. results and dynamic anal. using ADINA 87−78354
PWR LOCA, thermal stresses at nozzles of spherical steel containment 86−56567
PWR monitoring, computer aided signal validation *(French)* 86−25741
PWR nuclear power plant simulation using hybrid computer *(Hungarian)* 86−25704
PWR nuclear power plants in Japan, computerized operator-support system *(Japanese)* 86−39313
PWR nuclear power plants in Japan, computerized operator-support system *(Japanese)* 86−39314
PWR nuclear power stations, MC-PWR digital anal. package for control appl. 88−75347
PWR nuclear power stations, safe management *(German)* 85−27257
PWR plant models, STRIP and SFINCS codes, neutronic integrated computing system 87−78367
PWR plant steam generator, fast-running simulation code 86−6551
PWR plants, computer-aided incident mitigation, graphic display 87−57815
PWR power plant, auxiliary feedwater system anal. using dynamic logical analytical methodology 87−15488
PWR power plant, noise diagnostics development into process meas. method 85−38735
PWR power plant chemistry control, computer assisted data trending and problem assessment 87−71909
PWR power plant diagnostic technique using a plant event data base 85−21333
PWR power plants, reliability data acquisition system in France *(French)* 85−27204
PWR pressure vessel, large scale, HDR RPV-1 blowdown loads for test V32, computer aided calc. 85−4856
PWR reactor transient simulation 88−75391
PWR safety analysis using RELAP5 simulation code 88−75318
PWR steam generators, Fe_3O_4 deposits, eddy current probe response simulation 86−26944
PWR steam supply simulation using DYNODE-P system 88−75316
PWR turbulence modeling during high pressure coolant injection, COMMIX-1B code 87−9327
PWR units of nuclear power stations, computerised information processing *(French)* 86−18935
PWRs, Japanese annunciator system for control room, accident conditions 87−78319
PWRs, microcomputer model on IBM personal computer, H.B. Robinson Unit 2 appl. 85−59971
PWRs, Paluel, 1300 MWe, external core meas. *(French)* 87−50936
QA trend analysis program for nuclear plants 88−23648
QATTS Quality Assurance Tracking and Trending System for nuclear plants 88−23647
radiation protection management, applic. of computer using programless language *(Japanese)* 86−25333
radiation therapy, automation and computer control of accelerators 87−63833
radioactive filters, robotic handling at McGuire nuclear station 88−42947
radiological emergencies from nuclear power plant accidents, CRAC2 calcs. *(Spanish)* 85−53392
radionuclide release from severe nuclear power plant accidents, APS study group report 86−6479
radwaste disposal economics, overview 86−25734
RAMONA-3B and TRAC-BD1 85−9671
RAPID, reliability assessment program with in-plant data, for nuclear power plants 88−30452
RAPID plant status monitor, lessons learned from PSA, Oyster Creek plant appl. 87−78320
RAPID/RAM-UM system for reliability assessments 87−71849
RAS III, modular noise diagnostics system for reactor primary circuit monitoring *(German)* 87−35754
RASCAL dosimetry model for nuclear power station accidents 88−75324
RBMK-1000 power reactor, computer program for dynamic conditions calc. *(Russian)* 86−61250
RBMK-1000 reactor, operator training simulator, software development *(Russian)* 87−71876
reactor accident simulation for fissile materials 88−75407
Reactor Analysis Support Package, introduction and overview 86−56551
reactor diagnosis, software system design, artificial intelligence based approaches 86−70799
reactor diagnostics automation, based on neutron noise meas. and processing *(Czech)* 87−15470
reactor fuel rod bundles computer aided calculations of temperature distribution *(German)* 85−48774
reactor kinetics, stiffness problem solution, numerical applications 86−6519
reactor operations, computer appl., artificial intelligence program 88−48690
reactor operator licensing exam. simulators, qualification procedures 88−48665
reactor pressure vessel, ultrasonic inspection defect data evaluation and processing 87−71407

nuclear engineering computing continued
reactor pressure vessel manipulators, functions and basic concepts *(German)* 87−35751
reactor protection, supervisory systems, active-inactive times determ., system availability maximisation 87−71887
reactor protection software, verification and validation methodology 88−5493
reactor protection system, computer-based, using fail-safe mode of operation 88−37002
reactor safety system maintainability anal. using Q-GERT network simulation program 85−38743
real-time simulation for nuclear power plants and fuel pin performance 87−78308
real-time steam generator simulation for full-scope CANDU nuclear training simulators 88−75302
REDBL5, subcooled boiling test simul., void fraction prediction, exptl. computation 86−25823
redundancy industrial computer systems, common cause failure anal. for nuclear plants 85−65088
regulatory criteria for use of computers in nuclear power plants 88−48673
RELAP5/MOD1, BWR, ROSA-III recirculation pump discharge line break tests 85−65101
RELAP5/MOD2 calcs. of total distortions in PWR vertical hot leg 88−75397
RELAP5/MOD2 code for PWR transient anal. 87−9323
RELAP V Nuclear code, appl. of parallel processing 87−50970
reliability engineering techniques for nuclear power plant system *(Japanese)* 88−17261
RETRAN computer code for reactor transient anal. 85−32277
RETRAN-02 code, anal. of PWR turbine trip transient, pressurizer sizing effects 87−22071
RETRAN-02 thermal anal. 85−9672
Reversed Field Experiment, control and data acquisition, struct. definition, component selection 88−67704
RIBD code, radionuclide measurability for severely failed nuclear power plant fuel 88−30518
risk and safety anals. development *(Dutch)* 87−57807
RNR 1500 LMFBR, balance of nuclear island, 3D CAD techniques 88−36989
Robinson NPP, digital implementation of ATWS mitigation system actuation circuitry 88−43012
robotic devices, development and appls. 86−56531
ROCS/MC code system for coarse mesh reactor anal. 87−9325
RSAS, Reactor Safety Assessment System, situation assessment aid 86−45142
RSYST-EC, fast power reactor, equilibrium charge-discharge operation *(Russian)* 85−65082
Saaty eigenvalue technique, site selection of dual purpose nuclear power plant in Saudi Arabia 88−30454
safety, computer program validation using high-speed cinematography *(French)* 86−12623
safety data management system 85−43828
Saint Laurent B1 PWR, moisture separator reheater thermal-hydraulic performance anal. 85−48781
San Onofre Unit 2 PWR, transient test documentation for code validation 86−39494
San Onofre Unit 2 turbine trip from 100% power, RETRAN anal. 85−65094
Saudi Arabia, reactor type selection for water desalination and power generation 88−49322
SCORPIO core surveillance system, validation against measured PWR plant data 88−17315
SCREEN and PROSA-2 codes, probabilistic sensitivity and uncertainty anal. methods 85−43742
Seabrook PWR, pin power reconstruction using SIMULATE-3 PDQ comparison 88−23697
seismic monitoring system for Caorso nuclear powerstation *(Italian)* 86−44091
seismic safety, field testing and shaking table test, computational mechanics 88−55142
seismic stops versus snubbers, seismic response using RLCA-GAP code 88−48649
Sequoyah-1 power plant, long-term automated surveillance system 85−59949
Shearon Harris NPP, digital implementation of ATWS mitigation system actuation circuitry 88−43012
Shearon Harris Unit 1 PWR, turbine trip test, RELAP5/MOD2 comparison with plant data 88−23704
SHERPA, human error reduction and prediction, computer-assisted technique 88−11007
SICLE numerical model for moisture separator reheater, condensation front modelling *(French)* 88−69100
signal validation software at Millstone units 2 and 3 user's guide 88−30501
signal validation with control-roominformation-processing computers 86−12566
simulation parameter optimisation routine for use in real time nuclear power plant simulation 86−45073
simulation technology for safety, training and operation, review *(Japanese)* 85−38724
simulator verification effort at the South Texas Project Electric Generating Station 88−23659
simulator-based study of nuclear plants operators behaviour under abnormal conditions *(French)* 87−64239
simulators for nuclear power plants, aerospace and other appls., training conf., Orlando, FL, USA (Apr. 1988) 88−70004
Sizewell B PWR, containment building, finite element linear and nonlinear anal. 88−48726
SLIM-MAUD, computer based technique for human reliability assessment in BWR plants 85−53422
SOCRATES code for risk based anal. of technical specifications 85−43753
SOCRATES program for nuclear plants, risk-based eval. of technical specifications 86−39389
soft errors in dynamic random access memories−a basis for dosimetry 87−50455
software development for nuclear power station process information system 87−15461
software for nuclear plant management and control 88−48687
software reliability in nucl. power plant appl. 88−11000
SOPHT verification for parallel channel flow stability 87−9326

nuclear engineering computing continued
space nuclear-MHD generator, GWe-level power, parametric anal. 88−10486
space power systems 88−61573
space reactors, SP-100 transient performance prediction using CENTAR code 88−61488
Spanish power stations, computer-assisted operation and maintenance management system 87−15455
SPAR, ultrasonic seal identity data storage and archival system, nuclear safeguards appl. 88−42687
St. Lucie NPP, on-line digital feedwater control system for plant trip minimisation 88−62110
stability-enhancing two-step method for Transient Reactor Analysis Code 87−9322
STANSOL II code for fusion solenoid magnet optimised structural anal. 86−29320
state-of-the-art computer techniques for a nuclear plant 86−61292
steady-state steam generator eqns., semianalytic method for solns. 88−48654
steam generator diagnostics in nuclear power station, based on computerised vibroacoustic analysis *(Czech)* 87−15429
steam generator transient studies using simplified two-fluid computer code 85−38708
steam generators, chemical cleaning process data acquisition-reduction system 85−4787
steam plant cycle performance monitoring and computing 87−9254
STP program for radioactivity distribution determination in nuclear power plant systems, radiation protection 86−25721
subchannel anal., numerical technique using finite difference method 87−9330
Super Phenix fast breeder plant, emergency systems training simulators 87−42626
superconducting linac computer control system at NPL 86−55933
superconducting magnet, quench propagation and conductor pack temp. rise, model predictions, fusion appl. 85−1917
Surry Plant, loss of AC power accident, MARCH 2 screening sensitivity study 85−43741
Surry Power Plant, source term and consequence anal. 85−65062
surveillance system and anomaly detector, using online noise signal 85−15799
Susquehanna BWRs, recirculation system, transient monitoring using the GETARS system 87−57837
Susquehanna emergency response facility data requirements 88−48749
Susquehanna Unit 1, startup testing and cycle 1 operations, engineering anal. activities 85−65092
Susquehanna Unit 2 BWR, moisture separator drain tank level, transient response by RETRAN 87−42614
Susquehanna Unit 2 BWR, stability eval. for 9×9 fuel core, COTRAN and COTRANS2 tests 88−23700
Swedish probabilistic safety analyses, efficient fault tree handling, Asea-Atom approach 85−53435
technical specification compliance code SPECAPPRAISAL 85−53474
testing strategies and testing environment for reactor safety system software 87−15495
TEXTOR ICRF 3 MW long-pulse system, antenna diagnostics and data acquisition system 88−48572
TFTR, power system, electrical characteristics, computer simulation 87−15887
TFTR vacuum vessel, dynamic anal. of eddy currents and forces due to plasma disruptions 86−42766
three-dimensional computer-aided design system for plant layout 88−23646
TMX-Upgrade, axisymmetric throttle-coil, magnetic design, computer programs 85−1920
tokamak fusion devices, superconducting poloidal field coils design, CAD program system development 87−1926
TOKRAC, computer code system for real time PWR accident tracking simulator program 85−32325
tornado missile hazard to nuclear plants, numerical methods for risk assessment 87−9289
Torness AGR, data processing and auto-control software 88−55119
Torness AGR simulator for commissioning and operator training 87−57749
TRAC-BD1 interfacial friction predictions, comp. with NEPTUN bundle boil-off expts. 86−25822
TRAC-PF1 anal. of PWR accidents, LOFT tests L6-7 and L9-2 85−9668
TRAC-PF1/MOD1 simulation 85−9674
training simulator data collection and anal. 86−45091
training simulator for Heysham 2 nuclear power station 87−15467
training simulator validation using engineering computer codes 87−78307
training simulators, problem-oriented digital structure *(Russian)* 86−18987
training simulators, project engineering and management 86−25768
transient convective-conductive heat transfer computer code CONDIF-01 (release 2) 85−38746
transients anal. of nuclear, steam and hydroelectric plants *(Rumanian)* 86−56536
Turkey Point Units 3 and 4, pressurised thermal shock anal. with RETRAN 85−65091
TURMIS code for turbine missile risks, probabilistic anal. 86−32959
two-dimensional nuclear reactors, neutronic simulation 86−39504
two-phase flow in nuclear MHD generator, computer model 88−62632
TWOTRAN-II, analysis of SHE critical experiments for experimental very high temperature reactor 85−53450
U-tube steam generators in Kori-1 PWR, stability anal., SASG model 86−45104
UCELENA 2 computer program set for power plant piping strength checks *(Czech)* 86−61226
US pulse-echo data acquisition and processing, for fast reactors under sodium viewing 86−60188
USA, computer applications in power station control and operation 88−48740
Very Large Scale Integration and fault tolerance 88−44841

microcomputer-based data acquisition system for NMR spectrometer 86−5133
microcomputer-controlled two-pulse generator, for use in NQR spectroscopy 87−8640
modular pulse programmer use *(Spanish)* 88−44090
multifunctional pulse sequence generator for pulse NMR 88−56514
myocardial pressure meas., gated triggering device for NMR spectra processing 85−38157
NMR precision current source, construction *(Japanese)* 88−12177
NQR, DC SQUID for 30 MHz detection 85−62242
online anal. of biological materials, techniques 88−4703
opposed coil magnet calc., for large sample and unilateral NMR 85−34222
optimal deconvolution filter for high-resolution NMR spectral parameter estimation 88−72983
optimisation of magnetic coils for NMR field-cycling experiments 85−34220
oriented radioactive nuclei NMR and spin-lattice relaxation, automatic meas. 87−70385
parameter estimation by deconvolution 87−62034
particle accelerator supercond. bending magnets, multipole moments, NMR meas. technique 88−58043
passive screening of switched magnetic field gradients 87−14856
pickup for pulse NMR spectrometer 86−27168
programmable digital pulse generator for pulsed NMR spectroscopy 85−33721
proton gyromagnetic ratio, low-field, ETL expt. 88−15897
pulse EPR relaxometer, computer-controlled time-internal generator 86−67099
pulse sequencer for NMR and other applications 87−41531
pulse stretchers, high-stability 88−50067

nuclear magnetic resonance spectroscopy continued
pulsed broadband RF power amplifier design 85−54698
pulsed radial gradient system for magnetic resonance imaging, finite element/Fourier expansion 86−44640
rectangular resonator for studying electron-nucleardouble resonance 86−14469
remotely controlled crossed coils NMR probe 87−56799
RF excitation sensing system of tomograph, switching network *(Slovak)* 88−7001
RF pulse power amplifier, design *(Spanish)* 88−56491
RF technology for NMR imaging spectroscopy 87−21557
role of NMR in the context of existing medicaldiagnostic techniques 85−59279
sensitivity increase, using autodyne with precision calibrator 87−52461
spectrometer, large superconducting magnet 86−50551
spectrometer magnets, shim coil design for harmonic suppression 88−50445
split coaxial line UHF probes fabrication for high-resolution NMR expts. 88−9966
static magnetic field and gradient fields estimation 87−14496
stroboscopic integrator to register nuclear-resonance signals 88−42022
SUMRIS−Sydney University magnetic resonance imaging system, design, construction 88−23048
superconducting coil, energising by supercond. rectifier 85−62267
superconducting correction coil system for an NMR magnet 85−41084
superconducting devices appl., Czechoslovak development *(Slovak)* 88−1898
superconducting magnet, 2 Tesla, design, construction, and testing 85−35367
superconducting magnet at Orsay, performance 86−50552
superconducting magnet design for magnetic resonance imaging and spectroscopy appls. 87−74628
superconducting magnet magnet for mag. resonance imaging appls., config. and characts. 87−74629
superconducting magnetic system maximum resolution meas. at 200 MHz 88−29600
superconducting magnets for magnetic resonance imaging applications, cryostat/recondensers design considerations 87−74627
superconducting solenoids constant determ., by nuclear induction 87−77382
thin film DC SQUID amplifier, low temp, NMR detection 86−36090
tomography developments in NDT and medical appls. colloquium, London, England (March 1986) 86−33961
tomography for NDT and medical appls., review 86−34429
triangular voltage generator controlled by NTA-1024 multichannel analyser 87−5719
tunable reentrant microwave cavity 88−32396
Wyodak subbituminous coal molecular structure and reactivity obs. 86−51182
^3He, solid, nuclear free induction decay signals detected with DC SQUID 85−46071

Brunswick BWR probabilistic risk assessment, results and insights 88−23630
Brunswick NPP, computer-based performance monitoring 88−42981
Brunswick NPP, safety parameters display system, data acquisition system installation 88−42983
Brunswick Steam Electric Plant, decay, heat removal capability, probabilistic safety study 85−53522
Brunswick Steam Electric Plant, visual weld acceptance criteria 87−22051
build-operate-transfer model for NPP construction in developing countries 88−75357
building and atomic legislation, conflicts *(German)* 86−45144
building structures, modal anals. eigensolver performance, safety appl. 85−38638
bulb-type pumping station flow section design *(Russian)* 86−45195
bulk compensator, dynamic tests *(Russian)* 86−51197
bulk compensator of generator unit fed from VVER-1000 reactor, training model *(Russian)* 86−32933
bus orientated digital conduction methods in nuclear power stations *(German)* 87−64240
BWR, 1000 MWe design, variable structure adaptive control systems, feasibility 86−45058
BWR, ADMIX reactor control system from Toshiba 87−22074
BWR, advanced nuclear predictor, power distribution control 87−57816
BWR, commercial load following operation with KWU design 87−4510
BWR, induction heating stress improvement appl. to piping joint, IGSCC protection 86−19032
BWR, internal flooding initiator frequency evaluation 85−43775
BWR, piping and component replacement, safety assessment and licensing decisions 85−43824
BWR, power control system for fast load following 85−48702
BWR, power distribution minimum variance estimation 87−9320
BWR, probabilistic risk assessment, reliability allocation for power plants 86−25760
BWR, water radiolysis during accidents, H_2 and O_2 accumulation rates 85−9623
BWR 1100 MW(e) power plant, enhanced operational safety by computer technology and human engineering 85−21338
BWR 540 MW power plant pipe replacement project 87−71791
BWR 90 nuclear power plant from ABB-Atom, ALWR design 88−62109
BWR active emergency procedures monitoring, computerised system 86−45121
BWR and PWR power plant radioactive waste production comparison *(Croatian)* 86−18932
BWR at Gundremmingen nuclear power station with twin 1300 MW units, corrosion products *(German)* 87−9304
BWR computerised operator support system 88−48675
BWR core design and operating strategies for improved daily load following performance 85−15759
BWR corrosion cracking reduction by H_2 water chemistry 85−53504
BWR corrosion product removal from steel surface in aqueous coolant 86−70765
BWR decay heat removal through relief values, real-time simulation 85−9673
BWR digital feedwater control system, requirements and design specifications 88−48662
BWR digital feedwater control system, testing and installation 88−36948
BWR district heating plant, AST500 type, operating characts. *(German)* 88−17286
BWR drywell pipe replacement, measures to reduce personnel exposure, effectiveness 85−53493
BWR equipment qualification programme, backfit for Washington NPP Unit 2 85−43806
BWR feed-water system diagnosis using knowledge of system description 85−27247
BWR internal flood risk, human contrib. 86−51309
BWR load dispatching and regulation 86−33009
BWR load-follow-operation experience in nuclear power plants, 3D reactor core calcs. *(German)* 88−36998
BWR local equipment remote control and monitoring system 88−48680
BWR Mark II power plant, mitigation of internally initiated severe accidents, PRA anal. 85−53526
BWR MARK-II embedded reactor building, nonlinear seismic response anal. using substructure approach 88−10977
BWR microcomputer based stability monitor 88−48681
BWR nuclear power plant, deaeration and oxygen control during shutdown 86−33020
BWR nuclear power plants, advanced control and instrumentation systems 85−43688
BWR nuclear power station, main steam system, real-time simulation 88−10992
BWR nuclear power stations, radiation monitoring system training simulator 88−75350
BWR operating experience, appl. to plant life extension, age-related degradation study 88−43016
BWR operating experience with axially two-zoned initial core 85−43816
BWR operation and control improvement using new process computer techniques *(German)* 86−51421
BWR operational processes, progressive nuclear calcs. appl., Wurgassen NPP experience *(German)* 88−69125
BWR pipe cracking research program 86−33010
BWR piping, IGSCC mitigation using hydrogen additions in coolant 85−59961
BWR piping IGSCC control using H_2 water chemistry, Dresden-2 status report 86−25762
BWR plant analyser development at BNL, safety anals. and accident simulation 86−39316
BWR plant life extension management, cost effective steps 86−25799
BWR plant longevity, General Electric's approach 87−22027
BWR plant outage experience for General Electric design 86−25795
BWR plant surveillance and diagnosis system using noise anal. 87−71890
BWR plants, NUCAMM-80 advanced control and instrumentation system 87−71841
BWR power plant, 1220 MWe power range, design *(German)* 87−78249
BWR power plant, 1300 MWe, commissioning, organisational safeguards *(German)* 86−51261
BWR power plant, scheduled maintenance during refuelling outages, Taiwan experience 86−6490
BWR power plant, system prioritisation, PRA methodology, inspection programmes 85−48741
BWR power plant design, dynamic simulation anal. 85−59913
BWR power plant uprate, economic evaluation and implementation 86−25788
BWR power plants, chemical processes and their parameters 85−27168
BWR power plants, computerised automatic start up control 86−12636
BWR power plants, computerised operator support system with new man-machine interface 85−21337
BWR power plants, DIAREX expert system for failure diagnosis and operational guide 88−30453
BWR power plants, large-scale reliability anal. by system decomposition and integration 85−48746
BWR power plants, real-time stability monitoring method, power fluctuation, inverse system 87−71886
BWR power plants in Germany, backfitting improvements *(German)* 85−27157
BWR power plants in Germany, operating experience *(German)* 85−27218
BWR power stations, automated control rod operation system 88−62132
BWR power stations, condenser retubing with Ti piping for zero-leakage 88−23662
BWR power uprate, design margins appl. 86−25787
BWR power uprate feasibility study 87−71836
BWR pressure vessel life extension 87−71905
BWR radiation field control, in-plant demonstration at Vermont Yankee, chemistry control, Co replacement 88−36997
BWR recirculation flow control system, fuzzy logic control application 88−48732
BWR recirculation loop IGSCC detection and sizing Swiss US techniques 86−32990
BWR recirculation pipe IGSCC countermeasures in USA 86−32987
BWR recirculation piping, inspection system for IGSCC, Brunswick plant appl. 85−59902
BWR recirculation piping, probability of double ended guillotine break 86−51379
BWR recirculation piping passivation to ease maintenance 88−11026
BWR station power resin condensate polishing plant for waste reduction *(German)* 87−64283
BWR steam supply simulation using DYNODE-B package 88−75319
BWR systems, math. model development, Laguna Verde plant appl. 85−59970
BWR type nuclear plant, digital control for output regulating *(Japanese)* 86−39305
BWR vessel stub tubes, evaluation techniques for preventive repair 86−51364
BWR water level monitoring system anal., Hatch plant appl. 86−12604
BWR water-steam circuits, volumetric method for Co, Ni and Cu detection *(German)* 85−43803

nuclear power stations continued
BWR with Mark III containment, core meltdown, containment failure modes, fission product releases 85−43751
BWR-5 power plant, core damage risks, sensitivity and uncertainty anals. 85−48803
BWR-6, plant monitoring, computer system 88−48685
BWR/4 MSIV closure ATWS anal. using RAMONA-3B and TRAC-BD1 85−9671
BWR/6 Mark III, use of PRA to assess proposed QA requirement effects 85−48742
BWRs, impact of aging on availability and scram performance 86−51362
BWRs in Germany, refuelling and maintenance outage time reduction 88−17266
BWRs in nuclear power stations of Federal Republic of Germany, overview *(German)* 85−27217
BWRs with Marks I and II containments, containment performance for core melt accidents, risks 85−53525
bypass/inoperability status monitoring system, automatic, design 85−38719

Laguna Verde BWR nuclear power station, 1D math. model 88−75353
Laguna Verde nuclear plant, quality assurance development 86−39459
large hydraulic snubbers, failure study 86−51349
large scale fast breeder nuclear power stations, Superphenix description 87−15436
large scale LMFBRs, advanced monitoring and control system 86−65894
large scale soil-structure interactions for nuclear reactor containment structures 88−48663
LaSalle County station, technical specification changes 88−36950
LaSalle County Station performance, testing and maintenance, minimizing impact 86−51345
LaSalle Unit 2, cost benefits of plant hardware improvements 87−71840
LaSalle-1 BWR, water chemistry, corrosion products and radiation-field buildup 87−30342
laser scanning cameras for nuclear reactor inspection 87−50967
leak detecting 'sniffer' probe of He, for large-volume pressure vessels *(Chinese)* 86−38370
leak detection and localisation *(French)* 87−15443
legal restrictions on governmental changes *(German)* 86−45143
Leibstadt 1000 MW BWR, commissioning experience 88−30524
Leibstadt COSA containment venting system, safety assessment by PRA *(German)* 87−64328
Leibstadt nuclear plant, moisture preseparator and special crossunder pipe separator 87−71857
Leibstadt nuclear power plant commissioning 86−61239
Leibstadt nuclear power station, experience gained during construction and operation 87−42571
Leibstadt nuclear power station, organisation, planning and design *(Dutch)* 86−12573

nuclear power stations continued
Leibstadt nuclear power station, safety containment space cooling system failure effects *(German)* 86−51258
Leittechnik systems in nuclear power plants and their importance to reactor safety 85−27222
Leningrad nuclear power station interseparation and reheating modification tests 87−42589
Lepreau nuclear power station, innovative measures in operation, maintenance, commissioning and staffing 87−9310
level meas. and control in nuclear power station drum separators *(Russian)* 86−25698
liability protection for the general public in case ofa nuclear accident−Price-Anderson Act of 19578 86−13375
licenced radioactivity release levels from French nuclear facilities *(German)* 87−35723
license renewal policy, regulatory options, NRC study 88−75335
licensing, importance in technology transfer 86−39487
licensing delay cost estimation methodology and application 85−65038
licensing strategies for the 1990's, design uncertainty reduction 85−53409
life assessment studies, NDE appl. 86−51328
life expectancy prediction, uncertainty sources *(Hungarian)* 88−10967
life extension, economic aspects 87−57791
life extension, economics of refurbishment 87−35757
life extension, safety aspects of steel degradation in LWRs 86−61233
life extension, systematic and cost effective approach 86−51324
life extension and ageing, safety aspects 88−55116
life extension and maintenance, role of monitoring 87−78376
life extension criteria, safety, fatigue life and personnel irradiation 86−51220
life extension issues, overview 88−30500
life extension through predictive maintenance 85−53488
life extension through refurbishment 85−4823
life extensions, economic factors 85−4822
life-time extension of Czechoslovakian power plants *(Czech)* 87−57743
light water reactors: experience and operation *(German)* 85−15753
light water reactors improving, Japanese experiences 85−4860
lightning protection of electrical and nuclear equipment *(French)* 86−51225
Lilco's Shoreham nuclear power plant evacuation planning 87−71799
Limerick Generating Station, public risk from contaminated drinking water after accident 85−48728
Limerick nuclear station construction, maintenance of quality awareness, communication aspects. 88−62066
limiting conditions of operation monitor (LIMCOM) for Duke Power Company's McGuire Station 88−48683
liquid and solid radwaste capabilities at Surry and North Anna plants, systems eng. approach 88−42997
liquid effluents, radionuclide distribution in river, computer calc. *(Croatian)* 85−59870
liquid effluents from operating nuclear power plants, effects on water sector 88−17281
liquid metal reactor, industrialization 85−53519
liquid metal-cooled reactor design, low cost 86−33013
live steam piping, sealing using mechanical-hydraulic plugs *(German)* 86−51425
live-load valve packing to stop leakage in nuclear power plants, exposure reduction 86−65822
living schedule for maintenance and modification activities 85−4759
living schedule for plant performance improvements 85−4760
LLW classification, Limerick Generating Station compliance with regulatory requirements 88−36974
LLW generation rates at US domestic nuclear power plants, 1982-85 survey 88−36973
LLW management experience at Davis-Besse Nuclear Power Station 85−38644
LMFBR, USA innovative structural design developments 86−61264
LMFBR boiler feedwater system, multivariable control scheme design 88−23610
LMFBR core disruptive accident energetics, phenomenological uncertainty incorporation in safety anal. 85−43842
LMFBR operational and fuel cycle experience worldwide *(German)* 87−4508
LMFBR pool plant, cost-competitive inherently safe design 86−33015
LMFBR pool plant, inherent safety 86−33016
LMFBR power plant heat-pipe steam generator design *(Italian)* 86−32954
LMFBR power plants, defective fuel and fission products behaviour in coolant, CONTAMINATION code 86−65893
LMFBR power plants, design for increased competitiveness 85−59969
LMFBR steam generators, thermohydraulic anal. using porous medium model *(Italian)* 85−48701
load following generation by latent thermal energy storage *(Japanese)* 86−45097
load-following atomic heat and power plant 85−32324
LOCA containment pressure evaluation 85−48708
LOCA safety injection system failure modes *(Chinese)* 86−65843
LOFT-OECD, technology transfer for power stations 86−39456
logic flowgraph for processing failure modelling, disturbance anal. appls. diagnosis 85−32288
logic flowgraph models for computer aided process anal. and management system 88−48676
logic flowgraph-based concept for decision support and management 88−62043
long term simulation for real-time training of power system operators 87−42350
longevity potential of power stations 86−12628
loose parts evaluation techniques for nuclear power plants, MESH method 85−59954
loss of AC power, effect of grid collapse on Swedish nuclear plants 85−65089
loss of all AC power events, coping with station blackout 86−12584
loss of power events at FRG nuclear plants, redundancy in emergency power supplies 87−57754
Loviisa NPS process computer systems, replacement and development 88−48666
Loviisa nuclear plant, features, operating experience 88−30451
Loviisa nuclear power plant steam generator recombination *(German)* 85−48674
Loviisa PWR, backfitting procedures 87−15482
Loviisa PWR, process computer system replacement, simulator upgrade 87−71818

nuclear power stations continued
Loviisa PWR power plant, steam generator decontamination, dose reduction, decision making 85−15798
Loviisa PWRs, planned outages, time reduction 86−32993
Loviisa units 1 and 2, decommissioning plans 88−48722
Lovisa nuclear power plant, Finnish energy supplied from USSR *(Swedish)* 85−15724
low level radwaste, on-site storage structures, survey 85−4789
low power units for second era of nuclear power plants in USA *(German)* 85−38611
low pressure rotors for nucl. applications, missile anal. 86−51241
low pressure turbine noise from sealing glands 85−9600
low probability event treatment, appl. to nuclear power plant incidents 87−22033
low probability hazards, actual and perceived 85−32333
low-cobalt alloys for hardfacing appls. in nuclear components, performance evaluation 85−4793
low-pressure casing turbines, vibrs. and noises 85−9606
low-pressure turbine design and operating experience 87−64287
low-temperature heating from AST-300 and AST-500 reactors 85−38672
LTREE, LISP based algorithm for cutset generation, nuclear power plant fault tree appl. 85−48764
LWBR, Shippingport, neutron noise monitoring data 88−23701
LWR, 1D and 3D load following anal. methods comparison, HLOFO and CMSNAC codes 87−71805
LWR, active and passive safety, definitions and relative advantages 88−17312
LWR, advanced design programme, EPRI/industry regulatory stabilisation programme 85−53410
LWR, disturbance identification, projective operator technique appl. 88−48678
LWR, novel modular design 85−53520
LWR, operating experience with loose-parts monitoring 85−4837
LWR, safety margins reevaluation for LOCAs 86−51264
LWR, severe accident conditions, thermal-hydraulics and fission product transport in reactor containment 85−48802
LWR, steam generator and fuel assembly failure detection *(German)* 85−53448
LWR, the next generation, for viability in USA 85−53517
LWR adaptation to meet future needs of developing countries 85−43813

operator support system expt. validation using a training simulator, safety 85−21332
operator training, computerized course deficiency tracking system 87−64276
operator training by microcomputer simulation for tritium removal facility 88−17293
operator training programme eval. and accreditation 87−64272
operator training simulator, Grafenrheinfeld PWR plant 87−50930
operator/manager advisory expert system with probabilistic risk assessment 88−69111
operators, practical and psychological problems of work organisation *(Russian)* 86−65825
operators training simulators, architecture, advantages for training *(French, English)* 85−22143
optical data transmission system with variable priority of integrated information for nuclear plants *(Japanese)* 87−70047
optical fibre cables for nuclear power plant, Showa development and supply *(Japanese)* 85−3470
optimal cooling system for nuclear power plants in Transylvania *(Rumanian)* 86−39302
optimal power mix of power systems with nuclear power generation *(Japanese)* 86−70750
optimisation models of nuclear power development 86−45056
optimized approach to utility safety assurance program development 86−51335
optimum time between periodic test and maintenance for redundant systems 86−51344
ORNL Precursor to severe Core Damage Accidents study, dependent failure anal. 85−43733
Oskarshamn 3, construction quality and schedule management, successful experience 85−4800
out-of-core radiation reduction 87−50937
outage inspection program 86−25792
outage management in Finland 87−78300
outage performance, Public Service of New Jersey-Westinghouse joint study 87−78299
outage time for fuel reloading, maintenance and inspection *(Czech)* 87−42580
outage time minimization and plant availability, Swiss experience 85−27190
outages, ALARA health physics support 87−78370
outages, questions and perceptions 86−51347
overtime work and task complexity effect on operator performance 86−51307
Oyster Creek BWR, MSIV closure and bypass tests, RETRAN simulation 87−64318
Oyster Creek BWR, thermal-hydraulic anal. development using RETRAN02 and SAFER-CORECOOL 88−23702
Oyster Creek cycled 10 nodal model parameter optimization study using PSMS 87−64317
Oyster Creek emergency off-site dose assessment, ocean breeze inclusion 87−22037
Oyster Creek loss of feedwater transient, RETRAN−RELAP5 comparison 85−65095
Oyster Creek NGS, statistical treatment of safety valves during increasing-pressure transient events 88−62123
Oyster Creek Nuclear Generating Station, in-pool damaged fuel bundle recovery 88−62133
Pacific Basin operating experience 85−15770
Paks (Hungary) nuclear power plant main electrical equipment *(Hungarian)* 86−32942
Paks (Hungary) nuclear power plant measurement and control circuits *(Hungarian)* 87−64244
Paks (Hungary) nuclear power plant ventilation system commissioning and operation *(Hungarian)* 87−71797
Paks nucl. power plant, neutron physical meas. during phys. start-up *(Hungarian)* 86−12571
Paks nuclear power plant, (Hungary), water make-up system, water quality control *(Hungarian)* 86−39301
Paks nuclear power plant, laser surveillance system for spent fuel elements *(German)* 87−78330
Paks nuclear power plant, output control uncertainties *(Hungarian)* 86−39300
Paks nuclear power plant, radioactive emissions control *(Hungarian)* 88−69101
Paks nuclear power plant electrical installation and national grid connection *(Hungarian)* 86−18929
Paks Nuclear Power Station, reactor vessel test bars, mechanical and metallurgical examination *(Hungarian)* 88−55146
Paks power plant, LOF expts. at PMK-NVH facility, primary circuit dynamics, flow meas. *(Hungarian)* 87−57843
PAKS power plant, VERONA core monitoring system, SPND detectors 86−33005
Paks PWR plant, primary system corrosion deposits, in-situ γ-flux meas. 88−36956
Paks PWR power plant, boiling noise detection, neutron noise meas. *(Hungarian)* 86−12629
nuclear power stations continued
Paks reactor, consistence gauges of hermetic spaces measured for overpressure *(Hungarian)* 87−64248
Paks reactor, semi-axial water cooling pumps starting, partial immersion of running wheels *(Hungarian)* 87−64246
Paks Unit 1 nuclear power plant, operational performance, unavailability anal. and feedback 85−27191
Paks Unit 2, noise meas. using in-core self-powered neutron detector strings 87−35764
Paks VVER-440 reactor, thermal-hydraulics determs. using VERONA system *(Hungarian)* 87−57844
PAKS WWER power plant, availability and reliability, Hungarian experience 86−19043
Palisades nuclear power plant, employee involvement in radiological work practice upgrading 87−78315
Palisades radwaste volume reduction and solidification system, operational experience 86−12596
Palo Verde NPP, risk-based evaluation tool for safety-related maintenance involving scaffolding 88−42978
Palo Verde nuclear power station, RETRAN feedwater system model 88−75352
Paluel 1300 MWe PWR, start-up and initial operation *(French)* 86−25764
Paluel 1 and 2 nuclear power stations, 1300 MWe turboalternator vibr. characts. *(French)* 86−61500
Paluel 1 and 2 PWR power plants, commissioning of CONTROBLOC and SPIN automatic systems *(French)* 86−61229
Paluel nuclear power station, probabilistic safety study, EXPRESS system appls. *(French)* 88−11031
Paluel PWR plant, system reliability benchmark exercise for probabilistic safety assessments 85−48760
PANDA nuclear power station anal. package 88−75346
parallel operation, higher reliability, math. modelling *(Spanish)* 87−50636
parallel-signal-processing approach to signal validation for reactor safety 88−23685
parametric empirical Bayes methods for nuclear plant failure rate estimation for PRA 85−48731
particle accelerator control, mechanical system synchronisation *(Russian)* 85−65048
passive surveillance techniques for nuclear plant control and power circuits, TMI-2 appl. 86−51207
pattern recognition software for plant surveillance 87−71848
Peach Bottom 2, severe accident issues, regulatory anals., decay heat removal 85−48739
Peach Bottom 2 BWR, recirculation pump isolation valve disc Stellite repair 85−59958
Peach Bottom 3 BWR, creviced safe ends, US inspection for cracks 87−30344
Peach Bottom Unit 3, ALARA review for pipe replacement programme 88−42949
peak output boosting, optimum feedwater temp. *(Russian)* 86−39309
pebble bed HTR, status and prospects *(German)* 88−48729
pebble-bed HTR, active and passive safety, definitions and relative advantages 88−17312
performance goals, optimizing performance 86−51398
performance improvement program at plant Hatch 85−65056
performance improvement using traditional engineering anal., life extension 87−30312
performance incentives for nucl. power plants 87−22045
performance indicator improvements in nuclear power plants 88−62081
performance indicator program 87−71833
performance indicators and long-term goals developed by INPO 88−36972
performance monitoring at Ontario Hydro nuclear power plants 87−78372
performance monitoring at the TVO nuclear power plant 87−78374
Perry NPP, response to high freq., high amplitude, low energy earthquakes 88−48642
Perry Nuclear Power Plant, instrumentation and control, performance improvement program 87−71844
personnel, reliability of actions, effects on safety *(Russian)* 88−55112
personnel protection against radiation *(French)* 88−61486
personnel radiation dosimetry, Doel nuclear plant, Belgium *(German)* 88−68505
personnel training, utility accreditation programme 86−13323
personnel training for commissioning, operation and maintenance *(Slovak)* 88−17264
personnel training program *(Russian)* 86−32936
personnel training using KWU analysis simulator *(German)* 87−78399
PFR, operating experience, review 86−45062
PGV-2000 steam generator, hydrodynamics investig. at Novovoronezhskaya atomic power station *(Russian)* 87−71792
phase-in, load forecasting and utility regulation 87−22040
phased approach to nuclear plant life extension 88−10983
Philippine nuclear power program, safety, training and economics 85−59877
Philippsburg 2 nuclear power plant, computer based process information system *(German)* 87−57818
Philippsburg nuclear power station, acceptance tests eval. on 1300 MW unit *(German)* 87−57798
Philippsburg nuclear power station, natural draught wet cooling tower *(German)* 85−4738
Philippsburg Nuclear Power Station, Unit 2 construction *(German)* 85−38609
Philippsburg-2 nuclear power station district heat generation, economic efficiency anal. *(German)* 85−4737
Philippsburg-II NPP, experience with RHR 300-830 decay-heat coolant pump *(German)* 88−69118
Phillipsburg Block 2, optimisation of primary control operation *(German)* 87−78397
Phillipsburg power station, power output improvement *(German)* 87−78396
photogrammetry applications for safety related components 87−78377
photogrammetry techniques, appl. to reactor vessel, steam generator 88−62099
PHWR, 300 MWe design, introductory model, technology transfer 86−39320
PHWR power plants in India, operational experience, safety enforcement 86−19047
PHWRs in India, accident sequence identification using probabilistic risk assessment 85−43848
Pickering A, operator-machine interface upgrade, annunciation system 88−48684

nuclear power stations continued
Pickering A CANDU plant, leakage from biological shield cooling system 87−50974
Pickering NGS, channel temp. meas. using resistance temp. detectors 88−75381
Pickering NGS, large scale fuel channel replacement project, struct. and management 88−75280
Pickering NGS, maintenance forecasting model 88−75376
Pickering NGS, spring location and repositioning operations, program management 88−75374
Pickering NGS B, maintenance strategies for Incoloy 800 heat exchangers 88−75281
Pickering NGS large scale fuel channel replacement program, production loss anal. 88−75378
Pickering NGS Unit 1 & 2 recommissioning for CANDU reactor at Ontario Hydro 88−37004
Pickering NGS-B, calandria inlet line failures and repairs 88−75368
Pickering Nuclear Generating Station, outage management techniques 87−78301
Pickering operations fuel performance review 87−57845
Pickering Unit 2 CANDU reactor, Zircaloy-2 pressure tube failure anal. 85−21385
Pilgrim nucl. power station, plant performance improvements based on root cause anal. 88−11005
pilot scale power plants with BN-350 and BN-600 fast reactors, operating results *(Russian)* 86−65859
pipe bends for nuclear plants, manufacture and fitting, hot and cold bending *(German)* 86−51260
pipe networks, hydraulic conditions simulator modelling *(Russian)* 86−51198
pipe support optimization in nuclear power plants 86−32964
pipe system antivibration mountings, number reduction in older power plants *(German)* 86−51259
pipe whip tests for power plants, nonlinear dynamic anal. 86−61236
pipe-wall thinning, NUMARC program 88−62060
pipe-work components for nuclear power plants, standardization w.r.t. effects on joints *(German)* 86−51415
pipe-work components in nuclear power plants manufacturing techniques, tolerances *(German)* 86−52078
pipework repair or replacement planning 86−51222
pipework replacement for BWR and steam generators, experience of Power Cutting 85−106
piping, inspection and repair methods 88−23617
piping and pressure vessel inspection by adapted medical ultrasonic imaging techniques 85−54173
piping and support engng., national development for technology transfer 86−39355
piping criteria and construction costs 87−35767
piping design criteria and research dynamic design, NRC activities, earthquakes 88−48645
piping design using ISAP-III, integrated structural anal. program *(Japanese)* 86−51215
piping or equipment mounted on two points of a multistorey struct., seismic anal. 86−45065
piping seismic adequacy criteria recommendations based on performance during earthquakes 88−48644
piping support system optimum design *(Japanese)* 85−38623
piping supports under high-freq. excitation, load transfer behaviour, power plant appl. 85−27184
piping system seismic design, positive use of damping devices, experience and proposals 88−11021
piping systems, design review for nuclear plants 85−9612
piping systems, dynamic test data, comparison with analytical methods 87−9299
piping systems, economic safety evaluation *(German)* 85−48676
piping systems, high amplitude dynamic tests, seismic protection, safety margins 85−43723
piping systems, methods of equivalent damping estimation 87−78389
piping systems, plant life extension program 86−51235
piping systems, seismic response, model expt. studies 85−48719
PIUS and SBWR nuclear power stations, active and passive safety systems *(Dutch)* 88−36929
PIUS BWR with passive ECCS and prestressed concrete pressure vessel 86−25802
PIUS BWR without ECCS, 400 MW(e) plant design 86−25801
planned outage, preparation and training 85−27194
planned outage times, improvements 86−39329
planning with CAE *(German)* 87−22055
plant aging, preventive maintenance 86−51392
plant aging and design bases documentation 86−51402
plant analyser, computer codes for system anal. 85−59915
plant analyser, interactive power plant computer simulation for thermal-hydraulic behaviour 85−59916
plant automation and CRT display system 88−42995
plant availability, impact of technical specification surveillance requirements and allowable outage times 86−51244
plant availability improvement by reactor trip prediction software 87−9317
plant availability improvement through maintainability factors in station design 85−9610
plant backfit proposals, NRC perspective on use of probabilistic risk assessment 85−53441
plant component decontamination by ice-blasting *(Japanese)* 87−78258
plant component reliability and availability rel. to quality assurance 86−6498
plant components, dynamic loads, effects 88−55111
plant computer control system, operating experience 86−70762
plant construction, electrical energy related problems *(Romanian)* 88−62024

PWR steam generators, IGSCC at Ringhals 2 in crevice region 85−38773
PWR steam generators, IGSCC on primary side, roll transition shape influence 85−38774
PWR steam generators, improved U-tube design for replacement purposes 85−38789
PWR steam generators, Inconel 600 susceptibility to pure water SCC 85−38786
PWR steam generators, Inconel tubing stress corrosion performance 85−38781
PWR steam generators, Inconel-600 stress corrosion cracking susceptibility 85−38780
PWR steam generators, Japanese operating experience 85−38753
PWR steam generators, LOBI-MOD2 simulation, accident scenarios, operating procedures 85−38770
PWR steam generators, multiple tube ruptures, thermohydraulic calcs. 85−38767
PWR steam generators, NRC program for unresolved safety issues resolution 85−38798
PWR steam generators, operating experience, regulatory bases 85−38751
PWR steam generators, optimal level controller 87−64253
PWR steam generators, Point Beach Unit 1, replacement project 85−38792
PWR steam generators, preheat flow induced vibration effects 85−38756
PWR steam generators, preheated, flow induced vibration 85−38795
PWR steam generators, preheater type, accelerated wear experience 85−38758
PWR steam generators, radiation monitoring, in-service inspection 85−38761
PWR steam generators, replacement experience at Obrigheim Germany 85−38790
PWR steam generators, Ringhals Unit 2 outage, health physics review 85−38754
PWR steam generators, solute concentration in crevices 85−38772
PWR steam generators, tube degradation, preventive and corrective actions 85−38788
PWR steam generators, tube degradation examinations 85−38777
PWR steam generators, tube fretting flaws, CI-10 evaluation program 85−38762
PWR steam generators, tube fretting in preheated systems 85−38791
PWR steam generators, tube rupture, accident consequences mitigation 85−38765
PWR steam generators, tube rupture, French licensing process appraisal 85−38793
PWR steam generators, tube rupture, Italian regulatory trends 85−38794
PWR steam generators, tube rupture induced severe plant transients 85−38768
PWR steam generators, tube rupture procedure review for Borssele station 85−38769
PWR steam generators, tube rupture safety anal., NRC perspective 85−38764
PWR steam generators, tube rupture safety anal., operating procedures 85−38766
PWR steam generators, tube support and sections examination 85−38776
PWR steam generators, tube surveillance, in-service inspection, regulatory requirements 85−38759
PWR steam generators, tube vibration in Westinghouse model D3 generators 85−38757
PWR steam generators, tubing critical flaw sizes 85−38778
PWR steam generators, tubing roll transition cracks 85−38779
PWR steam generators, vibration induced tube wear, Swedish regulatory approach 85−38797
PWR steam generators, water chemistry balance effect on corrosion 85−38787
PWR steam separator modelling during transients 88−11032
PWR steam supply simulation using DYNODE-P system 88−75316
PWR steam turbine design for British and Chinese power stations 87−78262
PWR technology establishment in UK 86−39330
PWR technology transfer from France to Korea 86−39383
PWR thermal-hydraulic characts. during commercial operation, steam generator secondary water chem. 87−42612
PWR under accident conditions, auxiliary building dynamic containment, liquid effluent reinjection 88−48754
PWR units, failure anal. using causality method, reliability data bank appl. 88−10995
PWR units of nuclear power stations, computerised information processing *(French)* 86−18935
PWR valve packing and gland design improvements for leakproof boxes, French study 85−38647
PWRs, advanced construction techniques used for Takahama 3 and 4 units 85−32317
PWRs, comparison of worldwide occupational exposures 86−39418
PWRs, experimental valve qualification 88−23672

nuclear power stations continued
PWRs, fire control system, grey mode control 86−56571
PWRs, French, operation, maintenance 88−30496
PWRs, Japanese annunciator system for control room, accident conditions 87−78319
PWRs, microcomputer model on IBM personal computer, H.B. Robinson Unit 2 appl. 85−59971
PWRs, Paluel, 1300 MWe, external core meas. *(French)* 87−50936
PWRs, potential for elimination of soluble poison control 85−53514
PWRs, safety regulations for maintenance periods and servicing arrangements *(German)* 88−69126
PWRs, use of NDT during manuf. and in-service inspection, French developments 85−27239
PWRs, Westinghouse design, refuelling outages anal. 85−48785
PWRs for electric power generation, history and worldwide development 85−9649
PWRs in Canadian power stations, steam generator tube performance survey 85−32286
PWRs in France, EdF technical and ergonomic eval. of control rooms 87−78312
PWRs in France, safety experience 87−71812
PWRs in French nuclear power stations, present situation and prospects *(French, English)* 85−32318
QA pitfalls avoidance 85−4801
QA policies and procedures 85−53480
QA program and balance-of-plant system reliability improvement 85−21374
QA program implementation 86−25774
QA program management controls 86−25778
QA program optimisation 86−25777
QA support of preoperational testing 85−53482
QA trend analysis program for nuclear plants 88−23648
QA trending for management assessment 88−23650
QATTS Quality Assurance Tracking and Trending System for nuclear plants 88−23647
Qinshan nuclear power plant, design and construction 86−6537
QUAD+ BWR fuel assembly demonstration program at BrownsFerry plant 86−33011
Quad Cities-1, decontamination using CAN-DECON, LOMI and associated processes 88−36959
qualification concepts for instrumentation and control systems of nuclear power plants 87−15496
qualification for safety-related equipment and replacement parts 88−42956
qualification programmes for ageing and safety, critical component determ. *(French)* 88−48705
qualification standards for safety related electricalequipment *(French)* 86−19009
qualification testing of equipment and components *(Italian)* 85−48711
quality assurance, cost reduction 85−4830
quality assurance, design and construction verification 85−4777
quality assurance, engineer's role 88−48651
quality assurance, issues and outlook from industry's perspective 85−4826
quality assurance, legal implications 85−4829
quality assurance, survival of an industry 85−4828
quality assurance and quality control in operation, maintenance and repair 85−27202
quality assurance considerations for nuclear plant modifications 88−48652
quality assurance for maintenance work in nuclear power plants *(German)* 85−59886
quality assurance techniques 87−57792
quality awareness on a nuclear power construction project 85−38649
quality control during plant outages 85−53483
quality costs in perspective 85−4832
quality improvement, practical approach 85−4831
quality improvement without cost increases 85−4834
quality team approach to valve reliability 88−42953
quantitative performance monitoring in an operating nuclear plant 88−23651
quantitative safety goal, appl. to incident and accident sequence anal. 85−43736
quick-acting valves for nuclear power stations 88−36926
raceway systems for Class 1E circuits, IEEE standards 87−57801
radiation control system in nuclear plant *(Japanese)* 86−39306
radiation control to improve nuclear power plantavailability 86−51399
radiation exposures from coal-fired and nuclear power plants, comparison 88−30449
radiation impact of Chernobyl in Western Europe 87−22065
radiation protection legislation effect on workers and public *(German)* 86−45145
radiation safety improvement *(Slovak)* 88−17263
radiation shielding problems, use of rules of thumb and simplified methods 86−25720
radioactive aerosols, remote sampling methods 88−17246
radioactive pollution, relative population exposures from coal-fired and nuclear power plants in India 87−64358
radioactive waste, assay methods at power plants, gamma-ray emitter conc., radiochemical techniques 88−36947
radioactive waste disposal and environmental pollution *(Italian)* 86−25701
radioactive waste policy act, 1982, high level waste disposal 86−25831
radioactivity distribution determination in nuclear power plant systems, radiation protection 86−25721
radiological emergencies, mobilisation of robotic and teleoperated mobile vehicles at accidents 87−22036
radiological emergencies from nuclear power plant accidents, CRAC2 calcs. *(Spanish)* 85−53392
radionuclide measurability for severely failed nuclear power plant fuel, RIBD code 88−30518
radionuclide release from severe nuclear power plant accidents, APS study group report 86−6479
radionuclides, environmental dose assessment methodology, research and development 85−32298
radwaste disposal economics, overview 86−25734
Rajasthan Atomic Power plant I real-time simulator, training appl. 85−32302
Rajasthan Unit 1, fuel channel removal 85−48799
ramified systems of boiling-condensate piping, hydraulic design 87−35815
Rancho Seco Power Plant, inspection guidelines from generic PRA information 87−57769
Rancho Seco PWR, outage management organisation in a small utility 86−25793

nuclear power stations continued
RAPID, reliability assessment program with in-plant data, for nuclear power plants 88−30452
RAPID plant status monitor, lessons learned from PSA, Oyster Creek plant appl. 87−78320
RAPID/PSM software for nuclear power plant status monitor 88−62048
RAPID/RAM-UM system for reliability assessments 87−71849
Rapide 1500 project, evolution of fast reactor design in France *(French)* 86−65863
rarely used inventory stocking logic, spare parts management for improved availability 87−71837
RASCAL dosimetry model for nuclear power station accidents 88−75324
RBMK 1000 pressure tube water cooled graphite moderated reactor operation, Chernobyl *(Polish)* 88−17323
RBMK power stations, state-of-the-art and development prospects 85−32321
RBMK reactor power station, condensate circuit corrosion during outage 86−45069
RBMK reactor with defective emergency cooling system connection, safety *(Russian)* 86−32976
RBMK type nuclear power station, steam separation in drum separator 88−23675
RBMK-1000, control valve working life estimation using continuous Markov processes 85−59925
RBMK-1000, coolant O_2 concentration, effect of feedwater deaeration 86−45109
RBMK-1000 power plants, design and operational safety arrangements *(Russian)* 85−21318
RBMK-1000 reactor, operator training simulator, software development *(Russian)* 87−71876
RBMK-1000/LWR comparison, differences in fuel coolant and moderator, Chernobyl accident *(Dutch)* 87−9292
RBMK-1500 reactors, water treatment plant 85−4782
RCC-M codes, practical impact on nuclear power station construction *(French)* 86−18954
reactivity constraints and the automatic control of reactor power 85−21383
reactor, cost estimation within regulatory process 87−71869
reactor accident simulation for fissile materials 88−75407
Reactor Analysis Support Package, introduction and overview 86−56551
reactor building seismic response with regard to different soil props. 88−10978
reactor calculations as a part of nuclear powerdevelopment efforts 86−39479
reactor containment, long-term creep calc. using modified TEMPSTRESS code 85−4770
reactor coolant pumps for French PWR programme 85−15763
reactor decommissioning assessment, radionuclide source term meas. 88−75399
reactor decommissioning in W Germany, comparative study 88−75398
reactor display systems upgrading 87−15471
reactor engineering technology transfer. 86−39368
reactor internal sleeves, brazing to extend service life 85−15745
reactor operations, computer appl., artificial intelligence program 88−48690
reactor operator licensing exam. simulators, qualification procedures 88−48665
reactor optimal control system design by generalised spectral factorisation 88−55148
reactor physics, developments *(Dutch)* 87−71880
reactor plant licence/lifetime extension 85−53486
reactor plant probabilistic safety studies 86−32952
reactor power supply system reliability anal. using S.ESCAF simulator 88−48451
reactor pressure vessel, underclad defect repair influence on heat-treated zones 86−19031
reactor pressure vessel manipulators, functions and basic concepts *(German)* 87−35751
reactor pressure vessel radiation damage monitoring by improved surveillance programmes 88−48716
reactor protection software, verification and validation methodology 88−5493
reactor protection systems purposes and designs *(German)* 85−38700
reactor safety, calculation program validation using high-speed cinematography 86−12622
reactor trip breaker configurations, commun. cause modelling, model quantification 85−48812
reactor unit adaption to grid requirements, safety, G-mode *(French)* 86−18968
reactor vessel annealing to mitigate radiation effects 86−51355
reactor vessels dosimetry *(Hungarian)* 87−64247
readiness review program at Vogtle Unit 1 85−53481
real-time alarms processing using expert system 88−62047
real-time executive for basic principle simulator 88−17288
real-time simulation for nuclear power plants and fuel pin performance 87−78308
real-time steam generator simulation for full-scope CANDU nuclear training simulators 88−75302
reconstituted Charpy specimens, extension of R.E. Ginna reactor vessel surveillance data 86−51219
reduced downtimes through planned inspection andmaintenance 85−53462
redundancy management procedure for fault detection and isolation 87−15492
redundancy optimisation problems, dependent failures 86−51409
redundant reactivity control system for ATWS 85−43695
referendum on Swedish nuclear power, IVA and energy ministry viewpoints *(Swedish)* 85−4745
Refuna (Switzerland) nuclear-powered district heating scheme 86−32946
regulated availability goals 86−51412
regulated public utilities, failed/abandoned projects costs allocation 85−16664
regulating valve with increased resistance to cavitation erosion *(Russian)* 87−9366
regulation of future projects, legislative and administrative reforms 85−53411
regulators role for operating plants, licensing 88−62061
regulatory and licensing procedures in China 88−30483
regulatory approach for nuclear plant poweruprating 86−25785
regulatory criteria for use of computers in nuclear power plants 88−48673
regulatory implications of procurement practices at operating reactors 85−21375
regulatory initiatives toward improved technical specifications 85−43752
nuclear power stations continued
regulatory performance, utility perspective 85−21365
regulatory process in Canada, safety goals 88−30485
regulatory processes affecting early site approval 85−53407
reinforced concrete shear walls in nuclear power plants, probab.-based design criteria 87−22024
reinspection methods implemented for quality 87−22049
relay chatter impact on availability following seismic event 86−51236
reliability, availability and maintainability (RAM), program results 88−10998
reliability analysis methodology at the Alto Lazionuclear power plant 86−39327
reliability analysis of Markov systems, Monte Carlo methods, nuclear power plant appl. 85−48765
reliability and availability analysis of parallelsystem with common-cause failures and humanerrors 86−51250
reliability and availability as function of subsystem structs. and safety restrictions 85−32330
reliability and availability enhancement, generic software package 87−9278
reliability and risk allocation, decision-theoretic methodology 85−43737
reliability assessment from statistical operating data anal. 86−51582
reliability assessments, human factors, task analysis-linked eval. technique 88−62041
reliability based maintenance for reduced nuclear plant cost and enhanced safety 86−51208
reliability centred maintenance 86−25791
reliability characteristics, prior distribs., for Swedish nuclear power plants 85−48732
reliability critical maintenance, airline experience, nuclear plant appls. 86−25758
reliability engineering, historical perspective 85−15728
reliability engineering, reduction of plant failure rates 85−49315
reliability engineering methods appl. to nuclear plant maintenance programme optimisation 88−42954
reliability engineering techniques for nuclear power plant system *(Japanese)* 88−17261
reliability information system for power plant maintenance *(German)* 86−25702
reliability information systems *(Czech)* 86−65820
reliability of controls and instrumentation, use of ICs and LSI 86−4945
reliability-centred approach to maintaining nuclear plants 88−17265
reliability-centred maintenance progress report 87−9281
reliability-centred maintenance techniques 87−5300
relicensing procedures, preliminary evaluation and safety anal. 87−42601
reload methodology transfer from vendors to utilities 86−32691
remote, automated inspection systems and services for nuclear power plants 85−21309
remote automated inspection and maintenance of nuclear power plant equipment 85−43687
remote control application of a programmable controller 85−4805
remote control nuclear maintenance hardware 86−25835
remote control tooling for maintenance and in-service inspection 86−25839
remote controlled multipurpose vehicle for nuclear applications 85−48797
remote handling equipment, for maintenance and monitoring operations *(French)* 85−38651
remote handling in nuclear facilities, conf., Oxford, England (Oct. 1984) 85−44396
remote heating from Muhleberg nuclear power station *(German)* 86−56543
remote maintenance equipment development for nuclear plants 86−25838
remote multipurpose vehicle for nuclear appl. 86−25841
remote siting for enhanced safety, utility population projections 85−43679
remote vehicle for hostile environments 86−61277
removal from operation *(Russian)* 87−35725
repair using Isis robot system *(French, English)* 87−15460
repowering of terminated nuclear plants with alternative power sources 85−59887
Republic of China nuclear power plants, radiation safety experience 86−18941
research and development of nuclear power plants by Vattenfall in Sweden *(German)* 85−4736
research equipment and installations in France 88−17278
residual radionuclide contamination, origin, distrib., inventory, decommissioning assessment 85−27159
RETRAN computer code for reactor transient anal. of nuclear power station steam supply 85−32277
retrofit of new digital control systems in existingpower stations 86−61290
reversible valves, hydraulic characts. and operating lifetime *(Russian)* 86−61220
Ringhals 2 steam generator reliability 86−51359
Ringhals 4 PWR plant, radioactive corrosion product build-up, primary coolant chemistry effects 88−36955
Ringhals Nuclear Power plant, modifications, design assurance programme 86−19029
Ringhals PWRs, high constant pH water chemistry, dose and corrosion control 88−11022
risk, failure rate, unavailability, insignificant difference criteria 86−51396
risk, reliability, availability, living PRA concept 86−51407
risk anal. and public controversies of nuclear energy 85−59879
risk anal. methodology *(Japanese)* 86−51216
risk analysis, containment event tree analysis for source term frequency estimation 85−43750
risk assembly and decomposition for risk management 85−43794
risk assessment, human reliability anal. 86−51311
risk assessment, programmable controller fault tree models 86−61245
risk assessments and safety goals, UK perspective 88−5458
risk evaluation, seismic related design and construction errors 85−43774
risk from nuclear power stations, PRA calcs. and radiation effects 88−62023
Risk Management Query System 87−9283
risk perspectives and the use of risk-based information in regulation 87−71881
risk reduction through human perform. management 88−11008
risk studies of accidents *(German)* 87−35742
risk-based analysis of allowed outage times innuclear power plants 86−25771
risk-based methods for technical specification improvement, appl. to LaSalle BWR 87−71838
River Bend nuclear power station construction, reasons for still being on target 85−75
River Bend Station Unit-1, nucl. construction project, planning and scheduling 87−71864

San Onofre nuclear power station, USA, tripping reduction study 88−75272
San Onofre PWR, pressure vessel life expectancy, fuel management option effects 85−53490
San Onofre Unit 1, water hammer event in 1985, lessons learned 87−57838
San Onofre Unit 1 nuclear plant, return to service, project management, regulatory constraints 87−64292
San Onofre Unit 2, reliability-centred maintenance, appl. to auxiliary feedwater system 87−78362
San Onofre Unit 2 PWR, transient test documentation for code validation 86−39494
San Onofre Unit 2 turbine trip from 100% power, RETRAN anal. 85−65094
San Onofre Units 2 and 3, fuel performance data from coolant activity levels 86−19013
Santa Maria de Garona BWR, upgrade modifications to safety equipment 87−22026
Santa Maria de Garona nuclear plant, recirculation loop replacement 88−62108
saturated-steam turbine distribution selection, throttle and multiple nozzle control 85−4778
Saudi Arabia, nuclear technology transfer proposal 86−39466
SCAM cooling system, energy economy *(French)* 85−27187
Scandinavian BWR outage performance 86−32992
schedule reconciliation tests for management prudency determination 87−22047
SCORPIO core surveillance system 85−27230
scram prevention techniques at River Bend nuclear power plant 88−62082
scram reduction, appl. of reliability based methodology 87−71891
scram reduction at San Onofre nuclear generating station, human factor engineering 88−62084
seabed nuclear plant for electrical power, conceptual study 86−25718
Seabrook nuclear power plant, level 3 probabilistic risk assessment 85−48758
Seabrook PWR, pin power reconstruction using SIMULATE-3 PDQ comparison 88−23697
Seabrook Station, PWR, consistent probabilistic methodology for containment event tree anal. 85−43748
Seabrook Station, PWR, containment failure pressure anal. for probabilistic safety assessment 85−43747
secondary circuit water supply pumps, operational experience and design dev. *(German)* 88−69117
secondary pumps and straight-tube steam generators forfuture LMFBR power stations 86−65895
SECURE reactors for district heating and electricity generation 88−30522
Secure-P PIUS power station, modularised design 86−51280
security checks for nuclear installations *(German)* 86−45094
security during safety-related emergencies at nuclear power plants, safeguards 85−38645
security system, optimum check interval definition 88−36928
security systems, criteria for selection and appl. of equipment, IEEE standards 87−22052
seismic analysis in safety evaluation *(French)* 88−11016
seismic anchorage guidelines for nuclear plant equipment 88−48633
seismic behaviour of shear wall structs., expt. investigation, US NRC programme 88−48639
seismic design, less-costly approach following Mexican 1985 earthquake 86−65891
Seismic Design Margins Program, status and overview, Maine Yankee study 88−75338
seismic design strategy decision anal. 85−32301
seismic events, impact on containment and consequence anals., risk estimates 85−48723
seismic functionality of essential relays in operating nuclear plants 88−48634
seismic ground motion in Central Europe and nuclear power station design *(German)* 87−15474
seismic hazard analysis, parameter and model uncertainty in PRA 85−43739
seismic hazard and fragilities, use of data and judgment 86−61268
seismic hazard methodology for the central and eastern USA 87−15463
seismic isolation, technical and non-technical aspects in decision making 85−38635

nuclear power stations continued
seismic isolation using sliding elastomer bearing pads, review 85−38634
seismic margin assessment procedure for operating nuclear plants 88−48636
seismic margin assessment using walkdown criteria, ruggedness screening criteria 88−48638
seismic margin reviews for probability risk assessment using screening approach 88−42942
seismic margins for operating nuclear plants, safety and regulatory issues 88−48637
seismic monitoring system for Caorso nuclear powerstation *(Italian)* 86−44091
seismic probabilistic risk assessment, seismic margin studies impact 88−48635
seismic probabilistic risk assessment, systems anal. uncertainties 85−43773
seismic probabilistic risk assessment for nucl. power plants 85−43772
seismic qualification of safety related equipment 85−65046
seismic risk quantification for design and construction errors 87−9301
seismic safety, field testing and shaking table test, computational mechanics 88−55142
seismic stability of electrotechnical equipment during earthquakes *(Russian)* 86−32937
seismic stops versus snubbers, seismic response using RLCA-GAP code 88−48649
seismic surveillance of nuclear power plants, ISMES developments 88−55144
seismic test data, EPRI uses, equipment qualification and ruggedness 88−48632
seismic test for instruments to be used in nuclear plants *(Italian)* 86−60105
seismic tests of Czechoslovak nuclear power plants *(Czech)* 85−38624
seismic unresolved safety issues and generic issues, US NRC programme 88−48631
seismic verification of nuclear plant equipment anchorage 87−78325
selecting materials for electrical components 85−9579
selection criteria and requirements for floors in nuclear plants *(German)* 87−42596
self-assessment program for Commonwealth Edison Company 87−78371
semiautonomous robotic system for surveillance, maintenance and emergency response work 87−57785
seminar on understanding Chernobyl, London, England (Sept. 1986) 87−50975
Semiscale Power Loss Experiment S-PL-3 with primary feed-and-bleed plant recovery 85−9670
sensitivity and uncertainty analyses, response surface methodology performance 85−43743
sensor failure detection with a self-checking scheme 88−62075
separator superheater system of turbogenerator, thermal tests at Chernobyl nuclear power station *(Russian)* 87−15433
separators-superheaters under parallel operating conditions at Novovoronezh nuclear power station *(Russian)* 86−39293
sequential control systems appl., fault tree synthesis *(Japanese)* 86−52305
Sequoyah Power Plant, full-scale safety and availability anal. using GO methodology 86−6495
Sequoyah PWR, low leakage fuel management 87−22080
Sequoyah-1 power plant, long-term automated surveillance system 85−59949
serious reactor accident, estimate of economy wide financial risk 85−48805
service activities, special ancillaries, welding techniques and sequence planning 86−51376
service life determination and extension, maintenance strategies, safety system failure prevention 88−62035
service period extension of metallic components of equipment *(Russian)* 87−42577
service technology transfer to the nuclear industry in Spain 86−39345
Serviceability evaluations at Fermi 2 86−51300
severe accident management in United States, NRC implementation 88−75343
severe accident risks, rebaselining, power plant postulated safety backfit effects 85−48738
severe accident scenarios following externally initiated events in a commercial nuclear power plant 88−75409
severe accidents, aerosol behaviour simulation codes 88−62036
severe core damage frequency from loss of offsite powerinitiated sequences 86−51403
severe reactor accidents, sequences and consequences 87−22069
SHARP framework for incorporating human interactions into PRA studies 85−43799
Shearon Harris NPP, digital implementation of ATWS mitigation system actuation circuitry 88−43012
Shearon Harris nuclear power plant, spare parts programme development 88−23632
Shearon Harris Nuclear Power Plant (SHNPP) condensate and feedwater system reliability study 88−5452
Shearon Harris PWR, water hammer experience during startup and early operation 88−23705
Shearon Harris Unit 1 PWR, turbine trip test, RELAP5/MOD2 comparison with plant data 88−23704
SHERPA, human error reduction and prediction, computer-assisted technique 88−11007
ship-borne nuclear power plant, parameter optimisation, combined criterion 85−59865
Shippingport Atomic Power Station, decommissioning programme, estimated costs 85−32306
Shippingport Atomic Power Station decommissioning, operational experience 87−57765
Shippingport Atomic Power Station decommissioning project 87−57763
Shippingport atomic power station decommissioningprogram and applied technology 86−61238
Shippingport nuclear power S?tation decommiS?S?ioning planning 85−15762
Shippingport PWR decommissioning project 86−18997
Shippingport Station Decommissioning Project, barge transportation of waste, economic and safety aspects 87−57766
Shippingport Station decommissioning project, cost/schedule control system 87−57764
Shippingport Station Decommissioning Project, quality assurance program 87−57768
Shippingport Station Decommissioning Project, sampling plan for unconditional release of materials 87−57767
Shoreham nuclear power plant, technical, regulatory, political and economic problems 88−23613

nuclear power stations continued
short-circuit current boosting from induction motors *(Russian)* 86−25697
short-distance heat supply system development *(Hungarian)* 87−71796
short-distance space heating reactor *(German)* 85−43802
shut-off valve, vibr. tests of hydraulic drive 88−23671
shutdown nuclear plant, probabilistic safety assessment using process flow model, Zion appl. 86−70757
shutdown probabilistic safety assessment, process flow model appl. 87−42588
SICLE numerical model for moisture separator reheater, condensation front modelling *(French)* 88−69100
signal validation software at Millstone units 2 and 3 user's guide 88−30501

Sizewell B PWR, regulatory approach to containment struct. assessment in UK 88−48727
Sizewell B PWR, steam generator design for nondestructive exam. requirements 87−35756
Sizewell B PWR design modifications 87−50962
Sizewell B PWR nuclear power station, public enquiry and safety 87−57737
Sizewell B/PWR power station, preparation overview 85−65035
Sizewell inquiry, effects on UK nuclear power plant industry 85−9585
Sizewell nuclear power station, economic considerations for consumers 85−9588
Sizewell PWR, net effective cost model 85−15784
Sizewell-B and PWR programme, energy demands, CEGB role 88−55125
SKODA saturated steam turbines and reactor fabrication *(German)* 88−75363
SKODA steam turbines automation, for thermal and nuclear power plants *(Czech)* 85−60018
Skodaexport power equipment for USSR, an overview 85−91
SLIM-MAUD, computer based technique for human reliability assessment in BWR plants 85−53422
Slowpoke heating reactor, technical and economic feasibility 85−38675

nuclear power stations continued
small and medium power reactors, world market 86−12581
small and medium size reactors, economy of scale factors 86−6538
small and medium size reactors in Pakistan, KANUPP performance 86−6541
small and medium-sized nuclear power plants *(German)* 86−56532
small Canadian reactors for heat, electricity, research and isotopes 87−78414
small HTR in underground silo, concept for urban siting 87−15493
small modularised LWR plants, feasibility study, construction and costs 85−65113
small reactor economics for utility systems 85−4771
small reactors, financing and design approach 85−53518
small specimen test techniques, appl. to power plant reliability problems 86−51242
small- and medium-sized nuclear power plants, prospects assessment 85−38722
SNR-300, commissioning, licensing delays *(German)* 86−56559
SNR-300, protection against Beth-Tait accidents *(German)* 86−32974
SNR-300 power plant, design, safety features, economics *(German)* 86−18985
SNR-300 Project, status, develop, and pre-nuclear test runs *(German)* 88−10970
snubber inservice inspection, cost reduction through snubber reduction and improved test limits 88−48647
snubber reduction program, cost benefit 86−61243
snubber reliability from Licensee Event Report data 86−51351
snubbers, Nuclear Plant Aging Research Program, Phase I study and Phase II plans 88−75340
SNUPPS standardised nuclear unit power plant system 87−22031
SOCRATES code for risk based anal. of technical specifications 85−43753
SOCRATES program for nuclear plants, risk-based eval. of technical specifications 86−39389
Sofia IRT-2000 reactor, radiation control and pollution studies *(Russian)* 86−33004
software development for nuclear power station process information system 87−15461
software for nuclear plant management and control 88−48687
software reliability in nucl. power plant appl. 88−11000
software verification and validation programme 85−27260
soil-structure interaction anals. based on time and freq. domain approaches, damping 85−38639
soil-structure interaction design in Japan, simulation anal., review 85−4755
solenoid valves, comparison of ageing effects during nuclear accident simulations 85−41572
solid radwaste from nuclear plants, regulations and programme in France 88−17283
solid waste incineration for nuclear power stations *(Russian)* 86−25694
Southern Ukraine nuclear power station turbine and 1 GW generating unit efficiency tests 87−78285
Soviet nuclear power industry, cost reduction of power *(Russian)* 87−15432
space heating type nuclear heat supply station, coolant vapour phase in core riser 88−23622
space vehicles power plants, using nuclear power, NASA and DOE research project 85−26867
space-heating from homogeneous heat producing reactor 85−38681
spacecraft using nuclear power, liquid droplet radiator for heat rejection system 85−48404
Spanish nuclear power plants, technology transfer of operation and maintenance assistance 86−39366
Spanish nuclear program, services engineering 86−39490
Spanish Nuclear Safety Council and operational nuclear power plants in Spain *(Spanish)* 85−21321
Spanish power stations, computer-assisted operation and maintenance management system 87−15455
spare and replacement parts, procurement and control, regulatory perspective 88−23636
spare parts, issues and answers 88−23635
spare parts classification and procurement program 87−71853
spare parts inventory system proposal 86−6533
spares management for improved maintenance 87−57782
special events in nuclear power plants, exchange of experience *(German)* 87−15424
spent fuel and radioactive waste management, Swedish program 85−27175
spent fuel cask handling at an operating nuclear power plant 88−42950
spent fuel storage at Finnish nuclear power stations, economics, operating experiences 88−75268
squirrel cage vertical-shaft motors for circulating pumps of nuclear power station reactors *(Russian)* 86−39765
St. Lucie NPP, on-line digital feedwater control system for plant trip minimisation 88−62110
St. Lucie unit 2, construction, quality assurance program 85−4827
St. Lucie Unit 2, fuel cycle economics improvements 86−19014
staff training, plant operating experience appl., channelling of data 88−17291
staff training develop. 86−51226
stainless steel piping inner surfaces, mechanical decontamination and descaling techniques, laboratory evaluations 85−4790
stair climbing robot for maintenance tasks 85−44477
standard technical specifications appl. 85−53472
standardised nuclear power plant design, Westinghouse NUPACK system 85−43684
standardized construction, benefits, improvements and adaptation to client requirements 88−10985
standby combustion turbine units, periodically tested, availability model 85−9580
standby diesel generators, surveillance testing failures 86−19018
standby diesel generators for nuclear reactor facilities, long-term reliability anal. 88−62219
standby safety system, rational periodic surveillance testing 86−51310
standby safety systems, reliability-centered maintenance methods 88−30502
STAR concept, systems to assist the operator during abnormal events 85−27227
start up tests for 1300 MWe nuclear plants, objectives and organisation 87−50945
startup data for simulator verification 86−65848
startup test time reduction at various power plateaus for nuclear reactors 86−33008
state-of-the-art computer techniques for a nuclear plant 86−61292
static training simulators, basic design principles *(Russian)* 86−57119

nuclear power stations continued
station blackout events, determ. of frequency/duration relationships 87−30315
statistical cluster analysis and diagnosis of nuclear system level performance 85−48729
stator winding end-turn vibration monitoring using fibre optics 88−11180
steady-state steam generator eqns., semianalytic method for solns. 88−48654
steam and gas turbines, efficiency of Soviet units *(Russian)* 86−33042
steam condensers, circulating-water pipe internal surface cleaning equipment develop. *(Japanese)* 87−35816
steam cycle water chemistry 86−19017
steam gasification of coal using heat from HTGRs 85−38688
steam generating equipment automatic diagnostics 86−51195
steam generator, dynamic model based on multivariable domain theory 88−62095
steam generator, state-of-the-art on-line water chemistry monitoring system 87−71870
steam generator and pressure vessel eddy current testing 86−32989
steam generator blowdown effectiveness improvement 85−48707
steam generator commissioning for French 1300 MWe PWR power plants *(French)* 86−61279
steam generator decontamination at the Loviisa Nuclear Power Plant 85−15756
steam generator diagnostics in nuclear power station, based on computerised vibroacoustic analysis *(Czech)* 87−15429
steam generator dynamics, math. models *(Czech)* 86−65819
steam generator dynamics anal. using Rieman's method *(Czech)* 87−9247
steam generator feeds, automatic regulation, experimental checks *(Russian)* 86−61217
steam generator feedwater control system, safety considerations in control system design 86−6499
steam generator model for plant simulation package 88−75351
steam generator nozzle dam system 86−25798
steam generator removal from nuclear power plants *(French)* 86−19012
steam generator replacement at Point Beach nuclear power station 85−32287
steam generator replacement trends 86−61237
steam generator simulation 88−75317
steam generator submerged perforated screens, hydrodynamics *(Russian)* 87−4503
steam generator transient response test facility, BWR plant design and safety 85−9632
steam generator tube corrosion potential monitoring 86−51390
steam generator tube degradation prevention, measures, Japanese approach 85−38628
steam generator tube denting−criteria for tube plugging 86−51356
steam generator tube inspection, eddy current ultrasonic NDE methods 88−62097
steam generator tubes, eddy current testing signal restoration *(French)* 88−21274
steam generator U tubes, life expectancy 86−51357
steam generator water chemistry monitoring system 87−30302
steam generator with VVER-440 reactor, in-service cleaning experience 85−48703
steam generators, 3-D calcs. of heat transfer 87−78340
steam generators, chemical cleaning process data acquisition-reduction system 85−4787
steam generators, dynamic characts. and water level control *(Russian)* 86−39298
steam generators, immersed perforated plate hydrodynamics 85−59895
steam generators, in-service inspection by eddy currents 85−9710
steam generators, U-tube type for nuclear power plants, model for MMS 85−59914
steam generators at Roven nuclear power station, automatic control system adjustment *(Russian)* 86−32941
steam generators in nuclear and fossil power plants, corrosion phenomena and measures 85−21311
steam generators in nuclear power station blocks with VVER-440 reactors, dynamic characts. *(Russian)* 86−32939
steam generators in PWR power plants, operating experience 86−33107
steam generators in PWRs, conf., Stockholm, Sweden (Oct. 1984) 85−32912
steam generators of Super Phenix power plant, acoustic detection of water leakage *(French)* 86−25690
steam generators with economiser for Grafenrheinfeld nuclear power plant, commissioning measurements *(German)* 85−27185
steam generators with integral preheaters, KWU design concept 85−38629
steam heat supply from nuclear power stations *(Russian)* 87−4497
steam injection loop control, digital control unit for controlling triacs and thyristors *(Czech)* 88−13369
steam line blow out procedure at Southern-Ukraine power station *(Russian)* 86−45057
steam plant cycle performance monitoring and computing 87−9254
steam system macrofouling control, continuous low-level chlorination 86−32900
steam turbine, corrosion prevention advancements 88−62076
steam turbine automated control *(Russian)* 87−22020
steam turbine condensers, He leakage testing 86−25667
steam turbine efficiency rel. to control valve pressure losses and flow characteristics 86−6480
steam turbine plant, multistage counterflow water purification in steam and nuclear power stations *(Russian)* 86−33137
steam turbine plant separator/reheater exit chamber temp. distribution 86−32956
steam turbine sliding pressure operation and overload *(Hungarian)* 86−18930
steam turbines, low-speed, developing and commissioning experience, for VVER-1000 nuclear reactor power stations 85−15743
steam turbines, plant availability improvement and corrosion reduction using water separators *(German)* 88−69116
steam turbines, status and development trends *(German)* 85−27188
steam turbines, thermal load distrib. optimisation in intermediate superheating stages *(French)* 87−57760
steam turbines and heat exchangers, leakage testing *(German)* 85−4741
steam turbines for powerstations, development trends *(German)* 86−39529
steam turbogenerator units, large-scale, recent techniques and improvements 85−43686
steel, austenitic, stainless, neutron irradiated stress corrosion cracking 86−51354

nuclear power stations continued
steel, austenitic stainless, leak-before-break behaviour in nuclear power plant components 86−65861
steel component surface treatment, detonation-deposition method *(Russian)* 87−30306
steel corrosion in steam and water channels *(Russian)* 86−65826
steel gas transmission lines and piping in nuclear power plants, safety assessment 86−6471
steel pins of control rod assemblies in French PWRs, rupture and failure anal. 85−48801
steel pipes, ultrasonic flaw detection and continuity operational control *(Russian)* 86−65824
steel spherical nuclear power plant containments, failure internal pressure 86−32986

structural fragility assessment using nonlinear stochastic dynamics methods 86−32948
structural integrity assessment using acoustic emission 86−19036
structural integrity program for process hazards management 86−51239
structural materials deterioration, integrated assessment for NUPLEX evaluations 88−23677
structural welds, visual weld acceptance criteria and reinspection sampling plan 88−17325
structure and component ageing in nuclear power plants, US NRC research programme 88−48697
submerged circulator motor design for AGR power stations 85−39049
subminiature TV systems for nuclear industry inspection programs 86−32991
subsea nuclear electrical power plant, safety evaluation 86−25769
Super Phenix fast breeder plant, emergency systems training simulators 87−42626
Super Phenix-1, internal structure vibr. phenomena, countermeasures *(Japanese)* 86−39414
super-grid system, short-circuit current loading, circuit breaker manufacture *(Czech)* 88−42732
Super-Phenix 1 power station, development of FBRs *(French)* 86−56570
supercritical generating-unit and single-loop nuclear power station condensate circuit steel surface structure 85−4779
superfine non-precoated filters, operational use in LWR power plants, radwaste disposal 86−12597
superheated steam generators, parallel/mixed flow system feasibility 85−4781
Superphenix, operating experience over first few months *(French)* 87−64314
Superphenix, steam-water circuits and electrical generating system *(French)* 87−64312
SUPERPHENIX breeder power station, operational and technological aspects *(German)* 88−36981
Superphenix internal structure, low freq. vibr., hydraulic testing *(French)* 87−64310
Superphenix LMFBR power plant, design concepts and specifications for NSSS *(German)* 86−18986
Superphenix nuclear power station, organisation and testing *(French)* 87−64309
Superphenix steam generators, commissioning and behaviour *(French)* 87−64261
supervision system and man-machine interface design *(Italian)* 88−30506
supervisory control centre, information retrieval system *(Russian)* 86−32934
SURBOT, mobile surveillance robot for nuclear power plants 86−25729
Surry 1 PWR, life extension study, near-term benefits from better reliability 87−22029
Surry NPP, plant systems response eval. for improved performance, GETARS-1 system 88−42982
Surry NPP steam generator replacement, techniques applicable to decommissioning 88−48724
Surry Plant, loss of AC power accident, MARCH 2 screening sensitivity study 85−43741
Surry Power Plant, source term and consequence anal. 85−65062
Surry steam generator, examination and eval., nondestructive testing 87−30334
Surry steam generator tube denting and deterioration 86−51358
Surry Unit 1, control rod guide tube split pin replacement 85−59957
Surry Unit 1 life extension programme, technical, economic and regulatory aspects 88−42994
Surry Unit 2, feedwater line failure due to erosion, fracture mechanics anal. 88−30504
Surry Unit 2, secondary circuit piping rupture event *(Japanese)* 87−78259
surveillance, audit and inspection function support 87−57794
surveillance and maintenance programmes feasibility considerations 85−53403
surveillance CCTV, high mast lighting for nuclear power plant security 87−22895
surveillance system and anomaly detector, using online noise signal 85−15799
surveillance test intervals methodology 87−64271
surveillance test procedures, advantages of independent technical reviews 85−43706
Surveyor mobile robot, experience in radioactive work environments 87−30319
Surveyor mobile robot experience at Nine Mile Point nuclear plant 88−42998
Susquehanna BWR plant, startup test programme, organisation, test procedures 85−59959
Susquehanna BWRs, recirculation system, transient monitoring using the GETARS system 87−57837
Susquehanna emergency response facility data requirements 88−48749
Susquehanna safety parameter display system, human factors engineering 86−45124
Susquehanna Steam Electric Station, operational testing, impact on plant availability 86−51231
Susquehanna Steam Electric Station, plant evaluation methodology 86−65845
Susquehanna Unit 1, startup testing and cycle 1 operations, engineering anal. activities 85−65092

nuclear power stations continued
Susquehanna Unit 2 BWR, moisture separator drain tank level, transient response by RETRAN 87−42614
Susquehanna Unit 2 BWR, stability eval. for 9×9 fuel core, COTRAN and COTRANS2 tests 88−23700
SWEC hybrid liquid metal reactor as small power plant option 85−53492
Swedish probabilistic safety analyses, efficient fault tree handling, Asea-Atom approach 85−53435
Swiss electricity generation and consumption, 1985 statistics *(French, German)* 86−50807
Swiss electricity statistics on power generation and consumption in 1986 *(French, German)* 87−64036
Swiss electricity supply, develop. prospect *(German)* 87−42380
Swiss light water reactors, operation experience for electricity generation 85−4861
Swiss nuclear generating stations refurbishment, legislation *(German)* 88−75274
Swiss nuclear plants, performance, availability, safety records 85−9659
Swiss nuclear power plants, backfitting and services 88−69110
Swiss power plants, operating experience 86−51237
switchgear assemblies for class 1E appls. in nuclear power generating stations, IEEE standard 87−64286
switchgear seismic qualification, UK AGR program 87−9688
Switzerland, nuclear district heating considerations *(German)* 86−45177
system engineering concept 86−25781
system engineering program, improved performance and reliability 86−25782
system engineering program for plant management and operation 87−57795
system identification; IEEE recommended practices 85−43827
system interaction events and sources, survey and eval. for plant safety 85−43732
system model for failure anal. by 408 computer *(Hungarian)* 88−10968
system reliability and safety calc. *(Hungarian)* 86−39299
systems analysis for nuclear power station parameters selection *(German)* 87−15438
systems interaction, training course 87−57834
systems interaction identification procedures 85−65063
systems interaction study of a Westinghouse PWR 86−51404
Taipower nuclear power plant system, availability improvement factors 86−51233
Taiwan Power, extension to 18 month cycles 88−17267
Taiwan Power Company dynamic operational characts. 85−4748
Taiwanese nuclear power, present standing and future development 85−59875
Tarapur power plant, planned outage management, radiation zone activities 85−27196
TARMS, on on-line boiling water reactor operation management system 85−27229
task anal., method and uses 86−45084
task and job anal., training program design 86−45086
technical and engineering services for nucl. power plant industry 87−64238
technical diagnostics appl. to surveillance of nuclear plant ageing 88−48715
technical personnel, training *(German)* 88−55113
technical specification, changing philosophy 85−53473
technical specification compliance code SPECAPPRAISAL 85−53474
technical specification improvement for power plant licensing 86−25711
technical specification optimisation programme for nuclear plant engineered safety features 87−30318
technology development cooperation, trend in technology transfer 86−39464
technology transfer 86−39434
technology transfer 86−39435
technology transfer, application of codes and standards 86−39338
technology transfer, Brazilian architect/engineer experience 86−39472
technology transfer, bridging the gap 86−39471
technology transfer, Chinese experience 86−39437
technology transfer, engineering capability aspects 86−39360
technology transfer, Finnish experience 86−39442
technology transfer, human aspects 86−39353
technology transfer, human factors 86−39352
technology transfer, Indian experience 86−39436
technology transfer, industrial evaluation basis 86−39347
technology transfer, integrated management by engng. company 86−39354
technology transfer, international cooperation 86−39432
technology transfer, plant size influence 86−39465
technology transfer, Portuguese considerations 86−39447
technology transfer, USA perspective 86−39438
technology transfer architect/engineer capabilities 86−39346
technology transfer by GEC for operating plants 86−39367
technology transfer during the construction of Krsko power plant 86−39342
technology transfer elements for developing countries 86−39451
technology transfer for nuclear power plants 86−39474
technology transfer for Vandellos II Nuclear Project 87−50952
technology transfer in developing countries, R&D role 86−39446
technology transfer in French multipurpose research reactors 86−39364
technology transfer in nucl. power plant equipment manufacture 86−39348
technology transfer in system design at NUCLEN 86−39443
technology transfer in the construction stage of anuclear power plant 86−39470
technology transfer infrastructure 86−39450
technology transfer of management capabilities to engineering and manufacturing 86−39344
technology transfer through teaching and research in Spain 86−39378
technology transfer to an Argentine engineering company 86−39469
technology transfer to an Argentine engineering company 86−39473
technology transfer to China 86−39341
technology transfer to developing nations, management viewpoint, Egypt 85−4773
technology transfer within the KFA/Nuclebras cooperativeprogram: thorium utilization in PWRs 86−39482
Temelin nuclear plant, 3×400 MVA transformer winding circulation losses *(Czech)* 88−17254
temperature measurement problems *(Czech)* 86−65821
Terry turbine equipment and procedure modification for reliability improvements 87−22088
test controls for safe confinement and accident prevention *(French)* 87−78256
testing of nuclear power plant relief valves at EDF *(French)* 85−27181
testing strategies and testing environment for reactor safety system software 87−15495

nuclear power stations continued
thermal, nuclear and hydroelectric alternatives to petroleum in USSR 85−27268
thermal efficiency optimisation during early design stages to cut costs 87−50939
thermal heating from nuclear power plants, worldwide review 85−15721
thermal imaging appl. 87−15457
thermal performance at Palisades plant 87−78373
thermal performance on-line monitoring and anal. system 87−57788
thermal power section, parameter sampling *(Russian)* 87−30341
thermal prime movers and world energy resources (1984) *(Italian)* 86−25910
thermal- and flame-resistant EPDM insulated cables, development and characterisation, for PWR nuclear power plants *(Japanese)* 85−43607
thermionic fuel element endurance enhancement 85−53856
thermionic fuel elements for space nuclear power, technology status 85−53133
thermochemical energy transfer for industrial heat supply 85−59897
thermochemical pipeline system for nuclear heat dist. 85−38687
thermochemical water splitting for H production using reactor heat 85−39388
thermoelastic analysis, SPATE camera for use on nucl. plant components 88−17321
thermoelastic stress analysis, SPATE system operational experience on components 88−17322
thermoelectric convertors, metrological reliability 88−18088
thermographic inspection appl. to predictive maintenance of fossil and nuclear plants 87−15458
thermonuclear power generation, research and develop. *(German)* 88−62026
threaded coupling reliability and lifetime improvement *(Russian)* 88−5431
Three Mile Island instrumentation system forcharacterization of electrical circuits 86−51339
three-dimensional computer-aided design system for plant layout 88−23646
THTR300 nucl. power station with pebble bed high temp. reactor 87−64237
THTR power plant, fuel flow control *(German)* 87−78331
THTR-300, operating experiences *(German)* 87−35760
THTR-300 commissioning, HTGR development work review *(German)* 86−18981
THTR-300 commissioning, results and experience, design verification 86−18975
THTR-300 power operation *(German)* 87−4514
THTR-300 rise to power and operational tests, plant control system optimisation *(German)* 88−17310
Tihange 1 PWR, baffle jetting cure by upflow conversion 88−17318
Tihange nuclear power station personnel dosimetry *(French)* 86−38841
Tihange number 3 unit PWR, starting and operation *(French)* 86−65869
Tihange Unit 1 PWR, upflow conversion of operating plant *(German)* 87−64325
TMI nuclear reactor accident, role of management communication 86−51203
TMI-1 availability management programme, pilot demonstration phase 87−9275
TMI-2, LWR accident source terms, implications in design 88−62113
TMI-2, safety systems and accident consequences *(Croatian)* 88−36984
TMI-2, teleoperators appl. 86−25837
TMI-2 accident, fission product release behaviour anal. 88−75404
TMI-2 accident scenario develop., degraded core config., upper core debris coolability 88−75401
TMI-2 core bore examination results, gamma spectrometry and visual anal. 88−75402
TMI-2 decommissioning, contamination control using supplemental ventilation systems 88−42941
TMI-2 nuclear reactor accident, post-mortem examination, book contrib. 86−39491
TMI-2 reactor core samples, microstructural and microchemical charactn. 88−75403
TMI-2 remote cameras, teleoperators and other appls. 88−42940
TMI-2 technical specifications, uniqueness, pot. appl. to other plants 85−53471
Tokai 2 BWR power plant, fuel handling equipment, operation and maintenance 85−15766
TOKRAC, computer code system for real time PWR accident tracking simulator program 85−32325
TOPFORM nuclear plant modification review, utility design change programme 87−57771
tornado missile hazard to nuclear plants, numerical methods for risk assessment 87−9289
tornado protection by venting 87−57839
Torness AGR, data processing and auto-control software 88−55119
Torness AGR power station, construction progress 86−45061
Torness AGR simulator for commissioning and operator training 87−57749
Toshiba's developments in construction techniques 88−23643
total economical production and employment effects of power plant construction *(German)* 85−65033
total quality control leads to lower quality costs 85−4833
toxic substance control trends for electric utilities 87−63853
tracking prod., quality and licensing 87−71854
training and education of nuclear power plant staff *(German)* 85−48673
training and education of power unit operators *(Russian)* 86−61222
training of operating staff, experience and development 86−70758
training of operators, using Loviisa training simulator 87−15468
training of personnel 86−40422
training of personnel for nuclear power plants 85−59881
training plan for designers 86−39377
training simulation for nuclear power plant personnel, legislation effects in USA 85−54068
training simulator, computer aided, for nuclear power station operators *(Russian)* 86−25693
training simulator data collection and anal. 86−45091
training simulator discrepancies, operational impact eval. using EPRI methodology 88−75300
training simulator fidelity 87−78394
training simulator for Heysham 2 nuclear power station 87−15467
training simulator interface system software 86−61889
training simulator life cycle support 85−54071
training simulator update 88−75329
training simulator validation using engineering computer codes 87−78307
training simulators, module maintenance 88−75303
training simulators of EDF *(French)* 86−18945

nuclear power stations continued
training simulators validation 88−75301
training tool for nuclear plant operators, TOPCAT 88−17292
transfer of Canadian nuclear regulatory technology 86−39484
transient anal. by appl. of transfer fns. *(Croatian)* 88−10964
transient event analysis, multivariate stat. study for failure trend and pattern detection 85−48730
transient simulator qualification plan 88−75326
transients anal. of nuclear, steam and hydroelectric plants *(Rumanian)* 86−56536
transients in real-time simulators 88−75299
transparent model reactor for operator training 87−57750
TRIGA power reactors for district heating 85−43814
Trillo nuclear power station construction, cooperation and technology transfer 86−39357
trip circuit breakers for nuclear reactors, development and performance improvement 86−65833
tritiated waste, conditioning and handling at Canadian nuclear power facilities 88−36932
Tsuruga No.2 PWR power plant, construction schedule reduction 88−23638
Tsuruga-2 PWR, start of commercial operation, commissioning programme review 87−78268
tube inspection using pattern recognition expert system, nuclear steam generators 86−12638
tube to tubesheet joint interfacing pressure, anal. and expts. 87−78383
Tullnerfeld nuclear power station, status report 1984 *(German)* 85−21304
turbine, K-500-60/1500 type, for nuclear power stations, testing *(Russian)* 86−39292
turbine blade NDT by PHOCUS boresonic system 86−6545
turbine construction, develop. by Turboatom 88−42943
turbine cooling and restarting processes 87−9261
turbine design with increased exhaust loading 85−38655
turbine electrohydraulic control system, reliability assessment 87−71834
turbine exhaust characteristics under changing meteorological conditions *(Russian)* 85−15783
turbine feed-water regulator modification results *(Russian)* 86−61218
turbine generator fire protection by sprinkler system 86−6494
turbine generators, static stability, experimental study 85−15736
turbine missile risks, probabilistic anal., TURMIS code 86−32959
turbine plant tests, separator-reheater temp. characterisation 85−48706
turbine protection systems, improved plant availability from false-alarm shutdown reduction 88−17329
turbine rotor steel, 1 CrMoV, mech. props., service exposure effects 86−51395
turbine rotors, fracture toughness study 88−75276
turbine steam superheating, advisability and efficiency 87−9262
turbine system, model reduction technique appl. 88−5433
turbine turn controller adjustment results for Kursk atomic power station *(Russian)* 87−71793
turbines life extension by implementation of coal fired steam generators 87−50947
turbines life extension by implementation of steam generators 87−50922
turbogenerator, 1000 MW, 3000 RPM, for nuclear power station *(Russian)* 87−9463
turbogenerator, TVV-1000-4, at South Ukrainian nuclear power plant, testing *(Russian)* 87−4664
turbogenerator rapid testing control using computer and data-processing system, Armyansk nuclear power stations *(Russian)* 86−33258
turbogenerator set, K500 65/3000, of Leningrad nuclear power station, deformation study *(Russian)* 86−33265
turbogenerator vibratory surveillance for safety enhancement 85−9604
turbogenerators for power generation 88−30647
turbogroup shafts in nuclear appls., computer aided torsional fatigue anal. 86−70881
turbomachines, fault identification by spectral anal. of pressure signals *(German)* 86−51591
Turkey Point, component cooling water system, reliability centred maintenance 86−25828
Turkey Point Units 3 and 4, pressurised thermal shock anal. with RETRAN 85−65091
turnkey power plants, FRG technology transfer experience 86−39433
TVO nuclear power plant, fuel performance experience 86−18959
TVO nuclear power plant, preventive maintenance of safety systems during operation 86−19037
two-loop, condensate polishing 85−15742
two-stage coolant system, hydraulic and mechanical transients *(Russian)* 87−4502
two-unit nuclear power plants, control of configuration maintenance and modifications 88−62067
U-tube steam generator anal. in PWR power stations *(Italian)* 87−9351
U-tube steam generator modelling for nuclear power plant transients 88−75306
U-tube steam generators in Kori-1 PWR, stability anal., SASG model 86−45104
UCELENA 2 computer program set for power plant piping strength checks *(Czech)* 86−61226
UHT gas turbines for nuclear power plants *(German)* 86−12569
UK future electricity demand, need for new power plants 88−10719
UK nuclear power station control room design 85−27225
UK standard PWR design, construction and design planning 88−23640
ultrasonic and eddy current materials testing *(French)* 86−25689
ultrasonic inspection of gas-cooled reactor standpipes 86−61276
ultrasonic pipe testing using trackless scanner, nuclear power plant inspection 86−25458
ultrasonic waveguide sensor for acoustic emission monitoring of nucl. power plants 88−54788
ultrasound and tube integrity of steam generators 86−61275
underground energy storage in the CSSR *(Czech)* 88−31056
underground safety related tunnels, dynamic behaviour under aircraft impact loads 85−38642
undervoltage trip switchgear failures, NRC experience 86−65834
unfinished US nuclear power plants, costs of completion 88−62029
unfueled nuclear generating stations, economical conversion, function comments 88−23614
uninterruptible power system as safety related isolation device 88−30444
Union Electric technical specification improvement program 87−78293
UNIRAM modeling of nuclear power plants 86−51343
UNIRAM modelling for availability improvement 87−9268
unit pickup for thermal, atomic and hydroelectric power plants 87−72034
United States licensing procedure standardization 86−65853

nuclear power stations continued
Unterweser nuclear power plant, performance under grid control *(German)* 87−4512
unusual radwaste forms from Fort St. Vrain HTGR 88−42999
uprating, ways of increasing flexibility of generating plant *(Russian)* 88−30448
uprating for output capacity augmentation 86−45066
Uralelektrotyazhmash production combine's role in electrification of Soviet Union *(Russian)* 86−39088
US DOE nuclear plant life extension program 88−42990

Wolf Creek quality trend analysis program 88−23649
Wolf Greek PWR, RETRAN system anal. by Kansas Gas and Electric Co. 87−42613
Wolsung CANDU, D_2O spill incident of Nov. 1984, CATHENA simulation 87−50971
Wolsung Nuclear Generating Station, heat transport pump bearing journal replacement 88−75370
Wolsung Nuclear Plant, Korea's operating experience 88−30468
word processing system on single integrated network 88−35068
work structure and plant personnel 86−45085
world fuel cycle markets and Cogema of France 85−4750
world survey of nuclear power plants in 1984 *(German)* 85−38610
worldwide status of nuclear power, develop, trends, plant perform. 88−5432
Wurgassen BWR, emergency cooling calcs. using SAFER code *(German)* 87−64330
WWER, neutron noise diagnostics, core barrel motion monitoring, Paks appl. *(Hungarian)* 86−12626
WWER, nonstationary processes in power plants, reactor safety and accident phenomena *(German)* 88−36987
WWER 440 nuclear power stations for district heating in DDR, safety *(Polish)* 88−5513
WWER power plants, ensuring operational safety *(Russian)* 85−21316
WWER power plants, reliability improvement using Reliability Information System 86−18963
WWER pressure vessel safety analyses by SKODA Plzen *(Czech)* 87−35749
WWER primary circuit maintenance *(Slovak)* 88−17306
WWER reactor, TEPI code for technical-economic performance data evaluation *(Czech)* 87−64256
WWER-1000 power plants, IAEA safeguards procedures, technical recommendations 88−62033
WWER-440 basic principle simulator, data presentation 87−15464
WWER-440 nuclear power plant, secondary circuit, dynamic simulation models 88−69124
WWER-440 nuclear power plants, personnel collective dose equivalent comparison *(Czech)* 87−71807
WWER-440 nuclear power plants, reliability and safety *(Slovak)* 88−17303
WWER-440 nuclear power station, model of secondary circuit, computer program *(German)* 87−15473
WWER-440 power plant, dynamic behaviour of secondary circuit, simulation model 88−17287
WWER-440 power plant, primary circuit dynamic behaviour simulation 85−53508
WWER-440 power plants, load factor analysis and planning *(German)* 87−15451
WWER-440 power plants, operational improvements using computer codes *(Russian)* 86−19046
WWER-440 reactor at Greifswald power plant, noise diagnostics applications *(German)* 88−75362
WWER-440 V-213 reactor, in-core control system meas. and performance *(Czech)* 88−30514
WWER-type nuclear power stations, pressurizer dynamics, theoretical and expt. study *(German)* 88−75365
Wylfa Power Station, reactor pressure vessel cooling, operational and maintenance aspects 86−33006
Xerox Ethernet LAN appl. by the South Carolina Electricity & Gas Co. 88−15090
Yankee Nuclear Power Station, 25 years of operating experience 86−51238
Yugoslav nuclear power programme, construction, safety, MOX fuel prod. *(Croatian)* 86−6473
Zarnowiec nuclear power plant, quality assurance system *(Polish)* 85−21298
Zion Probabilistic Safety Study, methodology for PRA reviews 87−9290
Zion PWR, online steam generator leak monitors using ^{16}N activity 88−23696
Zion Unit 2 PWR, cycle 1 analysis, QUANDRY, PDQ and ARROTTA comparison 87−42617
Zwentendorf nuclear power station, mothballing experience *(German)* 86−32927
^{131}I, on-line monitor for nuclear power stations 86−32979
Al smelter at Holyhead, nuclear power station for electricity supply 87−79237
C filters, protection guidelines from Diablo Canyon 88−48718
^{14}C discharge at LWRs, NE USA, vent gas comp. 85−65039
^{14}C, particulate contamination at Pickering generating station, origin and control 88−75296
^{14}C, particulate contamination control at Pickering generating station 88−75297
$FeCr_2O_4$ film contamination of PWR steam generator heating tubes, expt. anal. *(German)* 88−55137
Gd_2O_3 bearing fuel, LWR burnable absorbers, H.B. Robinson 2 fuel cycle optimisation 85−15776
H water chemistry, IGSCC remedy for BWRs 86−32988
He cleaning, gas-cooled reactor plants, cyclone model for removing graphite dust 85−4841
^{131}I spiking in LWR coolants after transients 86−65889
Na fires in fast reactors, power station safety charact., design basis accident 88−36952

nuclear power stations continued
Pb storage batteries, Class 1E for nuclear IEEE standard power generating stations, qualification 87−22718
Pu and U recycling in LWRs from power plant operators point of view 85−38799
Th high temp. reactor, structural engng. charact., construction and safety *(German)* 88−17285
U market future and interrelation with fuel cycle industry 85−38663
U nuclear fuel supplies, effects on nuclear energy policies 85−9650
UO_2-PuO_2 mixed oxide fuel for LMFBR 86−33007
Xe oscillations in load follow of large reactor, optimal control 87−22093

nuclear pumped lasers
aerosol cone fission reactor/laser, direct energy conversion techniques 85−18879
C, atomic lasers in elec. discharge, energy storage 85−41320
calibration of power deposition, using ozone dosimetry 85−2379
electron beam pumped laser operation, numerical simulation 88−40154
excimer laser with ionisation by radiation from nuclear reactor 86−58887
gamma ray lasing from atomic excitations 88−58462
gamma-ray laser excitation, using electron motion 88−58461
gamma-ray lasers, pumping at laboratory scale, recent progress, review 88−58404
high energy/power laser systems 88−33917
interfaces with nuclear fuel energy sources 87−7235
research status 85−18878
ruby solid-state NMR laser with injected signals, instabilities and chaos 87−46826
short and ultrashort wavelength lasers, conf., Los Angeles, USA (Jan. 1988) 88−55793
X-ray laser, nuclear pumped, as part of layered ballistic missile defensive system 85−29961
X-ray laser mechanisms *(Chinese)* 85−2187
X-ray lasers, heuristic remarks 85−12757
He, purification by forced circulation through cooled sorbers 87−68566
^3He-Cd laser with nuclear pumping, kinetic model 88−65597
^3He-Ne gas laser, neutron pumping from tokamaks 87−33087
Xe gas laser, neutron pumping from tokamaks 87−33087
XeF laser, gain of $^3He/Xe/NF_3$ mixtures pumped by $^3He(n,p)^3H$ reaction 87−2061
XrF nuclear pumped lasers 87−18876

nuclear quadrupole resonance
DC SQUID for 30 MHz detection 85−62242
industrial NQR and fibre optic temp. sensors 88−22621
microcomputer-controlled two-pulse generator, for use in NQR spectroscopy 87−8640
temperature transducer, automatic control 86−17951
thermometers, freq.-temp. conversion *(Russian)* 87−29078

nuclear reactor fuel *see fission reactor fuel; fusion reactor fuel*

nuclear reactor instrumentation

CANDU plants, on-line tritium-in-air monitor 86−50360
CANDU press., tubes, eddy current inspection 85−39837
CFT displays of plant operation 87−30332
computer based information system installation in operating nuclear plant, experience 85−43701
computer-aided nuclear plant equipment diagnosis with knowledge engineering technology 85−21379
conference, nuclear science, San Francisco, CA, USA (Oct. 1987) 88−55775
conference, nuclear science and power systems, San Francisco, CA, USA (Oct. 1985) 86−45897
contactless transmission equipment for high temp. power reactor appl. *(Czech)* 86−55617
containment vessel optical-fibre penetration devices 85−53454
control rod assembly examination program 86−61303
coolant temperature meas. in nuclear reactor, using computer controlled combined sensor *(Slovak)* 85−20577
Czechoslovak nuclear power station commissioning tests 86−32953
D-T fusion reactions diagnostics, using Cherenkov detector and Compton-recoil spectrometer 85−59201
data acquisition system for TFTR 85−8750
developing countries, plant control and instrumentation, support needs 86−39428
diagnostic vacuum controller, hardware design 85−6644
Doppler sodar wind meas. unit, long-term testing *(German)* 86−32958
Doublet III fusion expt., programmable controller for neutral beam control 85−4233
dynamic materials testing using fibre optic sensors 87−23793
dynamic meas. in nuclear reactor models 85−48816
eddy current testing, cracks propag. evaluation in austenitic steel cladding 85−39838
electromagnetic compatibility in nuclear power plants 86−51213
Emeraude, test equipment for steam generator of Superphenix plant *(French)* 86−25750
engineering science appl. of meas., conf., London, England (March 1985) 85−44451
environmental monitoring (book) 85−22150
EPRI nondestructive evaluation center 86−61307
equipment in nucl. service, internal bore welding and repair techniques 86−61306
expert systems for PWR diagnostics 87−35765
external to reactor detector systems for power and energy distrib. meas. 85−43708
failed fuel rod detection system and computerised manipulator for use during outages 85−27211
fault detection procedure for faulty sensors, implementation 87−3606
fault detection system, microcomputer-based, implementation 86−55541

nuclear reactor instrumentation continued
FBR pressure vessels, MIR system for visual and ultrasonic inspection during operation *(French)* 85−21358
fibre optic sensors appls. 85−27231
field hardened instruments and electrical components for increased plant availability 85−15786
freely-moving ultrasonic inspection device for reactor pressure vessels *(Japanese)* 86−6181
fuel motion, cineradiography appl. to nuclear reactor safety studies 85−4818
gamma thermometers, dynamic response correction using digital filters *(French)* 86−25742
gamma thermometers for reactor in-core power measurements 86−39457
Hartlepool AGR, external vibr. monitoring of reactor and gas circuit components 85−48786
heat exchangers tube bundles, pre-service and in-service US inspection 85−43503
heat release meas., monotone-wall heat flow calorimeter design 86−24811
high-pressure ^{3}He gas scintillation neutronspectrometer 86−50439
holography appl. to nuclear reactor core inspection 86−3347
Hungarian Unit III and IV, transmitter appls. *(Hungarian)* 85−32313
IEEE standard for nuclear power station control boards 86−51229
in-reactor testing of ionic thermometers 86−25767
in-service inspection of electricity-generating nuclear reactors *(French)* 85−48795
instrumented fuel cassette development for internal diagnostics 86−51289
ionic thermometers use at nuclear power stations, for thermometers calibration *(Czech)* 86−24483
ionisation chamber for gamma exposure rates meas. in mixed radiation field 85−26695
JET Neutral Injection Test Bed, US flow metering 86−44471
large scale LMFBRs, advanced monitoring and control system 86−65894
liquid scintillators characts. for antineutrinos recording 85−20824
LMFBR, US viewing appl. potential 85−48782
LMFBR safety studies, US thermometry for reactor profiling 86−6186
LOFT pressurizer, on-line instrument failure detection, Kalman gain approach 87−4516
Loviisa I PWR control room critical function monitoring system simulation 85−4811
LWR, US fuel rod leak detection 86−61308
LWR in-pile collimator and shutter for neutron beam research 85−59948
LWR power monitoring, advanced hardware and software systems 85−21335
LWR power plant control room development 86−65847
magnetic fusion expts., current sensing by Faraday rot. in single mode optical fibres 85−4065
maintenance robot for steam generator tubing inspection and repair 86−25810
measurement system used in nondestructive testing, characterisation 85−43833
microcomputer based fuel element positioner 86−12637
MINAC, portable high energy radiographic inspection system for nucl. power plants 85−43727
Missouri Research Reactor Facility, position sensitive detectors, data collected system 85−15202
mobile inspection robot for nuclear reactor containment vessel inspection 86−25809
monitoring system for nuclear reactors, reliability improvements *(Russian)* 87−15472
NDT developments applied in industry 85−17044
neutron detector for reactor nucleus instrumentation *(Japanese)* 86−39413
neutron fluence rate around reactor, SSNTD meas. *(Chinese)* 86−11888
neutron fluence rate meas. by SSNTD in reactor control rod *(Chinese)* 86−11887
neutron fluxmeter for pulsed thermonuclear reactors 85−9077
noise anal. technique for nuclear reactor surveillance *(French)* 86−25743
nuclear power plants, gamma rays detection and measurement using CdTe detectors 85−4853
nuclear power station computerised monitoring and control 86−18937
online surveillance techniques for power reactor instrumentation, neutron sensors 86−51271
optical fibre penetration development 85−35413
out-of-core gaseous Cerenkov detector for reactor noise analysis 85−20832
Paks power plant, unit performance controller ARM 5Sz *(Hungarian)* 85−32311
PAKS power plant, VERONA core monitoring system, SPND detectors 86−33005
Paks PWR power plant, boiling noise detection, neutron noise meas. *(Hungarian)* 86−12629
photogrammetry appl. to inspection 85−48817
polarised neutron spectrometer, automatic control in radiation areas *(German)* 85−4242
portable multichannel analyser appl. in nucl. safeguards 86−50429
power plant, computer based surveillance and anomaly detection system, models, algorithms and graphics 85−59951
power plant instrumentation and control, IAEA guidebook 85−38745
power plants, advanced instrumentation and control technology appl., NRC research, LOCA instruments 85−21346
power plants, analogue instrument and control systems, improved reliability 86−56550
power plants, smart instrumentation 86−61305
power plants, temp. meas., some problems *(Czech)* 86−65821
power systems and nucl. science symp., Orlando, FL, USA (Nov. 1984) 85−39411
pressure vessels, in-service inspection, phased arrays appl. 85−43504
programmable logic controllers in Large Coil Task Facility 85−4234
protection system instrumentation channels, performance verification using detection noise 85−59952
proton-recoil proportional-counter array for neutron-image construction, reactor fuel motion meas. 85−43203
PWR, improved coolant chemistry techniques for corrosion control, monitoring 85−21382
PWR, measurement techniques on high temperature pressure water rigs 85−48813
PWR, sensor for water inventory supervision *(German)* 86−51417
PWR containment, neutron dosimetry system 86−60844
PWR core temperature monitoring using thermocouples 85−58700
PWR power plants, noise diagnostics, effects on safety and availability 85−59953
nuclear reactor instrumentation continued
PWR safety assessment, two-phase flow meas. using turbine/gamma densitometer 85−48814
PWR steam generators, eddy current inspection system 85−38760
PWRs neutron meas. instrumentation, French products *(French)* 85−9034
radiation-hardened microelectronics for nuclear power systems 87−53636
remotely operated examination, maintenance equip. 86−25813
robotic staff, EPRI perspective 85−53475
robotics and automation 85−53476
rod worth minimiser, NUMAC instrumentation, operating plant appl. 86−51212
scalar neutron spectrum meas. in assembly using simple facility 85−37909
self powered Rh detectors, depletion laws for reactor use 85−4227
sensor failures diagnostics in nuclear plants, using parity space methodology 85−37613
sensors for hostile environments, book contrib. 86−5255
Sequoyah-1 power plant, long-term automated surveillance system 85−59949
Spar 2500 remote manipulator system for nuclear heavy industrial uses, design features 86−25811
SSNTD readout, image anal. system, dosimetry and fusion diagnostics appl. 85−20850
subminiature TV systems for nuclear industry inspection programs 86−32991
telemetric fibre-optic link, for TFTR tokamak 85−8444
TFTR, EMI free fibre optic strain sensor system 85−4122
TFTR, X-ray crystal spectrometer, mech. design 85−4251
TFTR prototype X-ray pulse-height analyser diagnostic 85−52983
thermal performance analysis, coolant flow tracing by conductivity meas. and electrolyte injection 85−48815
thermocouple drift due to ordering, effect on nuclear plant economics 86−5259
thermocouple performance during in-core, high-temp. expts. 86−61252
thermonuclear fusion product diagnostics by nuclear track detectors 85−20838
Three Mile Island instrumentation system forcharacterization of electrical circuits 86−51339
TREAT upgrade manual reactor control system 86−51268
ultrahigh-sensitivity threshold neutron detector for plasma diagnostics using fission counter 85−43204
US pulse-echo data acquisition and processing, for fast reactors under sodium viewing 86−60188
VERONA, core monitoring system for Paks nuclear power plant *(Hungarian)* 85−32312
VHTR monitoring system for gaseous fission products in primary coolant 86−51265
vibration test facility (SAMSON) for multi-axis dynamic motion simulation 85−43807
vortex shedding flowmeter, for He flow meas. in GCFR test loop 85−3980
VVER, CSSR, in-service inspection mechanization *(Czech)* 86−61256
water-level measuring system for drum separators in nuclear power-plant with RBMK-1000 reactor *(Russian)* 87−3798
Westinghouse nuclear automation 85−53479
Westinghouse setpoint methodology for control andprotection systems 86−51266
Westinghouse Technical Specification Optimization Program 85−43755
wide range neutron monitor for BWR post-accident power meas. 85−4225
WWER reactors, general characts., fuel vibr., control, safety, flux and temp. meas. *(Polish)* 86−39429
X-ray diagnostic instruments for TFTR fusion reactor 85−4250
zero power reactor, $\delta^{25,28}$ meas. by SSNTD *(Chinese)* 86−11889
^{131}, on-line monitor for nuclear power stations 86−32979
BF_3 long life counter development for nuclear reactors 85−4226
BF_3 long-life counters, development, use of activated charcoal layer 85−48173
Si diode detectors, radiation damage by 14 MeV neutrons 85−43264
U-Al fuel tubes, U density and enrichment meas. from ^{232}U and ^{235}U γ-activities 85−52991
V self powered neutron detector, thermal neutron flux density meas. 86−32155
W-Re alloy thermocouple for VHTR in-core gas temp. meas. 86−51267

large values of character sums 88−70227
Leopoldt conjecture on p-adic regulators 87−51973
limit periodic continued fractions, even and odd parts 86−57375
linear eqn. system in positive integers, partial soln. 88−43831
linear numeration systems of order two 88−49664
linear recurrences, polynomial values 86−66711
linear sieve, A-dependence with appl. to polynomial sequences 87−16493
local differents of algebraic and finite extensions of values fields 88−38075
local Langlands conjecture for GL(p) *(French)* 85−245
locally repeated values of certain arithmetic functions 86−19929
long convolutions improvement using generalised number theoretic and polynomial transforms 86−26696
maximal modulus of an algebraic integer 86−7630
maximal parabolic terms in Selberg trace formula 88−56144
metric diophantine approximation 88−70233
minimal diameters of algebraic integers inJ-fields 86−19928
Minkowski's theorem, modification 88−49691
missing trace values for the eta multipliers 87−36596
mod p^2 determination of $(_{(p-1)/4}{}^{(p-1)/2})$ 87−16497
modular equations for Hilbert modular equations for $Q(\sqrt{3})$ 88−49700
natural nos., representation by triangular nos. 86−57329
natural numbers, densities and gaps 87−51974
nearest continued fractions with stochasticallyindependent and identically distributed digits 86−66718
nearest integer continued fraction, asymptotic results on digits 86−34158
norm-Euclidean number fields 86−34164
numerical computation, state-of-the-art *(Japanese)* 86−34107
odd amicable numbers not divisible by three 88−49705
odd integers, representation as sums of primes and powers of two 85−10592
odd triperfect numbers are divisible by eleven distinct prime factors 85−39637
optical computing, medium accuracy, highly redundant number representation 87−7804
optimal GFSR pseudorandom number generators 88−49697
P-adic continued fraction expansions, periodicity 86−57336
p-adic numbers, approx. lattices 86−66714
P-adic numbers and polynomial transformations, fast digital convolution 86−13608
parallel VLSI architecture for a digital filter using a number-theoretic transform, book contrib. 85−45185
parenthesis systems and Baxter permutations, shuffle 87−10252
partitions of bases into disjoint unions of bases 88−49689
perfect multiple error-correcting arithmetic codes 88−14589
perfect one factorisations of K_{2n} and symmetry groups 86−46186
perfect zero-knowledge interactive protocol for SAT and beyond 87−33645
periodicities of partition functions and Stirling numbers modulo p 87−36595
polynomial factorization and nonrandomness of bits of algebraic and some transcendental numbers 88−38081
polynomial factorization over Z[X] 87−65287
polynomials with small value set over finite fields 88−31641
positive integers $\leqslant x$ and free of prime factors $>y$ 86−34160
positive integers numbers, free of prime factors 86−19927
positive values of inhomogeneous quadratic forms of signature −2 88−56146
power sums of digital sums 86−34183
powerful numbers, computational results 88−49704
precise deconvolution using the Fermat numbertransform 86−43211
primality testing, number of false witnesses for composite number 86−34162
primality testing, review 87−5340
prime no. counting function, Meissel-Lehmer method of evaluation 85−49451
prime number Hartley transform implementation using transversal filter type structures 88−63143
primitive α-abundant numbers 85−5915
privacy-protecting protocol, secure, for personal information transmission between organisations 88−40823
probabilistic factorization algorithm with quadratic forms of negative discriminant 87−51979
pseudoprime numbers, composite integers 87−51978
Q-admissible groups 87−51977
quadratic sieve factoring algorithm *(Dutch)* 87−65367
quasi-Monte Carlo, low discrepancy sequences, andergodic transformations 85−54376
quintic polynomials and real cyclotomic fields with large class numbers 88−49699
radar signal processing, matched filter synthesis, appl. of number theory 85−52409
Ramanujan theorems generalisation 88−56145
ramification groups and nos. of algebraic finite extensions of valued fields 88−38074
Ramsey nos. and association schemes, lower bounds 87−23494

EM fields, cubical block model of man in specific absorption rate distrib. calc., limitations 85−4370
EM fields, effect of a conducting screen placed on an infiniteconducting plane 85−57069
EM inverse theories, math. methods, space of parameters 85−51408
EM plane wave scatt. by infinite plane grating, numerical anal. using weighted Fourier series 86−42819
EM scattering by underground inhomogeneities, numerical modelling of 2D time-domain scatt. 87−57344

numerical analysis continued
EM scattering of conducting cylinders, discrete singularity method, optimisation process, numerical anal. 85−41578
EM scattering of cylindrical wave by four conducting rectangular cylinders 87−61372
EM wave anal., symmetrical condensed mode for transmission line modelling, numerical results 87−47144
EM wave anal. using transmission-line modelling symmetrical condensed mode 87−47143
emitter-base junction sidewall space-charge layer, bulk and surface recomb. modelling 86−2096
epoxy resin spacer, DC voltage stressed, accumulated surface charge, numerical anal. 87−67647
external nonlinear focusing, appls. to ultrafast optical power limiting 87−26541
factoring using a fast elliptic curve method *(Japanese)* 88−31703
ferromagnetic channel, nonlinear, magnetic field numerical anal. using Crank-Nicholson scheme 85−7578
finite periodic notches in ground plane, numerical anal. of surface-wave scattering 87−47145
flaw detection, EM, permeability and cond. rel. to depth in monitored layer of ferromag. cylinder 87−73170
flaw detection, probabilistic inverse problems, conjugate vector method 85−10896
flaw reconstruction, inverse problems, algorithm implementation techniques 85−10898
flaw reconstruction, max. entropy reconstruction of vol. anomaly from pulse scatter data 85−10897
flicker noise models, minimum number of Lorentzian spectra sufficient to yield $1/f^{\gamma}$ spectrum 87−23450
free electron lasers, resonance between betatron and synchrotron oscillations 85−56683
fuzzy variable single-value simulation 88−18576
Gaussian beam wave scatt. from cond. strips placed on ground plate *(Japanese)* 87−68763
graphite elec. brushes, transient nonlinear thermal runaway effects 88−38807
graphite electrical brushes, transient nonlinear thermal runaway of cooled stationary contact, numerical anal. 88−7106
gratings with profiles represented by superposition of sinusoidal waves, EM wave diffraction 86−63960
gyrotrons, multimodal transient anal. 88−50595
H-plane 2D horn antenna, receiving characts., numerical anal. 86−68907
heat flux probe characts. analysis 88−35936
helical antenna with finite ground plane 87−27018
helix TWT, numerical anal. and design 86−8695
helix TWTs, numerical anal. and design 87−24713
HF planar IC geometries 88−9376
high-power short MM-wave generation by refl. at front of relativistic electron beam, anal. *(Japanese)* 88−38706
human exposure, energy deposition and thermal response models 85−4369
HV semicond. devices, elec. field profile, 2D numerical anal. *(Chinese)* 88−57590
HV thyristor switches, series connected, effects on resistance of du/dt effect *(Russian)* 85−10062
hypergeometric functions of unit argument, recurrence relations 86−26749
ICs, resistance calc., numerical method based on Schwarz-Christoffel conformal transform. 86−46464
IGFET, substrate current model, numerical verification 87−53551
